PREFACE

This publication represents the third revision of the *National Occupational Classification* (NOC) system and the National Occupational Classification for Statistics (NOC-S). The NOC was jointly developed by Human Resources and Skills Development Canada and Statistics Canada and has been maintained in partnership since the first edition published in 1991/92. However, until this revision, NOC and NOC-S differed in their major group structures and, consequently, in their coding systems. The publication of NOC 2011 on this twentieth anniversary of the classification system reflects the unification of the two versions. With the adoption of NOC 2011 all differences between the classifications used by Human Resources and Skills Development Canada and by Statistics Canada have been eliminated. Furthermore, this has been accomplished while maintaining the advantages of both former classification versions.

NOC 2011 would not have been possible without the significant contribution of a number of individuals and groups. Their commitment to excellence is evident in this revised edition of the foundational system used for describing occupations in the Canadian labour market and for managing the collection and reporting of occupational statistics. The collaborative partnership between the two departments has ensured that the quantitative and qualitative information on occupations is reliable, timely and relevant for a wide range of audiences.

ACKNOWLEDGEMENTS

This major, structural revision of the NOC was accomplished under the guidance of Alice Born, Director of Standards Division, Statistics Canada and Christian Boucher, Director, Labour Market Information (LMI) Division of the Temporary Foreign Worker and Labour Market Information Directorate, Human Resources and Skills Development Canada. Subject matter expertise was provided from Statistics Canada by Debra Mair of Standards Division and Sandra Swain of Labour Statistics Division. From Human Resources and Skills Development Canada, subject matter expertise was provided by Clara Hamory and Ian McRae of LMI Division. Service Canada's Regional Labour Market Information Directors, their staff and provincial colleagues, as well as Statistics Canada's Methods and Standards Committee and its Advisory Committee on Labour and Income Statistics, provided important input to the development of NOC 2011. The many stakeholders who responded to the public online consultation for the 2011 Revision of the NOC, hosted by both departments, provided valuable input which is much appreciated.

The realization of NOC 2011 was dependent on the direct involvement and hard work of a team of occupational research analysts and assistants from both Human Resources and Skills Development Canada and Statistics Canada. The overall process also included consultations with an Interdepartmental Committee of representatives from several

government departments that are key users of the NOC. The professionalism and dedication of all those involved in the revision process is reflected in the results of this project which has unified the two variants of the classification while maintaining the advantages of both systems. This success is attributable to the co-operation between these stakeholders and to the partnership between Human Resources and Skills Development Canada and Statistics Canada.

Statistics Canada's Internet version of this publication was created jointly by Sylvain Boucher and Niloufar Zanganeh. Their Systems Engineering Division and Administrative and Dissemination Systems Division were responsible for their systems development of the PDF and HTML versions. Human Resources and Skills Development Canada's NOC content development was undertaken by the analysts of LMI Division's Occupational Research unit and Web development by Lyne Phillion, Linda Trudel and Jules-André Léger with the help of the Skills and Labour Market Information team of Innovation, Information and Technology Branch.

Both Statistics Canada and Human Resources and Skills Development Canada wish to acknowledge the valuable input of other individuals and groups too numerous to name. Research consultants, academics, professional associations, sector organizations, educators as well as employers and workers throughout the Canadian labour market provided occupational information and advice that informed this revision process. Their contribution has ensured that the quality and integrity of NOC 2011 has been maintained and it will continue to be the authoritative foundational reference and framework for occupational data and descriptive information.

Introduction to the National Occupational Classification (NOC) 2011

Background

The National Occupational Classification (NOC) 2011 updates both the National Occupational Classification of Human Resources and Skills Development Canada and Statistics Canada's National Occupational Classification for Statistics (NOC-S) which was based on it. It is the nationally accepted taxonomy and organizational framework of occupations in the Canadian labour market. This revision represents the 20th anniversary of the classification and reflects the unification of Human Resources and Skills Development Canada's NOC and Statistics Canada's NOC-S. This revised edition eliminates the differences between the two former systems and incorporates the advantages of both. Through the collaborative partnership between Human Resources and Skills Development Canada and Statistics Canada the department and the statistical agency introduce the revised and unified National Occupational Classification – NOC 2011.

As in the past, this revision is based on extensive occupational research, analysis and consultation conducted across the country. In the decade since its first structural revision in 2001, the labour market has evolved significantly. Technological innovation, further globalization of the economy and restructuring of the workplace have impacted many occupations. In addition to content changes, the harmonization of the NOC and the NOC-S has resulted in a new classification structure.

The NOC is designed to classify occupational information from statistical surveys. It is also used in a range of contexts to compile, analyze and communicate information about occupations. Occupational information is of critical importance for the provision of labour market and career intelligence, skills development, occupational forecasting, labour supply and demand analysis, employment equity and numerous other programs and services. It provides a standardized framework for organizing the world of work in a manageable, understandable and coherent system.

The basic principle of classification of the NOC is that of kind of work performed. Occupations are identified and grouped primarily in terms of the work usually performed, this being determined by the tasks, duties, and responsibilities of the occupation. Factors such as the materials processed or used, the industrial processes and the equipment used, the degree of responsibility and complexity of work, as well as the products made and services provided, have been taken as indicators of the work performed when combining jobs into occupations and occupations into groups.

An occupation is defined as a collection of jobs, sufficiently similar in work performed to be grouped under a common label for classification purposes. A job, in turn, encompasses all the tasks carried out by a particular worker to complete their duties.

Structure of NOC 2011

The National Occupational Classification 2011 is a four-tiered hierarchical arrangement of occupational groups with successive levels of disaggregation. It contains broad occupational categories, major, minor and unit groups.

10 broad occupational categories

- Each broad occupational category has a unique one digit code number and is composed of one or more major groups.

40 major groups

- Each major group has a unique two-digit code number and is composed of one or more minor groups. The first digit of this code indicates the broad occupational category to which the major group belongs.

140 minor groups

- Each minor group has a unique three-digit code number and is composed of one or more unit groups. The first two digits of this code indicate the major group to which the minor groups belong.

500 unit groups

- Each unit group has a unique four-digit code. The first three digits of this code indicate the major and minor groups to which the unit group belongs.

For example:

0	Management occupations
00	Senior management occupations
001	Legislators and senior management
0011	Legislators
0012	Senior government managers and officials
0013	Senior managers - financial, communications and other business services
0014	Senior managers - health, education, social and community services and membership organizations
0015	Senior managers - trade, broadcasting and other services, n.e.c.
0016	Senior managers - construction, transportation, production and utilities

The broad occupational category code, designated by a single digit, is repeated at all levels. Major group codes are created by adding a second digit. This digit appears in the second position at all lower levels in the structure. Minor group codes add a third digit. Finally, the 4-digit unit group codes contain the digit identifying the broad occupational category, followed by the digit identifying the major group and the digit identifying the minor group and a last digit identifying the unit group.

There are approximately 40,000 occupational titles classified in the 500 unit groups of the NOC 2011. Some of these titles are clearly occupations, such as librarian and chef, while others reflect specializations within an occupational area, such as music librarian and pastry chef. Still others represent a range of jobs, such as furniture assembler and sawmill machine operator.

These titles are used to describe the work performed by many individuals holding similar jobs within an occupational area. The list of titles in the NOC is not meant to be exhaustive, but attempts to cover the most commonly used and universally understood labels that identify work in the labour market.

Abbreviations

Few abbreviations are used in this classification. Particular attention should be given to the abbreviation n.e.c. (not elsewhere classified). As an occupational qualifier it is occasionally used in the labels of major, minor and unit groups to refer to occupations not elsewhere classified; e.g. 065 Managers in customer and personal services, n.e.c. indicates that this class includes managers in customer and personal services that are not classified elsewhere in the classification.

Language

The NOC is available separately in both official languages. It is important to note that the French version includes only titles commonly used in French and proper to the milieu and, therefore, these are not normally translations of the English titles. The classification structure is the same in both languages.

Unit group labels are presented in gender-neutral format in French identifying the masculine and feminine titles separated by a slash. Where relevant, this structure is used in English as well. The illustrative example titles are also presented in gender-neutral format. The NOC descriptions are written using the masculine form as they refer to all workers within the included occupations. This has been done in order to lighten the text and to reduce reading burden.

Modifying terms

Modifying terms have been added to several job titles, as extensions, to designate the industrial sector or the domain of expertise. If applicable, this information is preceded by a dash at the end of the title (cashier supervisor – retail trade) to distinguish between similar titles. These modifying terms specify where the titles appear in the classification structure (painter – visual arts; painter – manufacture of motor vehicles). This information should be considered when coding job titles.

Format of unit group descriptions

Each NOC unit group description consists of several standardized sections which define and describe its content.

Lead statement

This section provides a general description of the content and boundaries of the unit group and indicates the main activities of occupations within the unit group. It also indicates the kinds of industries or establishments in which the occupations are found. The list of places of employment is not always exhaustive, but can assist in clarifying the occupations described and in differentiating them from occupations found in other groups.

Illustrative examples ¹ / Example titles ²

This section is a list of titles commonly used in the labour market. The titles are intended to illustrate the contents and range of the occupational group. This is not an exhaustive list of titles.

Exclusions¹ / Classified elsewhere²

This section clarifies the boundaries of the unit group by identifying related unit groups and similar occupations that are classified elsewhere. Unit groups or individual occupations are cited in this section when they bear a functional similarity to the unit group or when similar titles occur.

Main duties

This section lists some of the tasks or duties performed in the occupations in the unit group. Depending on the contents of the unit group, one of three formats is used.

- A series of statements that can be applied to all occupations in the unit group. This format was selected for unit groups that contain a single core occupation, such as 1242 Legal administrative assistants and 2146 Aerospace engineers. This format was also selected for unit groups that contain a range of related titles that nevertheless share a set of common duties, such as 1411 General office support workers and 9417 Machining tool operators.
- Two or more sub-sets of occupations with a series of statements that apply to each component. This format was selected for unit groups that consist of two or more sub-components which, while similar enough to be in the same unit group, can be described separately. Examples of unit groups with this format are 3141 Audiologists and speech-language pathologists and 5125 Translators, terminologists and interpreters.
- A series of brief descriptive statements that are linked to specific occupations within a group. This format was selected for unit groups that contain a series of occupations which, while similar enough to be in the same unit group, can be described separately. Examples of unit groups with this format include 4423 By-law enforcement and other regulatory officers, n.e.c. and 5226 Other technical and co-ordinating occupations in motion pictures, broadcasting and the performing arts.

For some unit groups, a statement appears at the end of the tasks performed or main duties section, identifying specializations that exist within the occupational area encompassed by the unit group.

1. This heading is used by Statistics Canada.

2. This heading is used by Human Resources and Skills Development Canada.

Employment requirements

This section describes the employment requirements for the unit group. Several types of requirements are identified in this section and are listed in the following order.

- Type and level of formal education: for example, secondary school, college diploma, university degree. Efforts were made to be as specific as possible, though many unit groups have a range of acceptable educational requirements.
- Specific training: for example, apprenticeship training, on-the-job training, training courses specific to an occupation.
- Experience in another occupation: for example, supervisors usually require several years of experience in the occupation that they supervise.
- Licences, certificates or registration: for example, regulatory requirements to practice in a regulated profession, special licenses to operate certain kinds of vehicles.
- Other requirements: for example, athletic ability or artistic talent.

Note: Some occupations are designated as regulated professions and trades. Regulations are subject to change and may vary across jurisdictions. The most reliable information on regulatory requirements for occupations is found on the Web sites of provincial regulatory organizations and licensing authorities.

The Employment requirements section does not attempt to describe personal suitability requirements that are assessed by employers as part of the hiring process.

Some occupations have very definite employment requirements while for others, there is no consensus or a range of acceptable requirements exist. To reflect this variation in the labour market, this section describes employment requirements using the following terminology:

- “... is required” - to indicate a definite requirement;
- “... is usually required” - to indicate something that is usually required by the majority of employers, but not always required by all employers; and
- “... may be required” - to indicate something that may be required by some employers, but on a less frequent basis.

Note: For reasons of brevity, in this section the term college includes the following types of post-secondary institutions: community colleges, CÉGEPs, technical institutes, trade schools and agricultural colleges. Where relevant, in some provinces, it may also include private training organizations, music conservatories and other non-degree granting institutions.

Additional information

This section appears in some unit group descriptions. It provides information on the following:

- progression to other occupations (such as supervisory or management positions) based on transferability of skills from acquired occupational experience;
- mobility patterns, such as inter- and intra-occupational transferability of skills (for example, identifying occupations that are part of internal lines of progression or specializations within a subject matter area);
- trends and forthcoming changes in the unit group’s employment requirements; and
- other information to clarify and define the unit group.

Related classifications: NAICS, Class of Worker

The classification of occupations does not stand alone but must be understood as being related to other classifications, such as the North American Industry Classification System (NAICS) and that of Class of Worker. Each of these classifications supplements the NOC 2011 in presenting a rounded picture of the nature of a person's job.

North American Industry Classification System (NAICS)

The industrial qualifier which may accompany the job title:

- a. Indicates the type of economic activity with which the job is usually associated. (It is important to note that the assignment of an industrial qualifier does not necessarily limit a job to that industry. These qualifiers are merely indicative of the possible areas of activity in which the job may be found.)
- b. Permits the assignment of similar occupational titles to different occupation groups where the duties vary between industries.
- c. Aids in defining the specific occupations and helps the coder grasp the underlying principles of this classification.

The industry in which the individual is employed is determined by the kind of economic activity of the establishment. The establishment is usually a factory, mine, farm, store, other place of business or an institution for which a number of basic production variables can be compiled.

It is important to note the conceptual differences between an industry classification and an occupation classification. An establishment can employ individuals performing completely different occupations, and these are classified to appropriate occupational groups, but the industrial classification of each individual employed in the establishment should be the same and is determined by the nature of the product made or service rendered. In other words, the nature of the factory, business or service in which the person is employed does not determine the classification of the occupation, except to the extent that it enables the nature of the duties to be more clearly defined.

Class of Worker

Class of worker refers to an individual's employment relationship to the business in which he or she works, as employee or self employed, including unpaid family worker, and thus provides another means of describing the work. The NOC 2011 does not indicate the class of worker classification for each occupation since many occupations contain both jobs held by employees and jobs of self-employed individuals. However, a general rule has been established for coding purposes and is discussed in full under the section on Coding.

NOC 2011

NOC 2011 replaces the National Occupational Classification of Human Resources and Skills Development Canada and Statistics Canada's National Occupational Classification for Statistics. These classifications were revised jointly by Human Resources and Skills Development Canada

and Statistics Canada every 5 years according to the census cycle. The maintenance of the classification alternates between minor updates and structural revisions. Only in 10-year structural revisions are such changes considered as: the creation of new classes, the collapsing of classes, the moving of classes in the structure or the moving of content between classes.

The 2011 revision represents a major structural realignment. A key objective of this revision was to harmonize the coding structures and eliminate all other differences between the two classifications, fulfilling a request heard from users of both the NOC and the NOC-S. The result is the unified NOC 2011 which was developed through the joint efforts of Human Resources and Skills Development Canada and Statistics Canada and will be used by both.

Separate concordance tables explain the revisions to both classification systems that have resulted in the harmonized classification structure for NOC 2011.

In addition to these changes, for NOC 2011, a new variant of the classification has been developed at a high level of aggregation. It is designed to better support the analysis of highly aggregated data (See: Variant for highly aggregated data).

Citation

The National Occupation Classification 2011 is a joint product of Statistics Canada and Human Resources and Skills Development Canada. The appropriate department should be cited when materials are used. The structure, class labels, class definitions (lead statements), example titles and exclusions were jointly developed and are to be attributed to both departments. Comparison of NOC 2006 and NOC-S 2006 to NOC 2011

The major difference between the NOC and the NOC-S had been the greater use in the NOC of skill level as a classification criterion. Whereas the NOC organized occupations by 10 skill types and four skill levels, NOC-S relied more on skill type in defining its major groups. The NOC 2011 uses the organizational structure of the NOC (See: [Classification criteria](#)).

In order to incorporate skill level as an organizational principle, several major groups from NOC-S 2006 were changed and a new coding structure reflecting the skill type by skill level numerical coding of the NOC was adopted. The relationship between the major groups of NOC 2011 and NOC-S 2006 is detailed in the [concordance tables](#).

In order to provide at the major group level a comparable level of detail to that which had been provided by the NOC-S major groups, the number of major groups was increased from the 26 major groups of NOC 2006 to 40 major groups in NOC 2011. The relationship between the major groups of NOC 2011 and NOC 2006 is detailed in the concordance tables.

The unit group descriptions of NOC 2011 contain all the types of information carried in NOC 2006. In comparison to NOC-S 2006, users will find additional information on the activities performed by workers in each unit group and a section related to educational and/or training requirements for entering an occupation. These sections provide further information on the nature

of the jobs included in each unit group, help to code job titles to the correct class and help identify the relative distinctions between skill levels for occupations.

The NOC and NOC-S had also differed in their treatment of military personnel. The NOC classified military personnel whose occupations had a civilian counterpart in the group appropriate to that civilian occupation. The NOC-S classified all military personnel on the basis of rank to one of two unit groups: one for commissioned officers and one for other ranks. NOC 2011 follows the approach used in NOC-S, with all military personnel being classified to either 0433 Commissioned officers of the Canadian Forces or 4313 Non-commissioned ranks of the Canadian Forces. The adoption of the NOC-S approach allowed this difference to be resolved with no impact on the historical comparability of data.

In this structural revision, various changes were also made at the unit group level to enable the classification to continue to provide a framework for the provision of relevant and reliable information on the occupational structure of Canada. New unit groups have been formed either by combining unit groups or parts of unit groups from 2006 and content has been moved between skill types and levels. The full relationship between the unit groups of NOC 2011 and those of NOC and NOC-S 2006 is presented in the concordances, but some highlights are noted [here](#).

Some unit groups were moved to better reflect the skill type of the work performed. For example, Loan officers, Customer service representatives – financial and customer service, information and related clerks all moved from Business to Sales and service. Public relations and communications professionals moved from Art and culture to Business. Protective service occupations, including the military, police and firefighters, moved from Sales and service to Government services. Care providers and educational assistants moved from Sales and service to Community and education services. Certain trades, including upholsterers and tailors, moved from Trades and equipment to Services. As a final example, Power system, station and auxiliary equipment operators moved from Trades and equipment operators to Utilities.

In other cases, only part of a group was moved. For example, legal assistants moved out of Paralegal and related occupations, in Law, into Legal administrative assistants, in Business. Advertising and marketing managers moved out of Sales, marketing and advertising managers, in Sales, into Advertising, marketing and public relations managers, in Business services. Similarly, Library assistants moved from Library and archive technicians and assistants, in Education, law and social, community and government services, to Library assistants and clerks, in Business, finance and administration.

Other unit groups were moved to better reflect the occupation's current skill level. For example, the group for Non-commissioned ranks of the Canadian Forces was moved from skill level C to skill level B to recognize the training that occurs post-recruitment. Water and waste treatment plant operators also moved from skill level C to B due to the changing requirements associated with this occupation. Farmers and farm managers were moved into management to recognize the significant management component in these occupations.

As was the case with skill type, here also there were cases where only part of a unit group was moved. For example, midwives were moved from skill level B to skill level A into a new unit group, Allied primary health practitioners. Pharmacy technicians and physiotherapy assistants moved from skill level C to skill level B, now included, respectively, in Other medical technologists and technicians (except dental health) and Other technical occupations in therapy and assessment.

Finally, some unit groups were combined. Administrative clerks were merged with General office clerks due to the increasing similarity in the job titles and work performed in these two unit groups. In other cases, particularly in manufacturing, unit groups that have been declining in size were combined with related groups.

In addition to these structural changes, the 2011 revision also provided an opportunity to add many new job titles in order to reflect changing terminology and new technology in the workplace and the rise of new occupations and specializations. Too numerous to list, these additions included titles ranging from oil and gas contractor to mystery shopper and from physician assistant to seismic buried facilities locator.

NOC classification criteria

The two major attributes of jobs used as classification criteria in developing the NOC are skill type and skill level. A description of skill levels is presented first as the definitions of skill types incorporate some information related to the concept of skill level. Other factors, such as industry and occupational mobility, are also taken into consideration.

Skill level

Skill level is defined generally as the amount and type of education and training required to enter and perform the duties of an occupation. In determining skill level, the experience required for entry, and the complexity and responsibilities typical of an occupation are also considered in relation to other occupations.

Four skill level categories are identified in the NOC. Each major, minor and unit group is assigned to one of the skill levels.

The skill level categories are broad aggregates, reflecting four commonly accepted educational, training or preparatory routes for entering employment. Requirements for individual unit groups or occupations may overlap between the boundaries of the skill levels. For example, some occupations can be entered with either a university degree or a college diploma. When the entry requirements for a unit group or occupation reflect a range of possible educational and training specifications, skill level placement of the group was determined by considering several factors. These include the requirements most generally demanded by employers, the minor group context, complexity of overall responsibilities and knowledge requirements as well as further training and specialization acquired on the job.

The classification describes the educational and training requirements for occupations. However, the education and experience of particular job incumbents may not correspond exactly to the level described. Individuals may be over-qualified for their work or they may work in occupations for which the entry requirements have changed after they became employed.

It is important to note that the skill level categories are not intended to designate socio-economic status or prestige. Rather they are intended to reflect actual occupational entry requirements. These requirements are expressed in terms of the formal educational system and other types of training specified by employers.

Management occupations, while considered a skill type, are assigned to the skill level A category. These occupations are at the top of organizational hierarchies and as such, are characterized by high levels of responsibility, accountability and subject matter expertise gained through either formal education or extensive occupational experience. Management occupations span the entire classification structure and are found in all sectors or areas of the labour market. A range of factors are taken into consideration as determinants for employment in management occupations.

The skill level categories of the NOC are outlined and defined below.

NOC skill level criteria - education/training and other criteria

Skill level A

- University degree (bachelor's, master's or doctorate)

Skill level B

- Two to three years of post-secondary education at community college, institute of technology or CÉGEP
or
- Two to five years of apprenticeship training
or
- Three to four years of secondary school and more than two years of on-the-job training, occupation-specific training courses or specific work experience
- Occupations with supervisory responsibilities are also assigned to skill level B.
- Occupations with significant health and safety responsibilities (e.g., fire fighters, police officers and licensed practical nurses) are assigned to skill level B.

Skill level C

- Completion of secondary school and some short-duration courses or training specific to the occupation
or
- Some secondary school education, with up to two years of on-the-job training, training courses or specific work experience

Skill level D

- Short work demonstration or on-the-job training
or
- No formal educational requirements

Skill level is referenced in the code for all occupations with the exception of management occupations. For all non-management occupations the second digit of the numerical code corresponds to skill level. Skill levels are identified as follows: level A – 0 or 1; level B – 2 or 3; level C – 4 or 5; and level D – 6 or 7.

Skill type

Skill type is defined as the type of work performed, although other factors related to skill type are also reflected in the NOC. One of these factors is similarity with respect to the educational discipline or field of study required for entry into an occupation. Another factor is the industry of employment where experience within an internal job ladder or within a specific industry is usually a prerequisite for entry. The 10 skill types, 0 to 9, are presented below and are also identified in the first digit of the NOC numerical code for all occupations.

The ten broad occupational categories of the NOC are based on skill type.

0. Management occupations

This skill type category contains legislators, senior management occupations and middle management occupations. While management occupations are defined as a skill type, they are

also found throughout all other skill type areas of the classification. The first digit of the code for all management occupations is 0.

These occupations are considered to be at the top of the organizational hierarchy of workplaces or businesses. Decision-making that affects the organization as a whole, or departments within organizations, is undertaken by management. As such, management is characterized by high levels of responsibility, accountability and subject matter expertise. Expertise is acquired through either formal education or extensive occupational experience. For these reasons all management occupations in the NOC 2011 are also included within skill level A.

1. Business, finance and administration occupations

This category contains occupations that are concerned with providing financial and business services, administrative and regulatory services and clerical supervision and support services. Some occupations in this category are unique to the financial and business service sectors; however, most are found in all industries.

Often, occupations at skill levels A and B are supplied from educational programs specific to the profession or occupation. Some occupations at skill level B are also supplied from experienced workers in related administrative support occupations.

2. Natural and applied sciences and related occupations

This category contains professional and technical occupations in the sciences, including physical and life sciences, engineering, architecture and information technology.

Occupations in this skill type category require post-secondary education in an appropriate scientific discipline. Progression from occupations in skill level B to occupations in skill level A is usually dependent on completion of additional formal education.

3. Health occupations

This category includes occupations concerned with providing health care services directly to patients and occupations that provide support to professional and technical staff. Most occupations in this skill type category require post-secondary education in a related health care program. Progression from occupations in skill level B to occupations in skill level A is usually dependent on completion of additional formal education. Occupations in skill level C require short training programs.

4. Occupations in education, law and social, community and government services

This skill type category includes a range of occupations that are concerned with law, public protective services, teaching, counselling, conducting social science research, developing government policy, and administering government and other programs.

Occupations in this skill type category usually require completion of a related post-secondary program. Progression from occupations in skill level B to occupations in skill level A is not usually possible without completion of additional formal education.

5. Occupations in art, culture, recreation and sport

This skill type category includes professional and technical occupations related to art and culture, including the performing arts, film and video, broadcasting, journalism, writing, creative design, libraries and museums. It also includes occupations in recreation and sport.

This category is characterized by occupations which are linked by subject matter to formal post-secondary educational programs but which have, for the most part, a range of acceptable qualifications. Occupations in this category are also characterized by a requirement for creative talent, such as for designers and performers, or for athletic ability. Unit groups for occupations that usually require university graduation in a professional discipline, such as journalism or

library science, have been classified in skill level A. Most others have been classified in skill level B in recognition of the wide range of entry routes that are possible.

6. Sales and service occupations

This skill type category contains sales occupations, personal services and security service occupations, and occupations related to the hospitality and tourism industries.

Occupations in skill level B of this category can be linked, for the most part, to formal post-secondary or occupation-specific training programs. Others are characterized by periods of formal on-the-job training other than apprenticeship. Progression from occupations in skill level C or D to those in skill level B usually require completion of related training programs. Some progression through experience is possible for supervisory positions.

7. Trades, transport and equipment operators and related occupations

This skill type category includes construction and mechanical trades, trades supervisors and contractors and operators of transportation and heavy equipment. These occupations are found in a wide range of industrial sectors, with many occurring in the construction and transportation industries.

This category includes most of the apprenticeable trades, including all of those related to the construction industry. Other occupations in this category usually require completion of college or other programs combined with on-the-job training. Progression to supervisory or self-employed contractor status is possible with experience. There is limited mobility or transferability of skills among occupations in this category due to specific apprenticeship, training and licensing requirements for most occupations.

8. Natural resources, agriculture and related production occupations

This category contains supervisory and equipment operation occupations in the natural resource-based sectors of mining, oil and gas production, forestry and logging, agriculture, horticulture and fishing. Most occupations in this category are industry specific and do not occur outside of the primary industries.

Occupations within skill level B of this category generally require completion of college or other post-secondary training programs. Some, however, are characterized by industry-based training and progression through experience.

9. Occupations in manufacturing and utilities

This category contains supervisory and production occupations in manufacturing, processing and utilities.

Occupations in this category are characterized by internal progression and on-the-job training. Workers typically start out in these occupations at entry-level positions and progress to increasingly higher skilled occupations through experience. Mobility between employers or industries may be limited by seniority provisions of collective agreements. The occupations in skill level B of this category are increasingly technical in nature and post-secondary training programs are required for some.

Industry

Industry and occupation are separate variables which can be cross-tabulated to provide detailed information on employment. However, many occupations are found almost solely within one particular industry. For example, mining and automobile assembly occupations occur each within their respective industrial sectors.

During the original research and development of the NOC, it was realized that in many industries, occupational mobility is determined more by internal job ladders than by functional

specialization. In consequence, some unit groups include workers of a particular skill level within a specific industry. Although the occupational categorisation resembles in part an industrial categorisation, the variables remain separate and distinct.

Industry was used in the development of classification categories for senior management occupations, for occupations in natural resources, agriculture and related production and for occupations in manufacturing and utilities.

Occupational mobility

In developing the NOC, an effort was made to consider mobility or transferability of skills between occupations. The objective was to develop unit groups where the potential for mobility, or substitution of workers, would be greater within the group than between groups. Movement within groups usually follows when the group is homogeneous in skill level and skill type, indicating increased potential for transferability of competencies and development of specialization. Movement between groups, or inter-occupational mobility, usually reflects a change in skill level (e.g., vertical mobility) or a change in skill type (e.g., acquisition of new responsibilities and diversified skills).

The degree of occupational mobility that exists for unit groups varies. Many unit group descriptions include a statement that indicates the potential for, and type of, mobility that characterizes the unit group.

Other classification considerations

In addition to the previously mentioned criteria, other factors were considered in determining the boundaries between unit groups and the contents of each group. These additional factors were the size of the unit groups and the codability or operational feasibility of the groups. Codability relates to the ease of accurately coding or assigning reported job titles from survey respondents to the occupational groups of the classification.

The size (or estimated number of workers) of the unit group was considered for reasons of statistical reliability and confidentiality. Generally, unit groups which contain fewer than 1,000 Canadian workers have not been delineated.

Because the NOC structure is used to code responses to the National Household Survey and other surveys, it must provide a set of unit groups that can be used for this operational application. The insufficient precision of some survey responses and ambiguities of language were given consideration in finalizing the unit groups.

The NOC Matrix

A matrix classifying the NOC major and minor groups has been developed to provide an overview of the entire classification and to show the organization of the groups by both skill type and skill level.

There are 10 skill types in the NOC identified as **0** to **9**. The vertical columns of the matrix correspond to nine of the 10 skill type categories with the exception of management. Management, the first skill type or **0**, is organized across the top of the matrix and spans all nine skill types as it is found within all occupational sectors or categories. The **first digit** of each code identifies the major and minor group as belonging to one of the ten **skill type** categories, 0 to 9.

The horizontal rows of the matrix correspond to the four skill level categories. Management occupations are by default included in the skill level A category. For all non-management occupations, the **second digit** of each code identifies the major and minor group as belonging to one of the four **skill level** categories.

Within each cell of the matrix, the major and minor groups that belong to each skill type and skill level category are listed. Management occupations are the exception, which span all skill type

categories and are included in skill level A. The **second digit** of management occupations identifies the occupational sector of management, for example 031 Managers in health care.

Issues and conventions of the NOC

Some of the many issues that were encountered in the development of the NOC and the conventions adopted in response are discussed in the following paragraphs.

Management occupations

Management occupations present a special problem for reliable coding of occupational survey responses. In many cases there is little indication of the level of responsibility, the size of the enterprise or division managed, or the field of specialization.

To be of practical use, a classification of managers must be a compromise between the theoretically optimal and the practical solutions.

Senior management occupations (in major group 00) have been divided on the basis of industry of employment into six unit groups.

Middle and other management occupations are divided into three major groups, 18 minor groups and 42 unit groups on the basis of specialization (e.g., Purchasing managers) or industry of employment (e.g., Postal and courier services managers). In certain cases (e.g., Managers in transportation) groups defined by industry also contain managers in that specialization regardless of their industry of employment.

Supervisors

Supervisors and foremen/women have generally been classified in skill level B.

In most cases, professional and technical occupations are supervised by managerial or professional personnel respectively. However, where supervisors are identified for professional and technical groups, they are generally classified in the same unit groups as the occupations supervised.

Supervisors in the following occupational categories have been classified in supervisor unit groups or minor groups separate from the workers supervised:

- administrative services occupations
- nursing occupations
- sales and service occupations
- trades and transport and equipment operators
- occupations in natural resources and agriculture
- occupations in manufacturing and utilities.

Most minor and unit groups in the occupational categories listed above have a corresponding supervisory group. Occasionally, as in minor group 431, Occupations in front-line public protection services, supervision is provided by managers and there are no corresponding supervisory groups in major group 43.

Trades

All apprenticeable trades are included in skill level B. Their inclusion does not imply an exact equivalence of skill between all trades, but rather that they occupy a range that lies within the boundaries of this skill level category. Information on entry requirements is provided within each unit group description.

Inspectors, testers and graders

Generally, inspectors who require post-secondary education have been classified in separate unit groups in skill level B or with technicians and technologists, also in skill level B. Other non-technical inspectors, testers, graders and samplers have been included either in separate unit groups covering occupations in processing industries or in unit groups of assemblers and fabricators in manufacturing industries. This is reflective of patterns of employment found within industries and the increasing responsibility for quality control that is placed on manufacturing production workers.

Apprentices and trainees

Apprentices and trainees have been classified in the same unit groups as the occupations for which they are training. Similarly, interns, residents and articling students are classified with their respective professional groups.

This convention has been adopted of necessity to prevent a proliferation of unit groups of apprentices. It is not intended to imply equivalence or interchangeability of apprentices or trainees with fully qualified workers.

NOC 2011 coding system

As indicated previously, the first two digits of each code convey meaning with respect to the group's skill type and skill level category.

For all occupations, including management, the **first digit** of each code identifies the major, minor and unit group as belonging to one of the **skill type** categories. For all non-management occupations, the **second digit** of each code identifies the major, minor and unit group as belonging to one of the four **skill level** categories.

For management occupations, the first two digits also convey meaning. The first digit is always 0 to convey management, while the second digit conveys the skill type category in which the management occupation is found. All management occupations are included as part of skill level A.

The following charts summarize and illustrate the meanings embedded in the coding system.

The skill type category is...	when the first digit is...
Management occupations	0
Business, finance and administration occupations	1
Natural and applied sciences and related occupations	2
Health occupations	3
Occupations in education, law and social, community and government services	4
Occupations in art, culture, recreation and sport	5

Sales and service occupations	6
Trades, transport and equipment operators and related occupations	7
Natural resources, agriculture and related production occupations	8
Occupations in manufacturing and utilities	9

The skill level category is...	when the second digit is...
Skill level A	0 or 1
Skill level B	2 or 3
Skill level C	4 or 5
Skill level D	6 or 7

Important note:

For management, the first digit is always 0. Senior managers in major group 00 are generally managers of middle managers, therefore the second digit is also 0. For middle management occupations, the second digit represents the skill type categories, from 1 to 9, as above. All management occupations are included in skill level A.

Examples of codes and their meaning:

9231

- The first digit indicates skill type category 9
- Occupations in manufacturing and utilities
- The second digit indicates skill level category B

6533

- The first digit indicates skill type category 6
- Sales and service occupations
- The second digit indicates skill level category C

0212

- The first digit 0 always indicates a management occupation
- All management occupations are part of skill level A
- The second digit indicates management in skill type category 2
- Natural and applied sciences and related occupations

Variant for highly aggregated data

A variant of NOC 2011 has been developed jointly by Statistics Canada and Human Resources and Skills Development Canada. It is based on a review of actual practices in the analysis of highly aggregated occupational data, consideration of the highest aggregation level in the International Standard Classification of Occupations (ISCO) and consultation with potential users.

The variant consists of 10 groupings, from a. to j., that are a convenient and useful way to summarize and analyse more detailed classes. The first three classes are homogeneous on skill level. The remaining classes focus on skill type. All classes consist of entire major groups; no major group is split between classes of the variant.

Variant Aggregation Structure

Coding

The NOC provides an overall structure for classifying occupations according to **kind of work performed**. The lists of example titles are merely indicative of the types of occupations that fit within specific unit groups. **The lists of example titles are not exhaustive nor are they intended to be.**

When coding an occupation, all the relevant facts about the job and its environment should be obtained. These include the kind of work performed, the most important activities or duties, the job titles, the kind of business, industry or service, and the class of worker described earlier. The more complete and comprehensive the information the coder is able to assemble about the duties performed by a worker on a particular job, the easier it will be to determine the appropriate classification.

To code an occupation, it is possible to start with either the classification structure or the search tool.

Using the structure

When using the structure, it is best to exploit the hierarchical nature of the classification. First the **broad occupational category** (skill type) which seems most likely to contain the job should be identified. Next the most appropriate **major group** within the broad occupational category should be found. Skill level can also provide a guide to locating major groups by considering titles with terms such as “technical”, “supervisor”, “helper”, and “labourer”. The process should be continued to find the most appropriate **minor group** within the major group selected. Finally the most appropriate **unit group** within the minor group selected should be identified. The unit group definition should be read carefully before deciding if this unit group offers the best possible classification. In addition, the example titles listed for the unit group should be examined to ensure that the choice is actually the best.

Using the NOC search tool

- a. First search for the occupation. This can be done by searching using a key part of the occupation title and reviewing the search results to find the four-digit code that contains the occupation sought. Check whether the title appears in any other four-digit code listed. If it does, the corresponding industrial qualifiers should be checked and the one which relates most closely to the one stated by the respondent selected. Using this code, go to the unit group. Read its definition carefully as well as the list of example titles before deciding whether it is the most appropriate classification. Also consult the list of Exclusions for similar occupations that are classified elsewhere.
- b. If the occupation title cannot be found or if the definition appears inappropriate, enter another title in the search. Some suggestions are:
 1. Look for the noun form: answering the phone will be a Receptionist or Telephone clerk
 2. Shorten the title: Electronic data processor to Data processor
 3. Find a synonym: Aircraft mechanic for Aircraft maintenance technician
 4. If the title is inverted, look for it in its natural order e.g. Manager, store may be located using Store manager
- c. Also consider such factors as:
 - Job location - tunnel worker; bridge keeper
 - Kind of machines used - cement-mixer operator; hydraulic riveter
 - Material used - concrete mason; leather handbag maker

Subject matter - music cataloguer; press clipper

Activity performed - locomotive inspector; body shop foreman/woman

Job skills - surgical instrument repairer; tool machinist

Coding procedures for problem responses

The procedure described above assumes responses contain sufficient information for coding. Unfortunately, depending upon the survey methods used, some responses may be problematic. This occurs when the information in the response is either vague or contradictory. Experience at Statistics Canada suggests the following approaches to resolving such problems.

1) Coding vague responses

It is suggested that vague responses be coded only to the level within the classification that is possible. Of course, before doing so, any information that is available about the respondent should be consulted.

2) Using education in coding

This is especially useful in coding occupational responses that are vague. The most reliable way of using education is as an exclusionary edit. Certain occupations require a minimum education and it is possible to exclude vague responses from being coded to such occupations if the respondent does not have the minimum education required. Great care must be taken when using education in occupational coding and it should only be used as a last resort.

3) Coding when the response contains contradictory information

Sometimes the responses will give an occupational title and a description of work performed that are contradictory. A response "labourer, driving dump truck" is contradictory in terms of the classification, as driving a truck is not considered elemental work. This response should be coded as a truck driver in 7511 Transport truck drivers. In general, it is best to let the description of the work performed predominate over occupational titles when coding.

Some occupational titles can be misleading. Titles that have manager as part of the title are sometimes not managers. For example, project managers and case managers are usually not managers and must be coded based on a description of their work. Special care must be given to responses that have manager, labourer, or consultant as part of the title as these terms have a variety of meanings in the workplace.

4) Coding responses containing two or more occupations

Where two or more occupations are reported in reply to a question on occupation, the first one mentioned should be coded unless there is additional information to suggest otherwise.

Classification rules

Managers

Managers are usually classified to the broad occupational category 0 Management Occupations. Within this category the senior managers that are the top of a management hierarchy as denoted by terms such as president, chief executive officer, etc. are classified in major group 00 Senior management occupations.

Managers with a management specialty, such as human resource management, are classified according to specialty in major group 01-05 Specialized middle management occupations. However, senior managers with a specialist responsibility would be classified with senior management in major group 00 Senior management occupations.

An attempt has been made to isolate many of the managers of small businesses by classifying managers of retail stores, restaurants, hotels and similar businesses in a separate major group 06 Middle management occupations in retail and wholesale trade.

All other managers are classified according to the type of business managed within major group 07-09 Middle management occupations in trades, transportation, production and utilities.

Proprietors

As a general rule, the class of worker status, that is, whether the respondent works for wages or is self-employed, is not considered for classification purposes. An exception is made for proprietors in retail trade, food and accommodation services and residential home building. These are classified as managers to the following unit groups:

0621	Retail and wholesale trade managers
0631	Restaurant and food service managers
0632	Accommodation service managers
0712	Home building and renovation managers

Contractors

Contractors are classified in several areas of the classification. General contractors in construction are classified in unit group 0711 Construction managers. Renovation contractors and home building contractors are classified in unit group 0712 Home building and renovation managers.

Contractors specializing in a specific trade such as plumbing, electrical, carpentry, etc., are classified together with supervisors to the appropriate unit group for that trade. That is, a plumbing contractor is classified to unit group 7203 Contractors and supervisors, pipefitting trades.

Supervisors and foremen/women

Supervisors are classified to separate unit groups for supervisors where they exist. These are found in the following minor groups for supervisors:

121	Administrative services supervisors
621	Retail sales supervisors
631	Service supervisors
720	Contractors and supervisors, industrial, electrical and construction trades and related workers
730	Contractors and supervisors, maintenance trades and heavy equipment and transport operators

821	Supervisors, logging and forestry
822	Contractors and supervisors, mining, oil and gas
825	Contractors and supervisors, agriculture, horticulture and related operations and services
921	Supervisors, processing and manufacturing occupations
922	Supervisors, assembly and fabrication

This unit group for supervisors is found outside of the supervisor minor groups:

3011	Nursing co-ordinators and supervisors
------	---------------------------------------

Where a separate unit group does not exist, supervisors are classified with the workers supervised. For example, in most professional major groups there are no separate unit groups for supervisors, the one exception being unit group 3011 Nursing co-ordinators and supervisors.

Technical occupations follow a similar rule and there are no separate unit groups for supervisors in this area.

Even where separate supervisory unit groups exist, "lead hands" are not classified to them as previous research has indicated that supervision is usually only a minor part of such jobs.

Apprentices

Apprentices are classified within the groups for tradesmen/women. For example an apprentice carpenter is classified to the appropriate trade group, unit group 7271 Carpenters.

Helpers

Helpers are usually considered as labourers. Most helpers will be found in the building trades such as carpenter's helper, mason's helper, roofer's helper, etc. These jobs are not to be confused with formal apprenticeships and are not classified as tradesmen/women but are classified to unit group 7611 Construction trades helpers and labourers.

Labourers

Labourers are classified in separate unit groups in the following major groups:

76	Trades helpers, construction labourers and related occupations
86	Harvesting, landscaping and natural resources labourers
96	Labourers in processing, manufacturing and utilities

Sample questions for obtaining occupation information

The following questions indicate the type of information and the format that could be used to obtain the facts necessary to classify an occupation.

a) For whom did you work?

- Name of firm, government agency, etc.

b) What kind of business, industry or service was this?

- Please give details. For example: primary school, municipal police, wheat farm, shoe store.

c) What was your work or occupation?

- Please be specific. For example: plumber, fishing guide, wood furniture assembler, secondary school teacher. (If in the armed forces, give rank).

d) In this work, what were your main activities?

- Please give details. For example: installed residential plumbing, guided fishing parties, made wood furniture products, taught mathematics.

e) In this job or business, were you mainly:

- Working for wages, salary, tips or commission?
- Working without pay for your spouse or another relative in a family farm or business?
- Self-employed without paid help (alone or in a partnership)?
- Self-employed with paid help (alone or in a partnership)?

Methodology

Research and Development for the NOC 2011 Revision

The NOC is a standard that classifies and describes occupations in the Canadian economy. It is the foundation for occupational statistics and labour market information. Research on occupational evolution, work skills and competencies is an ongoing process. This section outlines the methods and procedures used to revise and unify the 2006 editions of the NOC and the National Occupational Classification for Statistics (NOC-S).

Several contributing factors informed the 2011 revision process. They include a detailed study of NOC and NOC-S users following the 2006 update; the public on-line consultations conducted in advance of the 2011 revision by Human Resources and Skills Development Canada and Statistics Canada; and the establishment of a jointly-chaired interdepartmental committee on the 2011 revision of the classification.

Input and proposals were obtained from all of these initiatives. The most significant feedback included the following: unify the NOC and NOC-S classification structures and eliminate the differences between them; use one coding framework only and preferably the numerical coding of the NOC; increase the number of major groups to the degree possible for alignment with the NOC-S; and include skill level within the classification system.

Revision proposals were also received directly from a wide range of sources. Input was provided by labour market analysts, occupational regulatory and professional organizations, sector groups, employment and career counsellors, immigration specialists, industry experts, employers and educators.

Research analysts were assigned responsibility for NOC skill type categories to review and prioritize all of the input. Analysts also examined secondary sources of information such as occupational analyses and standards, research papers, as well as on-line information including country-wide job postings and employment advertisements in their research. Job analysis studies and contracted research were initiated for some occupational areas and data from sources such as the Census, the Labour Force Survey and other labour market studies were consulted.

For many areas of the classification there was general satisfaction with the content of the occupational groups and their placement within the overall classification structure. Research conducted for non-structural changes to content, such as updating of main duties, employment requirements and inclusion of emerging job titles, was validated by occupational specialists and employers.

Some occupational areas required in-depth research. An examination of how restructuring and use of technology had affected the nature of the work, the boundaries of occupational groups and their position in the classification structure was necessary to accurately reflect these occupations in the current labour market.

Following the analysis phase, revision proposals were compiled into a consolidated and standardized NOC revision template for internal review. Proposed revisions were forwarded to Statistics Canada for internal review to assess implementation concerns related to coding, historical continuity and other statistical considerations. The joint working committee met monthly to discuss issues and arrive at consensus on final decisions. All structural and content revisions implemented for NOC 2011 were agreed upon by both Human Resources and Skills Development Canada and Statistics Canada. NOC 2011 represents a structural revision and unification of the former classification systems.

Concordance Tables for NOC 2011

The concordance tables presented here for NOC 2011 show the relationship between NOC 2006 and NOC 2011 for those areas of the classification which have changed. Areas for which there were no changes are not included.

There are four tables identifying changes starting with the skill type categories followed by the successive levels of the classification from major group, to minor group and finally the four-digit unit group level. Changes include modification of the coding framework and labels of groups, content realignment and the introduction of new groups and codes. The reciprocal effects of the changes are presented in both directions, from 2006 to 2011 and from 2011 to 2006, within the same table.

Explanations are provided regarding the nature of the modifications for all levels. The explanations at the unit group level are the most detailed. The term “moved” refers to content moving out of the 2006 configuration at the skill type, major, minor and unit group levels to the new 2011 structure. The reciprocity of the move of content in the 2011 structure is identified as “includes” and “except”. The term “merged” is used to identify the aggregation of an entire group with another. The terms “relocated” and “relocation” identify entire groups which have been transferred on the skill type and/or skill level dimensions. Use of the term “former” in relation to a group indicates the code is no longer used. This may be a simple recode or a structurally modified group both of which are explained. The 2006 codes and labels that are no longer used are shown as strike outs in the tables.

- Consult with production supervisor to schedule production runs in a cost and time-efficient manner
- Meet regularly with other production clerks, warehouse, production and construction supervisors and purchasing and inventory clerks to co-ordinate activities between warehouses and production floors or construction sites
- Co-ordinate and monitor logistics of the movement of parts, supplies and materials within an establishment and ensure that supplies, materials and products are shipped and received on schedule
- Prepare and maintain various reports on the progress of work, materials used, rates of production and other production information, using manual or computerized systems.

Employment requirements

- Completion of secondary school is usually required and college may be required.
- Previous clerical experience or experience as a production worker may be required.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Purchasing and inventory control workers* (1524)

1524 Purchasing and inventory control workers

Purchasing and inventory control workers process purchasing transactions and maintain inventories of materials, equipment and stock. They are employed by retail and wholesale establishments, manufacturing companies, government agencies and other establishments.

Example titles

inventory analyst
inventory clerk
inventory control clerk
inventory planner

procurement clerk
purchasing clerk
purchasing clerk assistant

Main duties

Purchasing control workers perform some or all of the following duties:

- Review requisition orders for accuracy and verify that materials, equipment and stock are not available from current inventories
- Source and obtain price quotations from catalogues and suppliers and prepare purchase orders
- Calculate cost of orders and charge or forward invoices to appropriate accounts
- Process purchases within purchasing authority
- Contact suppliers to schedule deliveries and to resolve shortages, missed deliveries and other problems
- Prepare and maintain purchasing files, reports and price lists.

Inventory control workers perform some or all of the following duties:

- Monitor inventory levels as materials, equipment and stock are issued, transferred within an establishment or sold to the public using manual or computerized inventory systems
- Compile inventory reports, recording the quantity, type and value of materials, equipment and stock on hand, using manual or computerized inventory systems
- Prepare requisition orders to replenish materials, equipment and stock
- Maintain stock rotation and dispose of and account for outdated stock
- Enter data for production scheduling, stock replenishment/relocation and inventory adjustments
- Reconcile physical inventories with computer counts.

Employment requirements

- Completion of secondary school is usually required.
- Courses in purchasing management may be required for purchasing clerks.
- Courses in production and inventory management and ability to operate a computerized inventory system may be required for inventory clerks.

Additional information

- The duties of purchasing and inventory clerks may overlap in some establishments.
- Progression to supervisory positions or more senior occupations such as purchasing agent or retail buyer is possible with additional training or experience.

Classified elsewhere

- *Purchasing agents and officers* (1225)
- *Retail and wholesale buyers* (6222)
- *Storekeepers and partspersons* (1522)
- Supervisors of purchasing and inventory clerks (in 1215 *Supervisors, supply chain, tracking and scheduling co-ordination occupations*)

1525 Dispatchers

Dispatchers operate radios and other telecommunication equipment to dispatch emergency vehicles and to coordinate the activities of drivers and other personnel. They are employed by police, fire and health departments, other emergency service agencies, taxi, delivery and courier services, trucking and utilities companies, and other commercial and industrial establishments.

Example titles

911 dispatcher
alarm system dispatcher
ambulance dispatcher
emergency vehicle dispatcher
inbound/outbound freight co-ordinator
mobile equipment dispatcher

radio operator
taxi dispatcher
tow truck dispatcher
truck dispatcher
utilities maintenance crew dispatcher

Main duties

Dispatchers perform some or all of the following duties:

- Receive requests for emergency assistance or service and contact ambulances, police and fire departments, tow-trucks, and utility crews
- Process and transmit information and instructions to co-ordinate the activities of vehicle operators, crews and equipment using a variety of computer-aided communications and dispatching equipment
- Dispatch personnel according to written schedules and work orders, or as required by emergency situations
- Advise vehicle operators of route and traffic problems such as construction, accidents, congestion, weather conditions, weight and size restrictions and other information
- Operate radio equipment to communicate with ships, aircraft, mining crews, offshore oil rigs, logging camps and other remote operations
- Monitor personnel workloads and locations
- Maintain vehicle operator work records using computerized or manual methods and ensure time sheets and payroll summaries are completed accurately
- Maintain computer and manual records of mileage, fuel use, repairs and other expenses, and generate reports.

Employment requirements

- Completion of secondary school is required.
- Police and emergency dispatchers are required to complete formal on-the-job training. Other dispatchers usually undergo some informal on-the-job training.

- Police and emergency dispatchers and other radio operators usually require provincial radio operator's certificates.

Classified elsewhere

- *Air traffic controllers and related occupations (2272)*
- *Bus dispatchers (in 7305 Supervisors, motor transport and other ground transit operators)*
- *Railway traffic controllers and marine traffic regulators (2275)*
- *Supervisors of dispatchers (in 1215 Supervisors, supply chain, tracking and scheduling co-ordination occupations)*

1526 Transportation route and crew schedulers

Transportation route and crew schedulers prepare operational and crew schedules for transportation equipment and operating personnel. They are employed by municipal transit commissions, truck, delivery and courier companies, railways, airlines and by other transportation establishments in both the private and public sectors.

Example titles

bus scheduler	schedule writer, transportation
crew scheduler, transportation	train scheduler
flight crew scheduler	transit scheduler
schedule analyst	truck scheduler

Main duties

Transportation route and crew schedulers perform some or all of the following duties:

- Review schedule requisitions, passenger counts and cargo, running times, distances, personnel availability and other pertinent information to establish schedule parameters
- Design new or modify existing schedules using computer software or other methods
- Incorporate into route plan factors such as peak travel periods, holidays, special events and construction with emphasis on time and cost efficiency
- Assign personnel to equipment and routes and schedule work shifts
- Compile equipment and personnel records, including hours in service, distances, maintenance, repairs required and other data, to produce operating reports
- May prepare user guides and other public service information.

Employment requirements

- Completion of secondary school is required.
- Several years of experience in an appropriate transportation sector are usually required.
- On-the-job training may be provided.

Additional information

- Mobility between occupations in this group is limited due to the requirement of specific transportation sector experience.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Flight schedulers managers (in 0731 *Managers in transportation*)
- Production schedulers in manufacturing establishments (in 1523 *Production logistics coordinators*)
- Scheduling technicians in manufacturing (in 2233 *Industrial engineering and manufacturing technologists and technicians*)
- Supervisors of transportation route and crew schedulers (in 1215 *Supervisors, supply chain, tracking and scheduling co-ordination occupations*)

2111 Physicists and astronomers

Physicists conduct theoretical and applied research to extend knowledge of natural phenomena and to develop new processes and devices in fields such as electronics, communications, power generation and distribution, aerodynamics, optics and lasers, remote sensing, biotechnology, medicine and health. They are employed by electronic, electrical and aerospace manufacturing companies, telecommunications companies, power utilities, university and government research laboratories, hospitals and by a wide range of other processing, manufacturing, and research and consulting firms. Astronomers conduct observational and theoretical research to extend knowledge of the universe. They are employed by government and universities.

Example titles

acoustics physicist
aerodynamicist
astronomer
astrophysicist
atmospheric physicist
biophysicist
cosmologist
experimental physicist
health physicist
medical physicist

metrologist
nuclear physicist
optics physicist
plasma physicist
radio astronomer
research scientist, aerospace
research scientist, electronics
research scientist, physics
research scientist, remote sensing
solid-state physicist

Main duties

Physicists perform some or all of the following duties:

- Design and conduct research in experimental and theoretical physics
- Carry out analysis of research data and prepare research reports
- Participate as a member of a research or development team in the design and development of experimental, industrial or medical equipment, instrumentation and procedures.

Physicists may specialize in fields such as aeronomy and space, acoustics, atomic and molecular physics, biophysics, condensed matter or solid state physics, electromagnetics, fluids and aerodynamics, health physics, medical physics, metrology, particle physics, optics and laser physics, nuclear physics and plasma physics.

Astronomers perform some or all of the following duties:

- Design and conduct observational surveys, conduct detailed analyses and develop numerical models to extend knowledge of celestial bodies and cosmic radiation
- Develop or participate in the development of instrumentation and software for astronomical observation and analysis.

Astronomers may specialize in fields such as astrophysics, observational or optical astronomy and radio astronomy.

Employment requirements

- Physicists usually require a master's or doctoral degree in a field of physics, engineering physics, or in a related discipline.
- Astronomers usually require a master's or doctoral degree in astronomy or in a related discipline.

Additional information

- Mobility between specializations within physics and within astronomy is possible with experience.
- Physicists may work closely with and perform some of the duties of engineers.
- Mobility is possible to the fields of meteorology, geophysics and other fields of science.
- Progression to management positions is possible with experience.

Classified elsewhere

- *Architecture and science managers* (0212)
- *Atmospheric physicists* (in 2114 *Meteorologists and climatologists*)
- *Computer engineers (except software engineers and designers)* (2147)
- *Geophysicists and physical oceanographers* (in 2113 *Geoscientists and oceanographers*)

2112 Chemists

Chemists conduct research and analysis in support of industrial operations, product and process development, quality control, environmental control, medical diagnosis and treatment, biotechnology, nanotechnology and other applications. They also conduct theoretical, experimental and applied research into basic chemical and biochemical processes to create or synthesize new products and processes. Chemists are employed in research, development and quality control laboratories; chemical, petrochemical and pharmaceutical industries; mineral, metal and pulp and paper industries; and a wide variety of manufacturing, utility, health, educational and government establishments.

Example titles

agricultural chemist
analytical chemist
bioanalytical chemist
biochemist
chemist
clinical chemist
coatings chemist
electrochemist
environmental chemist
food chemist
inorganic chemist
medicinal chemist
nuclear magnetic resonance (NMR) spectroscopist

oceanographic chemist
organic chemist
organic mass spectrometrist
organometallic chemist
pharmacological chemist
physical chemist
polymer chemist
quality control chemist
research chemist
soil chemist
textile chemist
theoretical chemist

Main duties

Chemists perform some or all of the following duties:

- Analyze, synthesize, purify, modify and characterize chemical or biochemical compounds
- Develop and conduct programs of analysis to ensure quality control of raw materials, chemical intermediates or final products
- Conduct programs of sample and data collection and analysis to identify and quantify environmental toxicants
- Conduct research to develop new chemical formulations and processes and devise new technical applications of industrial chemicals and compounds
- Conduct research to discover, develop, refine and evaluate new products such as those used in nanomedicine, nanoelectronics and other applications of chemistry
- Conduct fundamental and applied research into the synthesis and properties of chemical compounds and the mechanisms of chemical reactions

- Investigate chemical aspects of the mechanisms of drug action, the diagnosis and treatment of disease, organ function and the assessment of health
- Participate in interdisciplinary research and development projects working with chemical engineers, biologists, microbiologists, agronomists, geologists or other professionals
- Act as technical consultant in a particular field of expertise
- May participate in the commercialization of new products
- May supervise other chemists and chemical technicians and technologists.

Employment requirements

- A bachelor's degree in chemistry, biochemistry or a related discipline is required.
- A master's or doctoral degree is usually required for employment as a research chemist.
- Licensing by a provincial association of chemists is required in Quebec, and available but voluntary in Nova Scotia, Ontario, Alberta and British Columbia.

2112 Chemists

Additional information

- Mobility between occupations in this group is possible with experience.
- Mobility is possible with experience, to occupations concerned with plant management, technical sales and the development and management of regulatory programs and teaching professions.

Classified elsewhere

- *Architecture and science managers* (0212)
- *Chemical engineers* (2134)
- *Geochemists* (in 2113 *Geoscientists and oceanographers*)
- *Metallurgists and material scientists* (in 2115 *Other professional occupations in physical sciences*)
- *Molecular biologists* (in 2121 *Biologists and related scientists*)

2113 Geoscientists and oceanographers

Geoscientists include geologists, geochemists and geophysicists who conduct programs of exploration and research to extend knowledge of the structure, composition and processes of the earth, to locate, identify and extract hydrocarbon, mineral and groundwater resources and to assess and mitigate the effects of development and waste disposal projects on the environment. Oceanographers conduct programs of exploration and research on ocean processes and phenomena, biological, chemical and physical characteristics of oceans, interactions with atmospheric and geological environments and impacts of human activity on oceans and marine ecosystems. Geoscientists are employed by petroleum and mining companies, consulting geology, geophysics and engineering firms and by governments and educational institutions, or they may be self-employed. Oceanographers are employed by governments, educational institutions and private companies engaged in exploration of seafloor deposits and seafarming areas, or they may be self-employed.

Example titles

development geologist
environmental geologist
exploration geologist
geochemist
geologist
geophysicist
glaciologist
groundwater geologist
hydrogeologist
hydrologist

mine geologist
mineralogist
oceanographer
paleontologist
petroleum geologist
petrologist
sedimentologist
seismologist
stratigrapher

Main duties

Geoscientists perform some or all of the following duties:

- Conduct theoretical and applied research to extend knowledge of surface and subsurface features of the earth, its history and the operation of physical, chemical and biological systems that control its evolution
- Plan, direct and participate in geological, geochemical and geophysical field studies, drilling and geological testing programs
- Plan and conduct seismic, electromagnetic, magnetic, gravimetric, radiometric, radar and other remote sensing programs
- Plan, direct and participate in analyses of geological, geochemical and geophysical survey data, well logs and other test results, maps, notes and cross sections
- Develop models and applied software for the analysis and interpretation of data
- Plan and conduct analytical studies of core samples, drill cuttings and rock samples to identify chemical, mineral, hydrocarbon and biological composition and to assess depositional environments and geological age
- Assess the size, orientation and composition of mineral ore bodies and hydrocarbon deposits

- Identify deposits of construction materials and determine their characteristics and suitability for use as concrete aggregates, road fill or for other applications
- Conduct geological and geophysical studies for regional development and advise in areas such as site selection, waste management and restoration of contaminated sites
- Recommend the acquisition of lands, exploration and mapping programs and mine development
- Identify and advise on anticipated natural risks such as slope erosion, landslides, soil instability, subsidence, earthquakes and volcanic eruptions
- May supervise and co-ordinate well drilling, completion and work-overs and mining activities.

Geologists may specialize in fields such as coal geology, environmental geology, geochronology, hydrogeology, mineral deposits or mining, petroleum geology, stratigraphy, tectonics, volcanology or in other fields.

Geochemists may specialize in analytical geochemistry, hydrogeochemistry, mineral or petroleum geochemistry or in other fields.

Geophysicists may specialize in areas, such as petroleum geology, earth physics, geodesy, geoelectromagnetism, seismology or in other fields.

2113 Geoscientists and oceanographers

Oceanographers perform some or all of the following duties:

- Conduct theoretical and applied oceanographic research programs and expeditions to extend knowledge of the physical, chemical and biological properties and functioning of oceans
- Plan, direct and participate in sampling and analysis of seawater, plankton, fish, sediments and rocks
- Study physical properties of oceans to develop models, charts and computer simulations of ocean conditions, such as tides, waves, currents and sediment transport
- Explore ocean floor and submarine geological structures, conduct seismic surveys and study formation of ocean basins and other structures to map ocean floor, coastal erosion, sediment accumulation and areas for offshore oil and gas exploration
- Plan and conduct investigations on ocean chemical properties and processes, ocean floor and marine atmosphere and undersea volcanoes to study impacts of environmental changes
- Study marine life and interaction with physical and chemical environments to assess impacts of pollutants on marine ecology and to develop ecologically-based methods of seafarming.

Oceanographers may specialize in biological, chemical, geological or physical oceanography, or in other fields related to the study of oceans.

Employment requirements

- Geoscientists require a university degree in geology, geochemistry, geophysics or a related discipline.
 - A master's or doctoral degree in geophysics, physics, mathematics or engineering may be required for employment as a geophysicist.
 - Registration with a provincial or territorial association of professional engineers, geologists, geophysicists or geoscientists is usually required for employment and is mandatory to practice in Newfoundland and Labrador, Alberta, British Columbia, the Northwest Territories and Nunavut.
 - Geologists and geophysicists are eligible for registration following graduation from an accredited educational program and after several years of supervised work experience and, in some provinces, after passing a professional practice examination.
- Oceanographers require a university degree in science, mathematics, statistics or engineering and usually require a graduate degree in oceanography.

Additional information

- Mobility between specializations in this group is possible with experience.
- Progression to supervisory or higher level positions is possible with experience in this unit group.
- Advancement to management positions in mining, petroleum and other industries is possible with experience.

Classified elsewhere

- *Architecture and science managers* (0212)
- *Biologists and related scientists* (2121)

- *Physicists and astronomers* (2111)

2114 Meteorologists and climatologists

Meteorologists and climatologists analyze and forecast weather, provide consultation on atmospheric phenomena and conduct research into the processes and phenomena of weather, climate and atmosphere. They are employed by all levels of government, natural resources and utility companies, the media and private consulting firms, or they may be self-employed.

Example titles

air quality meteorologist
climatologist
hydrometeorologist

meteorologist
operational meteorologist
weather forecaster

Main duties

Meteorologists and climatologists perform some or all of the following duties:

- Analyze and interpret data obtained from meteorological stations, radar and satellite imagery and computer model output
- Produce weather forecasts and provide weather consulting services for industries such as aviation, marine, agriculture and tourism, and to the general public
- Disseminate weather forecasts and reports to the general public through a variety of media including radio, television, print and the Internet
- Conduct research and provide consultation on the processes and determinants of atmospheric phenomena, weather and climate, atmospheric dispersion, and physical and chemical transformation of pollutants
- Develop and test mathematical computer models of weather and climate for experimental or operational use
- Analyze the impact of industrial projects and human activity on the climate and quality of the air and work with the social science, engineering and economic communities to develop appropriate mitigation strategies
- Participate in studies of the effect of weather on the environment
- Provide consultation and advice to outside agencies, professionals, or researchers regarding the use and interpretation of climatological information
- Make scientific presentations, publish reports, articles or popular texts for specialists, users or the general public
- May engage in the design and development of new equipment and procedures for meteorological data collection, remote sensing, or for related applications.

Employment requirements

- A bachelor's or master's degree in meteorology, atmospheric sciences or in a related field is required.
- A doctoral degree is usually required for employment as a research scientist in meteorology.
- Formal training is provided by Environment Canada for operational meteorologists employed by the federal government.
- Membership in the Canadian Meteorological and Oceanographic Society or, in Quebec, in l'Association professionnelle des météorologistes du Québec is available, but voluntary, for qualified meteorologists.

Classified elsewhere

- Announcers who broadcast weather forecasts (in 5231 *Announcers and other broadcasters*)

2115 Other professional occupations in physical sciences

This group includes metallurgists, soil scientists and physical scientists and researchers, not elsewhere classified, involved in the conduct of theoretical and applied research in fields of physical science. They are employed by governments, educational institutions and a wide range of industrial establishments.

Example titles

astronaut
ballistics examiner
materials scientist
metallurgist

physical metallurgist
research scientist – ceramics
research scientist – composite materials
soil scientist

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Metallurgists conduct studies into the properties and production of metals and alloys.
- Soil scientists conduct research into the composition, distribution and evolution of soils.
- Materials scientists conduct research into the properties, composition and production of materials such as ceramics and composite materials.
- Astronauts command, pilot or serve as crew members of a spacecraft to conduct scientific experiments and research, and participate in space missions as mission specialists to maintain spacecraft, install and repair space station equipment and launch and recapture satellites.

Employment requirements

- A bachelor's degree in metallurgy, physics, chemistry, or a related physical science discipline is required.
- A master's or doctoral degree is usually required for employment as a research scientist.
- Advanced degrees in a broad range of applied science areas, such as engineering or medicine
or

Licences may be required for some occupations in this unit group.

Additional information

- Mobility between specializations in this group may be possible with experience.
- Mobility is possible with experience, to other fields of physical science or to management or regulatory program management.

Classified elsewhere

- *Air pilots, flight engineers and flying instructors* (2271)
- *Architecture and science managers* (0212)
- *Chemists* (2112)
- *Metallurgical and materials engineers* (2142)

2121 Biologists and related scientists

Biologists and related scientists conduct basic and applied research to extend knowledge of living organisms, to manage natural resources, and to develop new practices and products related to medicine and agriculture. They are employed in both laboratory and field settings by governments, environmental consulting companies, resource and utilities companies, chemical, pharmaceutical and biotechnical companies and health and educational institutions.

Example titles

anatomist
bacteriologist
bioinformatician
biologist
botanist
cell biologist
ecologist
embryologist
geneticist
histologist
immunologist

marine biologist
microbiologist
molecular biologist
mycologist
parasitologist
pharmacologist
physiologist
protozoologist
toxicologist
virologist
zoologist

Main duties

Biologists perform some or all of the following duties:

- Plan and conduct studies of the environment, and of the population, distribution, structure and functional characteristics and behaviour of plants and animals
- Conduct ecological and environmental impact studies and prepare reports
- Study, identify and classify plant and animal specimens
- Conduct experiments in plant or animal growth, heredity and breeding
- Prepare reports and plans for management of renewable resources
- May supervise biological technologists and technicians and other scientists.

Microbiologists and cell and molecular biologists perform some or all of the following duties:

- Conduct research into the structure, function, ecology, biotechnology and genetics of micro-organisms, including bacteria, fungi, protozoans, and algae
- Conduct research into the structure and functioning of human, animal and plant tissues and cells

- Conduct studies into the identification, effects and control of human, plant and animal pathogens and toxins
- Conduct clinical or laboratory studies to test, evaluate and screen drugs, pharmaceuticals and nanoparticles used in biomedical applications
- Conduct molecular or biochemical studies and experiments in genetic expression, gene manipulation and recombinant DNA technology to develop new or alternative methods of producing products
- Conduct research in biotechnology to discover, develop and refine, and evaluate new products
- May participate in the commercialization of new products
- May supervise biological technologists and technicians and other scientists
- May conduct biostatistical data analysis using computer modelling techniques.

Biologists and related scientists may specialize at the macroscopic level, in fields such as botany, zoology, ecology and marine biology or, at the cellular and molecular level, in fields such as genetics, immunology, pharmacology, toxicology, physiology, pathology, bacteriology, virology, biotechnology and bioinformatics.

2121 Biologists and related scientists

Employment requirements

- A bachelor's degree in biology or in a related discipline is required for biologists.
- A master's or doctoral degree in biology or a related discipline is required for employment as a research scientist in biology.
- Post-doctoral research experience is usually required before employment in academic departments or research institutions.

Classified elsewhere

- *Architecture and science managers* (0212)
- Biochemists (in 2112 *Chemists*)
- Specialists in laboratory medicine (in 3111 *Specialist physicians*)

2122 Forestry professionals

Forestry professionals conduct research, develop plans and administer and direct programs related to the management and harvesting of forest resources. They are employed by the forest industry, provincial and federal governments, consulting companies, educational institutions and other industries, or they may be self-employed.

Example titles

appraisal forester
consulting forester
district forester
forest engineer

forester
forestry superintendent
regional inventory officer – forestry
registered professional forester (RPF)

Main duties

Forestry professionals perform some or all of the following duties:

- Plan and direct forest surveys and related studies and prepare reports and recommendations
- Establish short- and long-term plans for management of forest lands and forest resources
- Plan and direct woodlands harvesting, reforestation, silviculture and fire prevention and fire suppression programs, road building, wildlife management, environmental protection and insect and vegetation control programs
- Negotiate terms and conditions of agreements and contracts for forest harvesting, forest management and leasing of forest lands
- Monitor contract compliance and results of forestry activities
- Ensure adherence to government regulations and company objectives
- Plan and conduct public relations programs, and education and extension programs related to forestry
- Develop and oversee programs for tree seedling production and woodlands nursery operations
- Conduct advanced research in the areas of tree improvement, nursery seedling production, forest soils, forest ecology, forest mensuration, forest operations and other areas
- Provide advice and recommendations, as a consultant on forestry issues, to private woodlot owners, municipal, provincial or federal governments or to companies.

Employment requirements

- A bachelor's degree in forestry or forestry engineering is required.

- Certification as a forester or forest engineer by provincially chartered associations is required in provinces having such associations.
- A two-year practicum of supervised work experience and professional examinations are usually required before registration.

Additional information

- Supervisory and senior occupations in this unit group require additional experience.
- With experience, mobility is possible to management positions in government and industry.

Classified elsewhere

- Forest economists (in 4162 *Economists and economic policy researchers and analysts*)
- Forestry and woodlands operations managers (in 0811 *Managers in natural resources production and fishing*)
- Managers of government forestry policy and program administration (in 0412 *Government managers – economic analysis, policy development and program administration*)
- Managers of research in forestry (in 0212 *Architecture and science managers*)

2123 Agricultural representatives, consultants and specialists

Agricultural representatives, consultants and specialists provide assistance and advice to farmers on all aspects of farm management, cultivation, fertilization, harvesting, soil erosion and composition, disease prevention, nutrition, crop rotation and marketing. They are employed by businesses, institutions and governments that assist the farming community, or they may be self-employed.

Example titles

agricultural consultant
agricultural extension supervisor
agricultural livestock specialist
agricultural representative
agricultural soil and crop specialist
agriculturist
agrologist
agronomist

consulting agrologist
crop specialist
farm management consultant
field service adviser – agriculture
field service agent – agriculture
growers' advisor
professional agrologist (P.Ag.)

Main duties

Agricultural representatives, consultants and specialists perform some or all of the following duties:

- Provide counselling and advisory services to farmers on crop cultivation and fertilization, harvesting, animal and poultry care, disease prevention, farm management, farm financing, marketing and other agricultural subjects
- Prepare and conduct advisory information sessions and lectures for farmers and other groups
- Conduct research, analyze agricultural data and prepare research reports
- Liaise with researchers, educators and government or business managers on matters pertaining to farming and agriculture
- Maintain records of services provided and the effects of advice given.

Agricultural representatives, consultants and specialists may specialize in specific aspects of agriculture such as animal science, field crops, horticulture, soil science, irrigation or drainage, farm management, marketing, agricultural economics, land use, and environmental management, appraisal or extension and education.

Employment requirements

- A bachelor's or master's degree in agriculture or in a related science is required.
- Membership or eligibility for membership in a provincial institute of agrology is usually required.

- In Quebec, membership in the Ordre professionnel des agronomes is mandatory.

Additional information

- Progression to management positions is possible with experience.

Classified elsewhere

- Agricultural engineers (in 2148 *Other professional engineers, n.e.c.*)
- Agrology technologists and technicians (in 2221 *Biological technologists and technicians*)
- *Biologists and related scientists* (2121)
- *Landscape and horticulture technicians and specialists* (2225)
- Managers of agricultural extension and consulting services (in 0212 *Architecture and science managers*)
- Managers responsible for agricultural economic policy (in 0412 *Government managers – economic analysis, policy development and program administration*)

2131 Civil engineers

Civil engineers plan, design, develop and manage projects for the construction or repair of buildings, earth structures, powerhouses, roads, airports, railways, rapid transit facilities, bridges, tunnels, canals, dams, ports and coastal installations and systems related to highway and transportation services, water distribution and sanitation. Civil engineers may also specialize in foundation analysis, building and structural inspection, surveying, geomatics and municipal planning. Civil engineers are employed by engineering consulting companies, in all levels of government, by construction firms and in many other industries, or they may be self-employed.

Example titles

bridge engineer
civil engineer
construction engineer
environmental engineer
geodetic engineer
geomatics engineer
highway engineer
hydraulics engineer
municipal engineer

project engineer, construction
public works engineer
sanitation engineer
structural engineer
surveying engineer
traffic engineer
transportation engineer
water management engineer

Main duties

Civil engineers perform some or all of the following duties:

- Confer with clients and other members of the engineering team and conduct research to determine project requirements
- Plan and design major civil projects such as buildings, roads, bridges, dams, water and waste management systems and structural steel fabrications
- Develop construction specifications and procedures
- Evaluate and recommend appropriate building and construction materials
- Interpret, review and approve survey and civil design work
- Conduct field services for civil works
- Ensure construction plans meet guidelines and specifications of building codes and other regulations
- Establish and monitor construction work schedules
- Conduct feasibility studies, economic analyses, municipal and regional traffic studies, environmental impact studies or other investigations
- Monitor air, water and soil quality and develop procedures to clean up contaminated sites

- Conduct technical analyses of survey and field data for development of topographic, soil, hydrological or other information and prepare reports
- Act as project or site supervisor for land survey or construction work
- Prepare contract documents and review and evaluate tenders for construction projects
- Supervise technicians, technologists and other engineers and review and approve designs, calculations and cost estimates.

Employment requirements

- A bachelor's degree in civil engineering or in a related engineering discipline is required.
- A master's degree or doctorate in a related engineering discipline may be required.
- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).
- Engineers are eligible for registration following graduation from an accredited educational program, and after three or four years of supervised work experience in engineering and passing a professional practice examination.
- Leadership in Energy and Environmental Design (LEED) certification is offered by the Canada Green Building Council and may be required by some employers.

2132 Mechanical engineers

Mechanical engineers research, design and develop machinery and systems for heating, ventilating and air conditioning, power generation, transportation, processing and manufacturing. They also perform duties related to the evaluation, installation, operation and maintenance of mechanical systems. Mechanical engineers are employed by consulting firms, by power-generating utilities and in a wide range of manufacturing, processing and transportation industries, or they may be self-employed.

Example titles

acoustics engineer
automotive engineer
design engineer – mechanical
energy conservation engineer
engineer, power generation
fluid mechanics engineer
heating, ventilation and air conditioning (HVAC)
engineer

mechanical engineer
mechanical maintenance engineer
nuclear engineer
piping engineer
refrigeration engineer
robotics engineer
thermal design engineer
tool engineer

Main duties

Mechanical engineers perform some or all of the following duties:

- Conduct research into the feasibility, design, operation and performance of mechanisms, components and systems
- Plan and manage projects, and prepare material, cost and timing estimates, reports and design specifications for machinery and systems
- Design power plants, machines, components, tools, fixtures and equipment
- Analyze dynamics and vibrations of mechanical systems and structures
- Supervise and inspect the installation, modification and commissioning of mechanical systems at construction sites or in industrial facilities
- Develop maintenance standards, schedules and programs and provide guidance to industrial maintenance crews
- Investigate mechanical failures or unexpected maintenance problems
- Prepare contract documents and evaluate tenders for industrial construction or maintenance
- Supervise technicians, technologists and other engineers and review and approve designs, calculations and cost estimates.

Employment requirements

- A bachelor's degree in mechanical engineering or in a related engineering discipline is required.
- A master's degree or doctorate in a related engineering discipline may be required.

- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).

2133 Electrical and electronics engineers

Electrical and electronics engineers design, plan, research, evaluate and test electrical and electronic equipment and systems. They are employed by electrical utilities, communications companies, manufacturers of electrical and electronic equipment, consulting firms, and by a wide range of manufacturing, processing and transportation industries and government.

Example titles

avionics engineer
control systems engineer
design engineer, electrical
distribution planning engineer, electrical
electrical engineer
electrical network engineer
electronics engineer

instrumentation and control engineer
planning engineer, electrical systems
process control engineer, electrical
roadway lighting design engineer
television systems engineer
test engineer, electronics

Main duties

Electrical and electronics engineers perform some or all of the following duties:

- Conduct research into the feasibility, design, operation and performance of electrical generation and distribution networks, electrical machinery and components and electronic communications, instrumentation and control systems, equipment, and components
- Prepare material cost and timing estimates, reports and design specifications for electrical and electronic systems and equipment
- Design electrical and electronic circuits, components, systems and equipment
- Conduct micro or nanodevices simulations, characterization, process modeling and integration in the development of new electronic devices and products
- Supervise and inspect the installation, modification, testing and operation of electrical and electronic systems and equipment
- Develop maintenance and operating standards for electrical and electronic systems and equipment
- Investigate electrical or electronic failures
- Prepare contract documents and evaluate tenders for construction or maintenance
- Supervise technicians, technologists, programmers, analysts and other engineers.

Electrical and electronics engineers may specialize in a number of areas including electrical design for residential, commercial or industrial installations, electrical power generation and transmission, and instrumentation and control systems.

Employment requirements

- A bachelor's degree in electrical or electronics engineering or in an appropriate related engineering discipline is required.
- A master's or doctoral degree in a related engineering discipline may be required.
- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).
- Engineers are eligible for registration following graduation from an accredited educational program, and after three or four years of supervised work experience in engineering and passing a professional practice examination.

2134 Chemical engineers

Chemical engineers research, design, and develop chemical processes and equipment, oversee the operation and maintenance of industrial chemical, plastics, pharmaceutical, resource, pulp and paper, and food processing plants and perform duties related to chemical quality control, environmental protection and biochemical or biotechnical engineering. Chemical engineers are employed in a wide range of manufacturing and processing industries, consulting firms, government, research and educational institutions.

Example titles

adhesives engineer
biochemical engineer
biotechnical engineer
chemical engineer, environmental
chemical process engineer
industrial hygiene engineer
industrial waste treatment engineer
liquid fuels engineer

petrochemical engineer
polymer engineer
process control engineer, chemical
project engineer, chemical
pulp and paper engineer
refinery engineer
waste treatment engineer

Main duties

Chemical engineers perform some or all of the following duties:

- Conduct economic and technical feasibility studies in areas related to chemical, petroleum, pulp and paper, food or other processing industries
- Conduct research into the development or improvement of chemical engineering processes, reactions and materials
- Evaluate chemical process technology and equipment and determine production specifications
- Design and test chemical processing and associated plants and equipment
- Oversee the construction, modification, operation and maintenance of pilot plants, processing units or processing plants
- Establish and conduct quality control programs, operating procedures and control strategies to ensure consistency and adherence to standards for raw materials, products and waste products or emissions
- Prepare contract documents and evaluate tenders for the process aspects of industrial construction
- Supervise technicians, technologists and other engineers
- May work in an administrative capacity, for example, in the development of guidelines and specifications for the handling of dangerous chemicals, environmental protection, or standards for foods, materials and consumer goods.

Chemical engineers may specialize in the products and processes of a particular industry such as pulp and paper manufacturing, pharmaceuticals, petroleum refining, energy processing, plastics, metal extraction and refining, or adhesives and coatings production. They may also specialize in functional areas of various industries such as process control, pollution control or fermentation processes.

Employment requirements

- A bachelor's degree in chemical engineering or in a related engineering discipline is required.
- A master's degree or doctorate in a related engineering discipline may be required.
- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).

Additional information

- There is considerable mobility between chemical engineering specializations at the less senior levels.
- Supervisory and senior positions in this unit group require experience.

2134 Chemical engineers

- Engineers often work in a multidisciplinary environment and acquire knowledge and skills through work experience that may allow them to practise in associated areas of science, engineering, sales, marketing or management.
- Chemical engineers work closely with chemists and other scientists and engineers and mobility is possible between some fields of specialization.

Classified elsewhere

2141 Industrial and manufacturing engineers

Industrial and manufacturing engineers conduct studies, and develop and supervise programs to achieve the best use of equipment, human resources, technology, materials and procedures to enhance efficiency and productivity. Industrial and manufacturing engineers are employed in consulting firms, manufacturing and processing companies, in government, financial, health care and other institutions, or they may be self-employed.

Example titles

engineer, computer integrated manufacturing (CIM)

fire prevention engineer

industrial engineer

manufacturing engineer

plant engineer

production engineer

quality control engineer

safety engineer

work measurement engineer

Main duties

Industrial and manufacturing engineers perform some or all of the following duties:

- Plan and design plant layouts and facilities
- Study new machinery and facilities and recommend or select efficient combinations
- Develop flexible or integrated manufacturing systems and procedures
- Conduct studies and implement programs to determine optimum inventory levels for production and to allow optimum utilization of machinery, materials and resources
- Analyze costs of production
- Design, develop and conduct time studies and work simplification programs
- Determine human resource and skill requirements and develop training programs
- Develop performance standards, evaluation systems and wage and incentive programs
- Conduct studies of the reliability and performance of plant facilities and production or administrative systems
- Develop maintenance standards, schedules and programs
- Establish programs and conduct studies to enhance industrial health and safety or to identify and correct fire and other hazards
- Evaluate or assess industrial facilities
- Supervise technicians, technologists, analysts, administrative staff and other engineers.

Employment requirements

- A bachelor's degree in industrial engineering or in a related engineering discipline is required.

- A master's degree or doctorate in a related engineering discipline may be required.
- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).
- Engineers are eligible for registration following graduation from an accredited educational program, and after three or four years of supervised work experience in engineering and passing a professional practice examination.

Additional information

- Industrial engineers develop and implement organizational and management systems, and manufacturing engineers design production processes.
- There is considerable mobility between industrial engineering specializations at the less senior levels.
- Supervisory and senior positions in this unit group require experience.

2142 Metallurgical and materials engineers

Metallurgical and materials engineers conduct studies of the properties and characteristics of metals and other non-metallic materials and plan, design and develop machinery and processes to concentrate, extract, refine and process metals, alloys and other materials such as ceramics, semiconductors and composite materials. Metallurgical and materials engineers are employed in consulting engineering firms, mining, metal processing and manufacturing companies, and in government, research and educational institutions.

Example titles

ceramics engineer
corrosion engineer
electrometallurgical engineer
foundry engineer
hydrometallurgical engineer

materials engineer
metallurgical engineer
physical metallurgical engineer
pyrometallurgical engineer
welding engineer

Main duties

Metallurgical and materials engineers perform some or all of the following duties:

- Conduct studies and design, develop and specify the processes, and machinery to concentrate, extract, refine and process metals from ores
- Conduct studies on the properties and characteristics of materials and design, develop and specify processes for moulding, shaping, forming and thermal treatment of metals, alloys and metallic systems, ceramics, semiconducting and other materials
- Conduct chemical and physical analytical studies, failure analyses and other studies and recommend material selection, design of materials, corrosion control measures, operational testing and other procedures
- Co-ordinate production testing and control of metal refining, smelting or foundry operations or non-metallic materials production operations
- Supervise technologists, technicians and other engineers and scientists.

Employment requirements

- A bachelor's degree in metallurgical, materials, ceramic or chemical engineering or in a related engineering discipline is required.
- A master's degree or doctorate in a related engineering discipline may be required.
- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).

- Engineers are eligible for registration following graduation from an accredited educational program, and after three or four years of supervised work experience in engineering and passing a professional practice examination.

Additional information

- Metallurgical engineers research and develop new alloys and systems for extracting metal from ores; materials engineers research and develop new non-metallic materials with physical characteristics to meet specific requirements.
- There is considerable mobility between engineering specializations at the less senior levels.
- Supervisory and senior positions in this unit group require experience.
- Metallurgical and materials engineers work closely with other engineers and scientists and mobility is possible between some fields of specialization.
- Engineers often work in a multidisciplinary environment and acquire knowledge and skills through work experience that may allow them to practise in associated areas of science, engineering, sales, marketing or management.

2143 Mining engineers

Mining engineers plan, design, organize and supervise the development of mines, mine facilities, systems and equipment; and prepare and supervise the extraction of metallic or non-metallic minerals and ores from underground or surface mines. Mining engineers are employed by mining companies, consulting engineering companies, manufacturers, government and in educational and research institutions.

Example titles

mine design engineer

mine development engineer

mine layout engineer

mine production engineer

mineral engineer

mine safety engineer

mine ventilation engineer

mining engineer

Main duties

Mining engineers perform some or all of the following duties:

- Conduct preliminary surveys and studies of ore, mineral or coal deposits to assess the economic and environmental feasibility of potential mining operations
- Determine the appropriate means of safely and efficiently mining deposits
- Determine and advise on appropriate drilling and blasting methods for mining, construction or demolition
- Design shafts, ventilation systems, mine services, haulage systems and supporting structures
- Design, develop and implement computer applications such as for mine design, mine modelling, mapping or for monitoring mine conditions
- Plan and design or select mining equipment and machinery and mineral treatment machinery and equipment in collaboration with other engineering specialists
- Plan, organize and supervise the development of mines and mine structures and the operation and maintenance of mines
- Prepare operations and project estimates, schedules and reports
- Implement and co-ordinate mine safety programs
- Supervise and co-ordinate the work of technicians, technologists, survey personnel, and other engineers and scientists.

Employment requirements

- A bachelor's degree in mining engineering or in a related engineering discipline is required.
- A master's degree or doctorate in a related engineering discipline may be required.

- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).
- Engineers are eligible for registration following graduation from an accredited educational program, and after three or four years of supervised work experience in engineering and passing a professional practice examination.

- *Petroleum engineers* (2145)

2144 Geological engineers

Geological engineers conduct geological and geotechnical studies to assess suitability of locations for civil engineering, mining and oil and gas projects; and plan, design, develop and supervise programs of geological data acquisition and analysis and the preparation of geological engineering reports and recommendations. Geological engineers are employed in consulting engineering companies, electrical utilities, mining and petroleum companies and in government and research and educational institutions.

Example titles

geological engineer
geophysical engineer

hydrogeological engineer – engineering

Main duties

Geological engineers perform some or all of the following duties:

- Plan, develop and co-ordinate programs of geotechnical, geological, geophysical or geohydrological data acquisition, analysis and mapping to assist in the development of civil engineering, mining, petroleum and waste management projects or for regional development
- Analyze and prepare recommendations and reports for construction or improvements to foundations of civil engineering projects such as rock excavation, pressure grouting and hydraulic channel erosion control
- Analyze and prepare recommendations and reports on settlement of buildings, stability of slopes and fills, and probable effects of landslides and earthquakes to support construction and civil engineering projects
- Conduct theoretical and applied study of groundwater flow and contamination and develop prescriptions for site selection, treatment and construction
- Plan, develop, co-ordinate and conduct theoretical and experimental studies in mining exploration, mine evaluation and feasibility studies relative to the mining industry
- Conduct surveys and studies of ore deposits, ore reserve calculations and mine design
- Design, develop and implement computer applications for geophysics, geochemistry, geology, mapping and related fields
- Supervise technologists, technicians and other engineers and scientists.

Employment requirements

- A bachelor's degree in geological engineering or in a related discipline is required.

- A master's degree or doctorate in a related engineering discipline may be required.
- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).

2145 Petroleum engineers

Petroleum engineers conduct studies for the exploration, development and extraction of oil and gas deposits; and plan, design, develop and supervise projects for the drilling, completion, testing and re-working of oil and gas wells. They are employed by petroleum producing companies, consulting companies, well logging or testing companies, government, and research and educational institutions.

Example titles

drilling engineer, oil and gas
petroleum engineer
petroleum engineer, completion

production engineer, oil and gas
reservoir engineer, petroleum
subsea engineer

Main duties

Petroleum engineers perform some or all of the following duties:

- Conduct feasibility assessment studies for developing new oil and gas fields
- Direct and monitor oil and gas drilling operations
- Develop drilling programs, select sites and specify drilling fluids, bit selection, drill stem testing procedures and equipment
- Direct and monitor the completion and evaluation of wells, well testing and well surveys
- Design and select artificial lift machinery, and well and surface production equipment and systems, and specify programs for corrosion control and oil or gas treatment
- Develop specifications for and monitor and supervise well modification and stimulation programs to maximize oil and gas recovery
- Analyze reservoir rock and fluid data to design optimum recovery methods and to predict reservoir performance and reserves
- Monitor and forecast oil and gas reservoir performance and recommend oil recovery techniques which extend the economic life of wells
- Design, develop and co-ordinate the installation, maintenance and operation of subsea well-head and production equipment.

Petroleum engineers may specialize in drilling, production, reservoir analysis or subsea operations.

Employment requirements

- A bachelor's degree in petroleum engineering or in a related engineering discipline is required.
- A master's degree or doctorate in a related engineering discipline may be required.

- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).

2146 Aerospace engineers

Aerospace engineers research, design and develop aerospace vehicles, aerospace systems and their components, and perform duties related to their testing, evaluation, installation, operation and maintenance. They are employed by aircraft and spacecraft manufacturers, air transport carriers, and in government and educational and research institutions.

Example titles

aerodynamics engineer
aeronautical engineer
aerospace engineer
aircraft design engineer

stress engineer – aerospace
structural engineer, aerospace
systems engineer, aerospace
test engineer, aerospace

Main duties

Aerospace engineers perform some or all of the following duties:

- Design and develop aerospace vehicles, systems and components such as aircraft, spacecraft, missiles, satellites and space-based communication systems
- Develop and conduct computer simulations of aerospace vehicles, systems and components using advanced mathematical modelling
- Prepare specifications for materials and processes to be used in aerospace manufacturing, maintenance, repair or modification
- Supervise and co-ordinate the manufacturing, assembly, modification, repair and overhaul of aircraft and spacecraft
- Co-ordinate ground and flight tests of air and spacecraft
- Develop operational specifications, maintenance schedules and manuals for operators
- Develop the technical phases of logistical and operational support for aerospace vehicles and systems
- Investigate and report on structural or other component or system failures, accidents or incidents and prepare recommendations for corrective action.

Employment requirements

- A bachelor's degree in aerospace engineering or in a related engineering discipline, such as mechanical engineering or engineering physics, is required.
- A master's degree or doctorate in a related engineering discipline may be required.

- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).
- Engineers are eligible for registration following graduation from an accredited educational program, and after three or four years of supervised work experience in engineering and passing a professional practice examination.

2147 Computer engineers (except software engineers and designers)

Computer engineers (except software engineers and designers) research, plan, design, develop, modify, evaluate and integrate computer and telecommunications hardware and related equipment, and information and communication system networks including mainframe systems, local and wide area networks, fibre-optic networks, wireless communication networks, intranets, the Internet and other data communications systems. They are employed by computer and telecommunication hardware manufacturers, by engineering, manufacturing and telecommunications firms, in information technology consulting firms, by governmental, educational and research institutions and in information technology units throughout the private and public sectors.

Example titles

computer hardware engineer
fibre-optic network designer
hardware circuit board designer
hardware development engineer
hardware technical architect

network test engineer
systems designer – hardware
telecommunications hardware engineer
wireless communications network engineer

Main duties

Computer and telecommunications hardware engineers perform some or all of the following duties:

- Analyze user's requirements, and design and develop system architecture and specifications
- Research, design, develop and integrate computer and telecommunications hardware such as microprocessors, integrated circuit boards and semiconductor lasers
- Develop and conduct design verification simulations and prototype bench tests of components
- Supervise, inspect and provide design support during the manufacturing, installation and implementation of computer and telecommunications hardware
- Establish and maintain relationships with suppliers and clients
- May lead and co-ordinate teams of engineers, technologists, technicians and drafters in the design and development of computer and telecommunications hardware.

Network system and data communication engineers perform some or all of the following duties:

- Research, design and develop information and communication system network architecture
- Research, evaluate and integrate network system and data communication hardware and software
- Assess, document and optimize the capacity and performance of information and communication system networks

- May lead and co-ordinate teams of design professionals in the development and integration of information and communication system architecture, hardware and software.

Computer engineers may specialize in a number of areas including analog and digital signal processing, fibre optics, integrated circuits, lasers, microprocessors, microwaves and radio astronomy.

Employment requirements

- Computer engineers require a bachelor's degree in computer engineering, electrical or electronics engineering, engineering physics or computer science.
- A master's or doctoral degree in a related engineering discipline may be required.
- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).
- Engineers are eligible for registration following graduation from an accredited educational program, three or four years of supervised work experience in engineering and passing a professional practice examination.

Additional information

- Supervisory and senior positions in this unit group require experience.
- Engineers often work in a multidisciplinary environment and acquire knowledge and skills through work experience that may allow them to practise in associated areas of science, engineering, sales, marketing or management.

2148 Other professional engineers, n.e.c.

This unit group includes agricultural and bio-resource engineers, biomedical engineers, engineering physicists and engineering scientists, marine and naval engineers, textile engineers and other specialized engineering occupations which are not classified elsewhere.

Example titles

agricultural engineer
biomedical engineer
bio-resource engineer
engineering physicist
engineering scientist

food processing engineer
marine engineer
naval architect
textile engineer

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Agricultural and bio-resource engineers design and develop machinery, structures, equipment and systems related to agriculture and food processing.
- Biomedical engineers design and develop medical diagnostic and clinical instrumentation, equipment and procedures; develop devices to assist persons with disabilities; advise hospital administrators on planning, acquisition and use of medical equipment; and modify and install or supervise installation of equipment.
- Engineering physicists and engineering scientists conduct research, develop processes, programs and equipment to expand fundamental knowledge in the applied sciences and engineering and to support advanced engineering and scientific applications.
- Marine and naval engineers design and develop marine vessels and floating structures and associated marine power plants, propulsion systems and related systems and equipment and oversee the building, maintenance and repair of vessels and marine systems.
- Textile engineers design and develop processes, equipment and procedures for the production of fibres, yarns and textiles.

Employment requirements

- A bachelor's degree in an appropriate engineering discipline is required.
- A master's degree or doctorate in a related engineering discipline may be required.
- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports, and to practise as a Professional Engineer (P.Eng.).

- Engineers are eligible for registration following graduation from an accredited educational program, and after three or four years of supervised work experience in engineering and passing a professional practice examination.

Additional information

- There is limited mobility between the engineering specializations included in this unit group.
- Supervisory and senior positions in this unit group require experience.
- Engineers often work in a multidisciplinary environment and acquire knowledge and skills through work experience that may allow them to practise in associated areas of science, engineering, sales, marketing or management.

2151 Architects

Architects conceptualize, plan and develop designs for the construction and renovation of commercial, institutional and residential buildings. They are employed by architectural firms, private corporations and governments, or they may be self-employed.

Example titles

architect

architectural standards specialist

chief architect

consulting architect

industrial and commercial buildings architect

residential architect

Main duties

Architects perform some or all of the following duties:

- Consult with clients to determine the type, style and purpose of renovations or new building construction being considered
- Conceptualize and design buildings and develop plans describing design specifications, building materials, costs and construction schedules
- Prepare sketches and models for clients
- Prepare or supervise the preparation of drawings, specifications and other construction documents for use by contractors and tradespersons
- Prepare bidding documents, participate in contract negotiations and award construction contracts
- Monitor activities on construction sites to ensure compliance with specifications
- Conduct feasibility studies and financial analyses of building projects.

Architects may specialize in a particular type of construction such as residential, commercial, industrial or institutional.

Employment requirements

- A bachelor's degree from an accredited school of architecture
or
Completion of the syllabus of studies from the Royal Architectural Institute of Canada (RAIC) is required.
- A master's degree in architecture may be required.
- Completion of a three-year internship under the supervision of a registered architect is required.
- Completion of the architect registration examination is required.
- Registration with the provincial association of architects in the province of work is required.

- Leadership in Energy and Environmental Design (LEED) certification is offered by the Canada Green Building Council and may be required by some employers.

Additional information

- Progression to senior positions, such as chief architect, is possible with experience.

Classified elsewhere

2152 Landscape architects

Landscape architects conceptualize landscape designs, develop contract documents and oversee the construction of landscape development for commercial projects, office complexes, parks, golf courses and residential development. They are employed by government environmental and development agencies, landscape consulting firms and by architectural and engineering firms, or they are self-employed.

Example titles

golf course architect
landscape architect

landscape planner

Main duties

Landscape architects perform some or all of the following duties:

- Confer with clients to determine design needs
- Survey and assess designated sites and develop designs taking into consideration landscape features, buildings, climate, future usage and other aspects
- Prepare or oversee the preparation of detailed drawings for sites, including features such as trees, shrubs, gardens, lighting, walkways, patios, decks, benches, fences, retaining walls and fountains
- Prepare or oversee preparation of site plans, reports, sketches, models, photographs, maps, land use studies and design plans
- Estimate costs, prepare specifications and evaluate tenders for landscape construction projects
- Conduct environmental design studies, including environmental assessment, planning and the preservation and re-creation of historical sites
- Conduct community and neighbourhood physical planning studies, participate in multidisciplinary urban design studies and prepare design guidelines
- May manage and supervise landscape construction work.

Employment requirements

- A bachelor's degree in landscape architecture is required.
- A master's degree in landscape architecture may be required.
- In Ontario and British Columbia, landscape architects require a two-year internship and the successful completion of a provincial registration exam.

- In the remaining provinces and territories, landscape architects usually require two years of landscape design experience and an interview by their respective provincial associations to receive association certification.
- Leadership in Energy and Environmental Design (LEED) certification is offered by the Canada Green Building Council and may be required by some employers.

- *Urban and land use planners* (2153)

2153 Urban and land use planners

Urban and land use planners develop plans and recommend policies for managing land use, physical facilities and associated services for urban and rural areas and remote regions. They are employed by all levels of government, land developers, engineering and other consulting companies, or may work as private consultants.

Example titles

community and urban planner
environmental planner
land use planner
municipal planner
park planner

planner
recreation planner
regional planner
urban planner

Main duties

Urban and land use planners perform some or all of the following duties:

- Compile and analyze data on demographic, economic, legal, political, cultural, sociological, physical and other factors affecting land use
- Confer with municipal, provincial and federal authorities, civic leaders, social scientists, lawyers, land developers, the public and special interest groups to formulate and develop land use or community plans
- Prepare and recommend land development concepts and plans for zoning, subdivisions, transportation, public utilities, community facilities, parks, agricultural and other land uses
- Prepare plans for environmental protection, such as wildlife preserves, national and provincial parks, and protection of watersheds
- Present plans to civic, rural and regional authorities and hold public meetings to present plans, proposals or planning studies to the general public and special interest groups
- Review and evaluate proposals for land use and development plans and prepare recommendations
- Process application for land development permits and administer land use plans and zoning by-laws
- Formulate long-range objectives and policies relative to future land use and the protection of the environment
- Supervise and co-ordinate work of urban planning technicians and technologists.

Employment requirements

- A bachelor's degree in urban and regional planning, geography, architecture, engineering or a related discipline is required.

- A master's degree in one of these disciplines may be required.
- Membership in the Canadian Institute of Planners is usually required.
- Membership in a provincial planning institute may be required in some provinces.
- Leadership in Energy and Environmental Design (LEED) certification is offered by the Canada Green Building Council and may be required by some employers.

Additional information

- Progression to management positions in planning is possible with experience.

2154 Land surveyors

Land surveyors plan, direct and conduct legal surveys to establish the location of real property boundaries, contours and other natural or human-made features, and prepare and maintain cross-sectional drawings, official plans, records and documents pertaining to these surveys. They are employed by federal, provincial and municipal governments, private sector land surveying establishments, real estate development, natural resource, engineering and construction firms, or they may be self-employed.

Example titles

commissioned land surveyor
land surveyor
legal surveyor

professional land surveyor
property surveyor

Main duties

Land surveyors perform some or all of the following duties:

- Develop survey plans, methods and procedures for conducting legal surveys
- Plan, direct and supervise or conduct surveys to establish and mark legal boundaries of properties, parcels of lands, provincial and Canada Lands, Aboriginal land claims, wellsites, mining claims, utility rights-of-way, roadways and highways
- Survey and lay out subdivisions for rural and urban development
- Determine precise locations using electronic distance measuring equipment and global positioning systems (GPS)
- Analyze, manage and display data using geographic information systems (GIS) and computer-aided design and drafting (CAD)
- Record all measurements and other information obtained during survey activities
- Prepare or supervise the preparation and compilation of all data, plans, charts, records and documents related to surveys of real property boundaries
- Certify and assume liability for surveys made to establish real property boundaries
- Advise, provide consultation and testify as an expert witness on matters related to legal surveys.

Employment requirements

- A bachelor's degree in geomatics engineering or survey engineering
or
A college diploma in survey science or geomatics technology with additional academic credits and successful completion of equivalent examinations set by a regional board of examiners for land surveyors is required.
- A one- to three-year articling period is required.
- Successful completion of professional land surveyor examinations is required.
- A federal or provincial land surveyor's licence is required.

Additional information

- Federal statutes require a separate license from the Association of Canada Land Surveyors to survey areas such as national parks, Aboriginal lands, offshore areas and northern territories.

Classified elsewhere

2161 Mathematicians, statisticians and actuaries

Mathematicians and statisticians research mathematical or statistical theories, and develop and apply mathematical or statistical techniques for solving problems in such fields as science, engineering, business and social science. Actuaries apply mathematics, statistics, probability and risk theory to assess potential financial impacts of future events. Mathematicians, statisticians and actuaries are employed by universities, governments, bank and trust companies, insurance companies, pension benefit consulting firms, professional associations, and science and engineering consulting firms.

Example titles

actuary	insurance actuary
biostatistician	mathematician
consulting actuary	statistical analyst
demographer	statistician

Main duties

Mathematicians, statisticians and actuaries perform some or all of the following duties:

- Mathematicians conduct research to extend mathematical knowledge in traditional areas of mathematics such as algebra, geometry, probability and logic and apply mathematical techniques to the solution of problems in scientific fields such as physical science, engineering, computer science or other fields such as operations research, business or management.
- Statisticians conduct research into the mathematical basis of the science of statistics, develop statistical methodology and advise on the practical application of statistical methodology. They also apply statistical theory and methods to provide information in scientific and other fields such as biological and agricultural science, business and economics, physical sciences and engineering, and the social sciences.
- Actuaries apply mathematical models to forecast and calculate the probable future costs of insurance and pension benefits. They design life, health, and property insurance policies, and calculate premiums, contributions and benefits for insurance policies, and pension and superannuation plans. They may assist investment fund managers in portfolio asset allocation decisions and risk management. They also use these techniques to provide legal evidence on the value of future earnings.

Employment requirements

- Mathematicians and statisticians usually require a graduate degree in mathematics or statistics.

- Actuaries usually require post-secondary education in actuarial science, mathematics, statistics, economics, commerce or business administration.
- Actuaries are conferred fellowships through the Canadian Institute of Actuaries upon successful completion of professional examinations *and* Three years of work experience in the actuarial field as an actuarial assistant or in a related position.

Additional information

- With experience, actuaries may progress to managerial positions in consulting, insurance and finance. They may also be self-employed.

2171 Information systems analysts and consultants

Information systems analysts and consultants analyze systems requirements, develop and implement information systems development plans, policies and procedures, and provide advice on a wide range of information systems issues. They are employed in information technology consulting firms and in information technology units throughout the private and public sectors, or they may be self-employed.

Example titles

computer systems analyst
informatics consultant
informatics security analyst
information systems business analyst
information systems quality assurance analyst

IT (information technology) consultant
management information systems (MIS) analyst
systems auditor
systems consultant
systems security analyst

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Information systems business analysts and consultants confer with clients to identify and document requirements, conduct business and technical studies, design, develop, integrate and implement information systems business solutions, and provide advice on information systems strategy, policy, management, security and service delivery.
- Systems security analysts confer with clients to identify and document requirements, assess physical and technical security risks to data, software and hardware, and develop policies, procedures and contingency plans to minimize the effects of security breaches.
- Information systems quality assurance analysts develop and implement policies and procedures throughout the software development life cycle to maximize the efficiency, effectiveness and overall quality of software products and information systems.
- Systems auditors conduct independent third-party reviews to assess quality assurance practices, software products and information systems.

Employment requirements

- A bachelor's degree in computer science, computer systems engineering, software engineering, business administration or a related discipline
or
Completion of a college program in computer science is usually required.
- Experience as a computer programmer is usually required.

- Certification or training provided by software vendors may be required by some employers.

Classified elsewhere

- *Computer and information systems managers* (0213)
- *Computer engineers (except software engineers and designers)* (2147)
- *Computer programmers and interactive media developers* (2174)
- *Database analysts and data administrators* (2172)
- *Financial auditors and accountants* (1111)
- *Professional occupations in business management consulting* (1122)
- *Software engineers and designers* (2173)
- *Web designers and developers* (2175)

2172 Database analysts and data administrators

Database analysts design, develop and administer data management solutions using database management software. Data administrators develop and implement data administration policy, standards and models. They are employed in information technology consulting firms and in information technology units throughout the private and public sectors.

Example titles

data administrator

database administrator (DBA)

database analyst

database architect

data custodian

data dictionary administrator

data warehouse analyst

technical architect – database

Main duties

Database analysts perform some or all of the following duties:

- Collect and document user requirements
- Design and develop database architecture for information systems projects
- Design, construct, modify, integrate, implement and test data models and database management systems
- Conduct research and provide advice to other informatics professionals regarding the selection, application and implementation of database management tools
- Operate database management systems to analyze data and perform data mining analysis.
- May lead, co-ordinate or supervise other workers in this group.

Data administrators perform some or all of the following duties:

- Develop and implement data administration policy, standards and models
- Research and document data requirements, data collection and administration policy, data access rules and security
- Develop policies and procedures for network and/or Internet database access and usage and for the backup and recovery of data
- Conduct research and provide advice to other information systems professionals regarding the collection, availability, security and suitability of data
- Write scripts related to stored procedures and triggers
- May lead and co-ordinate teams of data administrators in the development and implementation of data policies, standards and models.

Employment requirements

- A bachelor's degree, usually in computer science or in mathematics
or
Completion of a college program in computer science is usually required.
- Computer programming experience is usually required.

Classified elsewhere

- *Computer and information systems managers* (0213)
- *Computer engineers (except software engineers and designers)* (2147)
- *Computer programmers and interactive media developers* (2174)
- *Information systems analysts and consultants* (2171)
- *Software engineers and designers* (2173)
- *Web designers and developers* (2175)

2173 Software engineers and designers

Software engineers and designers research, design, evaluate, integrate and maintain software applications, technical environments, operating systems, embedded software, information warehouses and telecommunications software. They are employed in information technology consulting firms, information technology research and development firms, and information technology units throughout the private and public sectors, or they may be self-employed.

Example titles

application architect

computer software engineer

embedded software engineer

software architect

software design engineer

software designer

software design verification engineer

software testing engineer

systems integration engineer – software

technical architect – software

telecommunications software engineer

Main duties

Software engineers and designers perform some or all of the following duties:

- Collect and document users' requirements and develop logical and physical specifications
- Research, evaluate and synthesize technical information to design, develop and test computer-based systems
- Develop data, process and network models to optimize architecture and to evaluate the performance and reliability of designs
- Plan, design and co-ordinate the development, installation, integration and operation of computer-based systems
- Assess, test, troubleshoot, document, upgrade and develop maintenance procedures for operating systems, communications environments and applications software
- May lead and co-ordinate teams of information systems professionals in the development of software and integrated information systems, process control software and other embedded software control systems.

Employment requirements

- A bachelor's degree, usually in computer science, computer systems engineering, software engineering or mathematics
or
Completion of a college program in computer science is usually required.
- A master's or doctoral degree in a related discipline may be required.

- Licensing by a provincial or territorial association of professional engineers is required to approve engineering drawings and reports and to practise as a Professional Engineer (P.Eng.).
- Engineers are eligible for registration following graduation from an accredited educational program, three or four years of supervised work experience in engineering, and passing a professional practice examination.
- Experience as a computer programmer is usually required.

Classified elsewhere

- *Computer and information systems managers* (0213)
- *Computer engineers (except software engineers and designers)* (2147)
- *Computer programmers and interactive media developers* (2174)
- *Database analysts and data administrators* (2172)
- *Electrical and electronics engineers* (2133)
- *Information systems analysts and consultants* (2171)
- *Information systems testing technicians* (2283)
- *Web designers and developers* (2175)

2174 Computer programmers and interactive media developers

Computer programmers write, modify, integrate and test computer code for microcomputer and mainframe software applications, data processing applications, operating systems-level software and communications software. Interactive media developers write, modify, integrate and test computer code for Internet applications, computer-based training software, computer games, film, video and other interactive media. They are employed in computer software development firms, information technology consulting firms, and in information technology units throughout the private and public sectors.

Example titles

application programmer	operating systems programmer
business application programmer	programmer analyst
computer game developer	scientific programmer
computer programmer	software developer
e-business (electronic business) software developer	software programmer
interactive media developer	systems programmer
multimedia developer	Web programmer

Main duties

Computer programmers perform some or all of the following duties:

- Write, modify, integrate and test software code
- Maintain existing computer programs by making modifications as required
- Identify and communicate technical problems, processes and solutions
- Prepare reports, manuals and other documentation on the status, operation and maintenance of software
- Assist in the collection and documentation of user requirements
- Assist in the development of logical and physical specifications
- May lead and co-ordinate teams of computer programmers
- May research and evaluate a variety of software products.

Interactive media developers perform some or all of the following duties:

- Program animation software to predefined specifications for interactive CDs, DVDs, video game cartridges and Internet-based applications
- Program special effects software for film and video applications
- Write, modify, integrate and test software code for e-commerce and other Internet applications
- Assist in the collection and documentation of user requirements
- Assist in the development of logical and physical specifications

- May lead and co-ordinate teams of interactive media developers
- May research and evaluate a variety of interactive media software products.

Employment requirements

- A bachelor's degree in computer science or in another discipline with a significant programming component
or
Completion of a college program in computer science is usually required.
- Specialization in programming for engineering and scientific applications requires specific post-secondary study or experience.

Additional information

- Progression to information systems analyst, software engineer or Web designer is possible with experience.

- *Software engineers and designers* (2173)
- *Web designers and developers* (2175)

2175 Web designers and developers

Web designers and developers research, design, develop and produce Internet and Intranet sites. They are employed in computer software development firms, information technology consulting firms, information technology units throughout the private and public sectors, advertising agencies or they may be self-employed.

Example titles

e-business Web site developer
Internet site designer
Internet site developer
Intranet site designer
Web designer

Web developer
Web manager
Webmaster
Web site developer

Main duties

Web designers and developers perform some or all of the following duties:

- Consult with clients to develop and document Web site requirements
- Prepare mock-ups and storyboards
- Develop Web site architecture and determine hardware and software requirements
- Source, select and organize information for inclusion and design the appearance, layout and flow of the Web site
- Create and optimize content for the Web site using a variety of graphics, database, animation and other software
- Plan, design, write, modify, integrate and test Web-site related code
- Conduct tests and perform security and quality controls
- May lead and co-ordinate multidisciplinary teams to develop Web site graphics, content, capacity and interactivity
- May research and evaluate a variety of interactive media software products.

Employment requirements

- A bachelor's degree, usually in computer science, communications or business
or
Completion of a college program in computer science, graphic arts, Web design or business is required.
- Experience as a computer programmer or graphic designer is usually required.

Classified elsewhere

- *Computer network technicians* (2281)

2211 Chemical technologists and technicians

Chemical technologists and technicians provide technical support and services or may work independently in chemical engineering, chemical and biochemical research and analysis, industrial chemistry, chemical quality control and environmental protection. They are employed by research and development and quality control laboratories, consulting engineering companies, in chemical, petrochemical, pharmaceutical and a variety of other manufacturing and processing industries, and by utilities, health, educational and government establishments.

Example titles

analytical technician, chemical
biochemistry technologist
chemical analyst
chemical engineering technician
chemical engineering technologist
chemical laboratory analyst
chemical research technician
chemical technician
chemical technologist
food technologist

formulation technician
geochemical technician
industrial hygiene technologist
mass spectrometer technician
master dyer – textiles
paint technician
pilot plant technician
quality control technician – chemical processing
quality control technician – food processing

Main duties

Chemical technologists perform some or all of the following duties:

- Set up and conduct chemical experiments, tests and analyses using techniques such as chromatography, spectroscopy, physical and chemical separation techniques and microscopy
- Operate and maintain laboratory equipment and apparatus and prepare solutions of gas or liquid, reagents, and sample formulations
- Compile records and interpret experimental or analytical results
- Develop and conduct programs of sampling and analysis to maintain quality standards of raw materials, chemical intermediates and products
- Assist in the development of chemical engineering processes, studies of chemical engineering procurement, construction, inspection and maintenance and the development of standards, procedures and health and safety measures
- Operate experimental chemical or petrochemical pilot plants
- Conduct or assist in air and water quality testing and assessments, environmental monitoring and protection activities, and development of and compliance with standards
- Assist in synthesis of small molecules for the purpose of creating drug candidates
- Assist in the design and fabrication of experimental apparatus.

Chemical technicians perform some or all of the following duties:

- Assist in setting up and conducting chemical experiments, tests and analyses
- Operate and maintain laboratory equipment and apparatus and prepare solutions of gas and liquid, reagents and sample formulations
- Compile records for analytical studies
- Assist in developing and conducting programs of sampling and analysis to maintain quality standards
- Carry out a limited range of other technical functions in support of chemical research, tests and analyses, and environmental air and water quality monitoring and protection
- Assist in the design and fabrication of experimental apparatus.

Employment requirements

- Chemical technologists usually require completion of a two- or three-year college program in chemical, biochemical or chemical engineering technology or a closely related discipline.
- Chemical technicians usually require completion of a one- or two-year college program in chemical, biochemical or chemical engineering technology.
- National certification for chemical technologists and technicians is available through the Canadian Society for Chemical Technology.

2211 Chemical technologists and technicians

- Certification in chemical engineering technology or in a related field is available through provincial associations of engineering/applied science technologists and technicians and may be required by employers.
- In Quebec, membership in the regulatory body is required to use the title "Professional Technologist."
- A period of supervised work experience, usually two years, is required before certification.

Additional information

- Considerable mobility is possible among jobs within this occupational group.
- Progression to managerial positions is possible with experience.
- Some chemical technologists and technicians working in support of fundamental research in chemistry or biochemistry are university graduates.

Classified elsewhere

- Biochemistry technologists working as medical laboratory technologists (in 3211 *Medical laboratory technologists*)
- Process technicians who operate the controls of chemical or petrochemical processing plants (in 9232 *Petroleum, gas and chemical process operators*)

2212 Geological and mineral technologists and technicians

Geological and mineral technologists and technicians provide technical support and services or may work independently in the fields of oil and gas exploration and production, geophysics, petroleum engineering, geology, mining and mining engineering, mineralogy, extractive and physical metallurgy, metallurgical engineering and environmental protection. They are employed by petroleum and mining companies, consulting geology and engineering firms, and by governments and educational institutions as well as by a variety of manufacturing, construction and utilities companies.

Example titles

assayer
geological technician
geophysical technologist
groundwater technologist
log technician
marine geoscience technologist
metallurgical technologist
mineralogy technician
mining engineering technologist

mining technologist
petroleum engineering technologist
petroleum technician
petrology technician
reservoir engineering technician
rock mechanics technician
seismic technician
welding technologist

Main duties

Geological and mineral technologists perform some or all of the following duties:

- Conduct or direct geological, geophysical, geochemical, hydrographic or oceanographic surveys, prospecting field trips, exploratory drilling, well logging or underground mine survey programs
- Configure, operate and maintain geophysical survey and well logging instruments and equipment
- Prepare notes, sketches, geological maps and cross sections
- Prepare, transcribe or analyze seismic, gravimetric, well log or other geophysical and survey data
- Assist engineers and geologists in the evaluation and analysis of petroleum and mineral reservoirs
- Prepare or supervise the preparation of rock, mineral or metal samples and perform physical and chemical laboratory tests
- Conduct or assist in environmental audits, in the design of measures to minimize undesirable environmental effects of new or expanded mining and oil and gas operations, and in the development of waste management and other related environmental protection procedures
- May supervise oil and gas well drilling, well completions and work-overs

- May conduct or supervise studies and programs related to mine development, mining methods, mine ventilation, lighting, drainage and ground control
- May assist engineers and metallurgists in specifying material selection, metal treatments or corrosion protection systems
- May assist hydrogeologists in evaluating groundwater and well circulation and in report preparation
- May develop specifications for heat treatment of metals or for welding, design welding fixtures, troubleshoot welding processes or quality problems and supervise welding projects
- May co-ordinate crew members' activities during seismic tests.

Geological and mineral technicians perform some or all of the following duties:

- Participate in geological, geophysical, geochemical, hydrographic or oceanographic surveys, prospecting field trips, exploratory drilling, well logging or underground mine survey programs and in environmental audits and related environmental protection activities
- Operate and maintain geophysical survey and well logging instruments and equipment
- Prepare notes, sketches, geological maps and cross sections
- Assist in preparing, transcribing or analyzing seismic, gravimetric, well log or other geophysical and survey data

2212 Geological and mineral technologists and technicians

- Assist in the preparation of rock, mineral or metal samples and in conducting physical and chemical laboratory tests
- Assist in hydrogeological field and laboratory studies and in preparation of reports
- Carry out a limited range of other technical functions in support of geology, geophysics and petroleum and mining engineering.

Employment requirements

- Geological and mineral technologists usually require completion of a two- to three-year college program in geological technology, petroleum technology, petroleum engineering technology, hydrogeology or groundwater technology, mining technology, mining engineering technology, mineralogy, metallurgical technology, or welding technology.
- Geophysics technologists usually require completion of a two- to three-year college program in electronics technology.
- Geological and mineral technicians usually require completion of a one- to two-year college program in a related field.
- Certification in geological and mineral technology or in a related field is available through provincial associations of engineering/applied science technologists and technicians and may be required by employers.
- In Quebec, membership in the regulatory body for professional technologists is required to use the title "Professional Technologist."
- A period of supervised work experience, usually two years, is required before certification.

Additional information

- There is limited mobility among occupations in this group.
- Mobility may be possible between geophysical technology and electronic technology.
- Mobility may be possible between some occupations in this group and related fields of civil engineering technology.

Classified elsewhere

- *Civil engineering technologists and technicians* (2231)
- *Contractors and supervisors, oil and gas drilling and services* (8222)
- *Electrical and electronics engineering technologists and technicians* (2241)
- *Supervisors, mining and quarrying* (8221)
- *Technical occupations in geomatics and meteorology* (2255)

2221 Biological technologists and technicians

Biological technologists and technicians provide technical support and services to scientists, engineers and other professionals working in fields such as agriculture, resource management, environmental protection, plant and animal biology, microbiology, cell and molecular biology and health sciences, or may work independently in these fields. They are employed in both laboratory and field settings by governments, manufacturers of food products, chemicals and pharmaceuticals, biotechnology companies, health, research and educational institutions, environmental consulting companies, and resource and utilities companies.

Example titles

agricultural technician
agricultural technologist
agrology technician
aquaculture technician
bacteriological technician
biological laboratory technologist
botanical technician
fisheries technician

fish hatchery technician
food bacteriological technician
microbiology quality control technologist
microbiology technologist (except medical)
plant breeding technician
seed technologist
wildlife biology technician

Main duties

Biological technologists perform some or all of the following duties:

- Set up and conduct biological, microbiological and biochemical tests and laboratory analyses in support of research and quality control in food production, sanitation, pharmaceutical production, biotechnology and other fields
- Apply methods and techniques such as microscopy, histochemistry, chromatography, electrophoresis and spectroscopy
- Perform experimental procedures in agriculture, plant breeding, animal husbandry, biology and biomedical research
- Conduct field research and surveys to collect data and samples of water, soil, and plant and animal populations
- Conduct environmental monitoring and compliance activities for the protection of fisheries stock, wildlife and other natural resources
- Analyze data and prepare reports
- Conduct or supervise operational programs such as fish hatchery, greenhouse and livestock production programs.

Biological technicians perform some or all of the following duties:

- Assist in conducting biological, microbiological and biochemical tests and laboratory analyses

- Perform limited range of technical functions in support of agriculture, plant breeding, animal husbandry, biology, biomedical research and environmental protection
- Assist in conducting field research and surveys to collect data and samples of water, soil, and plant and animal populations
- Assist in analysis of data and preparation of reports.

Employment requirements

- Completion of a two- to three-year college program in a field related to agriculture, biology, microbiology, wildlife or resource management is usually required for employment as a biological technologist.
- Completion of a one- to two-year college program in a related field is required for employment as a biological technician.
- Certification with provincial associations is available, but voluntary.

Additional information

- There is limited mobility among occupations in this group.
- Some technologists and technicians working in support of government and academic research in biology are university graduates.

- *Conservation and fishery officers (2224)*
- *Forestry technologists and technicians (2223)*
- *Medical laboratory technicians and pathologists' assistants (3212)*
- *Medical laboratory technologists (3211)*

2222 Agricultural and fish products inspectors

Agricultural and fish products inspectors inspect agricultural and fish products for conformity to prescribed production, storage and transportation standards. They are employed by government departments and agencies and by private sector food processing companies. Supervisors of agricultural and fish products inspectors are also included in this group.

Example titles

agricultural products inspector
crop certification inspector
dairy products inspector
fish inspector
fish products inspector
fruit and vegetables inspector
grain inspector

livestock inspector
meat inspector
plant protection inspector
poultry inspector
supervisor, agricultural products inspection
supervisor, fish products inspection

Main duties

The following is a summary of main duties for some occupations in this unit group:

- Fish and fish products inspectors inspect fish, fish products, fish handling and processing methods and prepare reports and ensure that regulations are followed.
- Fruit and vegetables inspectors inspect fresh and frozen fruit and vegetables at inspection centres and prepare reports on crop production and market conditions.
- Grain inspectors inspect and grade all classes of grain at terminal elevators, monitor the fumigation of infested grain, and examine storage, handling and transportation equipment to ensure that sanitary procedures are followed.
- Meat inspectors monitor the operations and sanitary conditions of slaughtering and meat processing plants and inspect carcasses to ensure they are fit for human consumption.
- Plant protection inspectors certify seed crops, oversee the quarantine, treatment or destruction of plants and plant products, and the fumigation of plants and plant product imports and exports.

Employment requirements

- Completion of secondary school is required.
- Government inspectors usually require a bachelor's degree or college diploma in agriculture, biology, chemistry, food processing technology or a related discipline.
- Inspectors (other than government) may require a bachelor's degree or college diploma in a related discipline.

- Several years of experience in agricultural production or fish processing are usually required.
- Completion of in-house training courses is required.

Additional information

- Progression to managerial positions in this field is possible with experience.

Classified elsewhere

2223 Forestry technologists and technicians

Forestry technologists and technicians may work independently or perform technical and supervisory functions in support of forestry research, forest management, forest harvesting, forest resource conservation and environmental protection. They are employed by the forest industry sector, provincial and federal governments, consulting firms, and other industries and institutions, or they may be self-employed.

Example titles

conservation technician – forestry
cruising technician – forestry
enforcement officer – forestry
extension ranger – forestry
fire suppression officer – forestry
forest fire technician
forestry technician
forestry technologist

forest survey technician
forest technician
resource officer, forest inventory
resource technician – forestry
scaler technician – logging
scaling co-ordinator – logging
silviculture technician

Main duties

Forestry technologists and technicians perform some or all of the following duties:

- Conduct, supervise and participate in forest inventory cruises, surveys and field measurements following accepted scientific and operational procedures
- Assist and perform technical functions in the preparation of forest management and harvest plans using photogrammetric and mapping techniques and computerized information systems
- Assist in planning and supervise construction of access routes and forest roads
- Implement, supervise and perform technical functions in silvicultural operations involving site preparation, planting, and tending of tree crops
- Co-ordinate activities such as timber scaling, forest fire suppression, disease or insect control or pre-commercial thinning of forest stands
- Supervise and perform technical functions in forest harvesting operations
- Monitor activities of logging companies and contractors and enforce regulations such as those concerning environmental protection, resource utilization, fire safety and accident prevention
- Provide forestry education, advice and recommendations to woodlot owners, community organizations and the general public
- Develop and maintain computer databases
- Supervise forest tree nursery operations

- Provide technical support to forestry research programs in areas such as tree improvement, seed orchard operations, insect and disease surveys or experimental forestry and forest engineering research.

Employment requirements

- Completion of a one- to three-year college program in forestry technology or in a renewable resource program or forest ranger program is usually required.
- Certification by, or registration with, a provincial association as a forestry technologist or technician may be required.
- Certification or licensing as a scaler is required for some positions.
- In Quebec, membership in the regulatory body for professional technologists is required to use the title "Professional Technologist."

Additional information

- Mobility may be possible to occupations in natural resource and wildlife management and in parks management.

Classified elsewhere

2224 Conservation and fishery officers

This unit group includes conservation and fishery officers, inspectors and observers who enforce federal and provincial regulations established for the protection of fish, wildlife and other natural resources and collect and relay information on resource management. They are employed by federal and provincial government departments.

Example titles

conservation officer
fish and wildlife officer
fishery officer
forest ranger – wildlife management

game officer
game warden
natural resources officer
park ranger

Main duties

Conservation and fishery officers, inspectors and observers perform some or all of the following duties:

- Generate public awareness of fish and wildlife conservation and regulations
- Conduct patrols by truck, aircraft, boat, or on foot, to ensure compliance with the provincial and federal statutes relating to fish, wildlife and the environment
- Investigate complaints, arrest violators, prepare briefs and present evidence in court
- Issue licences, export documents and special permits and collect royalties assessed on fish, wildlife and timber resources
- Implement and supervise approved techniques in preventing or overcoming damage caused by wildlife
- Perform resource protection duties, such as inspecting fishing gear and equipment and monitoring fishing activities for compliance with regulations
- Gather resource data by making inventories of fish, collecting water samples and assisting biologists in scientific research
- Supervise or provide firearms safety training courses and trapper education courses.

Employment requirements

- Completion of a college program in renewable resources management, environmental conservation or a related discipline is usually required.
- On-the-job training and courses related to law enforcement and resource management are provided.
- A class-5 driver's licence, pesticide applicator's licence and explosives licence may be required.

Additional information

- Progression to senior and supervisory positions is possible with experience.

Classified elsewhere

- Fish inspectors (in 2222 *Agricultural and fish products inspectors*)
- *Forestry technologists and technicians* (2223)

2225 Landscape and horticulture technicians and specialists

This unit group includes those who survey and assess landscapes; draw sketches and build models of landscape designs; construct and maintain gardens, parks, golf courses and other landscaped environments; advise clients on issues related to horticulture such as irrigation; breed, cultivate and study plants; and treat injured and diseased trees and plants. They are employed by landscape designers and contractors, lawn service and tree care establishments, golf courses, nurseries and greenhouses, and municipal, provincial and national parks, or they may be self-employed.

Example titles

arborist	landscape architectural technician
golf course superintendent	landscape designer
greenskeeper	landscape gardener
horticultural technician	landscaper
horticulture specialist	landscape technician
horticulturist	lawn care specialist
hydroponics technician	tree service technician

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Arborists and tree service technicians examine trees and shrubs to diagnose problems and disease, and apply various treatments such as pruning, spraying, repairing damaged areas and injecting with treatment solutions.
- Golf course superintendents direct crews who maintain the health and appearance of golf courses and their surrounding landscapes, plant and move trees, and apply fertilizers, fungicides, herbicides and pesticides.
- Horticulturists plan and co-ordinate the growth and use of plants for landscaping, ornamental uses and other purposes.
- Landscape designers and landscape architectural technicians and technologists survey and assess sites, prepare drawings, sketches and reports and perform other duties to assist landscape architects in designing landscaped environments.
- Landscape gardeners plant and maintain private and public lawns and gardens.
- Landscapers plan and construct landscaped environments which may include trees, shrubberies, lawns, fences, decks, patios and other landscape structures.
- Lawn care specialists visit clients, assess the health of lawns, and apply fertilizer, pesticides and other lawn care products.

Employment requirements

- Completion of a university or college program in agronomy, arboriculture, horticulture, landscaping, landscape design or landscape technology is usually required.
- Experience as a landscape and grounds maintenance labourer may be required for golf course superintendents, landscape gardeners and landscapers.
- An apprenticeship program is available for horticulturists, arboriculturists and landscape gardeners.
- A provincial licence to apply chemical fertilizers, fungicides, herbicides and pesticides may be required.
- In Quebec, membership in the regulatory body is required to use the title of Professional Technologist.

Classified elsewhere

- *Nursery and greenhouse workers* (8432)

2231 Civil engineering technologists and technicians

Civil engineering technologists and technicians provide technical support and services to scientists, engineers and other professionals, or may work independently in fields such as structural engineering, municipal engineering, construction design and supervision, highways and transportation engineering, water resources engineering, geotechnical engineering and environmental protection. They are employed by consulting engineering and construction companies, public works, transportation and other government departments and in many other industries.

Example titles

bridge design technician
building materials technician
civil engineering technician
civil engineering technologist
construction technologist
foundation technologist

highway technician
municipal engineering assistant
soil technologist – civil engineering
specifications writer, construction
structural design technologist
structural investigator

Main duties

Civil engineering technologists perform some or all of the following duties:

- Develop engineering designs and drawings from preliminary concepts and sketches
- Prepare construction specifications, cost and material estimates, project schedules and reports
- Supervise or conduct field surveys, inspections or technical investigations of topography, soils, drainage and water supply systems, road and highway systems, buildings and structures to provide data for engineering projects
- Conduct or supervise inspection and testing of construction materials
- May supervise, monitor and inspect construction projects.

Civil engineering technicians perform some or all of the following duties:

- Assist in developing engineering specifications and drawings
- Participate in field surveys, inspections or technical investigations of topography, soils, drainage and water supply systems, road and highway systems, buildings and structures to provide data for engineering projects
- Perform other technical functions in support of civil engineering activities.

Employment requirements

- Completion of a two- or three-year college program in civil engineering technology or a closely related discipline is usually required for civil engineering technologists.

- Completion of a one- or two-year college program in civil engineering technology is usually required for civil engineering technicians.
- Certification in civil engineering technology or in a related field is available through provincial associations of engineering/applied science technologists and technicians and may be required for some positions.
- A period of supervised work experience, usually two years, is required before certification.
- In Quebec, membership in the regulatory body for professional technologists is required to use the title "Professional Technologist."

Additional information

- There is mobility to related occupations, such as drafting technologists and technicians and construction inspectors and estimators.
- Progression to construction supervisors or construction managers is possible with experience.

Classified elsewhere

- *Architectural technologists and technicians* (2251)
- *Construction estimators* (2234)
- *Construction inspectors* (2264)

- *Land survey technologists and technicians* (2254)
- *Urban and land use planners* (2153)

2232 Mechanical engineering technologists and technicians

Mechanical engineering technologists and technicians provide technical support and services or may work independently in mechanical engineering fields such as the design, development, maintenance and testing of machines, components, tools, heating and ventilating systems, power generation and power conversion plants, manufacturing plants and equipment. They are employed by consulting engineering, manufacturing and processing companies, institutions and government departments.

Example titles

aeronautical technologist
heating designer
HVAC (heating, ventilation and air conditioning)
technologist
machine designer
marine engineering technologist
mechanical engineering technician

mechanical engineering technologist
mechanical technologist
mould designer
thermal station technician
tool and die designer
tool designer

Main duties

Mechanical engineering technologists perform some or all of the following duties:

- Prepare and interpret conventional and computer-assisted design (CAD) engineering designs, drawings, and specifications for machines and components, power transmission systems, process piping, heating, ventilating and air-conditioning systems
- Prepare cost and material estimates, project schedules and reports
- Conduct tests and analyses of machines, components and materials to determine their performance, strength, response to stress and other characteristics
- Design moulds, tools, dies, jigs and fixtures for use in manufacturing processes
- Inspect mechanical installations and construction
- Prepare contract and tender documents
- Supervise, monitor and inspect mechanical installations and construction projects
- Prepare standards and schedules and supervise mechanical maintenance programs or operations of mechanical plants.

Mechanical engineering technicians perform some or all of the following duties:

- Assist in preparing conventional and computer-assisted design (CAD) engineering designs, drawings and specifications
- Carry out a limited range of mechanical tests and analyses of machines, components and materials
- Assist in the design of moulds, tools, dies, jigs and fixtures for use in manufacturing processes

- Assist in inspection of mechanical installations and construction projects
- Participate in the installation, repair and maintenance of machinery and equipment.

Employment requirements

- Completion of a two- or three-year college program in mechanical engineering technology is usually required for mechanical engineering technologists.
- Completion of a one- or two-year college program in mechanical engineering technology is usually required for mechanical engineering technicians.
- Certification in mechanical engineering technology or in a related field is available through provincial associations of engineering/applied science technologists and technicians and may be required for some positions.
- A period of supervised work experience, usually two years, is required before certification.
- In Quebec, membership in the regulatory body is required to use the title "Professional Technologist."

Additional information

- There is mobility to other related occupations such as technical sales or drafting technologists and technicians.
- Progression to supervisory occupations such as mechanical construction supervisor, manufacturing supervisor or operations maintenance manager is possible with experience.

2232 Mechanical engineering technologists and technicians

Classified elsewhere

- *Drafting technologists and technicians (2253)*
- *Industrial designers (2252)*
- *Managers in manufacturing and utilities (091)*
- *Technical sales specialists – wholesale trade (6221)*

2233 Industrial engineering and manufacturing technologists and technicians

Industrial engineering and manufacturing technologists and technicians may work independently or provide technical support and services in the development of production methods, facilities and systems, and the planning, estimating, measuring and scheduling of work. They are employed by manufacturing and insurance companies, government departments, and establishments in other industries.

Example titles

CAD/CAM programmer	plastics manufacturing technician
industrial engineering technician	pulp and paper manufacturing technologist
industrial engineering technologist	quality assurance technologist
loss prevention technologist – manufacturing	scheduling technician – manufacturing
manufacturing technician	textile technologist
manufacturing technologist	time study analyst
planning technician	

Main duties

Industrial engineering and manufacturing technologists perform some or all of the following duties:

- Develop and conduct production, inventory and quality assurance programs in manufacturing or in other industries
- Design plant layouts and production facilities
- Develop and carry out work study and related programs
- Develop and carry out industrial health, safety and fire prevention plans and programs and conduct safety training programs
- Develop applications using CAD/CAM (computer-assisted drafting, computer-assisted manufacturing) for the control of robots, computer numerical control (CNC) machines and other manufacturing processes and operations.

Industrial engineering and manufacturing technicians perform some or all of the following duties:

- Assist in the design of plant layouts
- Conduct work measurement or other studies
- Collect and compile operational or experimental data and assist in the development of estimates, schedules, specifications and reports
- Collect and analyze data and samples in support of quality assurance and industrial health and safety programs
- Develop manufacturing and processing procedures and variables, set machine or equipment controls, oversee production and inspect processes.

Technologists and technicians in this unit group may specialize in the development of production processes, quality assurance programs, plans and schedules in a particular industrial area such as metal fabrication, plastics, pulp and paper, or textile manufacturing.

Employment requirements

- Completion of a two- or three-year college program or equivalent in industrial engineering technology, pulp and paper technology, plastics technology, textile technology, manufacturing technology or a related discipline is usually required for industrial engineering or manufacturing technologists.
- Completion of a one- or two-year college program in industrial engineering technology or in a related discipline is usually required for industrial engineering or manufacturing technicians.
- Certification in industrial engineering or manufacturing technology or in a related field is available through provincial or territorial associations of engineering/applied science technologists and technicians and may be required for some positions.
- A period of supervised work experience, usually two years, is required before certification.
- A college diploma in manufacturing technology and/or trade certification and experience in machining and tooling or metalworking is required for CAD-CAM/CNC programmers.
- In Quebec, membership in the regulatory body is required to use the title "Professional Technologist."

2233 Industrial engineering and manufacturing technologists and technicians

Additional information

- There is mobility to related fields such as technical sales.
- Progression to managerial positions is possible with experience.

Classified elsewhere

- *Machining, metal forming, shaping and erecting trades (723)*
- *Technical sales specialists – wholesale trade (6221)*
- *Textile technologists/technicians working in support of chemical dyeing and finishing and quality control technologists/technicians in food or chemical industries or laboratories (in 2211 *Chemical technologists and technicians*)*

2234 Construction estimators

Construction estimators analyze costs of and prepare estimates on civil engineering, architectural, structural, electrical and mechanical construction projects. They are employed by residential, commercial and industrial construction companies and major electrical, mechanical and trade contractors, or they may be self-employed.

Example titles

chief estimator – construction
construction estimator
cost estimator – construction

principal estimator – construction
professional quantity surveyor
quantity surveyor – construction

Main duties

Construction estimators perform some or all of the following duties:

- Prepare estimates of probable costs of materials, labour and equipment for construction projects based on contract bids, quotations, schematic drawings and specifications
- Advise on tendering procedures, examine and analyze tenders, recommend tender awards and conduct negotiations
- Establish and maintain tendering process and set up cost monitoring and reporting systems and procedures
- Prepare cost and expenditure statements and forecasts at regular intervals for the duration of a project
- Prepare and maintain a directory of suppliers, contractors and subcontractors
- Liaise, consult and communicate with engineers, architects, owners, contractors and subcontractors, and prepare economic feasibility studies on changes and adjustments to cost estimates
- Manage and co-ordinate construction projects and prepare construction progress schedules.

Estimators may specialize in estimating costs for structural, electrical or mechanical construction projects.

Employment requirements

- Completion of secondary school is required.
- Completion of a three-year college program in civil or construction engineering technology
or
Several years of experience as a qualified tradesperson in a construction trade such as plumbing, carpentry or electrical, are required.
- Certification by the Canadian Institute of Quantity Surveyors is usually required.

Additional information

- Progression to more senior positions in this unit group, such as senior estimator or to construction management positions is possible with experience.

Classified elsewhere

- *Architectural technologists and technicians* (2251)
- *Civil engineering technologists and technicians* (2231)
- *Civil engineers* (2131)
- *Construction managers* (0711)

2241 Electrical and electronics engineering technologists and technicians

Electrical and electronics engineering technologists and technicians may work independently or provide technical support and services in the design, development, testing, production and operation of electrical and electronic equipment and systems. They are employed by electrical utilities, communications companies, manufacturers of electrical and electronic equipment, consulting firms, and in governments and a wide range of manufacturing, processing and transportation industries.

Example titles

communications technologist
electrical engineering technician
electrical engineering technologist
electricity distribution network technologist
electronics design technologist
electronics engineering technician
electronics engineering technologist

electronics manufacturing technician
electronics manufacturing technologist
lighting technologist
metering technologist
microwave maintenance technician
production support technician – electronics manufacturing

Main duties

Electrical and electronics engineering technologists perform some or all of the following duties:

- Design, develop and test power equipment and systems, industrial process control systems, telecommunication, broadcast, recording and audiovisual systems, micro-electronic systems and circuits, computers, computer systems and networks, and computer software
- Supervise the building and testing of prototypes according to general instructions and established standards
- Conduct or supervise the installation, commissioning, and operation of electrical and electronic equipment and systems other than aircraft electronics or instruments
- Carry out applied research in fields of electrical and electronic engineering and physics under the direction of scientists or engineers
- Set up and operate specialized and standard test equipment to diagnose, test and analyze the performance of electrical and electronic components, assemblies and systems
- Write specifications, schedules and technical reports and control schedules and budgets.

Electrical and electronics engineering technicians perform some or all of the following duties:

- Assist in the design, development and testing of electrical and electronic components, equipment, and systems

- Assist in inspection, testing, adjusting and evaluation of incoming electrical, electro-mechanical and electronic components and assemblies to ensure conformance with product specifications and tolerances
- Conduct life tests (burn-ins) on assemblies and record and analyze results
- Assist in building and testing prototypes to specifications
- Carry out a limited range of technical functions in support of research in electrical and electronic engineering and physics
- Install, operate and maintain electrical and electronic equipment and systems
- Calibrate electrical or electronic equipment and instruments according to technical manuals and written instructions
- Collect and compile operational or experimental data and assist in the preparation of estimates, schedules, budgets, specifications and reports.

Employment requirements

- Completion of a two- or three-year college program in electrical or electronics engineering technology, computer engineering technology, telecommunications technology or an equivalent is usually required for electrical or electronics engineering technologists.
- Completion of a one- or two-year college program in electrical or electronics engineering technology is usually required for electrical or electronics engineering technicians.

2241 Electrical and electronics engineering technologists and technicians

- Certification in electrical or electronics engineering technology or in a related field is available through provincial associations of engineering/applied science technologists and technicians and may be required for some positions.
- A period of supervised work experience, usually two years, is required before certification.
- In Quebec, membership in the regulatory body for professional technologists is required to use the title "Professional Technologist."

Additional information

- There is mobility to other related occupations such as technical sales, electronics service technicians, instrument technicians and avionics technicians.
- Progression to managerial positions in engineering, production or operations is possible with experience.

Classified elsewhere

- *Aircraft instrument, electrical and avionics mechanics, technicians and inspectors* (2244)
- *Electronic service technicians (household and business equipment)* (2242)
- *Engineering managers* (0211)
- *Industrial instrument technicians and mechanics* (2243)
- *Manufacturing managers* (0911)
- *Technical sales specialists – wholesale trade* (6221)

2242 Electronic service technicians (household and business equipment)

Electronic service technicians service and repair household and business electronic equipment such as audio and video systems, computers and peripherals, office equipment and other consumer electronic equipment and assemblies. They are employed by electronic service and retail establishments, by wholesale distributors and within service departments of electronic manufacturing companies.

Example titles

alarm system technician	field service technician, electronic products
audio-video service technician	office equipment service technician
computer service technician	photocopy machine technician
electronic service technician apprentice	radio and television service technician
electronic service technician supervisor	satellite antenna servicer

Main duties

Electronic service technicians perform some or all of the following duties:

- Install, maintain and repair household and business electronic equipment, such as televisions, radios, video cassette recorders, stereo equipment, photocopiers, computers and peripherals
- Inspect and test electronic equipment, components and assemblies using multimeters, circuit testers, oscilloscopes, logic probes and other electronic test instruments, tools and equipment
- Diagnose and locate circuit, component and equipment faults
- Adjust, align, replace or repair electronic equipment, assemblies and components following equipment manuals and schematics, and using soldering tools and other hand and power tools
- Complete work orders, test and maintenance reports
- May supervise other electronic equipment service technicians.

Employment requirements

- Completion of a two- to three-year college program in electronics
or
Completion of a four-year apprenticeship program in electronic servicing and repair
or
Completion of high school or college courses in electronics and on-the-job training is required.
- Trade certification for electronics technicians (consumer products) is available, but voluntary, in Ontario, British Columbia and the Yukon.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Electrical and electronics engineering technologists and technicians (2241)*
- *Telecommunications installation and repair workers (7246)*

2243 Industrial instrument technicians and mechanics

Industrial instrument technicians and mechanics repair, maintain, calibrate, adjust, and install industrial measuring and controlling instrumentation. They are employed by pulp and paper processing companies, nuclear and hydro power generating companies, mining, petrochemical and natural gas companies, industrial instrument and other manufacturing companies, and by industrial instrument servicing establishments.

Example titles

apprentice industrial instrument mechanic
industrial instrument mechanic
instrumentation technician, industrial

instrument technician, industrial
process control equipment mechanic

Main duties

Industrial instrument technicians and mechanics perform some or all of the following duties:

- Consult manufacturer's manuals, circuit diagrams and blueprints to determine tests and maintenance procedures for instruments used for measuring and controlling flow, level, pressure, temperature, chemical composition and other variables in manufacturing and processing
- Inspect and test operation of instruments and systems to diagnose faults using pneumatic, electrical and electronic testing devices and precision measuring instruments
- Repair and adjust system components, such as sensors, transmitters and programmable logic controllers, or remove and replace defective parts
- Calibrate components and instruments according to manufacturers' specifications
- Perform scheduled preventive maintenance work and complete test and maintenance reports
- Install control and measurement instruments on existing and new plant equipment and processes
- Consult with and advise process operators.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four- or five-year apprenticeship program in industrial instrument repair
or
Completion of a two-year college program in industrial instrumentation technology and several years of work experience are usually required for trade certification.
- Instrumentation and control technician trade certification is available, but voluntary, in all provinces and territories, except in Quebec.

- Red Seal endorsement is also available to qualified instrumentation and control technicians upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Aircraft instrument technicians (in 2244 *Aircraft instrument, electrical and avionics mechanics, technicians and inspectors*)

2244 Aircraft instrument, electrical and avionics mechanics, technicians and inspectors

This unit group includes mechanics and technicians who install, adjust, repair and overhaul aircraft instrument, electrical or avionics systems on aircraft. This unit group also includes avionics inspectors who inspect instrument, electrical and avionics systems following assembly, modification, repair or overhaul. Workers in this unit group are employed by aircraft manufacturing, maintenance, repair and overhaul establishments and by airlines and other aircraft operators.

Example titles

aircraft electrical technician	avionics technician
aircraft electrician	inspector, avionics
aircraft instrument mechanic	instrument inspector, aircraft
aircraft instrument technician	instrument overhaul and repair mechanic –
aircraft maintenance engineer (AME) – avionics	avionics
avionics maintenance technician	

Main duties

The following is a summary of main duties for some occupations in this unit group:

- Aircraft instrument mechanics and technicians repair and overhaul, install, calibrate and test aircraft instruments.
- Aircraft electrical mechanics and technicians repair and overhaul, modify, install and test aircraft electrical systems and equipment.
- Avionics mechanics and technicians troubleshoot, repair and overhaul, test, modify, install and inspect aircraft electronic systems and components including communications, navigation, and autoflight equipment.
- Avionics inspectors inspect and test aircraft instrument, electrical and avionics systems and ensure that the installation, maintenance, repair and overhaul of these systems meet Transport Canada and company standards of performance and safety.

Aircraft mechanics and technicians who work in repair and overhaul shops service and test electrical, electronic and instrument components.

Avionics mechanics and technicians who work in maintenance hangars troubleshoot, repair, install and inspect aircraft systems and components.

Employment requirements

- Aircraft instrument and avionics mechanics and technicians require completion of a two- to three-year college program in avionics or electronics.
- Aircraft electrical mechanics and technicians require completion of a college program as an electrical or electronic technician.

- Four years of on-the-job or company apprenticeship training is required for all mechanics and technicians in this unit group.
- Avionics inspectors require completion of a two- to three-year college program in avionics or electronics
and
Three to five years of experience as an avionics mechanic or technician.
- Avionics inspectors, mechanics and technicians who sign maintenance releases and certify airworthiness require an Aircraft Maintenance Engineer's (AME) licence (category E – avionics) issued by Transport Canada.
- Industry certification is available from the Canadian Aviation Maintenance Council for some occupations in this unit group.
- In Quebec, membership in the regulatory body for professional technologists is required to use the title "Professional Technologist."

Additional information

- Avionics inspectors, maintenance technicians and mechanics may acquire further endorsements to their AME licence allowing them to inspect and certify a broader range of aircraft and avionics systems.
- An AME licence can be obtained by fulfilling the education and training requirements as stated above and passing Transport Canada AME examinations.
- Progression to supervisory positions within specific areas of expertise is possible with experience.

2244 Aircraft instrument, electrical and avionics mechanics, technicians and inspectors

Classified elsewhere

- *Aircraft assemblers and aircraft assembly inspectors (9521)*
- *Aircraft mechanics and maintenance engineers who maintain and inspect aircraft structures, mechanical, hydraulic or propulsion systems (in 7315 Aircraft mechanics and aircraft inspectors)*
- *Airworthiness inspectors – government (in 2262 Engineering inspectors and regulatory officers)*
- *Electrical mechanics (7333)*
- *Industrial instrument technicians and mechanics (2243)*

2251 Architectural technologists and technicians

Architectural technologists and technicians may work independently or provide technical assistance to professional architects and civil design engineers in conducting research, preparing drawings, architectural models, specifications and contracts and in supervising construction projects. Architectural technologists and technicians are employed by architectural and construction firms, and governments.

Example titles

architectural design technician
architectural design technologist

architectural technician
architectural technologist

Main duties

Architectural technologists and technicians perform some or all of the following duties:

- Assist in the development of architectural designs
- Analyze building codes, by-laws, space requirements, site requirements and other technical documents and reports
- Prepare manual and CAD (computer-assisted design) drawings, specifications, cost estimates and listings of quantities of material from conceptual drawings and instructions
- Construct architectural and display models, and 3-D virtual models of architectural designs
- Prepare contract and bidding documents
- May supervise drafters, technicians and technologists on the architectural team
- May supervise construction projects and coordinate, monitor and inspect work done by others.

Employment requirements

- Completion of a two- to three-year college program in architectural technology or a related subject is usually required.
- Certification in architectural technology or in a related field through provincial associations of architectural or engineering/applied science technologists and technicians may be required by employers.
- A period of supervised work experience, usually two years, is required before certification.
- In Quebec, membership in the regulatory body for professional technologists is required to use the title "Professional Technologist."

Additional information

- There is mobility to other related occupations such as drafters, civil engineering technologists and technicians, construction estimators and construction inspectors.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Architects* (2151)
- *Civil engineering technologists and technicians* (2231)
- *Construction estimators* (2234)
- *Construction inspectors* (2264)
- *Construction managers* (0711)
- *Drafting technologists and technicians* (2253)
- *Land survey technologists and technicians* (2254)

2252 Industrial designers

Industrial designers conceptualize and produce designs for manufactured products. They are employed by manufacturing industries and private design firms or they may be self-employed.

Example titles

furniture designer

industrial design consultant

industrial designer

industrial products designer

product designer

Main duties

Industrial designers perform some or all of the following duties:

- Consult with client, engineers or production specialists to establish product requirements
- Analyze the intended use of product and user preferences
- Conduct research into cost, properties of production materials and methods of production
- Prepare design concepts, sketches or models for approval
- Prepare manufacturing drawings, specifications and guidelines for production and construct prototype of design
- Consult with engineers and production staff during manufacturing stage.

Employment requirements

- A university degree in industrial design, architecture, engineering
or
A college diploma in industrial design is required.
- Creative ability, as demonstrated by a portfolio of work, is required.

Additional information

- There is mobility between positions in this unit group.
- Mobility is possible to other design occupations.

Classified elsewhere

- *Architectural technologists and technicians* (2251)
- Civil engineering design technologists (in 2231 *Civil engineering technologists and technicians*)
- Electrical and electronics design technologists (in 2241 *Electrical and electronics engineering technologists and technicians*)
- Engineering design and drafting technicians and technologists (in 2253 *Drafting technologists and technicians*)
- *Graphic designers and illustrators* (5241)
- *Interior designers and interior decorators* (5242)
- Mechanical engineering equipment designers (in 2232 *Mechanical engineering technologists and technicians*)
- *Theatre, fashion, exhibit and other creative designers* (5243)

2253 Drafting technologists and technicians

Drafting technologists and technicians prepare engineering designs, drawings and related technical information, in multidisciplinary engineering teams or in support of engineers, architects or industrial designers, or they may work independently. They are employed by consulting and construction companies, utility, resource and manufacturing companies, all levels of government and by a wide range of other establishments.

Example titles

architectural draftsman
computer-assisted design and drafting technologist
computer-assisted drafting (CAD) technician
design and drafting technologist
drafting technician
drafting technologist
draftsman
electrical draftsman

electromechanical draftsman
electronic draftsman
engineering design and drafting technologist
mechanical draftsman
steel detailer – drafting
structural draftsman
structural steel drafter-detailer
supervisor, drafting office

Main duties

Drafting technologists perform some or all of the following duties:

- Develop and prepare engineering designs and drawings from preliminary concepts, sketches, engineering calculations, specification sheets and other data
- Operate computer-assisted design (CAD) and drafting workstations
- Develop and prepare design sketches
- Complete documentation packages and produce drawing sets
- Check and verify design drawings to conform to specifications and design data
- Write technical reports
- Prepare contracts and tender documents
- Prepare construction specifications, costs and material estimates
- Supervise and train other technologists, technicians and drafters.

Drafting technicians perform some or all of the following duties:

- Develop and prepare engineering drawings, plans, diagrams or layouts from sketches
- Operate computer-assisted drafting equipment or a conventional drafting station.

Employment requirements

- Completion of secondary school is usually required.

- Completion of a two- to three-year college program in engineering design and drafting technology or in a related field is usually required for drafting and design technologists.
- Completion of a one- to two-year college program in drafting
or
Completion of a three- to four-year apprenticeship program
or
Four to five years of related experience plus completion of college or industry courses in drafting are usually required for drafting technicians.
- Trade certification for draftsmen is available, but voluntary in Ontario.
- Certification in engineering design and drafting technology or in a related field through provincial associations of engineering/applied science technologists and technicians may be required by employers.
- A period of supervised work experience, usually two years, is required before certification.

Additional information

- Mobility is possible to civil, mechanical, electrical or other engineering design technologies through educational or work specialization.
- Senior and supervisory drafting and design technology workers require experience.

2254 Land survey technologists and technicians

Land survey technologists and technicians conduct or participate in surveys to determine the exact locations and relative positions of natural features and other structures on the earth's surface, underground and underwater. They are employed by all levels of government, architectural and engineering firms, and by private sector surveying establishments.

Example titles

engineering survey technologist
geodetic survey technologist
geomatics technologist – land surveying
land survey technician

legal survey technician
topographic survey technician
transit operator – surveying

Main duties

Land survey technologists perform some or all of the following duties:

- Assist survey engineers or professional surveyors to develop methods and procedures for conducting field surveys
- Conduct field surveys and operate survey instruments and computer equipment to measure distance, angles, elevations and contours
- Record measurements and other information obtained during field survey activities
- Determine precise geographic locations using global positioning systems (GPS) equipment
- Analyze latitude, longitude and angles and compute trigonometric and other calculations to plot features, contours and areas to a specific scale
- Prepare detailed drawings, charts and plans and survey notes and reports
- Supervise and co-ordinate field survey activities.

Land survey technicians perform some or all of the following duties:

- Participate in field surveys and operate survey instruments and devices
- Keep records, measurements and other survey information in systematic order
- Assist in the calculation, analysis and computation of measurements obtained during field surveys
- Assist in the preparation of detailed drawings, charts and plans.

Land survey technologists and technicians may specialize in one of the following types of surveys: geodetic survey, topographic survey, legal (cadastral) survey or engineering survey.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a two- to three-year college program in geomatics or land survey technology is usually required for land survey technologists.
- Completion of a one- to two-year college program in geomatics or land survey technology is usually required for land survey technicians.
- Certification by provincial associations of technicians and technologists may be required by some employers.
- In Quebec, membership in the regulatory body for professional technologists is required to use the title "Professional Technologist."

Additional information

- Mobility is possible between the various occupations in this unit group.
- Progression to supervisory positions is possible with experience.
- Progression to land surveyor position is possible with completion of professional surveyor examinations and certification.
- Geomatics is an interdisciplinary field encompassing the collection, analysis and presentation of geographically referenced data.

2255 Technical occupations in geomatics and meteorology

Technical occupations in geomatics include aerial survey, remote sensing, geographic information systems, cartographic and photogrammetric technologists and technicians, who gather, analyze, interpret and use geospatial information for applications in natural resources, geology, environmental research and land use planning. Meteorological technologists and technicians observe weather and atmospheric conditions, record, interpret, transmit and report on meteorological data, and provide weather information to the agricultural, natural resources and transportation industries and the public. Geomatics technologists and technicians are employed by all levels of government, utilities, mapping, computer software, forestry, architectural, engineering and consulting firms and other related establishments. Meteorological technologists and technicians are employed by all levels of government, the media, natural resources, utilities and transportation companies and consulting firms.

Example titles

aerial survey technician
aerological technician
avalanche controller
cartographer
climate data processor
climate service technician
geographic information systems (GIS) technician
ice observer
map editor
mapping technician

meteorological inspector
meteorological technician
officer-in-charge, weather station
operations technician, weather station
photogrammetric technologist
photogrammetrist
remote sensing (RS) technician
softcopy photogrammetrist
surface weather observer

Main duties

Aerial survey and remote sensing technologists and technicians perform some or all of the following duties:

- Operate analog or digital airborne remote sensing equipment such as survey film or digital cameras, laser or radar sensors and scanners to prepare images, data and graphic reports, maps and charts from airborne or satellite data
- Develop specialized analog and computer software specific routines to customize and integrate image analysis
- Inspect quality of recorded images, verify the integrity and accuracy of data contained in remote sensing image analysis systems, and adjust equipment as required.

Geographic information systems (GIS) technologists and technicians perform some or all of the following duties:

- Operate specialized computer hardware and software and peripheral equipment to model, manage, analyze and display geospatial data
- Develop specialized computer software routines, Internet based GIS, database and business applications to customize geographic information
- Work with external organizations on data transfer and systems compatibility issues

- Perform data entry and editing activities and maintenance operations to systems following pre-determined calibration procedures
- Integrate external software such as spreadsheets and statistical packages with GIS software
- Train and provide technical support for GIS users.

Cartographic technologists and technicians perform some or all of the following duties:

- Plan map content, format and design and compile required data from aerial photographs, survey notes, records, reports and other maps
- Generate maps and related graphs and charts using digital mapping techniques, computer interactive graphics, computer assisted design and drafting (CAD) software, traditional drafting methods and computer or traditional scribing tools

- Inspect final compositions to ensure completeness and accuracy.

Photogrammetric technologists and technicians perform some or all of the following duties:

- Examine and interpret aerial photographs to prepare topographic maps, aerial-photograph mosaics and related charts

2255 Technical occupations in geomatics and meteorology

- Operate digitized stereoscopic plotting and computer graphics equipment to provide three-dimensional optical models of terrain, to trace maps, and to prepare charts and tables
- Monitor recording quality and adjust equipment as required and inspect quality of recorded images.

Meteorological technologists and technicians perform some or all of the following duties:

- Observe, record and transmit atmospheric and weather information including air pressure, temperature, humidity, precipitation and cloud, wind and ultraviolet conditions
- Observe, chart and report on ice conditions in navigable waters and snow conditions, and participate in programs to forecast and control avalanches in mountainous terrain
- Maintain climatological databases, analyze and interpret weather data and participate in the production of weather maps, charts and reports
- Install, inspect, monitor, calibrate and maintain meteorological equipment and instruments.

Employment requirements

- Completion of secondary school is required.
- Geomatics technologists require completion of a two- to three-year college program in cartography, photogrammetry, aerial survey, remote sensing, geographic information system or geomatics.
- Geomatics technicians require completion of a one- to two-year college program in cartography, photogrammetry, aerial survey, remote sensing, geographic information system or geomatics.
- In Quebec, membership in the regulatory body for professional technologists is required to use the title "Professional Technologist".
- Meteorological technicians require completion of a one-year meteorological technician program provided by the Meteorological Service of Canada.
- Further specialized training is available for meteorological technicians, and may be required by some employers.

Additional information

- Geomatics is an interdisciplinary field encompassing the collection, analysis and presentation of geographically referenced data.
- Mobility is possible between some occupations in this unit group.

2261 Non-destructive testers and inspection technicians

Non-destructive testers and inspection technicians operate radiographic, ultrasonic, liquid penetrant, magnetic particle, eddy current and similar testing equipment to detect discontinuities in objects of various compositions and materials. They are employed by quality control, maintenance and safety departments of manufacturing, processing, transportation, energy and other companies and by private industrial inspection establishments.

Example titles

acoustic emission technician
aircraft non-destructive inspection technician
eddy current technician
industrial radiographer
infrared thermographer
liquid penetrant testing technician
NDT (non-destructive testing) maintenance technician

non-destructive inspector
pressure vessel tester
radiographic technician – non-destructive testing
ultrasonic testing technician
visual inspection technician – welding
weld tester

Main duties

Non-destructive testers and inspection technicians perform some or all of the following duties:

- Set up and calibrate non-destructive testing equipment
- Conduct tests to ensure quality or detect discontinuities (defects) using ultrasonic, radiographic, liquid penetrant, magnetic particle, eddy current and other non-destructive testing methods
- Establish techniques for proper examination of objects under inspection, ensuring strict adherence to safety regulations
- Interpret radiographs, cathode ray tube (CRT) or digital readouts, conductivity meters and visual indicators
- Apply testing criteria in accordance with applicable specifications or standards and evaluate results
- Organize and report test results
- May perform specialized inspections using acoustic emission, vibration analysis, infrared thermography and laser shearography testing methods
- May instruct and supervise trainees.

Employment requirements

- Completion of secondary school is required.
- Completion of two years of an approved post-secondary science or engineering program may be required.

- Additional classroom and on-the-job training is required for certification in non-destructive testing.
- Non-destructive testing certification by Natural Resources Canada is available in three levels and is usually required by employers.
- Industrial radiographers using a radioactive isotope must pass an examination to be recognized as a certified exposure device operator by the Canadian Nuclear Safety Commission.
- Welding inspector certification by the Canadian Welding Bureau is available in three levels and may be required by employers.
- Boiler and pressure vessel, process pipeline and above-ground storage tank inspector certification is available from the American Petroleum Institute.

Classified elsewhere

- *Engineering inspectors and regulatory officers* (2262)
- Radiographic or ultrasonic equipment operating occupations in medical laboratories or hospitals (in 321 *Medical technologists and technicians* (except dental health))

2262 Engineering inspectors and regulatory officers

Engineering inspectors and regulatory officers inspect transportation vehicles such as aircraft, watercraft, automobiles and trucks and weighing and measuring devices such as scales and meters as well as industrial instruments, processes and equipment for conformity to government and industry standards and regulations. They are employed by government agencies and in the private sector.

Example titles

airworthiness inspector
elevator inspector
engineering inspector
inspector, air carrier maintenance
inspector, air transport
inspector, electricity and gas meters

inspector, weights and measures
insurance loss prevention inspector
marine damage surveyor
motor vehicle defects investigator
railway accident investigation officer
regulatory officer, engineering

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Motor vehicles defects investigators conduct motor vehicle and motor vehicle component defect investigations, examinations, tests and defect-related accident investigations; provide expert advice and testimony on specific motor vehicle performance problems or defects and recommend improvements in vehicle inspection and licensing procedures and vehicle safety standards.
- Railway accident investigation officers collect and analyze data from train derailments, collisions, and other accidents to determine the causes and inspect and evaluate railway property, structures, rolling stock, signals, track structure and train handling characteristics to ensure compliance to operating standards.
- Airworthiness inspectors conduct initial and regular inspections of establishments and individuals holding or applying for air carrier operating certificates and establishments engaged in aircraft maintenance, repair or modification; inspect aircraft, advise of any deficiencies and detain aircraft suspected of being unairworthy or unsafe.
- Inspectors, weights and measures conduct inspections and tests of a variety of mechanical and electronic weighing and measuring devices and systems; prepare draft investigative reports of findings and recommend corrective or enforcement action.

- Oil and gas drilling rig inspectors conduct onshore and offshore inspections of drilling and well servicing equipment and processes to ensure compliance with regulations and policies and to recommend improvements and corrective action.

Employment requirements

- University degree or college diploma in an appropriate engineering field
or
Trade qualifications and extensive related work experience are required.
- Appropriate professional engineering or engineering technology certification and licences may be required.

Classified elsewhere

- *Construction inspectors* (2264)
- *Inspectors in public and environmental health and occupational health and safety* (2263)
- *Non-destructive testers and inspection technicians* (2261)

2263 Inspectors in public and environmental health and occupational health and safety

Inspectors in this unit group evaluate and monitor health and safety hazards and develop strategies to control risks in the workplace. They inspect restaurants, public facilities, industrial establishments, municipal water systems and other workplaces to ensure compliance with government regulations regarding sanitation, pollution control, the handling and storage of hazardous substances and workplace safety. They are employed throughout the private and public sectors.

Example titles

environmental health officer
hazardous waste inspector
health and safety officer
health standards inspector
occupational health and safety officer
pollution control inspector

public health inspector
restaurant inspector
rodent control inspector
supervisor, public health inspectors
water inspector

Main duties

Inspectors in this unit group perform some or all of the following duties:

- Inspect the sanitary conditions of restaurants, hotels, schools, hospitals and other public facilities or institutions
- Conduct surveys and monitoring programs of the natural environment to identify sources of pollution
- Collect samples of water for analysis; measure physical, biological and chemical workplace hazards; and conduct safety and environmental audits
- Investigate health and safety related complaints, spills of hazardous chemicals, outbreaks of diseases or poisonings and workplace accidents
- Inspect workplaces to ensure that equipment, materials and production processes do not present a safety or health hazard to employees or to the general public
- Develop, implement and evaluate health and safety programs and strategies
- Initiate enforcement procedures to fine or to close an establishment contravening municipal, provincial or federal regulations
- Provide consultation and deliver training programs to employers, employees and the general public on issues of public health, environmental protection or workplace safety.

- In some establishments, several years of related work experience and the completion of in-house training courses may substitute for formal education.
- Public health inspectors employed outside Quebec require certification with the Canadian Institute of Public Health Inspectors.
- Occupational health and safety officers may require certification with the Association for Canadian Registered Safety Professionals.

Classified elsewhere

- *By-law enforcement and other regulatory officers, n.e.c.* (4423)
- *Construction inspectors* (2264)
- *Engineering inspectors and regulatory officers* (2262)
- Occupational hygienists and ergonomists (in 4161 *Natural and applied science policy researchers, consultants and program officers*)

Employment requirements

- A bachelor's degree or college diploma in a discipline such as food science, environmental studies, chemistry or health and safety is usually required.

2264 Construction inspectors

Construction inspectors inspect the construction and maintenance of new and existing buildings, bridges, highways and industrial construction to ensure that specifications and building codes are observed and monitor work site safety. They are employed by federal, provincial and municipal governments, construction companies, architectural and civil engineering consulting firms or they may be self-employed.

Example titles

bridge inspector
building construction inspector
construction inspector
highway construction inspector
home inspector

housing construction inspector
mine inspector, construction
plumbing inspector
pre-stressed concrete inspector
safety officer – construction

Main duties

Construction inspectors perform some or all of the following duties:

- Examine plans, drawings, and site layouts for new buildings, building renovations and other proposed structures
- Inspect construction of buildings, bridges, dams, highways and other types of building and engineering construction for conformance to drawings, specifications, building codes or other applicable ordinances
- Inspect and test electrical or plumbing installations in buildings to ensure compliance with municipal, provincial and federal regulations
- Inspect steel framework, concrete forms, reinforcing steel mesh and rods, concrete or pre-stressed concrete to ensure quality standards and to verify conformance to specifications and building codes
- Inspect construction of sewer systems and pipelines
- Inspect construction sites to ensure that safe working conditions are maintained
- Inspect existing buildings to identify and report on structural defects, fire hazards and other threats to safety
- Inspect new or resale homes on behalf of clients and assess and provide reports on the physical condition of property.

Employment requirements

- Completion of secondary school is required.

- A college diploma in construction, civil engineering or architectural technology plus several years of related work experience
or
Several years of experience as a qualified tradesperson in a construction trade, such as plumbing, carpentry or electrical trade are required.
- Provincial certification in a skilled trade or as an engineering technologist is usually required.
- Leadership in Energy and Environmental Design (LEED) certification is offered by the Canada Green Building Council and may be required by some employers.

Additional information

- Progression to construction management positions is possible with experience.

Classified elsewhere

- *By-law enforcement and other regulatory officers, n.e.c.* (4423)

2271 Air pilots, flight engineers and flying instructors

Air pilots fly fixed wing aircraft and helicopters to provide air transportation and other services such as crop spraying and aerial surveying. Flight engineers assist air pilots with monitoring, troubleshooting and maintenance of aircraft systems and with pre- and post-flight inspections. Flying instructors teach flying techniques and procedures to student and licensed pilots. Air pilots, flight engineers and flight instructors are employed by airline and air freight companies, flying schools and by other public and private sector aircraft operators.

Example titles

air pilot
captain – air transport
check pilot
chief flying instructor
chief pilot
co-pilot
flight engineer

flying instructor
helicopter pilot
pilot instructor
relief pilot
second officer – air transport
test pilot

Main duties

Air pilots perform some or all of the following duties:

- Conduct pre-flight inspection of aircraft and check passenger and cargo distribution to ensure that weight and balance specifications are met
- Co-ordinate flight activities with ground crews and air-traffic control, inform crew members of flight and test procedures and direct activities of aircraft crew during flights
- Contact control towers for takeoff clearances, arrival instructions and other information
- Conduct in-flight tests and monitor functioning of aircraft equipment and systems during flights, maintain communications with flight dispatchers and weather forecasters and respond to and report in-flight emergencies and malfunctions
- Prepare flight evaluation reports
- Train pilots to use new equipment, or prepare them for examinations to re-validate or upgrade existing licences
- May fly new or experimental planes to examine their flight performance and safety
- May participate in search and rescue operations, forest firefighting, aerial surveying, crop dusting and other services.

Flight engineers perform some or all of the following duties:

- Inspect aircraft prior to takeoff according to pre-flight checklist and verify passenger and cargo distribution to ensure that weight and balance specifications are met

- Assist air pilots in monitoring aircraft systems, equipment and functions during flight
- Make in-flight repairs, such as replacing fuses and adjusting instruments, and follow emergency procedures to compensate for equipment malfunction or failure
- Perform post-flight inspections, record equipment malfunctions and corrective actions taken during flight and report required repairs to ground maintenance personnel.

Flying instructors perform some or all of the following duties:

- Instruct student pilots in procedures and techniques of flying aircraft and in ground-school subjects such as navigation, radio procedures and flying regulations
- Train licensed pilots for additional certification.

Employment requirements

Pilots and flight engineers

- Completion of secondary school and graduation from a certified flying or aviation school are required.
- A university degree or college diploma may be required.
- A commercial pilot's licence or an air transport pilot's licence is required.
- Additional licences or endorsements to fly different types of aircraft are required.
- Flight engineers require a flight engineer license issued by Transport Canada.
- Structured training is provided by employers.

2271 Air pilots, flight engineers and flying instructors

Flight instructors

- Completion of secondary school and graduation from a certified flying or aviation school are required.
- A university degree or college diploma may be required.
- A commercial pilot's or an air transport pilot's licence is required.
- Transport Canada ratings and endorsements to provide instructions on different types of aircraft are required.

Additional information

- Flight engineers may progress to co-pilot and pilot positions with required hours of flying experience and completion of licensing and endorsement requirements.

Classified elsewhere

- *Air traffic controllers and related occupations (2272)*
- Ground school instructors (in 4021 *College and other vocational instructors*)

2272 Air traffic controllers and related occupations

Air traffic controllers direct air traffic within assigned airspace, and control moving aircraft and service vehicles at airports. Flight service specialists provide pilots with flight information essential to aviation safety. Flight dispatchers authorize airline flights over assigned routes. Air traffic controllers and flight service specialists are employed by NAV Canada and the Canadian Forces. Flight dispatchers are employed by airline and air services companies and by the Canadian Forces.

Example titles

airport air traffic controller
air traffic controller (ATC)
enroute air traffic controller
flight dispatcher

flight service specialist (FSS)
instrument flight rules air traffic controller
terminal air traffic controller
visual flight rules air traffic controller

Main duties

Air traffic controllers perform some or all of the following duties:

- Control flow of air traffic within assigned airspace using radar monitors, radio and other communication equipment and visual references
- Issue aircraft takeoff and landing instructions to pilots and relay meteorological, navigational and other information to pilots in flight
- Maintain radio and telephone contact with adjacent control towers, terminal control units and other area control centres, and co-ordinate movement of aircraft into adjoining areas
- Alert airport emergency services when aircraft are experiencing difficulties and report missing aircraft to search and rescue services
- Direct activities of all moving aircraft and service vehicles on or near airport runways.

Flight service specialists perform some or all of the following duties:

- Provide pre-flight information concerning current and forecast weather conditions, radio frequencies, terrain, airports and related data to assist pilots in preparation of flight plans
- Check flight plans for completeness and accuracy and forward flight plans to air traffic services facility
- Respond to radio calls from aircraft preparing for takeoff or landing and supply information such as weather conditions, wind speed and direction and presence of local air traffic
- Support air traffic control operations by relaying radio requests for flight clearances, arrival and departure information and position reports

- Alert airport emergency services of aircraft experiencing difficulties and initiate communication searches when aircraft become overdue
- Observe, record and report weather conditions at airports.

Flight dispatchers perform some or all of the following duties:

- Analyze environmental conditions and assess aircraft for load and fuel capacity and other factors to determine flight routes
- Brief flight crew before takeoff on weather conditions, status of navigational facilities and airports en route
- Co-sign flight authorization with aircraft captain
- Monitor progress of flight and communicate as required with aircraft during flight
- Delay or cancel flights if conditions warrant
- Prepare and maintain flight plans, flight logs and other reports.

Employment requirements

- Completion of secondary school is required.
- A basic radio telephone operator's licence is required.
- Air traffic controllers and flight service specialists require completion of a NAV Canada training program which includes structured in-class and on-the-job training.
- Air traffic controllers require an air traffic controller's licence.
- Flight dispatchers may require experience in air traffic control or flight operations and may require a private pilot's licence.

2272 Air traffic controllers and related occupations

Additional information

- Air traffic controllers with experience and appropriate NAV Canada endorsements may move to units with higher volumes of air traffic.

Classified elsewhere

- *Railway traffic controllers and marine traffic regulators (2275)*

2273 Deck officers, water transport

Deck officers, water transport, operate and command ships or self-propelled vessels to transport passengers and cargo on oceans and coastal and inland waters, and supervise and co-ordinate the activities of deck crews. This unit group also includes Canadian Coast Guard deck officers. They are employed by marine transportation companies and federal government departments.

Example titles

deck officer – water transport

ferryboat master

first mate, ship

master mariner

navigation officer, Coast Guard vessel

second mate, ship

ship pilot

ship's captain

ship's mate

third mate, ship

tugboat captain

watchkeeping officer, Coast Guard vessel

Main duties

Deck officers perform some or all of the following duties:

- Command and operate ships or other self-propelled vessels, such as barges or oil rigs, to transport passengers and cargo
- Command and operate coast guard vessels to provide ice-breaking and search and rescue services, and to maintain control over ships operating in Canadian waters
- Board vessels at berth or from pilot boats to advise ships' captains on the course to steer for safe passage into and out of ports, seaways or other waterways under pilotage authority
- Plan and execute safe navigational passage using navigational aids
- Determine geographical position using navigational instruments, maps and charts
- Guide vessels in rivers, canals, and other confined or hazardous waters and waterways
- Maintain vessels' navigational instruments and equipment
- Direct and oversee the loading and unloading of cargo
- Supervise and co-ordinate the activities of deck crews
- Record vessel progress, crew activities, weather and sea conditions in the ship's log.

Employment requirements

- Completion of secondary school is required.
- Completion of deck officer cadet program from an approved nautical institute
or
One to three years of experience as a member of a deck crew is required.

- A deck officer certificate of competency, issued by Transport Canada, is required.
- For ship pilots, a ship pilot licence and a master certificate of competency are required.

Additional information

- Transport Canada administers a deck officer certification program, consisting of several levels. Progression from one level of certification to the next requires additional experience, training and testing.
- Mobility between employers is possible for positions requiring the same level of certification.
- Progression to management positions in transportation is possible with experience.

Classified elsewhere

- *Engineer officers, water transport* (2274)
- *Fishing masters and officers* (8261)
- Shore captains (in *0731 Managers in transportation*)
- *Water transport deck and engine room crew* (7532)

2274 Engineer officers, water transport

Engineer officers, water transport, operate and maintain main engines, machinery and auxiliary equipment aboard ships and other self-propelled vessels, and supervise and co-ordinate the activities of engine room crews. They are employed by marine transportation companies and federal government departments.

Example titles

chief engineer – water transport
engineer officer – water transport
fourth engineer – water transport
marine engineer officer

second engineer
third engineer – water transport
tugboat engineer

Main duties

Engineer officers, water transport, perform some or all of the following duties:

- Operate main engines, machinery and all auxiliary equipment aboard ships, such as boilers, steering and deck machinery, motors, pumps, generators and condensers
- Stand engine room watch, monitoring and noting performance of engines, machinery and all auxiliary equipment
- Inspect and conduct maintenance and emergency repairs to engines, machinery and all auxiliary equipment
- Supervise and co-ordinate the activities of the engine room crew
- Maintain records and prepare reports on engine performance and failures.

Employment requirements

- Completion of secondary school is required.
- Completion of a three-year cadet program in marine engineering from an approved marine training institute
or
Approximately three years of experience as an engine room crew member and six months of formal training at an approved marine training institute
or
Approximately three years of experience as an engine mechanic and six months of experience as an engine room crew member are required for certification as a fourth class marine engineer.
- A marine engineer officer certificate of competency, issued by Transport Canada, is required.

Additional information

- Fourth Class Marine Engineer certificate is the entry level of a four-level certification program administered by Transport Canada. Progression from one level of certification to the next requires additional experience, training and testing.
- Mobility between employers is possible for positions requiring the same level of certification.
- Progression to management positions in transportation is possible with experience.

Classified elsewhere

- *Deck officers, water transport* (2273)
- *Managers in transportation* (0731)
- Marine and naval engineers (in 2148 *Other professional engineers, n.e.c.*)
- Marine mechanical engineers (in 2132 *Mechanical engineers*)
- *Water transport deck and engine room crew* (7532)

2275 Railway traffic controllers and marine traffic regulators

Railway traffic controllers co-ordinate passenger and freight train traffic on railways. They are employed by rail transport companies. Marine traffic regulators monitor and regulate coastal and inland marine traffic within assigned waterways. They are employed by port, harbour, canal and lock authorities and by the Canadian Coast Guard.

Example titles

chief rail traffic controller
marine traffic regulator

rail traffic controller
train operator

Main duties

Railway traffic controllers perform some or all of the following duties:

- Operate and monitor centralized traffic control systems to co-ordinate and follow railway traffic
- Chart train movements, calculate arrival and departure times and record rail traffic information
- Issue instructions to control the movement of passenger and freight train traffic and on-track mobile maintenance equipment
- Receive, record and relay train instructions to train crew by hand or radio telephone
- May supervise and train other railway traffic controllers.

Marine traffic regulators perform some or all of the following duties:

- Direct and monitor vessel movements using radar or closed circuit monitors, remote radio systems and other telecommunication equipment
- Obtain position, course, speed and estimated arrival time of vessels and monitor vessel progress through traffic zone
- Issue clearance instructions to vessels, advise vessels of traffic volumes and weather conditions, and relay information to next marine traffic control sector
- Report accidents, distress signals, navigational hazards and other emergencies to authorities
- Maintain radio and telephone contact with adjacent marine control sectors and with vessels within area of jurisdiction
- Maintain log of vessel movements, size and structure.

Employment requirements

- Railway traffic controllers usually require completion of secondary school and several years of experience in the railway industry.

- Up to 35 weeks of a combination of classroom and on-the-job training is provided for railway traffic controllers.

- Railway traffic controllers require a Canadian Rail Operating Rules certificate.
- Marine traffic regulators require completion of secondary school and several months of formal traffic regulator training.

Additional information

- There is little mobility between traffic controlling occupations in the railway and marine sectors.
- With experience, railway traffic controllers may progress to supervisory positions in rail transport operations.

Classified elsewhere

- Harbour masters (in 0714 *Facility operation and maintenance managers*)
- Subway traffic controllers and light rail transit dispatchers (in 7305 *Supervisors, motor transport and other ground transit operators*)
- *Supervisors, railway transport operations (7304)*

2281 Computer network technicians

Computer network technicians establish, operate, maintain and co-ordinate the use of local and wide area networks (LANs and WANs), mainframe networks, hardware, software and related computer equipment. They set up and maintain Internet and intranet Web sites and Web-server hardware and software, and monitor and optimize network connectivity and performance. They are employed in information technology units throughout the private and public sectors. Supervisors of computer network technicians are included in this unit group.

Example titles

computer network technician

data centre operator

Internet Web site technician

LAN (local area network) administrator

LAN (local area network) technician

network administrator

network support technician

supervisor, computer network technicians

system administrator

Web technician

Main duties

Computer network technicians perform some or all of the following duties:

- Maintain, troubleshoot and administer the use of local area networks (LANs), wide area networks (WANs), mainframe networks, computer workstations, connections to the Internet and peripheral equipment
- Evaluate and install computer hardware, networking software, operating system software and software applications

Main duties

Nursing co-ordinators and supervisors perform some or all of the following duties:

- Supervise registered nurses, licensed practical nurses and other nursing personnel
- Evaluate patients' needs and ensure that required nursing care is delivered
- Set up and co-ordinate nursing services in conjunction with other health services
- Ensure quality nursing care is provided and appropriate administrative procedures are followed
- Assist in the establishment of unit policies and procedures
- Administer nursing unit budget and ensure that supplies and equipment are available
- Assist in the selection, evaluation and professional development of nursing personnel
- Collaborate on research projects related to nursing and medical care and multidisciplinary services
- May provide direct patient care.

Employment requirements

- Completion of a university, college or other approved registered nursing, or registered psychiatric nursing, program is required.
- Courses in management studies or a degree, diploma or certificate in management or administration may be required.
- Registration as a registered nurse by a provincial or territorial regulatory body is required or registration as a registered psychiatric nurse in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon is required.
- Clinical experience as a registered nurse, or as a registered psychiatric nurse, is required.

Additional information

- Progression to management positions, such as director of nursing, is possible with experience.

Classified elsewhere

- Directors of nursing and nursing unit administrators (in 0311 *Managers in health care*)

3012 Registered nurses and registered psychiatric nurses

This unit group includes registered nurses, registered psychiatric nurses and graduates of a nursing program who are awaiting registration (graduate nurses). They provide direct nursing care to patients, deliver health education programs and provide consultative services regarding issues relevant to the practice of nursing. They are employed in a variety of settings including hospitals, nursing homes, extended care facilities, rehabilitation centres, doctors' offices, clinics, community agencies, companies and private homes, or they may be self-employed.

Example titles

clinical nurse
community health nurse
critical care nurse
emergency care nurse
intensive care nurse
nurse researcher

nursing consultant
occupational health nurse
private duty nurse
public health nurse
registered nurse (R.N.)
registered psychiatric nurse (R.P.N.)

Main duties

General duty registered nurses perform some or all of the following duties:

- Assess patients to identify appropriate nursing interventions
- Collaborate with members of an interdisciplinary health team to plan, implement, co-ordinate and evaluate patient care in consultation with patients and their families
- Administer medications and treatments as prescribed by a physician or according to established policies and protocols
- Monitor, assess, address, document and report symptoms and changes in patients' conditions
- Operate or monitor medical apparatus or equipment
- Assist in surgery and other medical procedures
- May supervise licensed practical nurses and other nursing staff
- May develop and implement discharge planning process on admission of patients
- May teach and counsel patients and their families on health-related issues in collaboration with other health care providers.

Registered nurses may specialize in areas such as surgery, obstetrics care, psychiatric care, critical care, pediatrics, geriatrics, community health, occupational health, emergency care, rehabilitation or oncology.

- Occupational health nurses develop and implement employee health education programs and provide registered nursing care in private businesses and industry.

- Community health nurses provide health education and registered nursing care in public health units and through home visits, manage complex home care cases, participate in community needs assessment and program development, conduct disease screening and deliver immunization programs.
- Psychiatric nurses provide nursing care, supportive counselling and life skills programming to patients in psychiatric hospitals, mental health clinics, long-term care facilities and community-based settings.
- Nursing consultants provide consultative services to institutes, associations and health care organizations regarding issues and concerns relevant to the nursing profession and nursing practice.
- Nursing researchers engaged in research activities related to nursing are self-employed or are employed by hospitals, public and private organizations and governments.
- Clinical nurses provide leadership, advice and counsel on the provision of research-based care for specific patient groups within the care of particular health care organizations.

Employment requirements

Registered nurses

- Completion of a university, college or other approved registered nursing program is required.
- Additional academic training or experience is required to specialize in a specific area of nursing.

3012 Registered nurses and registered psychiatric nurses

- A master's or doctoral degree in nursing is usually required for clinical nurse specialists, clinical nurses, nursing consultants and nursing researchers.
- Registration with a regulatory body is required in all provinces and territories.

Registered psychiatric nurses

- Completion of a university or college registered psychiatric nursing program is required.
- Registration with a regulatory body is required in Manitoba, Saskatchewan, Alberta, British Columbia and the Yukon.

Additional information

- Nurses trained exclusively as registered psychiatric nurses (RPN) are regulated in Manitoba, Saskatchewan, Alberta and British Columbia. In all other provinces and territories, registered nurses (RN) may work as psychiatric nurses without separate registration.
- Registered nurses and registered psychiatric nurses may progress to supervisory and managerial positions with experience.

Classified elsewhere

- Inoculate and vaccinate patients
- Advise patients and their families on health care including health promotion, disease, illness and accident prevention
- Collaborate with members of an interdisciplinary health team such as family physicians, therapists and nutritionists to plan, implement, co-ordinate and evaluate patient care in consultation with patients and their families.

Physician assistants perform some or all of the following duties:

- Conduct patient interviews, physical assessments and take medical histories
- Perform or order diagnostic tests and interpret results
- Formulate and implement treatment plans and monitor patients' progress
- Inoculate and vaccinate patients
- Perform and assist in minor surgery
- Provide health maintenance education
- May participate in research activities.

Midwives perform some or all of the following duties:

- Provide primary, full-course, care to women and their babies during pregnancy, labour, birth and the post-natal period including monitoring the health of mother and baby
- Manage labour and spontaneous normal deliveries
- Care for, assess and monitor the health of newborns and refer infants to appropriate medical services as required
- Provide advice and guidance regarding care for newborns and young infants.

Employment requirements

- Nurse practitioners usually require a master's degree in nursing; or completion of a nursing program with additional advanced or extended primary health care nursing education; and several years of practice as a registered nurse.
- Registration with a regulatory body is required for nurse practitioners in all provinces and territories.
- Physician assistants require completion of a university degree in a physician assistant program.
- Registration with a regulatory body is required for physician assistants in Manitoba.
- Midwives require completion of an undergraduate university degree program in midwifery or its equivalent and a period of supervised practical training.

3124 Allied primary health practitioners

- Registration with a regulatory body is required for midwives in Newfoundland and Labrador, Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta, British Columbia and the Northwest Territories.

Additional information

- There is no mobility between these occupations without further training.

Classified elsewhere

- *General practitioners and family physicians* (3112)

- *Other professional occupations in health diagnosing and treating* (3125)
- *Practitioners of natural healing* (3232)
- *Registered nurses and registered psychiatric nurses* (3012)
- *Specialist physicians* (3111)

3125 Other professional occupations in health diagnosing and treating

This unit group includes health professionals who diagnose and treat the diseases and injuries of patients and who are not elsewhere classified. This includes doctors of podiatric medicine, chiropodists and podiatrists, naturopaths, orthoptists and osteopaths. They work in private practices, clinics and hospitals.

Example titles

chiropodist
doctor of osteopathy
doctor of podiatric medicine (D.P.M.)
foot specialist
naturopath

naturopathic doctor (ND)
orthoptist
osteopath
osteopathic physician
podiatrist

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Doctors of podiatric medicine are primary care practitioners who diagnose diseases, deformities and injuries of the human foot and communicate diagnoses to patients. They treat patients using braces, casts, shields, orthotic devices, physical therapy, or prescribed medications. Doctors of podiatric medicine may also perform surgery on the bones of the forefoot and the subcutaneous soft tissues of the foot.
- Chiropodists and diploma or first-degree trained podiatrists diagnose diseases, deformities and injuries of the human foot and treat patients using braces, casts, shields, orthotic devices, physical therapy and subcutaneous soft-tissue foot surgery.
- Naturopaths diagnose patients' diseases and disorders and employ natural methods of healing such as acupuncture and acupressure, spinal manipulation, reflexology, hydrotherapy, herbal medicines, biochemical therapy, clinical nutrition, homeopathy and counselling in their treatment.
- Orthoptists work alongside ophthalmologists in the diagnosis and treatment of eye disorders by performing specialized eye tests to measure and assess defective binocular vision or abnormal eye movement in patients and prescribing treatment such as eye exercises or patching regimens.
- Osteopaths or osteopathic physicians diagnose disorders and injuries of the musculo-skeletal, circulatory and nervous systems and treat patients with manipulative therapy, medications or surgery.

Employment requirements

Doctors of podiatric medicine (D.P.M.)

- A four-year doctoral degree program in podiatric medicine available in the United States and in Quebec, normally following completion of a bachelor's degree program, is required.
- A medical residency is required in Alberta and British Columbia.
- A doctor of podiatric medicine (D.P.M.) degree is required to practise podiatry in Quebec, Ontario, Alberta and British Columbia.

Chiropodists and podiatrists

- A three-year diploma program in chiropody (DCh) obtained in Canada
or
A first-degree program in podiatric medicine (D.Pod.M.) obtained abroad (United Kingdom) is usually required.
- A licence is required in New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.

Naturopaths

- A university degree in pre-medical science is required.
- Completion of a university program in naturopathic medicine, obtained abroad
or
A four-year program in naturopathic medicine from a private institute is required.
- A licence is required in Ontario, Manitoba, Saskatchewan and British Columbia.

Orthoptists

- A bachelor's degree and completion of a two-year accredited training program in orthoptics are required.

3125 Other professional occupations in health diagnosing and treating

- Certification with the Canadian Orthoptic Council is required.
- Continuing education is required for recertification with the Canadian Orthoptic Council.

Osteopaths

- A bachelor's degree is required for admission to a doctor of osteopathy program.
- A four-year program in osteopathic medicine leading to a doctor of osteopathy degree *and* a one-year medical residency are required. These qualifications are usually obtained in the United States.
- A licence is required in New Brunswick, Quebec, Ontario, Saskatchewan, Alberta and British Columbia.

Additional information

- Chiropodist and podiatrist titles are used interchangeably in some provinces, although the title podiatrist is becoming more common. The use of the podiatrist job title does not necessarily refer to doctors of podiatric medicine (D.P.M.).
- Orthoptists often work as part of a medical team which includes ophthalmologists, opticians and other ophthalmic medical personnel.

- Orthoptists may also be trained as ophthalmic technicians or technologists.
- Osteopaths may obtain a licence as general practitioners.
- Osteopaths have full scope of practice in New Brunswick, Quebec and Alberta, and limited scope of practice (to practise osteopathic manipulative medicine) in Ontario and Saskatchewan.
- There are two licences in British Columbia for osteopaths – one allows the doctor of osteopathy full scope of practice rights, while the other limits practice to osteopathic manipulative medicine.

retail pharmacist

Main duties

Community pharmacists and hospital pharmacists perform some or all of the following duties:

- Check prescriptions for proper dosage
- Compound prescribed pharmaceutical products by calculating, measuring and mixing the quantities of drugs and other ingredients required and filling appropriate containers with correct quantity
- Dispense prescribed pharmaceuticals to customers or to other health care professionals and advise them on indications, contra-indications, adverse effects, drug interactions and dosage
- Maintain medication profiles of customers including registry of poisons and narcotic and controlled drugs
- Ensure proper preparation, packaging, distribution and storage of vaccines, serums, biologicals and other drugs and pharmaceuticals
- Order and maintain stock of pharmaceutical supplies
- Advise customers on selection and use of non-prescription medication
- May supervise and co-ordinate the activities of other pharmacists, pharmacy assistants, pharmacy technicians and other staff.

Industrial pharmacists perform some or all of the following duties:

- Participate in research for the development of new drugs
- Formulate new drug products developed by medical researchers
- Test new drug products for stability and to determine absorption and elimination patterns
- Co-ordinate clinical investigations of new drugs

- Control the quality of drug products during production to ensure that they meet standards of potency, purity, uniformity, stability and safety
- Develop information materials concerning the uses, properties and risks of particular drugs
- Evaluate labelling, packaging and advertising of drug products
- Promote pharmaceutical products to health professionals.

Employment requirements

- A bachelor of science degree in pharmacy is required.
- Pharmacists also require practical training under the supervision of a pharmacist.
- Licensure is required in all provinces and territories for community and hospital pharmacists.

Classified elsewhere

- *Chemists* (2112)
- Chiefs of pharmacy and pharmacy directors (in 0311 *Managers in health care*)
- Pharmaceutical sales representatives (in 6221 *Technical sales specialists – wholesale trade*)
- Pharmacologists (in 2121 *Biologists and related scientists*)
- Pharmacy assistants (in 3414 *Other assisting occupations in support of health services*)

3132 Dietitians and nutritionists

Dietitians and nutritionists plan, implement and oversee nutrition and food service programs. They are employed in a variety of settings including hospitals, home health-care agencies and extended care facilities, community health centres, the food and beverage industry, the pharmaceutical industry, educational institutions, and government and sports organizations, or they may work as private consultants.

Example titles

administrative dietitian
clinical dietitian
community nutritionist
consultant dietitian
dietitian
dietitian-nutritionist

nutritionist
nutrition specialist
public health dietitian
public health nutritionist
registered dietitian (RD)
research dietitian

Main duties

Dietitians and nutritionists perform some or all of the following duties:

- Develop, administer and supervise nutrition and food preparation and service programs in hospitals, nursing homes, schools, company cafeterias or similar settings
- Evaluate nutritional status of individuals and provide nutrition guidance and consulting to health professionals, individuals, dietetic interns, community groups, government and the media
- Aid in the prevention and/or treatment of inadequate nutrition
- Plan, evaluate and conduct nutrition education programs and develop educational materials for various audiences
- Practice on an individual basis or as a member of an interdisciplinary team to determine nutritional needs of patients and to plan, implement and evaluate normal and therapeutic menus to maintain and enhance general health
- Analyze current scientific nutritional studies, conduct research and evaluate program effectiveness to improve the nutritional value, taste, appearance and preparation of food
- Work within industry in the development, testing and evaluation, and marketing of food and nutrition products or as a company representative supplying product related information to health professionals
- Confer with other health professionals, community groups, government and the media to provide consultation and advice in areas of nutrition interpretation, intervention and policy
- Supervise training of dietetic interns.

Dietitians and nutritionists may specialize in areas such as administrative dietetics, clinical dietetics, community dietetics, public health nutrition or research dietetics.

Employment requirements

- Dietitians require a bachelor's or master's degree in dietetics, nutrition or a related field such as food and nutritional science or biochemistry *and* A period of supervised practical training.
- Registration with a regulatory body is required in all provinces for dietitians.
- Membership in the national association, Dietitians of Canada, may be required for dietitians to practise.
- Nutritionists usually require similar education and training as dietitians.
- Registration with a regulatory body is required for nutritionists in Nova Scotia, (as a registered dietitian-nutritionist) in New Brunswick, Quebec and Alberta.
- Membership with the national association, Dietitians of Canada, and/or a provincial regulatory body is available for nutritionists who have the same education and practical training as dietitians.

Additional information

- Dietitians and nutritionists may progress to management positions through additional experience.

3132 Dietitians and nutritionists

Classified elsewhere

- Dietary technicians (in 3219 *Other medical technologists and technicians (except dental health)*)
- Directors of dietetics (in 0311 *Managers in health care*)
- *Food service supervisors* (6311)

3141 Audiologists and speech-language pathologists

Audiologists diagnose, evaluate and treat individuals with peripheral and central hearing loss, tinnitus and balance problems. Speech-language pathologists diagnose, assess and treat human communication disorders including speech, fluency, language, voice and swallowing disorders. Audiologists and speech-language pathologists are employed in hospitals, community and public health centres, extended care facilities, day clinics, rehabilitation centres and educational institutions, or may work in private practice. Audiologists and speech-language pathologists who are supervisors are included in this unit group.

Example titles

audiologist
certified audiologist
clinical audiologist
educational speech-language pathologist

research audiologist
speech-language clinician
speech therapist

Main duties

Audiologists perform some or all of the following duties:

- Develop and administer audiometric tests and examinations using specialized instruments and electronic equipment to diagnose and evaluate the degree and type of patients' hearing impairment
- Plan and implement habilitation/rehabilitation programs for patients, including selection, fitting and adjustment of amplification devices, such as hearing aids, and teaching speech (lip) reading
- Provide information to patients and families regarding the nature, extent, impact and implications of hearing loss and treatment
- Establish personalized care plans working as a member of an interdisciplinary team
- Conduct research related to hearing and hearing disorders
- May instruct and supervise audiometric technicians, students and other health care personnel.

Speech-language pathologists perform some or all of the following duties:

- Administer tests and examinations and observe patients to diagnose and evaluate speech, voice, resonance, language, cognitive-linguistic and swallowing disorders
- Develop, plan and implement remedial programs to correct speech, voice, language, resonance, cognitive-linguistic and swallowing disorders
- Establish group and personalized care plans working as a member of an interdisciplinary team

- Provide advice and educational services to patients and families regarding communication and swallowing disorders
- Conduct research on speech and other communication disorders and on the development and design of diagnostic procedures and devices
- May instruct and supervise communicative disorders assistants, students and other health care personnel.

Employment requirements

- Audiologists require a master's degree in audiology.
- Speech-language pathologists require a master's degree in speech-language pathology.
- Registration with a regulatory body is required for audiologists and speech-language pathologists in New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.
- Membership in the national association, Canadian Association of Speech-Language Pathologists and Audiologists, is usually required.
- In some jurisdictions, audiologists may be required to obtain a separate licence to dispense hearing aids.

Additional information

- Progression into management positions, such as chief audiologist or director of speech-language pathology, is possible with experience.

3141 Audiologists and speech-language pathologists

Classified elsewhere

- Audiology and speech-language technical and assisting occupations (in 3237 *Other technical occupations in therapy and assessment*)
- Braille, lip-reading and sign language instructors (in 4215 *Instructors of persons with disabilities*)
- *Managers in health care* (0311)
- Phoniatricians (in 3111 *Specialist physicians*)

3142 Physiotherapists

Physiotherapists assess patients and plan and carry out individually designed treatment programs to maintain, improve or restore physical functioning, alleviate pain and prevent physical dysfunction in patients.

Physiotherapists are employed in hospitals, clinics, industry, sports organizations, rehabilitation centres and extended care facilities, or they may work in private practice.

Example titles

physical therapist
physiotherapist

registered physiotherapist
research physiotherapist

Main duties

Physiotherapists perform some or all of the following duties:

- Assess patients' physical abilities through evaluative procedures such as functional ability tests
- Establish treatment goals with patients based on physical diagnoses
- Plan and implement programs of physiotherapy including therapeutic exercise, manipulations, massage, education, the use of electro-therapeutic and other mechanical equipment and hydro-therapy
- Evaluate effectiveness of treatment plans and modify accordingly
- Communicate with referring physician and other healthcare professionals regarding patients' problems, needs and progress
- Maintain clinical and statistical records and confer with other health care professionals
- Develop and implement health promotion programs for patients, staff and the community
- May conduct research in physiotherapy
- May provide consulting or education services.

Physiotherapists may focus their practice in particular clinical areas such as neurology, oncology, rheumatology, orthopedics, obstetrics, pediatrics, geriatrics, in the treatment of patients with cardiovascular and cardiopulmonary disorders, burns or sports injuries or in the field of ergonomics.

Employment requirements

- A university degree in physiotherapy and a period of supervised practical training are required.
- A licence or registration with a regulatory body is required to practise physiotherapy in all provinces.

- Completion of the Physiotherapy National Exam, administered by the Alliance of Physiotherapy Regulatory Boards, may be required.

Additional information

- Progression to management positions, such as director of physiotherapy, is possible through experience and additional training.

Classified elsewhere

- Directors of physiotherapy (in 0311 *Managers in health care*)
- Physical rehabilitation technicians (in 3237 *Other technical occupations in therapy and assessment*)

3143 Occupational therapists

Occupational therapists develop individual and group programs with people affected by illness, injury, developmental disorders, emotional or psychological problems and ageing to maintain, restore or increase their ability to care for themselves and to engage in work, school or leisure. They also develop and implement health promotion programs with individuals, community groups and employers. They are employed in health care facilities, in schools, and by private and social services agencies, or they may be self-employed.

Example titles

clinical occupational therapist
community occupational therapist
occupational therapist, case manager

occupational therapist (OT)
occupational therapist, research and development
occupational therapy rehabilitation consultant

Main duties

Occupational therapists perform some or all of the following duties:

- Analyse clients' capabilities and expectations related to life activities through observation, interviews and formal assessments
- Develop intervention programs to address clients' needs related to self-care, work and leisure activities
- Maintain clients' records
- Establish personalized care plans working as a member of an interdisciplinary team
- Consult and advise on health promotion programs to prevent disabilities and to maximize independent function in all activities of life
- May supervise support personnel and students and provide training.

Occupational therapists may specialize in working with specific populations such as children or adults, or persons with distinct problems such as dementia, traumatic brain injury and chronic pain, or provide special interventions such as return-to-work programs.

Employment requirements

- A university degree in occupational therapy including supervised fieldwork is required
or
Graduation from an occupational therapy program approved by the World Federation of Occupational Therapists (WFOT) is accepted in some provinces.
- Completion of the national certification examination may be required.
- Licensure with a regulatory body is required in all provinces.

- Membership in the national association, Canadian Association of Occupational Therapists, is required in some provinces.
- Occupational therapists may obtain expertise in a particular area through additional training or experience.

Additional information

- Occupational therapists may progress to management or administrative positions through further training and experience.

Classified elsewhere

- Directors of occupational therapy (in 0311 *Managers in health care*)
- Orientation and mobility instructors (in 4215 *Instructors of persons with disabilities*)

3144 Other professional occupations in therapy and assessment

This unit group includes specialized therapists not elsewhere classified who use techniques such as athletic, movement, art or recreational therapy to aid in the treatment of mental and physical disabilities or injuries. They are employed by establishments such as hospitals, rehabilitation centres, extended health care facilities, clinics, recreational centres, nursing homes, industry, educational institutions and sports organizations, or they may work in private practice.

Example titles

art therapist
athletic therapist
certified athletic therapist (CAT)
certified kinesiologist
drama therapist
exercise physiologist

human kineticist
kinesiologist
movement therapist
music therapist
recreational therapist
registered dance therapist (DTR)

Main duties

Therapists and other professionals in this unit group perform some or all of the following duties:

- Assess patients and review reports from physicians, physiotherapists, psychiatrists, counsellors, teachers and other professionals to determine patients' current and potential functioning level
- Prepare individualized and group treatment plans either independently or through a multidisciplinary team approach, based on health concerns and on recommendations from physicians or other health professionals
- Design specialized therapy programs to maintain, rehabilitate or enhance movement, musculoskeletal functioning and performance in sports, work and recreation
- Implement treatment plans by carrying out specialized therapy sessions employing approaches and techniques such as art, drama and music therapy or dance, recreational, sports or other movement therapy
- Observe, record observations and analyze patients during treatment sessions, write progress reports on patient outcomes and consult with other health professionals to evaluate treatment plans
- May provide education to clients regarding health promotion and injury prevention, management and treatment
- May conduct research in respective field of specialization.

Employment requirements

- Kinesiologists usually require a master's degree in kinesiology or human kinetics.

- Certification for kinesiologists is available through the Canadian Kinesiology Alliance.
- Sport therapists require a bachelor's degree in sport therapy, or a degree in health sciences with a specialization in sports injury management.
- Art therapists require a bachelor's degree in psychology and a master's degree in art therapy.
- Music therapists require a bachelor's degree in psychology and a master's degree in music therapy.
- Dance therapists require a bachelor's degree in psychology, and usually require a master's degree in art, drama or movement therapy.
- Recreational therapists usually require a bachelor's degree in recreation with a specialization in therapeutic recreation.
- Supervised practical training is usually required for occupations in this unit group.
- Creative or technical ability in the field of specialization is usually required.
- Certification or membership with the appropriate national professional association or provincial counterpart may be required.

Additional information

- There is no mobility between the different occupations in this unit group.

3144 Other professional occupations in therapy and assessment

Classified elsewhere

- *Family, marriage and other related counsellors* (4153)
- *Occupational therapists* (3143)
- *Physiotherapists* (3142)
- *Recreation, sports and fitness policy researchers, consultants and program officers* (4167)

3211 Medical laboratory technologists

Medical laboratory technologists conduct medical laboratory tests, experiments and analyses to assist in the diagnosis, treatment and prevention of disease. They are employed in medical laboratories in hospitals, blood banks, community and private clinics, research facilities and post-secondary educational institutions. Medical laboratory technologists who are supervisors are included in this unit group.

Example titles

clinical immunology technologist
cytogenetics technologist – medical laboratory
histology technologist
immunohematology technologist

medical laboratory supervisor
medical laboratory technologist
medical technologist – medical laboratory

Main duties

Medical laboratory technologists perform some or all of the following duties:

- Set up, operate and maintain laboratory equipment
- Conduct chemical analyses of blood, urine, and cerebrospinal and other body fluids
- Study blood cells and other tissues to determine their relation to various physiological and pathological conditions
- Prepare tissue sections for microscopic examinations using techniques to demonstrate special cellular tissue elements or other characteristics
- Perform blood group, type and compatibility tests for transfusion purposes
- Establish procedures for the analysis of specimens and for medical laboratory experiments
- Conduct quality control assessment of testing techniques
- May supervise and train other medical laboratory technical staff, students and helpers
- May assist pathologists during autopsies.

Medical laboratory technologists may specialize in areas such as clinical chemistry, clinical microbiology, hematology, histotechnology, immunohematology, cytotechnology and cytogenetics.

Employment requirements

- A two- or three-year college program in medical laboratory technology is required
and
A period of supervised practical training may be required.

- Registration with a regulatory body is required in Nova Scotia, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan and Alberta.
- Certification by the Canadian Society for Medical Laboratory Science is usually required by employers.

Classified elsewhere

- Life science technologists in non-medical laboratories (in 2221 *Biological technologists and technicians*)
- *Medical laboratory technicians and pathologists' assistants* (3212)
- Physical science technologists in non-medical laboratories (in 2211 *Chemical technologists and technicians*)

3212 Medical laboratory technicians and pathologists' assistants

Medical laboratory technicians conduct routine medical laboratory tests and set up, clean and maintain medical laboratory equipment. They are employed in medical laboratories in hospitals, clinics, research facilities, post-secondary educational institutions and government research laboratories. Pathologists' assistants assist at autopsies and examinations of surgical specimens or perform autopsies under a pathologist's supervision. They are usually employed in hospitals and universities.

Example titles

medical laboratory assistant
medical laboratory technician
pathology assistant

phlebotomist
phlebotomy aide

Main duties

Medical laboratory technicians perform some or all of the following duties:

- Collect blood, tissue and other samples from patients
- Log patient samples and prepare them for testing
- Set up medical laboratory equipment
- Conduct routine laboratory tests and sample analyses
- Perform quality assurance of testing techniques
- Clean and maintain medical laboratory and medical laboratory equipment.

Pathologists' assistants perform some or all of the following duties:

- Prepare for autopsies by obtaining patients' medical records and arranging for radiographic examinations
- Assist with or perform autopsies and surgical specimen examinations under pathologists' supervision
- Dissect, examine, weigh and photograph organs and specimens, collect tissue samples for chemical analysis and record findings
- Discard specimens according to established safety procedures
- Clean and maintain instruments, equipment and supplies
- May prepare bodies for release to funeral homes following completion of autopsies
- May supervise and train junior resident pathologists and morgue attendants.

Employment requirements

- Medical laboratory technicians/assistants require completion of a college certificate program in medical laboratory science.

- Certification by the Canadian Society for Medical Laboratory Science may be required for medical laboratory technicians/assistants.
- Combined laboratory and X-ray technicians require completion of a combined laboratory X-ray technology program.
- Pathologists' assistants require some post-secondary courses or a university degree in life sciences
and
Specialized on-the-job training.

Classified elsewhere

- Biological technicians in non-medical laboratories (in 2221 *Biological technologists and technicians*)
- Chemical technicians in non-medical laboratories (in 2211 *Chemical technologists and technicians*)
- *Medical laboratory technologists (3211)*

3213 Animal health technologists and veterinary technicians

Animal health technologists and veterinary technicians provide technical support to veterinarians by caring for animals and assisting in the diagnosis and treatment of animal health disorders. They are employed in veterinary clinics, animal hospitals, animal shelters, humane societies, zoos, animal research laboratories, pharmaceutical companies and government. Animal health technologists and veterinary technicians who are supervisors are included in this unit group.

Example titles

animal health technician
animal health technologist
laboratory animal technician
registered veterinary technician (RVT)

veterinarian assistant
veterinary technician
veterinary technologist

Main duties

Animal health technologists and veterinary technicians perform some or all of the following duties:

- Provide nursing care and rehabilitation therapy for animals
- Handle, restrain and care for animals undergoing treatment and surgery
- Produce radiographs, collect and analyse samples and perform other laboratory tests to assist in diagnosis of animal health problems
- Assist veterinarian with animals before, during and following surgery by preparing surgical equipment, administering and monitoring anaesthetics and cleaning up after surgery
- Prepare and administer medications and vaccines under direction of a veterinarian
- Administer treatments as prescribed by a veterinarian
- Provide wound and bandage care
- Conduct specialized procedures such as animal identification and hoof trimming
- Educate and advise clients on animal health care including nutrition and home care
- Assist in laboratory research
- Perform routine animal dental procedures and assist veterinarians with animal dentistry
- May perform a variety of office management and clerical duties.

Employment requirements

- Completion of a two- or three-year animal health/veterinary technology college program is required.
- Successful completion of a national registration examination may be required in some employment settings.

- Registration with provincial animal health technologists' or veterinary technicians' associations is available, and is mandatory in some provinces.

Additional information

- With experience, animal health technologists and veterinary technicians may progress to supervisory positions.

Classified elsewhere

- *Pet groomers and animal care workers (6563)*

3214 Respiratory therapists, clinical perfusionists and cardiopulmonary technologists

Respiratory therapists assist physicians in the diagnosis, treatment and care of patients with respiratory and cardiopulmonary disorders. Clinical perfusionists provide technical support to patients undergoing cardiac surgery and patients requiring cardio-respiratory support. Cardiopulmonary technologists assist physicians in the technical aspects of diagnosis and treatment of cardiovascular and pulmonary disease. Respiratory therapists are employed in hospitals, extended care facilities, public health centres and respiratory home care companies. Clinical perfusionists and cardiopulmonary technologists are primarily employed in hospitals. Respiratory therapists, clinical perfusionists and cardiopulmonary technologists who are supervisors or instructors are included in this unit group.

Example titles

cardiopulmonary technologist
cardiovascular perfusionist
cardiovascular perfusion supervisor
certified clinical perfusionist (CCP)
chief respiratory technologist
chief, respiratory therapy

clinical perfusionist
perfusionist
registered respiratory therapist (RRT)
respiratory therapist
respiratory therapy clinical instructor

Main duties

Respiratory therapists perform some or all of the following duties:

- Perform diagnostic tests, such as arterial blood gas analysis and cardiopulmonary functions tests
- Operate and monitor respiratory equipment to administer treatments such as oxygen, oxygen-air mixtures, humidified air or medications
- Operate, monitor, maintain and test a variety of diagnostic and therapeutic equipment
- Assess patients and perform or assist with interventions such as airway maintenance, line insertions, inductions and intubations
- Perform artificial respiration and external cardiac massage
- Assist with transport of high-risk patients
- Supervise and train students and other respiratory therapists
- Participate in home care programs for chronic respiratory patients and provide patient and family education
- Participate in research related to cardiac and pulmonary disorders.

Respiratory therapists may specialize in areas such as anaesthesia, critical care, pediatrics, cardiopulmonary diagnostics and respiratory home care.

Clinical perfusionists perform some or all of the following duties:

- Assemble, maintain and operate extracorporeal circulation equipment, intra-aortic balloon pumps and other heart assist devices to support or temporarily replace patients' cardiopulmonary functions during open-heart surgery
- Administer blood products, drugs and other substances through heart-lung machines and other devices as directed by cardiac surgeons and anaesthetists to maintain adequate flow of oxygenated blood to all organs of the body
- Monitor vital signs to support and maintain patients' physiological functions and metabolic needs during cardiopulmonary surgery
- Participate in routine maintenance, calibration and inspection of all perfusion related equipment
- Supervise and train student clinical perfusionists and other clinical perfusionists.

Cardiopulmonary technologists perform some or all of the following duties:

- Perform diagnostic tests, such as pulmonary function and asthma stress, or assist physicians with cardiac and cardiopulmonary stress tests and bronchoscopies
- Determine patients' blood characteristics such as activated clotting time and oxygen saturation
- Operate, monitor, maintain, calibrate and test diagnostic and therapeutic equipment
- Monitor patients and advise physician of any changes in patients' condition

3214 Respiratory therapists, clinical perfusionists and cardiopulmonary technologists

- Prepare medications and administer inhaler and other treatments under supervision of cardiologist
- Provide information and care for patients during tests
- Assist with the preparation of cardiac catheterization room, prepare specialized catheters and assist cardiologists during catheterization
- Perform analysis, programming and monitoring of implanted devices such as pacemakers and defibrillators during surgery
- Supervise and train students and other cardiopulmonary technologists
- Provide technical support for research.

Employment requirements

- Respiratory therapists require the completion of a three-year college, hospital or university degree program in respiratory therapy, including clinical training.
- Licensing is required for respiratory therapists in Quebec, Ontario, Manitoba and Alberta.
- Clinical perfusionists require the completion of a respiratory therapy or registered nursing program with a minimum of one year of work experience as a respiratory therapist or registered nurse
and
Completion of a college or university program in clinical perfusion, including clinical training.
- Certification with the Canadian Society of Clinical Perfusion is required for clinical perfusionists.
- Cardiopulmonary technologists require a two-year college diploma in an allied health discipline such as respiratory therapy, nursing diploma, or a university degree in a related science
and
Completion of a college post-diploma program in cardiovascular technology and additional training in pulmonary technology through courses or supervised on-the-job clinical training.
- Registration with the Canadian Association of Cardio-pulmonary Technologists (CACPT) may be required.

Additional information

- Supervisory and instructor positions in this unit group require experience in their respective fields as a respiratory therapist, clinical perfusionist or cardiopulmonary technologist.

Classified elsewhere

- *Other medical technologists and technicians (except dental health) (3219)*
- *Other technical occupations in therapy and assessment (3237)*

3215 Medical radiation technologists

This unit group includes technologists who operate radiographic and radiation therapy equipment to administer radiation treatment and produce images of body structures for the diagnosis and treatment of injury and disease. They are employed in hospitals, cancer treatment centres, clinics, radiological laboratories, colleges and universities. Medical radiation technologists who are supervisors or instructors are included in this unit group.

Example titles

clinical instructor, radiation therapy
magnetic resonance imaging (MRI) technologist
mammography technician
nuclear medicine clinical instructor
nuclear medicine technologist
radiation oncology technologist
radiation therapist

radiation therapy technologist (RTT)
radiography technologist
radiological technologist
radiotherapy technician
supervisor, nuclear medicine technologists
X-ray (radiology) technician

Main duties

Radiological technologists perform some or all of the following duties:

- Operate X-ray, radiographic and fluoroscopic equipment, computerized tomography (CT) scanners, mammography units and magnetic resonance imaging (MRI) scanners to produce radiographs or anatomic images of the human body for the diagnosis by radiologists of disease or injury
- Record and process patient data
- Perform basic verification and quality control checks on radiographic and film processing equipment
- Provide appropriate care and monitoring of the patient during the radiographic examination
- Explain procedures, position patient and equipment and apply radiation protection measures
- May train and supervise student radiographers or supervise other radiological technologists.

Radiological technologists may specialize in areas such as computerized tomography, angiography, mammography, magnetic resonance imaging, interventional radiology, dosimetry, stereotaxy or brachytherapy.

Nuclear medicine technologists perform some or all of the following duties:

- Prepare and administer radiopharmaceuticals, such as radionuclides and other tracer materials to patients or to biological samples

- Operate radiation detection equipment, such as gamma cameras, scanners, scintillation counters, tomodensitometers and ionization chambers, to acquire data for use by nuclear medicine physicians in the diagnosis of disease
- Perform diagnostic procedures using radioactive materials on biological specimens, such as blood, urine and faeces
- Record and process results of procedures
- Check equipment to ensure proper operation
- Provide appropriate care and monitoring of the patient during the examination
- Apply radiation protection measures
- May train and supervise student nuclear medicine technologists or supervise other nuclear medicine technologists.

Radiation therapists perform some or all of the following duties:

- Operate linear accelerators, cobalt 60, X-ray and other radiation therapy equipment to administer radiation treatment prescribed by radiation oncologists
- Check radiation therapy equipment to ensure proper operation
- Assist radiation oncologists and clinical physicists with preparation of radiation treatment plan
- Assist in the preparation of sealed radioactive materials such as cobalt, radium, cesium and isotopes and the construction of devices such as plaster casts and acrylic moulds to assist with administration of radiation treatment

3215 Medical radiation technologists

- Provide appropriate care and monitoring of the patient's physical and psychological well-being during the entire course of treatment
- Explain procedures and side effects of radiation
- May train and supervise student radiotherapy technologists or supervise other radiotherapy technologists.

Employment requirements

- Completion of a two- to three-year college, hospital or other approved program in diagnostic radiography or magnetic resonance imaging (for radiological technologists and magnetic resonance technologists), nuclear medicine technology (for nuclear medicine technologists) or radiation therapy (for radiation therapists)
or
A bachelor of health sciences in radiography, nuclear medicine or radiation therapy
and
A period of supervised practical training are required.
- Licensure with a regulatory body is required in all provinces.
- Certification by the Canadian Association of Medical Radiation Technologists is required in all provinces except Quebec.

Additional information

- There is no mobility between the three types of medical radiation technologists without further training.
- Experience as a medical radiation technologist is required for supervisors and instructors.

Classified elsewhere

- Other medical technologists and technicians (in 321 *Medical technologists and technicians (except dental health)*)

3216 Medical sonographers

Medical sonographers operate ultrasound equipment to produce and record images of various parts of the body to aid physicians in monitoring pregnancies and in diagnosing cardiac, ophthalmic, vascular and other medical disorders. They are employed in clinics and hospitals. Medical sonographers who are supervisors or instructors are included in this unit group.

Example titles

diagnostic medical sonography instructor
medical sonographer
medical sonographers supervisor

registered diagnostic medical sonographer
(RDMS)
ultrasound technologist

Main duties

Medical sonographers perform some or all of the following duties:

- Operate ultrasound imaging equipment that transmits high frequency sound pulses through the body to produce images of those parts of the body requiring examination
- Monitor examination by viewing images on video screen, to evaluate quality and consistency of diagnostic images, and make adjustments to equipment, as required
- Record, store and process scanned images by using camera unit connected to ultrasound equipment
- Observe and care for patients throughout examinations to ensure patient safety and comfort
- Prepare examination reports for physicians to aid in the monitoring of pregnancies and the diagnosis of cardiac, abdominal, ophthalmic, vascular and other disorders
- Perform quality control checks on ultrasound equipment to ensure proper operation and perform minor repairs and adjustments as required
- May supervise and train student and other medical sonographers.

Medical sonographers may specialize in abdominal, cardiac, cerebral, obstetrical and gynaecological, ophthalmic, intraluminal or peripheral vascular sonography. They may also specialize in adult or pediatric echocardiography or neurosonology.

Employment requirements

- Completion of a three- to four-year program in diagnostic medical sonography or ultrasound technology
or
Completion of a two- to three-year program in a related allied health field and a one-year post-diploma program in diagnostic medical sonography from an accredited institution are required.
- Registration with the Canadian Association of Registered Diagnostic Medical Ultrasound Professionals and/or the American Registry of Diagnostic Medical Sonographers is usually required by employers.
- Registration with l'Ordre des Technologues en Radiologie du Québec is required in Quebec.

Additional information

- Membership in the Canadian Society of Diagnostic Medical Sonographers is available but voluntary.

Classified elsewhere

- *Medical radiation technologists (3215)*

3217 Cardiology technologists and electrophysiological diagnostic technologists, n.e.c.

Cardiology technologists operate electrocardiogram and other electronic equipment to record cardiac activity of patients to aid in the diagnosis, monitoring and treatment of heart disease. Electrophysiological diagnostic technologists, not elsewhere classified, operate electroencephalographic, electromyographic and other electrophysiological diagnostic equipment to assist physicians in diagnosing diseases, injuries and abnormalities. Cardiology technologists and electrophysiological diagnostic technologists who are supervisors or instructors are included in this unit group. They are employed in clinics, hospitals and medical laboratories.

Example titles

cardiac stress technologist
cardiology supervisor
cardiology technologist
electrocardiographic (ECG) technologist
electrocardiography technologist

electroencephalograph (EEG) technologist
electromyography (EMG) technologist
electroneurodiagnostic (END) technologist
electroneurophysiology (ENP) technologist

Main duties

Cardiology technologists perform some or all of the following duties:

- Operate electrocardiogram and other electronic equipment to record cardiac activity of patients
- Perform cardiovascular procedures and tests, such as electrocardiograms, exercise tolerance tests, ambulatory monitoring and scanning of tapes, holter arrhythmia scanning, pacemaker analysis and follow-up
- Record and assess cardiac activity and provide preliminary reports of tests
- Provide patients with care during procedures and tests
- Prepare reports for interpretation by cardiologists
- Reprogram pacemakers according to required standards
- Check, calibrate and perform routine maintenance of cardiology equipment to ensure proper operation
- May analyze tests and notify physician or other health care professionals of abnormalities
- May administer certain drugs under direct supervision of physician
- May document and record pacemaker implant threshold measurements under direct supervision of cardiac surgeon
- May supervise and train students, other cardiology technologists and nurses.

Electrophysiological technologists perform some or all of the following duties:

- Review patient's case history and assess nature of problem to determine procedures and tests required

- Attach diagnostic equipment to patients and ensure their comfort and safety
- Operate diagnostic equipment such as electroencephalographic and evoked potential equipment to record the electrical activity of the brain and cranial and central nervous systems
- Operate electromyographic equipment to conduct electrophysiological nerve conduction velocity tests and to assist physicians in conducting electrophysiological tests such as muscle strength and repetitive stimulation
- Take notes on the recorded graph to identify interference such as poor electrode contact or patient movement
- Prepare recordings and reports of findings for physicians to aid in the diagnosis of neurological disorders
- Check, calibrate and perform routine maintenance of diagnostic equipment
- Train and supervise students, technicians or other electroencephalograph technologists.

Employment requirements

- Cardiology technologists require completion of a two-year college diploma program in cardiology technology *and* Supervised practical training.
- Cardiology technologists require registration with the Canadian Society of Cardiology Technologists in all provinces except Quebec.

3219 Other medical technologists and technicians (except dental health)

This unit group includes medical technologists and technicians not elsewhere classified, such as dietary technicians, pharmacy technicians, ocularists, prosthetists, orthotists, prosthetic technicians and orthotic technicians. Dietary technicians are employed in health care and commercial food service establishments such as hospitals, extended care facilities, nursing homes, schools, cafeterias and fast food outlets. Pharmacy technicians are employed in retail and hospital pharmacies, long-term care facilities and by pharmaceutical manufacturers. Ocularists are employed in custom ocular prosthetic laboratories, or they may be self-employed. Prosthetists, orthotists and prosthetic and orthotic technicians are employed in hospitals, clinics, prosthetics and orthotics laboratories, and prosthetic device manufacturing companies. Prosthetists and orthotists may also be self-employed.

Example titles

dietary technician

food and nutrition technician – dietetics

ocularist

ocularist technician

orthotic technician

orthotist

pharmacy technician

prosthetic technician

prosthetist

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Dietary technicians assist dietitians or nutritionists to plan and supervise food service operations; plan menus and diet for individuals or groups under the direction of a dietitian or nutritionist; assist in the supervision of personnel who prepare and serve food; help patients select menu items; and assist dietitians with research in food, nutrition and food service systems.
- Pharmacy technicians assist pharmacists to maintain inventories of medications and prescription records of pharmaceutical products; ensure the information on prescriptions is accurate, enter client information in databases and prepare medications for clients; compound oral solutions, ointments and creams; bill third party insurers; and may help with scheduling and workflow.
- Ocularists design, fabricate and fit ocular prostheses and conformers, and may design and fabricate implants; paint the iris and pupil of artificial eyes; clean and restore ocular prostheses; advise patients concerning the loss of depth perception and the care and use of ocular prostheses; repair and maintain fabrication and laboratory equipment; and consult with ophthalmologists concerning insertion of ocular prostheses.

- Prosthetists and orthotists design, fabricate and fit prosthetic and orthotic appliances such as artificial limbs, braces or supports; interpret physicians' specifications and examine and measure patients to develop working sketches of appliances; make and modify plaster casts of areas to receive prostheses or orthoses; fit, adjust and repair appliances; advise patients in the use and care of prostheses and orthoses; and supervise and direct the activities of prosthetic and orthotic technicians.
- Prosthetic and orthotic technicians assemble or build prosthetic and orthotic appliances according to drawings, measurements and plaster casts using a variety of materials such as metals, plastics and leathers; repair, rebuild and modify prosthetic and orthotic appliances or orthopaedic footwear; and may take the body or limb measurements of patients.

Employment requirements

- Dietary technicians require completion of a two- to three-year college program in dietary technology and supervised practical training.
- Pharmacy technicians usually require completion of a two- to three-year college program in pharmaceuticals.
- Ocularists require completion of the ocularist training program of the American Society of Ocularists and supervised practical training
or
A five-year supervised practical training program under a certified ocularist.

3219 Other medical technologists and technicians (except dental health)

- Certification by the National Examining Board of Ocularists is usually required.
- Prosthetists and orthotists require a two-year college program in prosthetics and orthotics technology and three years of supervised practical training.
- Certification by the Canadian Board of Certification of Prosthetists and Orthotists (CBCPO) may be required.
- Prosthetic and orthotic technicians usually require a two- to three- year college program in prosthetics and orthotics and one to two years of supervised practical training
or
Completion of secondary school and up to four years of supervised practical training under a certified prosthetist or orthotist.
- Registration with the Canadian Association of Prosthetists and Orthotists (CAPO) may be required.

Additional information

- Prosthetic and orthotic technicians may become certified prosthetists or orthotists with an additional two years of experience as a registered prosthetic or orthotic technician and completion of certification examinations by the Canadian Board of Certification of Prosthetists and Orthotists.

3223 Dental technologists, technicians and laboratory assistants

Dental technologists and technicians design, prepare and fabricate dentures and dental devices as prescribed by dentists and other specialists. Dental laboratory assistants assist dental technologists and technicians in preparing and fabricating dentures and other dental devices. They are employed in dental laboratories. Dental technologists and technicians who are supervisors are included in this unit group.

Example titles

ceramic denture moulder
dental laboratory assistant
dental technician
dental technician supervisor
dental technologist

denture finisher
denture wax pattern former
orthodontic band maker
registered dental technician
registered dental technologist

Main duties

Dental technologists, technicians and laboratory assistants perform some or all of the following duties:

- Design, fabricate or repair dental devices including full or partial dentures, orthodontic appliances, crowns, bridges, inlays, onlays, clasps and bands, and implants
- Prepare plaster models and moulds from dental impressions
- Prepare wax bite-blocks and impression trays
- Cast gold or metal alloys for bridges and denture bases
- Pack plastic material in moulds to form full or partial dentures
- Mould wax over denture set-up to form full contours of artificial gums
- Make orthodontic bands from gold, silver, stainless steel or other metals
- Finish metal framework of dentures and polish and buff dentures to obtain natural finish
- May consult with dentists or other specialists on problematic dental cases
- May train and supervise other dental technicians and dental laboratory assistants in fabricating dentures and other dental devices
- May perform administrative functions for the dental laboratory.

Employment requirements

- Dental technologists and technicians are required to complete a college program in dental technology
or
Four or more years of on-the-job training under the supervision of a registered dental technologist or technician.

- Registration with a regulatory body is required for dental technologists and technicians in all provinces except in Manitoba and the territories.
- Dental laboratory assistants usually require secondary school and up to two years of on-the-job training.

Additional information

3232 Practitioners of natural healing

Practitioners of natural healing provide health care to patients using traditional Chinese medicine techniques and other forms of treatment including acupuncture, herbology or reflexology to promote, maintain and restore the holistic health of patients. They usually work in private practice, including group or team practices, or are employed by clinics, health clubs and spas.

Example titles

acupuncturist
aromatherapist
ayurvedic practitioner
herbalist

homeopathist
reflexologist
traditional Chinese medicine practitioner

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Traditional Chinese medicine practitioners diagnose the diseases, physiological disorders and injuries of patients and treat them using raw herbs and other medicines, dietary supplements or acupuncture.
- Acupuncturists diagnose symptoms, physiological disorders and injuries of patients and treat them by the insertion of acupuncture needles or through stimulation techniques such as acupressure, moxibustion, cupping or electrical current.
- Herbalists assess patients and advise them on the use of herbs for the treatment of conditions such as arthritis, rheumatism, asthma, skin disorders and stomach ailments and may cultivate herbs and manufacture and sell herbal compounds.
- Homeopaths diagnose illnesses and treat them by administering, in chemical or herbal form, a small dosage of the illness itself or by suggesting lifestyle changes.
- Reflexologists apply gentle finger pressure to specific spots on the clients' feet or hands to promote relaxation and better health and well-being.

Employment requirements

- Traditional Chinese medicine practitioners usually require completion of a three- to four-year diploma program in traditional Chinese medicine from a private institute
or
completion of a program in traditional Chinese medicine from recognized medical schools abroad.

- Registration with a regulatory body is required for traditional Chinese medicine practitioners in Ontario and British Columbia.
- Registration with a regulatory body is required for acupuncturists in Quebec, Ontario, Alberta and British Columbia.
- Acupuncturists usually require completion of a three-year diploma program in acupuncture from a private institute
or
completion of some university undergraduate studies in science and training in a related health care discipline or work experience under the supervision of a registered acupuncturist.
- Other occupations in this unit group usually require completion of training programs specific to their type of practice and some supervised practical training.

3237 Other technical occupations in therapy and assessment

This unit group includes workers, not elsewhere classified, who perform various technical therapy and assessment functions. Some may assist professionals such as audiologists, speech-language pathologists, ophthalmologists, physiotherapists and occupational therapists. They are employed in hospitals, clinics, extended care facilities, rehabilitation centres, educational institutions and in the private practices of the professionals they assist.

Example titles

audiology technician

audiometric assistant

audiometric technician

communicative disorders assistant

hearing instrument practitioner

occupational therapy assistant

ophthalmic assistant

ophthalmic technician

ophthalmic technologist

ophthalmologist assistant

physical rehabilitation technician

physiotherapy technician

speech technician

speech therapy assistant

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Hearing instrument practitioners examine adult clients to assess hearing loss using diagnostic evaluation and electro acoustic testing; recommend and dispense appropriate type of hearing instrument; take earmold impressions for use in the manufacture of hearing devices; fit, adjust and make minor modifications to hearing instruments; educate clients in appropriate use, care and maintenance of hearing instruments and perform follow-up examinations and readjustments.
- Audiometric technicians, under the supervision of audiologists, administer tests such as pure tone hearing screening, impedance tests and noise level measurements using equipment such as audiometers and sound level meters to determine hearing thresholds of patients; instruct patients on test procedures and record results; monitor, check and calibrate auditory equipment; may take earmold impressions and fit and adjust hearing instruments.
- Communicative disorders assistants and speech-language pathology assistants assist speech-language pathologists during assessment of patients; carry out treatment programs and develop materials for use with patients, under the supervision of speech-language pathologists; document patient rehabilitation progress; and check and maintain therapeutic equipment and materials.

- Ophthalmic medical assistants operate ophthalmic testing and measuring instruments to aid ophthalmologists in assessing patients' vision; record test results; assist ophthalmologists in office surgery; administer eye drops, ointments and medications as directed by ophthalmologists; clean and maintain instruments and equipment used during examinations; take patients' general medical and ophthalmic history; and perform various administrative duties.
- Physiotherapy assistants and occupational therapy assistants, under the direction of physiotherapists and/or occupational therapists, carry out treatment programs such as thermotherapy, traction, hydrotherapy and electrotherapeutic techniques to rehabilitate patients with various injuries or disabilities to maximize their ability to independently manage daily activities.

Employment requirements

- Hearing instrument practitioners require completion of a three-year college diploma in a hearing instrument specialist program, including a period of supervised training.
- Licensure with a regulatory body is required for hearing instrument practitioners in all provinces except in Ontario where membership with the Association of Hearing Instrument Practitioners (AHIP) is required. Hearing instrument practitioners can prescribe and dispense hearing instruments except in Ontario where dispensing is dependant on a prescription from a physician or audiologist.

3237 Other technical occupations in therapy and assessment

- Audiometric technicians and communicative disorders and speech-language pathology assistants require completion of a 12- to 18-month college program in communicative disorders
or
Some post-secondary education and on-the-job training.
- Ophthalmic medical assistants require completion of a one- to two-year college program or a two-year hospital-based training program in ophthalmic medical technology
or
A minimum of one year of supervised practical training under an ophthalmologist and completion of an approved ophthalmic assistant home study program.
- Physiotherapy assistants require completion of a two- to three-year college program in physical rehabilitation therapy
or
A two-year physical therapy assistant (PTA) program and supervised practical training.
- Occupational therapy assistants require completion of a two-year occupational therapy assistant (OTA) college program.

Additional information

- Currently, the qualifications of physical rehabilitation technicians are recognized only in the province of Quebec.
- In most provinces occupational therapy assistants (OTA) and physiotherapy assistants (PTA) receive training through a single OTA/PTA program in community colleges.

- Laundromat attendants replenish vending machines, provide change, explain operation of machines to customers, clean the laundromat and arrange for the repair of broken machines and may wash, dry and fold laundry for customers; may operate dry cleaning machines for customers.
- Parking lot attendants and car jockeys collect parking fees, issue ticket stubs, direct customers to parking spaces and park cars.
- Ticket takers and ushers collect admission tickets or passes from patrons at entertainment events and direct patrons to their seats.
- Other related elemental workers in this group perform services specific to the establishments in which their occupations are found.

Employment requirements

- There are no specific education requirements for occupations in this unit group.
- A valid driver's licence is required for some occupations in this unit group, such as funeral attendant and car jockey.

7201 **ors and supervisors, machining, metal forming, shaping and erecting trades and related occupations**

This unit group includes sheet metal, ironwork, welding and boilermaking trade contractors who own and operate their own businesses. This group also includes supervisors who supervise and co-ordinate the activities of workers classified in the following unit groups: *Machinists and Machining and Tooling Inspectors (7231)*, *Tool and Die Makers (7232)*, *Sheet Metal Workers (7233)*, *Boilermakers (7234)*, *Structural Metal and Platework Fabricators and Fitters (7235)*, *Ironworkers (7236)*, *Welders and Related Machine Operators (7237)* and *Machining Tool Operators (9417)*. They are employed by structural, platework and related metal products fabrication, manufacturing and erecting companies and machine shops.

Example titles

contractor, ironwork

foreman/woman, automotive machine shop

foreman/woman, blacksmiths

foreman/woman, boilermakers

foreman/woman, ironworkers

foreman/woman, machinists

foreman/woman, maintenance machine shop

foreman/woman, tool and die makers

supervisor, boilermakers

supervisor, machine shop

supervisor, machinists

supervisor, metal mould and metal patternmakers

supervisor, sheet metal workers

supervisor, structural metal fitters

supervisor, tool and die inspectors

supervisor, welders

Main duties

Contractors and supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who shape, form and join metal parts or products to specified dimensions, machine metal into parts, products, tools and dies or moulds with precise measurements and erect light and heavy metal products and structures
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Requisition materials and supplies
- Resolve work problems and recommend work measures to improve productivity
- Train or arrange for training of workers
- Recommend personnel actions such as hirings and promotions
- Ensure standards for safe working conditions are observed
- Prepare production and other reports
- Set up machines and equipment and write programs for computer numerically controlled (CNC) machine tools
- May manage the operations of their own companies
- May also supervise, co-ordinate and schedule the activities of related apprentices, machine operators, helpers and labourers.

Employment requirements

- Completion of secondary school is usually required.
- Several years of experience as a qualified machinist or tool and die maker are required.
- Journeyman/woman trade certification in machining, tool and die making or in another related metalworking trade is required.

Classified elsewhere

- CAD-CAM and CMM programmers (in 2233 *Industrial engineering and manufacturing technologists and technicians*)
- *Supervisors, motor vehicle assembling (9221)*
- *Supervisors, other mechanical and metal products manufacturing (9226)*

7202 Contractors and supervisors, electrical trades and telecommunications occupations

This unit group includes telecommunications and electrical trade contractors who own and operate their own businesses. This group also includes supervisors who supervise and co-ordinate the activities of workers classified in the following unit groups: *Electricians (7241)*, *Industrial Electricians (7242)*, *Power System Electricians (7243)*, *Electrical Power Line and Cable Workers (7244)*, *Telecommunications Line and Cable Workers (7245)*, *Telecommunications Installation and Repair Workers (7246)* and *Cable Television Service and Maintenance Technicians (7247)*. They are employed in a wide range of establishments; places of employment are indicated in the above unit group descriptions.

Example titles

electrical contractor	foreman/woman, telecommunications installation and repair workers
foreman/woman, cablevision technicians	supervisor, cable maintenance and repair
foreman/woman, construction electricians	supervisor, plant electricians
foreman/woman, industrial electricians	supervisor, residential electricians
foreman/woman, power line and cable workers	
foreman/woman, power system electricians	

Main duties

Contractors and supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who install, repair and maintain electrical wiring, fixtures and control devices, power systems, telecommunication systems and cablevision systems
- Establish methods to meet work schedules and co-ordinate work activities with other departments or subcontractors
- Requisition materials and supplies
- Resolve work problems and recommend work measures to improve productivity
- Train or arrange for training of workers
- Recommend personnel actions such as hirings and promotions
- Ensure standards for safe working conditions are observed
- Prepare work progress reports
- May manage the operations of their own companies
- May also supervise, co-ordinate and schedule the activities of related apprentices, helpers and labourers.

Employment requirements

- Completion of secondary school is usually required.
- Several years of experience as a qualified tradesperson in a relevant trade are required.
- Journeyman/woman trade certification in a relevant trade is required.

Additional information

- There is some mobility between jobs within a specific trade; however, there is little or no intertrade mobility.

Classified elsewhere

- Foreman/woman of electrical mechanics (in 7301 *Contractors and supervisors, mechanic trades*)

7203 Contractors and supervisors, pipefitting trades

This unit group includes plumbing and other pipefitting trade contractors who own and operate their own businesses. This group also includes supervisors who supervise and co-ordinate the activities of workers classified in the following unit groups: *Plumbers (7251)*, *Steamfitters, Pipefitters and Sprinkler System Installers (7252)* and *Gas Fitters (7253)*. They are employed by construction companies, mechanical, plumbing and pipefitting trade contractors and maintenance departments of industrial, commercial and manufacturing establishments.

Example titles

contractor, pipefitting

contractor, plumbing

foreman/woman, gas fitters

foreman/woman, pipefitters

foreman/woman, plumbers

foreman/woman, sprinkler system installers

foreman/woman, steamfitters

supervisor, gas fitters

supervisor, plumbers

supervisor, steamfitters

Main duties

Contractors and supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who install, repair and maintain piping systems used for the transmission of steam, heat, water, oil and other liquids and gases in residential, commercial, industrial and other installations
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Requisition materials and supplies
- Resolve work problems and recommend measures to improve productivity
- Train or arrange for training of workers
- Recommend personnel actions such as hirings and promotions
- Ensure standards for safe working conditions are observed
- Prepare schedules and other reports
- May manage the operations of their own companies
- May supervise, co-ordinate and schedule the activities of related apprentices, helpers and labourers.

Employment requirements

- Completion of secondary school is usually required.
- Several years of experience as a qualified tradesperson in a relevant trade are required.
- Journeyman/woman trade certification in a relevant trade is required.

Additional information

- There is little or no intertrade mobility among the supervisors in this unit group.

Classified elsewhere

- *Contractors and supervisors, other construction trades, installers, repairers and servicers (7205)*

7204 Contractors and supervisors, carpentry trades

This unit group includes carpentry and cabinetmaking trade contractors who own and operate their own businesses. This group also includes supervisors who supervise and co-ordinate the activities of workers classified in the following unit groups: *Carpenters (7271)* and *Cabinetmakers (7272)*. They are employed by construction companies, carpentry contractors, maintenance departments of industrial establishments, and custom furniture and fixture manufacturing or repair companies.

Example titles

cabinetmaking contractor
carpentry contractor
foreman/woman, finish carpenters
foreman/woman, form builders

foreman/woman, framers
foreman/woman, maintenance carpenters
supervisor, carpenters

Main duties

Contractors and supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of carpenters who construct, renovate and maintain structures of wood and other building materials and build and install interior finishing in residential, commercial and industrial buildings; and of cabinetmakers who construct and repair custom wooden cabinets, furniture, fixtures and related products
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Requisition materials and supplies
- Resolve work problems and recommend work measures to improve productivity
- Train or arrange for training of workers
- Recommend personnel actions such as hirings and promotions
- Ensure standards for safe working conditions are observed
- Prepare schedules and other reports
- May manage the operations of their own companies
- May also supervise, co-ordinate and schedule the activities of related apprentices, helpers and labourers.

Employment requirements

- Completion of secondary school is usually required.
- Several years of experience as a qualified carpenter or cabinetmaker are required.
- Journeyman/woman trade certification as a carpenter or cabinetmaker is usually required.

Additional information

- There is some mobility among jobs within a specific trade; however, there is little or no intertrade mobility.

Classified elsewhere

- *Construction managers (0711)*
- *Home building and renovation managers (0712)*
- *Supervisors, furniture and fixtures manufacturing (9224)*

7205 Contractors and supervisors, other construction trades, installers, repairers and servicers

This unit group includes roofing, masonry, painting and other construction trade contractors, not elsewhere classified, who own and operate their own business. Supervisors in this unit group supervise and co-ordinate the activities of various tradespersons, installers, repairers and servicers classified in the following minor groups: *Masonry and Plastering Trades (728)*, *Other Construction Trades (729)* and *Other Installers, Repairers and Servicers (744)*. They are employed by a wide range of establishments; places of employment are indicated in the unit group descriptions. This unit group also includes prefabricated product installation and service contractors and proprietors of some repair and service establishments.

Example titles

bricklaying contractor

cement finishing contractor

foreman/woman, glaziers

foreman/woman, insulators

foreman/woman, plasterers

painting contractor

pest control supervisor

roofing contractor

supervisor, bicycle repair shop

supervisor, painters and decorators

supervisor, tilers

Main duties

Contractors and supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of construction workers engaged in bricklaying, roofing, cement finishing, tilesetting, plastering, drywall installation, glazing, insulating and painting, and workers who install and service prefabricated products in residential and commercial properties, as well as workers who repair a wide variety of products, such as musical instruments, sports equipment, vending machines, bicycles and cameras
- Establish methods to meet work schedules and co-ordinate work activities with other subcontractors
- Resolve work problems and recommend measures to improve productivity and product quality
- Requisition materials and supplies
- Train workers in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare work progress reports
- May manage the operations of own company
- May also supervise, co-ordinate and schedule the activities of related apprentices, helpers and labourers.

Employment requirements

- Completion of secondary school is usually required.
- Several years of experience in the trade or in the work area supervised are usually required.
- Journeyman/woman trade certification may be required for some occupations in this unit group.

Additional information

- There is little or no mobility among supervisors in this unit group.

Classified elsewhere

- *Contractors and supervisors, carpentry trades (7204)*

7231 Machinists and machining and tooling inspectors

Machinists set up and operate a variety of machine tools to cut or grind metal, plastic or other materials to make or modify parts or products with precise dimensions. Machining and tooling inspectors inspect machined parts and tooling in order to maintain quality control standards. They are employed by machinery, equipment, motor vehicle, automotive parts, aircraft and other metal products manufacturing companies and by machine shops.

Example titles

automotive machinist
aviation machinist
general machinist
machined parts inspector
machine shop inspector

machining inspector
machinist
machinist apprentice
tooling inspector

Main duties

Machinists perform some or all of the following duties:

- Read and interpret engineering drawings, blueprints, charts and tables or study sample parts to determine machining operation to be performed, and plan best sequence of operations
- Compute dimensions and tolerances and measure and lay out work pieces
- Set up, operate and maintain a variety of machine tools including computer numerically controlled (CNC) tools to perform precision, non-repetitive machining operations such as sawing, turning, milling, boring, planing, drilling, precision grinding and other operations
- Fit and assemble machined metal parts and subassemblies using hand and power tools
- Verify dimensions of products for accuracy and conformance to specifications using precision measuring instruments
- May set up and program machine tools for use by machining tool operators.

Machining and tooling inspectors perform some or all of the following duties:

- Verify dimensions of machined parts or tooling using micrometers, verniers, callipers, height gauges, optical comparators, co-ordinate measuring machines (CMM) or other specialized measuring instruments
- Maintain, repair and calibrate precision measuring instruments such as dial indicators, fixed gauges, height gauges and other measuring devices
- Report deviations from specifications and tolerances to supervisor
- Complete and maintain inspection reports.

46Employment requirements

- Completion of secondary school is usually required.
- Completion of a four-year apprenticeship program
or
A combination of over four years of work experience in the trade and some college or industry courses in machining is usually required to be eligible for trade certification.
- Trade certification for machinists is available, but voluntary, in all provinces and territories.
- Trade certification for automotive machinists is available, but voluntary, in Ontario.
- Trade certification for machinists (CNC) is available, but voluntary, in New Brunswick, Québec and Manitoba.
- Several years of experience as a machinist, tool and die maker or machining tool operator may be required for machining and tooling inspectors.
- Red Seal endorsement is also available to qualified machinists upon successful completion of the interprovincial Red Seal examination.

Additional information

- Familiarity with exotic and composite materials may be required for machinists in aviation and other advanced manufacturing sectors.
- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

7231 Machinists and machining and tooling inspectors

Classified elsewhere

- CAD-CAM programmers (in 2233 *Industrial engineering and manufacturing technologists and technicians*)
- *Contractors and supervisors, machining, metal forming, shaping and erecting trades and related occupations (7201)*
- *Machining tool operators (9417)*
- *Tool and die makers (7232)*

7232 Tool and die makers

Tool and die makers make, repair and modify custom-made, prototype or special tools, dies, jigs, fixtures and gauges using various metals, alloys and plastics which require precise dimensions. They are employed primarily in manufacturing industries such as automobile, aircraft, metal fabrication, electrical machinery and plastics, and in tool and die, mould making and machine shops. This unit group also includes metal patternmakers and metal mould makers.

Example titles

die finisher
die maker
jig maker
metal mould maker
metal patternmaker
metal patternmaker apprentice

mould maker apprentice
mould maker – plastics processing
tool and die maker
tool and die maker apprentice
toolmaker

Main duties

Tool and die makers perform some or all of the following duties:

- Read and interpret engineering drawings and specifications of tools, dies, prototypes or models
- Prepare templates and sketches, and determine work processes
- Compute dimensions and tolerances and set up machine tools
- Position, secure, measure and work metal stock or castings to lay out for machining
- Set up, operate and maintain a variety of conventional and computer numerically controlled (CNC) machine tools to cut, turn, mill, plane, drill, bore, grind or otherwise shape workpiece to prescribed dimensions and finish
- Verify machined parts for conformance to specifications using precision measuring instruments such as verniers, callipers, micrometers, co-ordinate measuring machines (CMM) and electronic measuring devices
- Fit and assemble or disassemble parts using hand tools
- Test completed tools, dies, jigs or fixtures for proper operation
- May program CNC machine tools.

Metal patternmakers perform some or all of the following duties:

- Machine, fit and assemble castings and other parts to make precision models of required shape such as metal patterns, core boxes and match plates

- Lay out, shape and assemble patterns of metal, wood, plastic and other materials from blueprints, models or templates
- May program CNC machine tools.

Metal mould makers perform some or all of the following duties:

- Machine, fit and assemble parts to make metal moulds and cores for plastic injection moulding, or other production processes
- May program CNC machine tools.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four- or five-year tool and die making apprenticeship program
or
A combination of over five years of work experience in the trade and some high school, college or industry courses in tool and die making is usually required to be eligible for tool and die trade certification.
- Tool and die making trade certification is available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Quebec, Ontario, Manitoba, Alberta and British Columbia.
- Red Seal endorsement is also available to qualified tool and die makers upon successful completion of the interprovincial Red Seal examination.
- Mould makers usually require completion of a four-year apprenticeship or college program in mould making.
- Trade certification for mould makers is available, but voluntary, in Quebec and Ontario.

7232 Tool and die makers

- Patternmakers usually require completion of an apprenticeship or college program in patternmaking.
- Patternmaking trade certification is available, but voluntary, in Ontario.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Machining tool operators* (9417)
- *Machinists and machining and tooling inspectors* (7231)
- Manual and machine mould makers and core makers (in 9412 *Foundry workers*)
- Supervisors of tool and die makers, metal mould makers and patternmakers (in 7201 *Contractors and supervisors, machining, metal forming, shaping and erecting trades and related occupations*)

7233 Sheet metal workers

Sheet metal workers fabricate, assemble, install and repair sheet metal products. They are employed by sheet metal fabrication shops, sheet metal products manufacturing companies, sheet metal work contractors and various industrial sectors.

Example titles

apprentice sheet metal worker
sheet metal fabricator
sheet metal mechanic

sheet metal worker
tinsmith

Main duties

Sheet metal workers perform some or all of the following duties:

- Read engineering and architectural drawings, sketches and work specifications to be performed, and lay out, measure and mark sheet metal according to drawings or templates
- Develop patterns for sheet metal using computer-assisted design and drafting (CAD) software package
- Operate light metalworking machines such as shears, brakes, punches, and drill presses, including computer numerical control (CNC) equipment to cut, bend, punch, drill, shape or straighten sheet metal
- Operate computerized laser or plasma cutting equipment to cut sheet metal
- Install and use rigging and hoisting equipment
- Fit and join sheet metal parts using riveting, welding, soldering and similar equipment to fabricate products such as ventilation shafts, exhaust hoods, eavestroughs, partition frames, air and heat ducts, material handling systems, roof decking and sheet metal buildings
- Install sheet metal products according to specifications and building codes
- Grind and buff seams, joints and rough surfaces
- Inspect product quality and installation to ensure conformance to specifications.

Sheet metal workers may specialize in on-site installation or shop manufacture of sheet metal products, or servicing and maintenance of installed equipment and systems.

Employment requirements

- Completion of secondary school is usually required.

- Completion of a three to five year apprenticeship program
or
A combination of over four years of work experience in the trade and some high school, college or industry courses in sheet metal working is usually required to be eligible for trade certification.
- Trade certification is compulsory in Quebec, Ontario, Saskatchewan and Alberta, and available, but voluntary, in all other provinces and the territories.
- Trade certification for precision sheet metal set-up operator is available, but voluntary in Québec.
- Red Seal endorsement is also available to qualified sheet metal workers upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Aircraft sheet metal technicians (in 7315 *Aircraft mechanics and aircraft inspectors*)
- *Boilermakers* (7234)
- *Ironworkers* (7236)
- *Metalworking and forging machine operators* (9416)
- *Structural metal and platework fabricators and fitters* (7235)
- Supervisors of sheet metal workers (in 7201 *Contractors and supervisors, machining, metal forming, shaping and erecting trades and related occupations*)

7234 Boilermakers

Boilermakers fabricate, assemble, erect, test, maintain and repair boilers, vessels, tanks, towers, heat exchangers and other heavy-metal structures. They are employed in boiler fabrication, manufacturing, shipbuilding, construction, electric power generation and similar industrial establishments.

Example titles

boiler fitter
boiler installer
boilermaker
boilermaker apprentice

construction boilermaker
industrial boilermaker
marine boilermaker
pressure vessel fabricator

Main duties

Boilermakers perform some or all of the following duties:

- Read blueprints or specifications to plan sequence of operation
- Lay out plate, sheet steel or other heavy metal and mark bending and cutting lines on work piece using protractors, compasses and drawing instruments or templates
- Set up and operate heavy-metal working machines such as brakes, rolls, shears, flame cutters and drill presses to cut, shape and form metal into parts or sections
- Fit and weld metal parts or sections together to fabricate boilers, vessels, tanks, heat exchangers, piping and other heavy-metal products
- Erect and install boilers and other heavy-metal products according to specifications using hand and power tools
- Repair and perform maintenance work on boilers and other heavy-metal products
- Direct activities of hoist or crane operators and other workers during fabrication, assembly, installation or repair of structures
- Test finished structures using a variety of methods.

Boilermakers may specialize in rigging and hoisting, preparation and layout, or welding aspects of the trade.

Employment requirements

- Completion of secondary school is usually required.

- Completion of a three- to four-year apprenticeship program
or
A combination of over four years of work experience in the trade and some high school, college or industry courses in boilermaking is usually required to be eligible for trade certification.
- Trade certification is compulsory in Nova Scotia, Quebec and Alberta and available, but voluntary, in all other provinces.
- Red Seal endorsement is also available to qualified boilermakers upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Ironworkers (7236)*
- *Structural metal and platework fabricators and fitters (7235)*
- Supervisors of boilermakers (in 7201 *Contractors and supervisors, machining, metal forming, shaping and erecting trades and related occupations*)
- *Welders and related machine operators (7237)*

7235 Structural metal and platework fabricators and fitters

Structural metal and platework fabricators and fitters fabricate, assemble, fit and install steel or other metal components for buildings, bridges, tanks, towers, boilers, pressure vessels and other similar structures and products. They are employed in structural steel, boiler and platework fabrication plants and by heavy machinery manufacturing and shipbuilding companies.

Example titles

metal fabricator
plater
platework fitter
shipfitter

shipfitter apprentice
steel fabricator
structural steel fitter

Main duties

Structural metal and platework fabricators and fitters perform some or all of the following duties:

- Study engineering drawings and blueprints, determine the materials required, and plan the sequence of tasks to cut metal most efficiently
- Construct patterns and templates as guides for layouts
- Lay out reference points and patterns on heavy metal according to component specifications
- Rig, hoist and move materials to storage areas or within worksite
- Assemble and fit metal sections and plates to form complete units or subunits using tack welding, bolting, riveting or other methods
- Set up and operate various heavy-duty metal-working machines such as brake presses, shears, cutting torches, grinders and drills, including computer numerical control (CNC) equipment, to bend, cut, form, punch, drill or otherwise form heavy-metal components
- Install fabricated components in final product.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a three- to four-year apprenticeship program
or
A combination of over four years of work experience in the trade and some college or industry courses in structural steel and platework fabrication is usually required to be eligible for trade certification.
- Trade certification for metal fabricator (fitter) is available, but voluntary, in all provinces.
- Trade certification for marine fitters is available, but voluntary, in Nova Scotia.

- Trade certification for marine mechanical technicians and marine repair technicians is available, but voluntary, in British Columbia.
- Trade certification for boiler and related equipment assemblers and structural metal fabricators (non-construction) is available, but voluntary, in Québec.
- Red Seal endorsement is also available to qualified metal fabricators (fitters) upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Some structural metal and platework fabricators and fitters may also be certified as skilled welders.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Boilermakers* (7234)
- *Metalworking and forging machine operators* (9416)
- Structural steel erectors (in 7236 *Ironworkers*)

- *Welders and related machine operators* (7237)

7236 Ironworkers

Ironworkers fabricate, erect, hoist, install, repair and service structural ironwork, precast concrete, concrete reinforcing materials, curtain walls, ornamental iron and other metals used in the construction of buildings, bridges, highways, dams and other structures and equipment. They are employed by construction ironwork contractors.

Example titles

ironworker	ornamental ironworker
ironworker apprentice	reinforcing ironworker
ironworker – metal building systems erector	structural steel erector

Main duties

Ironworkers perform some or all of the following duties:

- Read blueprints and specifications to lay out work
- Unload and position steel units so each piece can be hoisted as needed
- Erect and install scaffolding, hoisting equipment and rigging
- Signal crane operator to position steel units according to blueprints
- Align and weld or bolt steel units in place
- Erect structural and architectural precast concrete components for buildings, bridges, towers and other structures
- Assemble and erect prefabricated metal structures
- Position and secure steel bars or metal mesh in concrete forms to reinforce concrete structures
- Install ornamental and other structural metalwork such as curtain walls, metal stairways, railings and power doors
- Examine structures and equipment for deterioration, defects or non-compliance with specifications
- May dismantle structures and equipment.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a two- to three-year apprenticeship program
or
Over three years of work experience in the trade and some high school, college or industry courses in ironworking are usually required to be eligible for trade certification.

- Trade certification for ironworker (generalist) is compulsory in Alberta and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Ontario, Manitoba and British Columbia.
- Trade certification for ironworker (reinforcing) is compulsory in Quebec and Alberta and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Ontario, Saskatchewan and British Columbia.
- Trade certification for ironworker (structural/ornamental) is compulsory in Alberta and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Ontario, Saskatchewan and British Columbia.
- Trade certification for ironworker (metal building systems erector) is compulsory in Alberta.
- Red Seal endorsement is also available to qualified ironworkers upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

7237 Welders and related machine operators

Welders operate welding equipment to weld ferrous and non-ferrous metals. This unit group also includes machine operators who operate previously set up production welding, brazing and soldering equipment. They are employed by companies that manufacture structural steel and platework, boilers, heavy machinery, aircraft and ships and other metal products, and by welding contractors and welding shops, or they may be self-employed.

Example titles

aviation welding technician
brazing machine operator
brazing machine setter
electric arc welder
journeyman/woman welder
laser welding operator
pressure vessel welder

production welder
soldering machine operator
spot welder
submerged arc welder
welder
welder apprentice
welder-fitter

Main duties

Welders perform some or all of the following duties:

- Read and interpret blueprints or welding process specifications
- Operate manual or semi-automatic welding equipment to fuse metal segments using processes such as gas tungsten arc welding (GTAW), gas metal arc welding (GMAW), flux-cored arc welding (FCAW), plasma arc welding (PAW), shielded metal arc welding (SMAW), oxy-acetylene welding (OAW), resistance welding and submerged arc welding (SAW)
- Operate manual or semi-automatic flame-cutting equipment
- Operate brazing and soldering equipment
- Operate metal shaping machines such as brakes, shears and other metal straightening and bending machines
- Repair worn parts of metal products by welding on extra layers.

Welders may specialize in certain types of welding such as custom fabrication, ship building and repair, aerospace precision welding, pressure vessel welding, pipeline construction welding, structural construction welding, or machinery and equipment repair welding.

Welding, brazing and soldering machine operators perform some or all of the following duties:

- Operate previously set up welding machines such as spot, butt and seam resistance or gas and arc welding machines to fabricate or repair metal parts

- Operate previously set up brazing or soldering machines to bond metal parts or to fill holes, indentations and seams of metal articles with solder
- Start up, shut down, adjust and monitor robotic welding production line
- Assist with the maintenance and repair of welding, brazing and soldering equipment
- May adjust welding heads and tooling according to work specifications.

Employment requirements

Welders

- Completion of secondary school is usually required.
 - Completion of a three-year apprenticeship program
or
A combination of over three years of work experience in the trade and some college or industry courses in welding is usually required to be eligible for trade certification.
 - Trade certification is compulsory in Alberta and available, but voluntary, in all other provinces and the territories.
 - Red Seal endorsement is also available to qualified welders upon successful completion of the interprovincial Red Seal examination.
- Welding, brazing and soldering machine operators
- Some secondary school education is required.
 - Several months of on-the-job training are usually provided.

7237 Welders and related machine operators

- Experience as a machine operator helper may be required.
- Experience with robotics may be required.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

7241 Electricians (except industrial and power system)

Electricians in this unit group lay out, assemble, install, test, troubleshoot and repair electrical wiring, fixtures, control devices and related equipment in buildings and other structures. They are employed by electrical contractors and maintenance departments of buildings and other establishments, or they may be self-employed.

Example titles

apprentice electrician

construction electrician

construction electrician apprentice

domestic and rural electrician

electrician

Main duties

Electricians in this unit group perform some or all of the following duties:

- Read and interpret drawings, circuit diagrams and electrical code specifications to determine wiring layouts for new or existing installations
- Pull wire through conduits and through holes in walls and floors
- Install brackets and hangers to support electrical equipment
- Install, replace and repair lighting fixtures and electrical control and distribution equipment, such as switches, relays and circuit breaker panels
- Splice, join and connect wire to fixtures and components to form circuits
- Test continuity of circuits using test equipment to ensure compatibility and safety of system, following installation, replacement or repair
- Troubleshoot and isolate faults in electrical and electronic systems and remove and replace faulty components
- Connect electrical power to audio and visual communication equipment, signalling devices and heating and cooling systems
- Conduct preventive maintenance programs and keep maintenance records.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four- to five-year apprenticeship program is usually required.

- Trade certification for construction electricians is compulsory in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Quebec, Ontario, Manitoba, Saskatchewan and Alberta and available, but voluntary, in British Columbia, the Yukon, the Northwest Territories and Nunavut.
- Trade certification for electricians (domestic and rural) is compulsory in Newfoundland and Labrador and Ontario.
- Trade certification for electrical control (machine) builders is available, but voluntary, in Ontario.
- Red Seal endorsement is also available to qualified construction electricians upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

7242 Industrial electricians

Industrial electricians install, maintain, test, troubleshoot and repair industrial electrical equipment and associated electrical and electronic controls. They are employed by electrical contractors and maintenance departments of factories, plants, mines, shipyards and other industrial establishments.

Example titles

electrician, shipyard
industrial electrician

industrial electrician apprentice
marine electrician

mill electrician

mine electrician

plant electrician

plant maintenance electrician

Main duties

Industrial electricians perform some or all of the following duties:

- Read and interpret drawings, blueprints, schematics and electrical code specifications to determine layout of industrial electrical equipment installations
- Install, examine, replace or repair electrical wiring, receptacles, switch boxes, conduits, feeders, fibre-optic and coaxial cable assemblies, lighting fixtures and other electrical components
- Test electrical and electronic equipment and components for continuity, current, voltage and resistance
- Maintain, repair, install and test switchgear, transformers, switchboard meters, regulators and reactors
- Maintain, repair, test and install electrical motors, generators, alternators, industrial storage batteries and hydraulic and pneumatic electrical control systems
- Troubleshoot, maintain and repair industrial, electrical and electronic control systems and other related devices
- Conduct preventive maintenance programs and keep maintenance records
- May install, maintain and calibrate industrial instrumentation and related devices.

Employment requirements

- Completion of secondary school is usually required.

- Completion of a four- or five-year industrial electrician apprenticeship program
or
A combination of over five years of work experience in the trade and some high school, college or industry courses in industrial electrical equipment is usually required to be eligible for trade certification.
- Trade certification for industrial electricians is compulsory in Prince Edward Island, Quebec and Manitoba and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, New Brunswick, Ontario, British Columbia and the Yukon.
- Additional construction electrician certification may be required for industrial electricians when the employers are not owners of the industrial electrical equipment.
- Red Seal endorsement is also available to qualified industrial electricians upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

7243 Power system electricians

Power system electricians install, maintain, test and repair electrical power generation, transmission and distribution system equipment and apparatus. They are employed by electric power generation, transmission and distribution companies.

Example titles

apprentice power system electrician
power electrician

power station electrician
power system electrician

Main duties

Power system electricians perform some or all of the following duties:

- Install and maintain electrical power distribution equipment such as transformers, generators, voltage regulators, switches, circuit breakers, capacitors, inductors, and supervisory control and data acquisition (SCADA) systems
- Install and maintain electrical equipment and apparatus in generating stations or powerhouses
- Inspect and test installed electrical equipment and apparatus to locate electrical faults and check their operation, using volt meters, ammeters and other electrical test instruments and equipment
- Repair or replace faulty electrical equipment and apparatus
- Complete test and maintenance reports.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four-year apprenticeship program for power system electricians
or
A combination of over four years of work experience in the trade and some college or industry courses in electrical technology is usually required.
- Trade certification is available, but voluntary, in Manitoba, Alberta, the Yukon, the Northwest Territories and Nunavut.

7244 Electrical power line and cable workers

Electrical power line and cable workers construct, maintain and repair overhead and underground electrical power transmission and distribution systems. They are employed by electric power generation, transmission and distribution companies, electrical contractors and public utility commissions.

Example titles

apprentice lineman/woman – electric power systems
cable installer – electrical power
cable splicer – electrical power

construction lineman/woman – electrical power line
power lineman/woman
power line patroller
powerline technician

Main duties

Electrical power line and cable workers perform some or all of the following duties:

- Install, maintain, troubleshoot and repair electrical distribution and transmission systems including overhead and underground power lines and cables, insulators, conductors, lightning arrestors, switches, transformers and other associated equipment
- Erect and maintain steel, wood or concrete poles, towers and guy wires
- Splice, solder and insulate conductors and related wiring to connect power distribution and transmission networks using splicing tools, related electrical equipment and tools
- Inspect and test overhead and underground power lines and cables and auxiliary equipment using electrical test equipment
- Climb ladders or operate hydraulic buckets when working aloft on poles and towers, or work in confined spaces such as trenches and tunnels to install power lines and cables and associated equipment
- Install and maintain street lighting systems
- Communicate with other workers to co-ordinate the preparation and completion of work assignments.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a provincial three- or four-year lineman/woman apprenticeship program
or
A combination of over four years of work experience in the trade and some high school, college or industry courses in electrical technology is usually required for electrical power line and cable workers.

- Trade certification for powerline technicians is available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Ontario, Saskatchewan, Alberta, British Columbia, the Yukon, the Northwest Territories and Nunavut.
- Trade certification for powerline technicians (construction) is available, but voluntary, in Newfoundland and Labrador.
- Trade certification for distribution construction linemen/women is available, but voluntary, in New Brunswick.
- Red Seal endorsement is also available to qualified powerline technicians upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

7245 Telecommunications line and cable workers

Telecommunications line and cable workers install, repair and maintain telecommunication lines and cables. They are employed by cable television companies and by telephone and other telecommunications services.

Example titles

apprentice lineman/woman – telecommunications
cable repairer, telecommunications
communication technician – construction
construction technician – cable television

lineman/woman, telecommunications
splicer technician – telephone
telecommunications line installer
telephone line technician

Main duties

Telecommunications line and cable workers perform some or all of the following duties:

- Install, remove, maintain and repair aerial and underground telephone and other telecommunication transmission and distribution lines, cables and associated hardware
- Install (but do not repair or maintain) cable television lines and cables
- Splice and repair various types and sizes of telephone and other telecommunication cables including single line, coaxial and fibre optic
- Inspect and test telecommunication transmission lines and cables for transmission characteristics and to locate faults
- Analyze and record test results
- Climb and work aloft on poles, ladders or other support structures or work in confined spaces such as trenches, tunnels and crawl spaces
- Communicate with other workers to co-ordinate the preparation and completion of work assignments
- Assist in the erection and removal of telecommunication poles, towers and associated support structures
- May operate excavation machinery and other heavy equipment.

Employment requirements

- Completion of secondary school is required.
- Completion of a four-year telecommunications line and cable apprenticeship program
or
A combination of over three years work experience in the trade and some industry-related or other specialized courses
or
Completion of a two-year college program in electronics is usually required.
- Trade certification for communications electrician (construction craft) is available, but voluntary, in Alberta, the Yukon, the Northwest Territories and Nunavut.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Cable television service and maintenance technicians (7247)*

7246 Telecommunications installation and repair workers

Telecommunications installation and repair workers install, test, maintain and repair telephones, telephone switching equipment and telecommunications equipment related to transmission and processing of voice, video signals and other data over a variety of media including fibre optics, microwave, radio and satellite. They are employed by telephone and other telecommunications transmission services establishments.

Example titles

apprentice communication electrician – switching
cellular telephone technician
communication technician, telephone
exchange tester – telecommunications
line and station installer, telephone

mobile radio installer
private branch exchange (PBX) installer
switch network installer and repairer
telecommunications equipment technician
telephone installer

Main duties

Telephone installers and repairers perform some or all of the following duties:

- Install, arrange, remove and maintain telephone equipment, wiring and associated hardware
- Test installed telephone systems to locate transmission faults
- Repair or replace defective and damaged telephones, wire and associated equipment.

Switch network installers and repairers perform some or all of the following duties:

- Install electromechanical, analog and digital trunking systems, circuits and equipment in telecommunications central offices and switching centres
- Inspect and test trunking systems, circuits and equipment
- Analyze test results and adjust, change or repair switching system, network, associated equipment and software.

Telecommunications service testers perform some or all of the following duties:

- Operate computerized testing systems to conduct service tests on customer lines and equipment
- Determine the nature, cause and location of service trouble
- Initiate the dispatch of appropriate repair personnel
- Complete test reports and maintain test and service records
- May assist repair personnel to test lines, circuits and systems, isolate and clear cable faults and verify records.

Telecommunications equipment technicians perform some or all of the following duties:

- Install, remove and maintain various telecommunications equipment and related systems such as telex and facsimile machines, teletypewriters, mobile radios, cellular telephones, pagers and other related telecommunications equipment
- Configure operating systems and install software for access to the Internet
- Inspect and test operation of telecommunications equipment
- Diagnose and locate equipment faults, and adjust, replace or repair telecommunications equipment.

Employment requirements

- Completion of secondary school is required.
- Telephone and switch network installers and repairers require completion of an apprenticeship program ranging from three to four years
or
A combination of over three years work experience in the trade and some high school, college or industry related courses.
- Telecommunications equipment technicians usually require completion of a college electrical and electronics program and several months of on-the-job training
or
Completion of a three- or four-year apprenticeship training program.
- Trade certification for communication technicians is available, but voluntary, in Nova Scotia, Alberta, British Columbia, the Northwest Territories and Nunavut.

7246 Telecommunications installation and repair workers

- Experience as an installer and repairer (telephone and switch network) is usually required for service testers.

Classified elsewhere

- *Electronic service technicians (household and business equipment) (2242)*
- Supervisors of telecommunication installation and repair workers (in 7202 *Contractors and supervisors, electrical trades and telecommunications occupations*)
- *Telecommunications line and cable workers (7245)*

7247 Cable television service and maintenance technicians

Cable television service technicians install, maintain and repair cable and satellite television and Internet signal and associated equipment in homes and commercial buildings. Cable television maintenance technicians maintain and repair cable television transmission and distribution systems and associated hardware. They are employed by cable and satellite television companies.

Example titles

cable television installer
cablevision servicer
CATV technician

direct broadcast satellite (DBS) technician – cable
television
installation technician, cable television
maintenance technician, cable television

Main duties

Cable television service technicians perform some or all of the following duties:

- Communicate with subscribers and company personnel to determine work assignments
- Connect, disconnect and relocate cable outlets, install splitters, converters, decoders, satellite and pay TV equipment, and install other cable hardware and systems at subscriber's premises
- Install cable modems and software to enable Internet access at subscriber's premises
- Inspect, test and repair cable and satellite television signals and associated equipment at subscriber's premises.

Cable television maintenance technicians perform some or all of the following duties:

- Maintain and repair main aerial and underground coaxial and fibre optic cable television transmission lines, trunking and related distribution and interconnecting systems including power supplies and amplifiers
- Inspect, monitor, test and adjust cable transmission and distribution systems
- Repair or replace faulty cables, power supplies, amplifiers and other associated transmission and distribution equipment
- Climb and work aloft on poles, ladders or other support structures
- Communicate with other workers to co-ordinate the preparation and completion of work assignments.

Employment requirements

- Completion of secondary school is required.
- Completion of a college program in electronics *or* A combination of college, correspondence or industry courses related to electronics and electrical systems and on-the-job training *or* Completion of a four-year cable television technician apprenticeship program is required.
- Trade certification for cable television technicians is available, but voluntary, in British Columbia and the Yukon.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Supervisors of cable television service and maintenance technicians (in 7202 *Contractors and supervisors, electrical trades and telecommunications occupations*)
- Workers who install aerial or underground cable television lines (in 7245 *Telecommunications line and cable workers*)

7251 Plumbers

Plumbers install, repair and maintain pipes, fixtures and other plumbing equipment used for water distribution and waste water disposal in residential, commercial and industrial buildings. They are employed in maintenance departments of factories, plants and similar establishments, by plumbing contractors, or they may be self-employed.

Example titles

maintenance plumber
plumber

plumber apprentice
plumbing mechanic

Main duties

Plumbers perform some or all of the following duties:

- Read blueprints, drawings and specifications to determine layout of plumbing system, water supply network and waste and drainage systems
- Install, repair and maintain domestic, commercial or industrial plumbing fixtures and systems
- Locate and mark positions for pipe connections, passage holes and fixtures in walls and floors
- Cut opening in walls and floors to accommodate pipe and pipe fittings
- Measure, cut, bend and thread pipes using hand and power tools or machines
- Join pipes using couplings, clamps, screws, bolts, cement or soldering, brazing and welding equipment
- Test pipes for leaks using air and water pressure gauges
- May prepare cost estimates.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four- to five-year apprenticeship program

or

A combination of over five years of work experience in the trade and some high school, college or industry courses in plumbing is usually required to be eligible for trade certification.

- Trade certification is compulsory in Nova Scotia, Prince Edward Island, New Brunswick, Quebec, Ontario, Saskatchewan and Alberta and available, but voluntary, in Newfoundland and Labrador, Manitoba, British Columbia, the Yukon, the Northwest Territories and Nunavut.
- Red Seal endorsement is also available to qualified plumbers upon successful completion of the interprovincial Red Seal examination.

7252 Steamfitters, pipefitters and sprinkler system installers

Steamfitters and pipefitters lay out, assemble, fabricate, maintain, troubleshoot and repair piping systems carrying water, steam, chemicals and fuel in heating, cooling, lubricating and other process piping systems. Sprinkler system installers fabricate, install, test, maintain and repair water, foam, carbon dioxide and dry chemical sprinkler systems in buildings for fire protection purposes. Steamfitters, pipefitters and sprinkler system installers are employed in maintenance departments of factories, plants and similar establishments, and by pipefitting and sprinkler system contractors, or they may be self-employed.

Example titles

apprentice pipefitter-steamfitter
fire protection mechanic
fire sprinkler fitter
marine pipefitter
pipefitter

sprinkler system fitter
sprinkler system installer
steamfitter
steamfitter-pipefitter

Main duties

Steamfitters and pipefitters perform some or all of the following duties:

- Read and interpret drawings, blueprints and specifications to determine layout requirements
- Cut openings for pipe in walls, floors and ceilings using hand or power tools or machines
- Select type and size of pipe required
- Measure, cut, thread and bend pipe to required shape using hand and power tools
- Weld, braze, cement, solder and thread joints to join pipes and fabricate sections of piping system
- Install supports, valves, piping and control systems
- Test system for leaks using testing equipment
- Clean and maintain pipe units and fittings and flush system
- Remove and replace worn components and reactivate system
- May prepare cost estimates for clients.

Sprinkler system installers perform some or all of the following duties:

- Read and interpret drawings, specifications and fire codes to determine layout requirements
- Install clamps, brackets and hangers to support piping system and sprinkler and fire protection equipment, using hand and power tools
- Select, measure, cut, ream and thread pipe, install sprinkler heads and mount prepared pipe in supports
- Join pipes and piping sections using soldering and welding equipment

- Connect piping system to water mains, supply tanks, pumps, compressors and control equipment
- Installs valves, alarms and associated equipment
- Test system for leaks using air or liquid pressure equipment
- Service and repair sprinkler system
- May prepare cost estimates for clients.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four- to five-year apprenticeship program
or
A combination of over five years of work experience in the trade and some high school, college or industry courses in steamfitting, pipefitting or sprinkler system installation is usually required to be eligible for trade certification.
- Steamfitter-pipefitter trade certification is compulsory in Prince Edward Island, Quebec, Ontario, Manitoba and Alberta and available, but voluntary, in all other provinces and the territories.
- Steamfitter-pipefitter (non-construction) trade certification is compulsory in Quebec.
- Sprinkler system installer trade certification is compulsory in Nova Scotia, New Brunswick, Quebec and Manitoba and available, but voluntary, in all other provinces and the territories.
- Sprinkler system installer (no construction) trade certification is compulsory in Quebec.

7252 Steamfitters, pipefitters and sprinkler system installers

- Red Seal endorsement is also available to qualified steamfitters-pipefitters and sprinkler system installers upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

7253 Gas fitters

Gas fitters install, inspect, repair and maintain gas lines and gas equipment such as meters, regulators and heating units in residential, commercial and industrial establishments. They are employed by gas utility companies and gas servicing companies.

Example titles

gas fitter
gas fitter apprentice
gas servicer

gas technician
industrial gas fitter-tester

Main duties

Gas fitters perform some or all of the following duties:

- Study drawings and specifications to determine the layout of the installation and materials required
- Measure and mark reference points for installation of gas lines and equipment
- Install and maintain gas meters and regulators and gas lines between gas unit and gas meter
- Install, maintain and service gas heating units and their components, such as burners, valves and automatic controls
- Test and replace defective equipment or components
- Test and adjust control mechanisms and check pipes and piping connections for gas leaks using gas detecting devices
- Attend to gas escape calls and assist in the investigation of gas fires and explosions
- Prepare reports on work performed and condition of facilities
- Advise clients regarding standards, safety features and maintenance of gas units and systems
- Convert motor vehicles or appliances to use natural gas fuels
- May repair and service gas appliances and related equipment.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a two- or three-year gas fitter apprenticeship program
or
Several years of work experience in a pipefitting trade and completion of a high school, college or industry gas fitter program are required.
- Gas fitter trade certification is compulsory in Nova Scotia, Quebec, Alberta, British Columbia, the Yukon, the Northwest Territories and Nunavut.
- A provincial gas fitter licence is usually required.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

7271 Carpenters

Carpenters construct, erect, install, maintain and repair structures and components of structures made of wood, wood substitutes, lightweight steel and other materials. They are employed by construction companies, carpentry contractors, and maintenance departments of factories, plants and other establishments, or they may be self-employed.

Example titles

apprentice carpenter

carpenter

carpenter-joiner

finish carpenter

journeyman/woman carpenter

maintenance carpenter

metal framer – carpentry

renovation carpenter

rough carpenter

stair builder-carpenter

Main duties

Carpenters perform some or all of the following duties:

- Read and interpret blueprints, drawings and sketches to determine specifications and calculate requirements
- Prepare layouts in conformance to building codes, using measuring tools
- Measure, cut, shape, assemble and join materials made of wood, wood substitutes, lightweight steel and other materials
- Build foundations, install floor beams, lay subflooring and erect walls and roof systems
- Fit and install trim items, such as doors, stairs, moulding and hardware
- Maintain, repair and renovate residences and wooden structures in mills, mines, hospitals, industrial plants and other establishments
- Supervise apprentices and other construction workers
- May prepare cost estimates for clients.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a three- to four-year apprenticeship program
or
A combination of over four years of work experience in the trade and some high school, college or industry courses in carpentry is usually required to be eligible for trade certification.

- Trade certification for carpenters is compulsory in Quebec and available, but voluntary, in all other provinces and the territories.
- Trade certification for framers is available, but voluntary, in Saskatchewan.

7272 Cabinetmakers

Cabinetmakers use a variety of woods and laminates to construct and repair wooden cabinets, furniture, fixtures and related products. They are employed by furniture manufacturing or repair companies, construction companies and cabinetmaking contractors, or they may be self-employed.

Example titles

cabinetmaker
cabinetmaker apprentice

custom wood furniture maker
furniture cabinetmaker

Main duties

Cabinetmakers perform some or all of the following duties:

- Study plans, specifications or drawings of articles to be made, or prepare specifications
- Mark outlines or dimensions of parts on wood
- Operate woodworking machines, such as power saws, jointers, mortisers and shapers, and use hand tools to cut, shape and form parts and components
- Trim joints and fit parts and subassemblies together to form complete unit using glue and clamps and reinforce joints using nails, screws or other fasteners
- Sand wooden surfaces and apply veneer, stain or polish to finished products
- Repair or restyle wooden furniture, fixtures and related products
- May estimate amount, type and cost of materials required.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four-year apprenticeship program
or
A combination of over four years of work experience in the trade and some high school or college courses in cabinetmaking is usually required to be eligible for trade certification.

- Trade certification is available, but voluntary, in all provinces and territories.

7281 Bricklayers

Bricklayers lay bricks, concrete blocks, stone and other similar materials to construct or repair walls, arches, chimneys, fireplaces and other structures in accordance with blueprints and specifications. They are employed by construction companies and bricklaying contractors or they may be self-employed.

Example titles

apprentice bricklayer
bricklayer
brickmason

refractory bricklayer
stonecutter
stonemason

Main duties

Bricklayers perform some or all of the following duties:

- Read sketches and blueprints to calculate materials required
- Cut and trim bricks and concrete blocks to specification using hand and power tools
- Prepare and lay bricks, concrete blocks, stone, structural tiles and similar materials to construct or repair walls, foundations and other structures in residential, industrial and commercial construction
- Lay bricks or other masonry units to build residential or commercial chimneys and fireplaces
- Lay radial bricks to build masonry shells of industrial chimneys
- Lay or install firebricks to line industrial chimneys and smokestacks
- Line or reline furnaces, kilns, boilers and similar installations using refractory or acid-resistant bricks, refractory concretes, plastic refractories and other materials

7284 Plasterers, drywall installers and finishers and lathers

Plasterers apply finish, and maintain and restore plaster or similar materials, on interior and exterior walls, ceilings and building partitions to produce plain or decorative surfaces. Drywall installers and finishers install and finish drywall sheets and various types of ceiling systems. Lathers install support framework for ceiling systems, interior and exterior walls and building partitions. They are employed by construction companies and by plastering, drywalling and lathing contractors, or they may be self-employed.

Example titles

acoustical ceiling installer

ceiling installer

drywall applicator

drywall finisher

drywall installer and finisher apprentice

drywall taper

lather

lather apprentice

lather (interior systems mechanic)

plasterer

plasterer apprentice

sheetrock applicator

wood lather

Main duties

Plasterers perform some or all of the following duties:

- Clean and prepare surfaces
- Mix plaster ingredients in trough to desired consistency
- Apply, level and smooth coats of plaster using trowels, floats, brushes and spraying equipment
- Trowel or spray coats of stucco over exteriors of buildings to form weatherproof surfaces
- Finish corners and angles and create decorative designs in finish coat, if required
- Cure freshly plastered surfaces
- Mould and install ornamental plaster panels, cornices and trim
- Spray acoustic materials or texture finish over walls and ceilings.

Drywall installers and finishers perform some or all of the following duties:

- Measure, cut and fit drywall sheets for installation on walls and ceilings
- Position and secure sheets to metal or wooden studs or joists
- Cut and install metal corner beads to protect exterior corners
- Fill joints, nail indentations, holes and cracks with joint compound using trowel and broad knife
- Tape over joints using taping machine and embed tape in compound
- Smooth out excess compound and allow coat to dry

- Apply successive coats of compound and sand seams and joints
- Fabricate and install suspended metal ceiling grids and place in panels to form acoustical and coffered ceilings.

Lathers perform some or all of the following duties:

- Prepare wall and ceiling layouts
- Install metal stud framing and furring for interior drywall or plaster walls and ceilings, using hand and power tools
- Attach metal or gypsum lath to studs or furring using nails, screws, clips or wire ties
- Cut openings in lath for heating and ventilation piping, ducts and electrical outlets
- Install corner beads and wire mesh around beams to which plaster is to be applied
- May install acoustic tile, hangers for suspended ceilings and metal studs for composition wallboard or lath.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a three- or four-year apprenticeship program in plastering, drywalling or lathing
or
A combination of over three years of work experience and some high school, college or industry courses in plastering, drywalling or lathing is usually required.

7291 Roofers and shinglers

Roofers install, repair or replace flat roofs and shingles, shakes or other roofing tiles on sloped roofs. Shinglers install and replace shingles, tiles and similar coverings on sloped roofs. They are employed by roofing and general contractors, or they may be self-employed.

Example titles

apprentice roofer
asphalt roofer
built-up roofer
flat roofer

residential steep roofer
roofer
shingler
single-ply roofer

Main duties

Roofers perform some or all of the following duties:

- Install, repair or replace built-up roofing systems using materials such as asphalt saturated felts and hot asphalt and gravel
- Install, repair or replace single-ply roofing system using waterproof sheet materials such as modified plastics, elastomeric or other asphaltic compositions
- Install, repair or replace shingles, shakes and other roofing tiles on sloped roofs of buildings
- Install sheet metal flashings
- Apply waterproof coatings to concrete or other masonry surfaces below or above ground level
- Install and repair metal roofs using hand and power tools
- Set up scaffolding to provide safe access to roofs
- May estimate materials required and quote costs.

Shinglers perform some or all of the following duties:

- Install or replace asphalt shingles, wood shingles and shakes and masonry or baked clay roofing tiles on sloped roofs of buildings
- Set up scaffolding to provide safe access to roofs.

Employment requirements

- Completion of secondary school is usually required.
- For roofers, completion of a two- to three-year apprenticeship program
or
Over three years of work experience in the trade are usually required to be eligible for trade certification.

7292 Glaziers

Glaziers cut, fit, install and replace glass in residential, commercial and industrial buildings, on exterior walls of buildings and other structures and in furniture and other products. They are employed by construction glass installation contractors, retail service and repair shops and glass fabrication shops, or they may be self-employed.

Example titles

glazier

glazier and metal mechanic

glazier apprentice

plate glass installer

stained glass glazier

structural glass glazier

Main duties

Glaziers perform some or all of the following duties:

- Read and interpret blueprints and specifications to determine type and thickness of glass, frame, installation procedure and materials required
- Measure and mark glass and cut glass using glass cutters or computerized cutter
- Tint glass and create patterns on glass by etching, sandblasting or painting designs
- Assemble, erect and dismantle scaffolds, rigging and hoisting equipment
- Position glass panes into frames and secure glass using clips, points or mouldings
- Assemble and install prefabricated glass, mirrors or glass products on walls, ceilings or exteriors of building
- Fabricate metal frames for glass installation
- Install, fit, fabricate and attach architectural metals or related substitute products in commercial and residential buildings
- Install pre-cut mirrors and opaque and transparent glass panels in frames to form exterior walls of buildings
- Replace glass in furniture and other products
- Prepare and install skylights, showcases and aquariums and stained or other special glass in churches, museums, sports and other establishments
- Repair and service residential windows, commercial aluminum doors and other glass supporting structures, and replace damaged glass or faulty sealant
- May prepare cost estimates for customers or clients.

Employment requirements

7293 Insulators

Insulators apply insulation materials to plumbing, air-handling, heating, cooling and refrigeration systems, piping equipment and pressure vessels, and walls, floors and ceilings of buildings and other structures, to prevent or reduce the passage of heat, cold, sound or fire. They are employed by construction companies and insulation contractors, or they may be self-employed.

Example titles

boiler and pipe insulator
building insulator
firestopping insulator
heat and frost insulator
insulation applicator

insulation mechanic
insulator
insulator apprentice
sound insulator

Main duties

Insulators perform some or all of the following duties:

- Read and interpret drawings and specifications to determine insulation requirements and select type of insulation required
- Measure and cut insulating material to required dimensions using hand and power tools
- Apply and secure insulation using spraying, blowing, pasting, strapping, taping and other application and installation methods
- Fit insulation around obstructions and between studs and joists
- Install vapour barriers
- Apply waterproofing cement over insulating materials to finish surfaces
- Remove asbestos or urea-formaldehyde insulation from buildings when required.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a three- to four-year apprenticeship program
or
A combination of over four years of work experience in the trade and some high school, college or industry courses in insulating is usually required to be eligible for trade certification.

7301 Contractors and supervisors, mechanic trades

This unit group includes heating, refrigeration, air conditioning, millwrighting and elevator and other equipment installation and mechanic trades contractors who own and operate their own businesses. This group also includes supervisors who supervise and co-ordinate the activities of workers classified in unit groups within the following minor groups: *Machinery and Transportation Equipment Mechanics (Except Motor Vehicle)* (731), *Automotive Service Technicians* (732) and *Other Mechanics* (733). They are employed in a wide range of establishments; places of employment are indicated in the unit group descriptions of the above minor groups.

Example titles

contractor, heating systems
foreman/woman, air conditioning and refrigeration mechanics
foreman/woman, aircraft mechanics and inspectors
foreman/woman, electrical mechanics
foreman/woman, heating systems mechanics
foreman/woman, heavy-duty equipment mechanics
foreman/woman, printing machine repairers
foreman/woman, railway car repairers

foreman/woman, railway equipment maintenance inspectors
foreman/woman, textile machine mechanics
supervisor, aircraft maintenance engineers (AME)
supervisor, appliance repair shop
supervisor, industrial mechanics
supervisor, motor vehicle repair shop
supervisor, small-engine repair shop

Main duties

Contractors and supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who repair and maintain aircraft, railway locomotives and cars, industrial machinery and equipment, construction and other heavy equipment, textile equipment, printing machines, heating equipment and furnaces, transformers and other electrical equipment, motor vehicles, air-conditioning and refrigeration equipment, electric appliances and other equipment, such as motorcycles, outboard motors and snowmobiles
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Requisition materials and supplies
- Resolve work problems and recommend work measures to improve productivity
- Train or arrange for training of workers
- Recommend personnel actions such as hiring and promotions
- Ensure that standards for safe working conditions are observed
- Prepare production and other reports
- May manage the operations of their own companies
- May also supervise, co-ordinate and schedule the activities of related apprentices, helpers and labourers.

Employment requirements

- Completion of secondary school is usually required.
- Several years of experience as a qualified tradesperson in a relevant trade are usually required.
- Journeyman/woman trade certification in a relevant trade is required.

Additional information

- There is little or no intertrade mobility among the supervisors in this unit group.

Classified elsewhere

- Foremen/women of workers who repair electrical industrial equipment (in 7202 *Contractors and supervisors, electrical trades and telecommunications occupations*)

7302 Contractors and supervisors, heavy equipment operator crews

This unit group includes excavating, grading, paving, drilling and blasting contractors who own and operate their own business. This unit group also includes supervisors who supervise and co-ordinate the activities of workers classified in the following unit groups: *Crane Operators (7371)*, *Drillers and Blasters – Surface Mining, Quarrying and Construction (7372)*, *Water Well Drillers (7373)*, *Longshore Workers (7451)*, *Material Handlers (7452)*, *Heavy Equipment Operators (Except Crane) (7521)*, *Public Works Maintenance Equipment Operators and Related Workers (7522)*, *Railway Yard and Track Maintenance Workers (7531)*, and *Public Works and Maintenance Labourers (7621)*. They are employed in a wide range of establishments; places of employment are indicated in the above unit group descriptions.

Example titles

excavating contractor
foreman/woman, demolition
foreman/woman, drilling and blasting –
construction
foreman/woman, logging road construction
foreman/woman, railway gang
foreman/woman, railway track maintenance
paving contractor

pipeline construction supervisor
road maintenance foreman/woman
section foreman/woman, railway
supervisor, heavy equipment operators
supervisor, oil field construction
supervisor, water well drilling
track foreman/woman – railway

Main duties

Contractors and supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who operate cranes and construction, paving, drilling, railway maintenance and other similar heavy equipment
- Establish methods to meet work schedules and co-ordinate work activities with other project supervisors or managers

7305 Supervisors, motor transport and other ground transit operators

Supervisors in this unit group supervise and co-ordinate activities of truck drivers, bus drivers, delivery drivers, subway and other transit operators, chauffeurs and taxi and limousine drivers. This unit group also includes bus dispatchers who co-ordinate the activities of transit system bus drivers and subway traffic controllers who operate and monitor signal and track switch control panels. They are employed by motor transportation and ground transit companies and by urban transit systems.

Example titles

bus inspector
dispatcher, bus
foreman/woman, truck drivers
foreman/woman, urban transit system
mobile inspector, transit

subway traffic controller
supervisor, light rail transit (LRT) operators
supervisor, school bus drivers
supervisor, subway operators

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who operate trucks, buses, subway trains, light rail transit, street cars, taxis and other transport vehicles
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend measures to improve performance
- Requisition materials and supplies
- Train staff in job duties, safety procedures and company policies
- Recommend personnel actions such as hiring and promotions
- Dispatch bus drivers and monitor routes to ensure schedules are met and to resolve operating problems
- Monitor and operate signal and track switch control panel of subway systems
- Prepare work reports and budgets, and monitor expenditures.

Employment requirements

- Completion of secondary school is usually required.
- Several years of experience as a driver or operator of motor transport or ground transit equipment are usually required.

Additional information

- There is little mobility between occupations in the different transportation sectors of this unit group.

7311 Construction millwrights and industrial mechanics

Construction millwrights and industrial mechanics install, maintain, troubleshoot, overhaul and repair stationary industrial machinery and mechanical equipment. This unit group includes industrial textile machinery mechanics and repairers. Construction millwrights are employed by millwrighting contractors. Industrial mechanics are employed in manufacturing plants, utilities and other industrial establishments.

Example titles

card fixer	maintenance millwright
card grinder	mechanic, textile machines
construction millwright	millwright
fixer, textile machinery	millwright apprentice
industrial mechanic	open-end technician
industrial mechanic apprentice	plant equipment mechanic
industrial sewing machine mechanic	spinning fixer
knitting machine mechanic	textile fixer
loom fixer	treatment plant maintenance mechanic
loom technician	

Main duties

Construction millwrights and industrial mechanics perform some or all of the following duties:

- Read blueprints, diagrams and schematic drawings to determine work procedures
- Install, align, dismantle and move stationary industrial machinery and mechanical equipment, such as pumps, fans, tanks, conveyors, furnaces and generators according to layout plans using hand and power tools
- Operate hoisting and lifting devices such as cranes, jacks and tractors to position machinery and parts during the installation, set-up and repair of machinery
- Inspect and examine machinery and equipment to detect and investigate irregularities and malfunctions
- Install, troubleshoot and maintain power transmission, vacuum, hydraulic and pneumatic systems, and programmable logic controls
- Adjust machinery and repair or replace defective parts
- Operate machine tools such as lathes and grinders to fabricate parts required during overhaul, maintenance or set-up of machinery
- Clean, lubricate and perform other routine maintenance work on machinery
- Construct foundations for machinery or direct other workers to construct foundations
- Assemble machinery and equipment prior to installation using hand and power tools and welding equipment.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a three- to four-year apprenticeship program
or
A combination of over five years of work experience in the trade and some high school, college or industry courses in industrial machinery repair or millwrighting is usually required to be eligible for trade certification.
- Textile machinery mechanics hired from other industries may require additional training in textile processes and experience as a textile manufacturing machinery operator.
- Industrial mechanic (millwright) trade certification is compulsory in Quebec and available, but voluntary, in all other provinces and the territories.
- Construction millwright trade certification is available, but voluntary, in Ontario.
- Industrial sewing machine mechanic trade certification is available, but voluntary, in Quebec.
- Red Seal endorsement is also available to qualified industrial mechanics or millwrights upon successful completion of the interprovincial Red Seal examination.

7311 Construction millwrights and industrial mechanics

Additional information

- Construction millwrights are mostly engaged in the initial installation of industrial plant machinery and equipment; industrial mechanics are more concerned with the post-installation maintenance and repair of machinery and equipment.
- Industrial mechanics and millwrights may be cross-trained in a second trade such as pipefitting, welding, machining or electrical maintenance.
- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Heavy-duty equipment mechanics (7312)*
- *Industrial instrument technicians and mechanics (2243)*
- Supervisors of industrial mechanics and millwrights (in 7301 *Contractors and supervisors, mechanic trades*)

7312 Heavy-duty equipment mechanics

Heavy-duty equipment mechanics repair, troubleshoot, adjust, overhaul and maintain mobile heavy-duty equipment used in construction, transportation, forestry, mining, oil and gas, material handling, landscaping, land clearing, farming and similar activities. They are employed by companies which own and operate heavy equipment, and by heavy equipment dealers, rental and service establishments, and railway transport companies and urban transit systems.

agricultural equipment technician
construction equipment mechanic
diesel mechanic – heavy equipment
farm equipment mechanic
heavy-duty equipment mechanic apprentice
heavy-duty equipment technician

heavy equipment mechanic
heavy mobile logging equipment mechanic
heavy mobile mining equipment mechanic
locomotive mechanic
tractor mechanic

Main duties

Heavy-duty equipment mechanics perform some or all of the following duties:

- Check bulldozers, cranes, graders and other heavy construction, agricultural, logging and mining equipment for proper performance and inspect equipment to detect faults and malfunctions
- Diagnose faults or malfunctions using computerized and other testing equipment to determine extent of repair required
- Adjust equipment and repair or replace defective parts, components or systems, using hand and power tools
- Test repaired equipment for proper performance and to ensure that work meets manufacturers' specifications
- Clean, lubricate and perform other routine maintenance work on equipment
- Service attachments and working tools such as harvesting and tillage equipment, blades, ploughs, winches and side booms
- May perform repair work on heavy trucks
- May attach components and adjust new farm equipment.

Heavy-duty mechanics may specialize in specific types of machinery such as combines or tracked vehicles, or in engine overhaul, power shift transmissions, fuel injection, hydraulics or electronics.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a three- to five-year apprenticeship program
or
A combination of over four years of work experience in the trade and some high school, college or industry courses in heavy equipment repair is usually required to be eligible for trade certification.
- Heavy-duty equipment technician trade certification is compulsory in Quebec and Alberta and available, but voluntary, in all other provinces and the territories.
- Agricultural equipment technician trade certification is available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Ontario, Manitoba, Saskatchewan, Alberta and British Columbia.
- Red Seal endorsement is also available to qualified heavy duty equipment technicians and agricultural equipment technicians upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

7313 Refrigeration and air conditioning mechanics

Refrigeration and air conditioning mechanics install, maintain, repair and overhaul residential central air conditioning systems, commercial and industrial refrigeration and air conditioning systems and combined heating, ventilation and cooling systems. They are employed by refrigeration and air conditioning installation contractors, various industrial settings, food wholesalers, engineering firms and retail and servicing establishments. Transport refrigeration mechanics are included in this unit group.

Example titles

central air conditioning mechanic
commercial air conditioning mechanic
heating and cooling mechanic
heating, ventilation and air conditioning (HVAC)
mechanic

refrigeration and air conditioning mechanic
apprentice
refrigeration mechanic
transport refrigeration mechanic

Main duties

Refrigeration and air conditioning mechanics perform some or all of the following duties:

- Read and interpret blueprints, drawings or other specifications
- Measure and lay out reference points for installation
- Assemble and install refrigeration or air conditioning components such as motors, controls, gauges, valves, circulating pumps, condensers, humidifiers, evaporators and compressors using hand and power tools
- Measure and cut piping, and connect piping using welding and brazing equipment
- Install, troubleshoot and overhaul entire heating, ventilation, air handling, refrigeration and air conditioning systems
- Start up system and test for leaks using testing devices
- Recharge system with refrigerant, check and test regulators, calibrate system and perform routine maintenance or servicing
- Repair and replace parts and components for entire refrigeration, air conditioning, ventilation or heat pump systems
- May install, maintain and repair equipment in refrigerated trucks used to transport food or medical supplies
- May prepare work estimates for clients.

Employment requirements

- Completion of secondary school is usually required.

- Completion of a three- to five-year apprenticeship program
or
A combination of over five years of work experience in the trade and some high school, college or industry courses in refrigeration and air conditioning repair is usually required to be eligible for trade certification.

7314 Railway carmen/women

Railway carmen/women inspect, troubleshoot, maintain and repair structural and mechanical components of railway freight, passenger and urban transit rail cars. They are employed by railway transport companies and urban transit systems.

Example titles

rail vehicle mechanic
railway car inspector
railway carman/woman

railway carman/woman apprentice
streetcar and subway car mechanic

Main duties

Railway carmen/women perform some or all of the following duties:

- Inspect interior and exterior components of freight, passenger and urban transit rail cars to determine defects and extent of wear and damage
- Repair and install railway car parts such as compressors, air valves, bearings, couplings, air cylinders and piping
- Repair and maintain electrical and electronic controls for propulsion and braking systems
- Repair defective or damaged metal and wood components, using hand and power tools
- Repair and repaint wooden fixtures
- Replace damaged windows and repair upholstery
- Test and adjust parts using testing gauges and other test equipment
- Perform and document routine maintenance.

Employment requirements

- Completion of secondary school is usually required.
- Completion of an industry-offered apprenticeship program or three to four years of on-the-job training is usually required.

Additional information

- Progression to supervisory positions is possible with experience.

7315 Aircraft mechanics and aircraft inspectors

Aircraft mechanics maintain, repair, overhaul, modify and test aircraft structural, mechanical and hydraulic systems. Aircraft inspectors inspect aircraft and aircraft systems following manufacture, modification, maintenance, repair or overhaul. Aircraft mechanics and aircraft inspectors are employed by aircraft manufacturing, maintenance, repair and overhaul establishments, and by airlines and other aircraft operators.

Example titles

aircraft gas turbine engine technician

aircraft inspector

aircraft maintenance engineer (AME) (except avionics)

aircraft mechanic

aircraft structural repair technician

aircraft systems inspector

aviation mechanical component shop technician

certified aircraft technician

hydraulic mechanic, aircraft

inspector, flight test

inspector, repair and overhaul

shop inspector, aircraft repair

Main duties

Aircraft mechanics perform some or all of the following duties:

- Troubleshoot aircraft structural, mechanical or hydraulic systems to identify problems and adjust and repair systems according to specifications, technical drawings, manuals and established procedures
- Repair and overhaul aircraft structural, mechanical or hydraulic systems
- Install or modify aircraft engines and mechanical, hydraulic, flight control, fuel and pneumatic systems
- Dismantle airframes, aircraft engines or other aircraft systems for repair, overhaul and cleaning, and reassemble
- Perform and document routine maintenance
- Order and maintain inventory of parts and supplies.

Aircraft mechanics usually specialize in working on specific aircraft systems such as engines, engine accessories, airframes, propellers, mechanical components or hydraulic systems and specific kinds of aircraft, such as light aircraft, jet transports and helicopters.

Aircraft inspectors perform some or all of the following duties:

- Inspect structural and mechanical systems of aircraft and ensure that these systems meet Transport Canada and company standards of performance and safety
- Inspect work of aircraft mechanics performing maintenance, repair and overhaul, or modification of aircraft and aircraft mechanical systems to ensure adherence to standards and procedures

- Maintain detailed repair, inspection and certification records and reports.

Employment requirements

- Completion of secondary school is required.
- A college diploma in aircraft maintenance *or* Completion of a four-year apprenticeship program is usually required.
- Several years of on-the-job training are required for aircraft mechanics.
- Aircraft mechanics and inspectors who sign maintenance releases and certify airworthiness require an Aircraft Maintenance Engineer's (AME) licence issued by Transport Canada.
- Trade certification for aircraft maintenance engineers is available, but voluntary, in Ontario, the Northwest Territories and Nunavut.
- Trade certification for aircraft structural technicians is available, but voluntary, in British Columbia.
- Industry certification from the Canadian Aviation Maintenance Council for some occupations in this unit group is available, but voluntary.
- Aircraft inspectors require several years of experience as an aircraft mechanic.

Additional information

- Aircraft mechanics may progress to foreman/woman, shop supervisor or aircraft inspector.
- With experience, aircraft inspectors may progress to shop inspector or supervisor.

7315 Aircraft mechanics and aircraft inspectors

- Aircraft mechanics and inspectors may acquire further endorsements to their AME licence allowing them to inspect and certify a broader range of aircraft and aircraft systems.
- AME licences are issued in the following categories:
 - M – Small and Large Aircraft,
 - E – Electronic Systems,
 - S – Aircraft Structures.

7316 Machine fitters

Machine fitters fit, assemble and otherwise build heavy industrial machinery and transportation equipment, including aircraft engines. They are employed in industrial machinery and transportation equipment manufacturing industries.

Example titles

aircraft engine fitter
assembly fitter
heavy equipment fitter
machine builder

machine fitter
machine tool builder
mechanical fitter

Main duties

Machine fitters perform some or all of the following duties:

- Read and interpret blueprints, sketches and diagrams to determine assembly operations
- Fit and assemble prefabricated metal parts to build heavy industrial machinery and equipment such as construction, farming, and processing machinery, railway vehicles and aircraft engines
- Move and align subassemblies and components using lifting and transporting devices such as overhead cranes
- Install major components such as gears, pumps, motors or hydraulic assemblies
- Inspect parts, subassemblies and finished products to ensure quality.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a mechanical apprenticeship program, such as millwrighting, machining, pipefitting, automotive service or heavy equipment repair
or
Completion of a four-year machine fitter apprenticeship program
or
Completion of five years of on-the-job training is usually required.

- Completion of a two- to three-year college program in aircraft manufacturing or general fabrication is required for aircraft engine fitters.
- Certification in a related trade may be required.

Additional information

- Progression to supervisory positions is possible with experience.

7318 Elevator constructors and mechanics

Elevator constructors and mechanics assemble, install, maintain and repair freight and passenger elevators, escalators, moving walkways and other related equipment. They are employed by elevator construction and maintenance companies.

Example titles

elevator constructor
elevator mechanic

elevator mechanic apprentice
escalator repairer

Main duties

Elevator constructors and mechanics perform some or all of the following duties:

- Read and interpret blueprints to determine layout of system components
- Perform preparatory construction work including steel work, wiring and piping
- Install elevators, escalators, moving walkways, dumbwaiters and related equipment according to specifications
- Connect car frames to counterweights with cables and assemble elevator cars
- Install and wire electric and electronic control system devices
- Install, test and adjust safety control devices
- Test operation of newly installed equipment
- Troubleshoot electrical or mechanical systems failures
- Disassemble defective units and repair or replace worn or suspect parts
- Adjust valves, ratchets, seals, brake linings and other components
- Carry out preventative maintenance programs to ensure public safety.

Elevator constructors and mechanics may specialize in construction, maintenance or repair.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four- to five-year apprenticeship program

or

A combination of over four years of work experience in the trade and some high school, college or industry courses in elevator construction or repair is usually required to be eligible for trade certification.

- Elevator constructor and mechanic trade certification is compulsory in Quebec and Alberta and available, but voluntary, in British Columbia, the Northwest Territories and Nunavut.

Additional information

- Progression to supervisory positions is possible with experience.

7321 Automotive service technicians, truck and bus mechanics and mechanical repairers

Automotive service technicians, truck and bus mechanics and mechanical repairers inspect, diagnose, repair and service mechanical, electrical and electronic systems and components of cars, buses, and light and commercial transport trucks. They are employed by motor vehicle dealers, garages, truck and trailer dealerships, fleet maintenance companies, and service stations, automotive specialty shops, transportation companies and retail establishments which have automotive service shops. This unit group also includes mechanical repairers who perform major repairs and replacement of mechanical units on newly assembled motor vehicles. They are employed by motor vehicle manufacturing companies.

Example titles

apprentice motor vehicle mechanic
automobile mechanic
automotive service technician
brake systems mechanic
bus mechanic
mechanical upgrader – motor vehicle
manufacturing

motor repairer – motor vehicle manufacturing
transmission mechanic
truck and transport mechanic
truck-trailer repairer
tune-up specialist – motor vehicle

Main duties

Automotive service technicians perform some or all of the following duties:

- Review work orders and discuss work with supervisor
- Inspect motor in operation, road test motor vehicle, and test automotive systems and components using computerized diagnostic and other testing devices to diagnose and isolate faults
- Adjust, repair or replace parts and components of automotive systems including fuel system, brakes, steering and suspension, engine and drive train, emission control and exhaust, cooling and climate control, and electrical and electronic systems using hand tools and other specialized automotive repair equipment
- Test and adjust repaired systems to manufacturer's performance specifications
- Perform scheduled maintenance service, such as oil changes, lubrications and tune ups
- Advise customers on work performed, general vehicle condition and future repair requirements.

Mechanical repairers, motor vehicle manufacturing, perform some or all of the following duties:

- Inspect and test mechanical units, such as engines, transmissions, axles and brake systems, to locate faults and malfunctions
- Diagnose faults or malfunctions and confirm findings with supervisor to determine whether to repair or replace unit

- Repair or replace mechanical units or components using hand and power tools
- Test and adjust units to specifications for proper performance
- Complete reports to record problems and work performed.

Truck and transport and truck-trailer mechanics perform some or all of the following duties:

- Adjust, repair or replace parts and components of commercial transport truck systems including chassis, frame, cab, body, engine and drive train, air brakes, steering, and fuel, hydraulic, electrical and electronic systems
- Adjust, repair or replace parts and components of truck-trailer systems including structural, brake and electrical systems.

Workers in this unit group may specialize in the following areas: engine and fuel systems, transmission systems, air conditioning, cooling and heating systems, steering, alignment, brakes, drive lines, suspension, electrical and electronic systems, truck-trailer repair or diagnostic services.

Employment requirements

Automotive service technicians

- Completion of secondary school is usually required.
- Completion of a four-year automotive service technician apprenticeship program
or
A combination of over four years of work experience in the trade and high school, college

7321 Automotive service technicians, truck and bus mechanics and mechanical repairers

or industry courses in automotive technology is required to be eligible for trade certification.

- Trade certification for automotive service technicians is compulsory in Nova Scotia, Prince Edward Island, New Brunswick, Quebec, Ontario and Alberta and available, but voluntary, in Newfoundland and Labrador, Manitoba, Saskatchewan, British Columbia, the Yukon, the Northwest Territories and Nunavut.
- Automotive service technician (transmission) trade certification is compulsory in Ontario.
- Automotive service technician (steering, suspension and brakes) trade certification is compulsory in New Brunswick and Ontario.
- Automotive service technician (service station mechanic) trade certification is compulsory in Nova Scotia and Prince Edward Island.
- Red Seal endorsement is also available to qualified automotive service technicians upon successful completion of the interprovincial Red Seal examination.

Mechanical repairers, motor vehicle manufacturing

- Completion of secondary school is usually required.
- On-the-job training of two to three years is provided by employers.

Truck and transport and truck-trailer mechanics

- Completion of secondary school is usually required.
- Completion of a four-year truck and transport mechanic or truck-trailer repair apprenticeship *or*
A combination of over four years of work experience in the trade and high school, college or industry courses in truck or heavy duty equipment mechanics is required to be eligible for trade certification.
- Trade certification for truck and transport mechanics is compulsory in Nova Scotia, Ontario and Alberta and available, but voluntary, in Newfoundland and Labrador, Prince Edward Island, New Brunswick, Quebec, Manitoba, Saskatchewan, British Columbia and the Yukon.
- Transport trailer technician trade certification is compulsory in Ontario and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Manitoba, British Columbia and the Yukon.
- Red Seal endorsement is also available to qualified truck-trailer repairers and truck and

transport mechanics upon successful completion of the interprovincial Red Seal examination.

Additional information

- With additional training, mobility is possible between automobile and truck and transport mechanics.
- The Red Seal endorsement allows for interprovincial mobility.
- With experience, mechanics and technicians in this unit group may progress to supervisory positions.
- Mechanical repairers employed in motor vehicle manufacturing may progress to motor vehicle mechanic positions through an apprenticeship program, or with experience, they may progress to supervisory positions in motor vehicle manufacturing.

7322 Motor vehicle body repairers

Motor vehicle body repairers repair and restore damaged motor vehicle body parts and interior finishing; repaint body surfaces; and repair and/or replace automotive glass. They are employed by automobile dealerships, automobile body repair shops and automobile appraisal centres. This unit group also includes metal repairers who repair defective automobile body parts and damage to the bodies of newly assembled cars. They are employed by motor vehicle manufacturers.

Example titles

autobody repairer
automotive body mechanic
automotive glass technician
automotive painter apprentice
automotive painter – motor vehicle repair

metal finisher – motor vehicle manufacturing
metal repairer – motor vehicle manufacturing
motor vehicle body repairer apprentice
motor vehicle body technician – truck
painter – motor vehicle repair

Main duties

Workers in this unit group perform some or all of the following duties:

- Review damage report and estimates of repair cost and plan work to be performed
- Repair and replace front end components, body components, doors and frame and underbody components
- Hammer out dents, buckles and other defects using blocks and hammers
- Operate soldering equipment or use plastic filler to fill holes, dents and seams
- Remove damaged fenders, panels and grills using wrenches and cutting torch and bolt or weld replacement parts into place
- Straighten bent frames using frame and underbody pulling and anchoring equipment
- File, grind and sand repaired body surfaces using hand and power tools
- Mask and tape auto body surfaces in preparation for painting
- Mix paint, blend and match colors
- Apply primers and repaint surfaces using brush or spray guns
- Repair and replace glass components such as windshields, windows and sunroofs
- Repair or replace interior components, such as seat frame assembly, carpets and floorboard insulation
- Inspect repaired vehicles and test drive vehicles for proper handling.

Employment requirements

Motor vehicle body repairers

- Completion of secondary school is usually required.
- Completion of a three- to four-year motor vehicle body repair apprenticeship program

or

A combination of over three years of work experience in the motor vehicle body repair trade and completion of a high school or college automotive body repair program is usually required to be eligible for trade certification.

- Trade certification for motor vehicle body repair (metal and paint) is compulsory in Nova Scotia, Ontario and Alberta and available, but voluntary, in Newfoundland and Labrador, Prince Edward Island, New Brunswick, Manitoba, Saskatchewan, British Columbia, the Yukon, the Northwest Territories and Nunavut.
- Auto body repairer and painter certification is compulsory in Quebec and auto body repairer certification is compulsory in Ontario and Alberta and available, but voluntary, in the Yukon and the Northwest Territories.
- Red Seal endorsement is also available to qualified motor vehicle body repairers (metal and paint) upon successful completion of the interprovincial Red Seal examination.

Automotive painters

- Completion of secondary school is usually required.
- Completion of a two- to three-year automotive painter apprenticeship program

or

A combination of one year of work experience in the automotive painter trade and completion of a high school or college automotive painting program is usually required for automotive painter trade certification.

- Automotive painter certification is compulsory in Alberta and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Ontario,

7322 Motor vehicle body repairers

Manitoba, Saskatchewan, British Columbia, the Yukon and the Northwest Territories.

- Red Seal endorsement is also available to qualified automotive painters upon successful completion of the interprovincial Red Seal examination.

Automotive glass installers and repairers

- Completion of secondary school is usually required.
- Auto glass industry certification is usually required.
- Apprenticeship training and trade certification for automotive glass technicians is available, but voluntary, in Alberta and British Columbia.
- Metal repairers, motor vehicle manufacturing
- Completion of secondary school is usually required.
- One to two years of on-the-job training are provided.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- With experience, motor vehicle body repair and automotive painter tradespersons may progress to supervisory positions.
- Metal repairers employed in motor vehicle manufacturing may progress to motor vehicle repairer positions through an apprenticeship program, or, with experience, they may progress to supervisory positions in motor vehicle manufacturing.

Classified elsewhere

7331 Oil and solid fuel heating mechanics

Oil and solid fuel heating mechanics install and maintain oil, coal and wood heating systems in residential and commercial buildings. They are employed by heating systems installation and service companies.

Example titles

furnace installer and repairer (except gas)
heating service mechanic
heating systems technician
oil burner installer

oil burner mechanic
oil burner mechanic apprentice
wood burner installer

Main duties

Oil and solid fuel heating mechanics perform some or all of the following duties:

- Read and interpret drawings or specifications to determine work to be performed
- Lay out oil burner heating system components and assemble components using hand and power tools
- Install oil burner components such as thermostats, motors, piping and safety devices, and connect to fuel supply, ventilation and electrical system
- Test installed unit and adjust controls for proper functioning
- Troubleshoot and repair malfunctioning oil burners, and their components and controls
- Install, maintain and repair coal and wood heating systems
- Perform scheduled maintenance service on oil and solid fuel heating systems.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a three- to four-year apprenticeship program

or

A combination of over four years of work experience in the trade and some college or industry courses in heating systems installation and repair is usually required for trade certification.

- Oil heat system technician trade certification is compulsory in Nova Scotia and New Brunswick and is available, but voluntary, in Newfoundland and Labrador, Prince Edward Island, British Columbia, the Yukon, the Northwest Territories and Nunavut.
- Red Seal endorsement is also available to qualified oil heat system technicians upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Refrigeration and air conditioning mechanics (7313)*
- Supervisors of oil and solid fuel heating mechanics (in 7301 *Contractors and supervisors, mechanic trades*)

7332 Appliance servicers and repairers

Appliance servicers and repairers service and repair domestic and commercial appliances. They are employed by repair shops, appliance service companies and repair departments of retail and wholesale establishments, or they may be self-employed.

Example titles

appliance servicer

appliance service technician

appliance service technician apprentice

commercial foodservice appliance technician

commercial laundry appliance technician

dishwasher repairer

refrigerator repairer

service technician – electrical appliances

service technician – gas appliances

stove repairer

vacuum cleaner repairer

washing machine servicer

window air conditioner repairer

Main duties

Small electrical appliance servicers and repairers perform some or all of the following duties:

- Repair small electrical appliances, such as lawn and garden equipment and power tools
- Consult customer or refer to work order to establish nature of the appliance malfunction
- Observe operation of appliance and conduct voltage, resistance and other tests using electrical test equipment
- Refer to schematic drawings or product manuals and replace or repair parts or components using hand tools and soldering equipment
- Prepare estimates and written accounts of work performed.

Major appliance repairers/technicians perform some or all of the following duties:

- Repair major electrical or gas appliances, such as domestic and commercial dishwashing equipment, stoves, laundry equipment and refrigerators in customer's home, in customer's place of business or in repair shop
- Consult customer or refer to work order to establish nature of the appliance malfunction
- Diagnose faults by checking controls, condensers, timer sequences, fans and other components using test equipment such as meters and gauges to measure resistance, current, voltage, pressure, temperature, flue gases and flow rates
- Refer to schematic diagrams or product manuals and disassemble appliance using hand tools
- Use shop equipment and specialized diagnostic and programming apparatus to repair, adjust and reprogram appliances
- Replace components and subcomponents and reassemble appliance using hand tools and soldering and brazing equipment

- Prepare estimates and written accounts of work performed
- May plan service routes.

Employment requirements

- Small appliance repairers usually require some specialized college or high school courses or several months of on-the-job training.
- Major appliance repairers/technicians require some secondary school education and completion of a college program in appliance repair
or
Completion of a three- or four-year apprenticeship program in appliance repair.
- Appliance service technician, or appliance serviceperson, trade certification is compulsory in Alberta and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Quebec, Ontario, British Columbia, the Northwest Territories and Nunavut.
- A provincial gas fitter licence, or gas appliance technician certificate, may be required for gas appliance service technicians.
- Red Seal endorsement is also available to qualified appliance service technicians upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

7333 Electrical mechanics

Electrical mechanics maintain, test, rebuild and repair electric motors, transformers, switchgear and other electrical apparatus. They are employed by independent electrical repair shops, service shops of electrical equipment manufacturers and maintenance departments of manufacturing companies.

Example titles

armature winder repairer
coil winder and repairer
electrical mechanic
electrical mechanic apprentice
electrical rewind mechanic

electrical transformer repairer
electric motor systems technician
industrial motor winder-repairer
power transformer repairer
transformer repairer

Main duties

Electrical mechanics perform some or all of the following duties:

- Test and observe electrical, electronic and mechanical components and systems using testing and measuring instruments
- Troubleshoot and repair electric motors, transformers, switchgear, generators and other electro-mechanical equipment
- Replace or recondition shafts, bearings, commutators and other components
- Wind, assemble and install various types of coils for electric motors or transformer
- Perform static or dynamic balancing of armatures or rotors by welding, brazing or soldering electrical connections and by aligning and adjusting parts
- Test and repair or replace faulty wiring or components in electrical switchgear
- Test repaired motors, transformers, switchgear or other electrical apparatus to ensure proper performance
- Perform some machining to recondition or modify shafts, commutators or other parts
- Perform on-site servicing and repair.

Electrical mechanics may specialize in working with certain types of apparatus, such as electric motors or transformers, or in performing certain functions, such as winding coils.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a four-year apprenticeship program
or

A combination of over four years of work experience in the trade and some college or industry courses in electrical mechanics is usually required for trade certification.

- Trade certification as an electric motor system technician is available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Ontario, Manitoba, Alberta, British Columbia, the Yukon and Nunavut.
- Electrical motor and equipment repairer – winding trade certification is available, but voluntary in Quebec.
- Electrical motor system technician (electrical utility) trade certification is available, but voluntary in New Brunswick.
- Red Seal endorsement is also available to qualified electric motor system technicians upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Although specialization may occur, workers in this unit group are required to be proficient in repairing all electrical apparatus.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

7334 Motorcycle, all-terrain vehicle and other related mechanics

Mechanics in this unit group test, repair and service motorcycles, motor scooters, snowmobiles, forklifts and all-terrain vehicles. They are employed by service shops of motorcycle dealers and retailers and by independent service establishments.

Example titles

all-terrain vehicle repairer
forklift mechanic
industrial truck repairer
motor boat mechanic
motorcycle mechanic

motorcycle mechanic apprentice
motor scooter repairer
outboard motor mechanic
snowmobile repairer

Main duties

Mechanics in this unit group perform some or all of the following duties:

- Review work orders and discuss work to be performed with supervisor
- Inspect and test engine and other mechanical components using test devices to diagnose and isolate faults
- Adjust, repair or replace mechanical or electrical system parts and components using hand tools and equipment
- Test and adjust repaired systems for proper performance
- Perform scheduled maintenance service on equipment
- Advise customers on work performed and general condition of equipment
- Determine estimates of repair cost
- May repair and rebuild hoisting mechanism and other mechanical systems on industrial trucks and forklifts.

Employment requirements

- Completion of secondary school is usually required.
- For motorcycle mechanics, completion of a three- to four-year apprenticeship program
or

A combination of over three years of work experience in the trade and some high school or college courses in motorcycle repair is usually required to be eligible for trade certification.

- Motorcycle mechanic trade certification is compulsory in Ontario and Alberta and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick and British Columbia.
- Other mechanics in this unit group may require several years of on-the-job training.
- Red Seal endorsement is also available to qualified motorcycle mechanics upon successful completion of the interprovincial Red Seal examination.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- There is mobility among some occupations in this unit group.

7335 Other small engine and small equipment repairers

Workers in this unit group test, repair and service small gasoline and diesel-powered engines and equipment, such as garden tractors, outboard motors, lawn mowers and other related equipment. They are employed by dealer service shops and by independent service establishments.

Example titles

air-cooled engine mechanic
lawn and garden equipment technician
lawn mower repairer, gasoline powered

small engine technician
small equipment mechanic apprentice
small equipment repairer

Main duties

Workers in this unit group perform some or all of the following duties:

- Review work orders and discuss work to be performed with supervisor
- Inspect and test engines and other mechanical components using test devices to diagnose and isolate faults
- Adjust, repair or replace mechanical or electrical system parts and components using hand tools and equipment
- Test and adjust repaired equipment for proper performance
- Perform scheduled maintenance service on equipment
- Advise customers on work performed and general condition of equipment
- Determine estimates of repair cost.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a three- to four-year apprenticeship program in small engine or equipment repair

or

A combination of several years of work experience in the trade and some high school or college courses in small engine or equipment repair are usually required for trade certification.

- Small engine or equipment mechanic trade certification is available, but voluntary, in Newfoundland and Labrador, Prince Edward Island, New Brunswick, Ontario and Nunavut.
- Inboard/outboard mechanic trade certification is available, but voluntary, in Ontario and British Columbia.
- Outdoor power equipment technician trade certification, for specified types of equipment, is available, but voluntary, in Manitoba, Alberta, British Columbia, the Yukon, the Northwest Territories and Nunavut.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

7361 Railway and yard locomotive engineers

Railway locomotive engineers operate railway locomotives to transport passengers and freight. They are employed by railway transport companies. Yard locomotive engineers operate locomotives within yards of railway, industrial or other establishments. They are employed by railway transport companies and industrial or commercial users of rail transport.

Example titles

locomotive engineer – railway
railway engineer
switch engineer – railway

transfer hostler – railway
yard engineer – railway

Main duties

- Railway locomotive engineers perform some or all of the following duties:
- Operate locomotives to transport passengers and freight on railways
- Operate communication systems to communicate with train crews and traffic controllers to ensure safe operation and scheduling of trains
- Inspect assigned locomotives and test operating controls and equipment.

Yard locomotive engineers perform some or all of the following duties:

- Operate locomotives to switch, couple and uncouple cars for loading and unloading
- Perform switching operations according to written switching orders or dispatched instructions
- Inspect locomotives, replenish fuel or perform routine maintenance on locomotives.

Employment requirements

- Completion of secondary school is usually required.
- Experience as a conductor is required for railway locomotive engineers and may be required for yard locomotive engineers.
- Experience as a railway yard worker may be required for yard locomotive engineers.
- Railway locomotive engineers require a Canadian Rail Operating Rules certificate.

Additional information

- Mobility between railway transport companies or between establishments employing locomotive engineers may be limited due to seniority provisions of collective agreements.

Classified elsewhere

- Subway and light rail transit operators (in 7512 *Bus drivers, subway operators and other transit operators*)
- Supervisors, railway transport operations (7304)
- Train dispatchers (in 2275 *Railway traffic controllers and marine traffic regulators*)

7362 Railway conductors and brakemen/women

Railway conductors co-ordinate and supervise the activities of passenger and freight train crew members. Brakemen check train brakes and other systems and equipment prior to train run, and assist railway conductors in activities en route. They are employed by railway transport companies.

Example titles

brakeman/woman
conductor – switching yard
freight train conductor
front-end brakeman/woman

passenger train conductor
railway conductor
road freight brakeman/woman
tail-end brakeman/woman

Main duties

Railway conductors perform some or all of the following duties:

- Supervise and co-ordinate the activities of passenger and freight train crew members (except locomotive engineers) to ensure train operations are in accordance with schedule, train orders and code of operating rules
- Receive train orders and explain orders to brakemen/women, locomotive engineer and other crew members
- Communicate with train crew members by radio, signals or by other means to give and receive train operation information
- Collect fares on board passenger trains, announce approaching train stops and answer passenger enquiries
- Prepare train run reports.

Brakemen/women perform some or all of the following duties:

- Check train systems and equipment such as air conditioning and heating systems, brakes and brake hoses prior to train run
- Communicate with train crew members by radio, signals or by other means to aid in the movement and operation of train
- Receive orders from traffic controllers, observe signals and track conditions and open and close track switches
- Set and release hand brakes and connect air brake hoses to couple and switch passenger or freight cars, making minor repairs to couplings, air hoses and wheel-bearing boxes as required
- Assist in collecting fares and helping passengers on and off train.

Employment requirements

- Completion of secondary school is usually required.
- Experience as a brakeman/woman is required for conductors.
- Experience as a railway worker is usually required for brakemen/women.
- Railway conductors require a Canadian Rail Operating Rules certificate.
- Brakemen/women require a Canadian Rail Operating Rules certificate.

Additional information

- With experience, brakemen/women may progress to railway conductors.
- With experience, railway conductors may progress to locomotive engineers.

Classified elsewhere

- *Railway and yard locomotive engineers (7361)*
- *Supervisors, railway transport operations (7304)*

7371 Crane operators

Crane operators operate cranes or draglines to lift, move, position or place machinery, equipment and other large objects at construction or industrial sites, ports, railway yards, surface mines and other similar locations. They are employed by construction, industrial, mining, cargo handling and railway companies.

Example titles

boom truck crane operator
bridge crane operator
climbing crane operator
construction crane operator
crane operator
dragline crane operator

gantry crane operator
hoist operator (except underground mining)
mobile crane operator
tower crane operator
tractor crane operator

Main duties

Crane operators perform some or all of the following duties:

- Operate mobile and tower cranes to lift, move, position or place equipment and materials
 - Perform pre-operational inspection, and calculate crane capacities and weight to prepare for rigging and hoisting
 - Operate pile driving cranes to drive pilings into earth to provide support for buildings and other structures
 - Operate cranes equipped with dredging attachments to dredge waterways and other areas
 - Operate gantry cranes to load and unload ship cargo at port side
 - Operate locomotive cranes to move objects and materials at railway yards
 - Operate bridge or overhead cranes to lift, move and place plant machinery and materials
 - Operate offshore oil rig cranes to unload and reload supply vessels
 - Operate cranes mounted on boats or barges to lift, move and place equipment and materials
 - Operate dragline cranes to expose coal seams and ore deposits at open pit mines
 - May assemble tower cranes on site
 - Perform routine maintenance work such as cleaning and lubricating cranes.
- Mobile crane operator trade certification is compulsory in Nova Scotia, Quebec, Ontario, Manitoba and Alberta and available, but voluntary, in all other provinces and the Northwest Territories.
 - Tower crane operator trade certification is compulsory in Nova Scotia, Quebec, Ontario and Manitoba and available, but voluntary, in Prince Edward Island.
 - Mobile crane operator (hydraulic) trade certification is compulsory in Quebec and available, but voluntary, in Prince Edward Island.
 - Hoist operator trade certification, for specified types of cranes, is compulsory in Quebec, Ontario, Manitoba and Alberta and is available, but voluntary, in New Brunswick, Saskatchewan, British Columbia, the Northwest Territories and Nunavut.
 - Mobile crane operators may require a provincial licence to drive mobile cranes on public roads.
 - Internal company certification as a crane operator may be required by some employers.
 - Red Seal endorsement is also available to qualified mobile crane, tower crane and mobile crane (hydraulic) operators upon successful completion of the interprovincial Red Seal examination.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a one- to three-year apprenticeship program
or
High school, college or industry courses in crane operating are usually required.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- Progression to supervisory positions is possible with experience.

7371 Crane operators

Classified elsewhere

- *Heavy equipment operators (except crane)*

- Hoist operators – underground mining (in 8231
Underground production and development miners)
- Supervisors of crane operators (in 7302
Contractors and supervisors, heavy equipment operator crews)

7372 Drillers and blasters – surface mining, quarrying and construction

Drillers in this unit group operate mobile drilling machines to bore blast holes in open-pit mines and quarries and to bore holes for blasting and for building foundations at construction sites. Blasters in this unit group fill blast holes with explosives and detonate explosives to dislodge coal, ore and rock or to demolish structures. They are employed by mining, quarrying and construction companies and by drilling and blasting contractors.

Example titles

blaster, construction
blaster – quarrying
blaster – surface mining
driller, construction

driller – surface mine
open-pit blaster
rotary drilling machine operator

Main duties

Drillers in this unit group perform some or all of the following duties:

- Drive and operate tracked or truck-mounted rotary drilling, air-track or other drilling machines to bore large blast holes to specified depths at staked positions in open-pit mine or quarry
- Operate drilling machines to drill blast holes in rock at road or other construction sites
- Operate tracked or truck-mounted drill equipped with auger or other attachment to drill holes for building foundations or pilings
- May measure location and stake out pattern of holes to be drilled, load blast holes with explosives and detonate explosives to dislodge coal, ore or rock.

Blasters in this unit group perform some or all of the following duties:

- Read instructions or diagrams, lay out drill pattern and determine depth and diameter of blast holes and conduct field tests to determine type and quantity of explosives required
- Assemble or direct other workers to assemble primer charges using selected detonators, fuses, detonating cords and other materials
- Load explosives in blast holes by hand or direct movement of bulk explosives trucks to load holes
- Connect electrical wires, detonating cords or fuses into series and connect series to blasting machines; press handle or button to detonate charges
- Handle, store and transport explosives and accessories in accordance with regulations and ensure that safety procedures are observed
- May operate air-track, rotary, down-the-hole or other drilling machines to drill blast holes or may direct drilling of blast holes.

Employment requirements

- Completion of secondary school is usually required.
- On-the-job training is provided.
- Experience as a heavy equipment operator may be required for drillers.
- Experience as a blaster helper in surface mining and quarrying or construction may be required for blasters.
- Provincial blasting licence is usually required for blasters.
- Trade certification for blasters is available, but voluntary, in New Brunswick and Ontario.

Additional information

- Drillers and blasters often perform both drilling and blasting activities.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Oil and gas well drillers (in 8232 *Oil and gas well drillers, servicers, testers and related workers*)
- Supervisors of construction drillers and blasters (in 7302 *Contractors and supervisors, heavy equipment operator crews*)

- Underground mine drillers and blasters (in 8231 *Underground production and development miners*)
- *Water well drillers (7373)*

7373 Water well drillers

Water well drillers operate a variety of mobile water well drilling rigs and equipment to drill and monitor residential, commercial and industrial water wells. They are employed by water well drilling contractors and governments, or they may be self-employed.

Example titles

cable tool driller – water well drilling
churn drill operator – water well drilling

water well driller
water well driller apprentice

Main duties

Water well drillers perform some or all of the following duties:

- Review client requirements and proposed locations for water wells
- Operate water well drilling rigs and other equipment to drill, bore and dig for residential, commercial and industrial water wells or environmental assessment, and install well screens, casings and other well fixtures
- Document geological formations encountered
- Clean and disinfect wells in preparation for use
- Perform routine mechanical maintenance work on water well drilling rigs and equipment
- Install, test, maintain and repair water well pumps, piping systems and equipment and perform pumping tests to assess well performance
- May provide other drilling services, such as repair or dismantling of existing water well structure, elevator shaft drilling and hydro pole drilling.

Water well drillers may specialize in a specific method of drilling, such as cable, rotary, auger, hammer or reverse circulation drilling.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a two- to three-year water well drilling apprenticeship program
or
Two to three years of work experience in the trade combined with college or industry courses in water well drilling is usually required to be eligible for trade certification.
- Trade certification is available, but voluntary, in New Brunswick, Saskatchewan, Alberta and British Columbia.

Additional information

- Mobility is possible among the various well drilling operators in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

7381 Printing press operators

Printing press operators set up and operate sheet and web-fed presses to print text, illustrations and designs on a wide variety of materials such as paper, plastic, glass, leather and metal. They are employed by commercial printing companies; newspapers, magazines, and other publishing companies; and establishments in the public and private sectors that have in-house printing departments.

Example titles

apprentice pressman/woman
assistant pressman/woman
first pressman/woman
flexographic press operator

offset press operator
printing press operator
rotogravure pressman/woman – printing

Main duties

Printing press operators perform some or all of the following duties:

- Review job orders to determine job specifications such as production time, colour sequence and quantities required, and advise press crew of these specifications
- Mount plates or cylinders and make necessary adjustments
- Fill ink fountains and take measurements, make adjustments and determine settings to control colour and viscosity
- Set up press and check samples for ink coverage, alignment and registration
- Monitor regular press runs for quality and consistency using computer control console and make adjustments as required
- Remove and clean plates and cylinders at end of press run
- Direct activities of press crew and ensure that safety procedures are adhered to.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a college program in printing technology
or
A combination of on-the-job training and specialized high school, college or industry courses is usually required.
- Trade certification is available, but voluntary, in Québec.

Additional information

- Progression to supervisory positions, such as pressroom supervisor, is possible with experience.

Classified elsewhere

7384 Other trades and related occupations, n.e.c.

This unit group includes tradespersons and related skilled workers, not elsewhere classified, who repair, service, install, calibrate or fabricate a variety of products. This unit group includes commercial divers. They are employed by a wide range of establishments, or they may be self-employed.

Example titles

aircraft patternmaker
blacksmith
commercial diver
die setter
explosive ordnance detector
farrier
gunsmith
locksmith
reclamation diver

recreation vehicle technician
restoration steeplejack
safe maker
saw fitter
small arms repairer
toolsmith
underwater contractor
vault repairer

Main duties

The following is a summary of main duties for some occupations in this unit group:

- Gunsmiths fabricate guns and repair and modify firearms according to blueprints or customers' specifications.
- Locksmiths repair, install and adjust locks, make keys and change lock combinations.
- Recreation vehicle technicians repair or replace electrical wiring, plumbing, propane gas lines, appliances, windows, doors, cabinets and structural frames in recreational vehicles.
- Safe and vault servicers install, repair and maintain safes and vaults in banks and other establishments.
- Saw fitters repair, set and sharpen band saws, chain saws, circular saws and other types of saw blades according to specifications.
- Die setters select dies for forging according to work order and specifications; position align and bolt dies to ram and anvil of power presses and hammers.
- Commercial divers perform underwater activities related to construction, inspection, search, salvage, repair and photography.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a two- to four-year apprenticeship program in a relevant trade, such as locksmith, recreation vehicle technician or saw fitter
or
College, high school or industry courses combined with several years of related work experience
or
Several years of on-the-job training are required.
- Trade certification for locksmiths is available, but voluntary, in Nova Scotia, New Brunswick, Saskatchewan, Alberta, British Columbia, the Northwest Territories and Nunavut.
- Trade certification for recreation vehicle service technicians is compulsory in Alberta and available, but voluntary, in Newfoundland and Labrador, Nova Scotia, Prince Edward Island, New Brunswick, Quebec, Ontario, Manitoba, British Columbia and the Yukon.
- Sawfiler/fitter and sawfitter trade certification is available, but voluntary, in Quebec, Alberta, British Columbia and the Yukon.
- Provincial trade certification or licensing may be required for other occupations in this unit group.
- Red Seal endorsement is also available to qualified recreation vehicle service technicians upon successful completion of the interprovincial Red Seal examination.

7384 Other trades and related occupations, n.e.c.

- Commercial divers must meet the requirements of CSA Standard Z275.4-02, Competency Standard for Diving Operations.
- Commercial divers require an Occupational Diver Certificate of Competency issued by the Diver Certification Board of Canada (DCBC) or qualification earned through a formal education program, training courses in diving or a combination of education and practical experience.
- Commercial divers require certification of competency and a diving medical examination from an approved hyperbaric physician.
- Commercial divers may require military or police diving experience.
- Commercial divers usually require a provincial blaster's licence for the setting and detonation of explosives.

Additional information

- The Red Seal endorsement allows for interprovincial mobility.
- There is little or no mobility among occupations in this unit group.
- Progression to supervisory positions is possible with experience.

7441 Residential and commercial installers and servicers

Workers in this unit group install and service a wide variety of interior and exterior prefabricated products such as windows, doors, electrical appliances, water heaters, fences, play structures and septic and irrigation systems at residential, commercial or institutional properties. They are employed by companies specializing in specific product installation and service.

Example titles

aluminum window installer

eavestrough installer

electric appliance installer

exterior cladder

fence erector

hot tub installer

irrigation technician – installation and maintenance

kitchen cupboard and vanity installer

recreation structure erector

siding installer

sign installer

swimming pool installer

water conditioner servicer

water heater servicer

window installer

Main duties

Installers and servicers in this unit group perform some or all of the following duties:

- Read blueprints or work order specifications to determine layout and installation procedures
- Measure and mark guidelines to be used for installations
- Install, repair and service interior prefabricated products such as doors, windows, kitchen cupboards, bathroom vanities, water heaters and household appliances using hand and power tools
- Install, repair and service exterior prefabricated products such as siding, shutters, awnings, fencing, decks, septic and irrigation systems, signs and play structures using hand and power tools.

Employment requirements

- Some secondary school education is usually required.
- On-the-job training and several months of related installing, repairing or servicing experience are usually required.
- A driver's licence may be required.

Additional information

- There is some mobility among the various types of installers and servicers in this unit group.

Classified elsewhere

- *Appliance servicers and repairers (7332)*
- *Central air conditioner installers (in 7313 Refrigeration and air conditioning mechanics)*
- *Steamfitters, pipefitters and sprinkler system installers (7252)*
- *Supervisors of workers in this unit group (in 7205 Contractors and supervisors, other construction trades, installers, repairers and servicers)*

7442 Waterworks and gas maintenance workers

Waterworks maintenance workers maintain and repair waterworks equipment and facilities. They are employed in water filtration and distribution plants and waste treatment plants. Gas maintenance workers check and perform routine maintenance and minor repairs to exterior and underground gas mains and distribution lines. They are employed by gas distribution companies.

Example titles

gas leak locator
gas maintenance worker
gas utility operator
pipeline maintenance worker

pipeline patrolman/woman
utility plant maintenance worker
waterworks maintenance worker

Main duties

Waterworks maintenance workers perform some or all of the following duties:

- Check, clean and lubricate waterworks equipment, such as pumping equipment, chlorination equipment and compressors
- Adjust and repair waterworks equipment under the direction of qualified tradesperson
- Search and locate reported water leaks and repair water-mains, valves or outlets
- Install water meters using hand and power tools.
- Gas maintenance workers perform some or all of the following duties:
 - Check and lubricate gas pipeline valves
 - Conduct routine survey of gas mains and distribution lines to detect and locate escaping gas using gas detecting devices
 - Investigate reports of gas leaks to determine the exact location and extent of leaks
 - Dig ground to expose gas lines and repair damaged pipes
 - Keep record of work performed and location and condition of pipelines
 - Provide information on underground gas distribution lines and observe excavation work to ensure that underground gas facilities are protected.

Employment requirements

- Completion of secondary school may be required.
- Several years of experience as a labourer in the same company may be required.
- On-the-job training is provided.

Additional information

- Mobility between jobs in this unit group normally occurs within the same area of work, such as within waste water treatment plants, within water filtration and distribution plants or within gas distribution plants.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Gas fitters* (7253)
- Supervisors of water and gas maintenance workers (in 9212 *Supervisors, petroleum, gas and chemical processing and utilities*)
- *Water and waste treatment plant operators* (9243)

7444 Pest controllers and fumigators

Pest controllers and fumigators inspect buildings and outside areas for pest infestation and spray chemical treatments to kill noxious and destructive insects, rodents and other pests or set cage traps to capture and remove animals. They are employed by pest control companies, or they may be self-employed.

Example titles

animal control trapper
fumigator, pests
pest controller
pest control operator

pest control service representative
pest control technician
pest exterminator

Main duties

Pest controllers and fumigators perform some or all of the following duties:

- Inspect buildings and outside areas at regular intervals or at specific request of property owner to detect signs of infestation
- Determine type of treatment required and provide estimate of costs to clients
- Prepare and spray chemical mixture on infested areas using mechanical or electric sprayer to kill insects, rodents and other pests
- Fumigate households
- Place and set traps to capture and remove animals, such as skunks or raccoons
- Install animal control barriers such as needle strips, netting and other devices to keep animals off property
- Clean out areas that harbour pests using rakes, shovels, brooms or mops
- Advise clients on how to prevent pest infestation.

Employment requirements

- Completion of secondary school is usually required.
- Completion of courses in pest control or extermination or several months of on-the-job training are usually required.
- Provincial pesticide applicator licence is required in all provinces.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Supervisors of pest controllers and fumigators (in 7205 *Contractors and supervisors, other construction trades, installers, repairers and servicers*)

7445 Other repairers and servicers

This unit group includes workers, not elsewhere classified, who repair and service a wide variety of products, such as cameras, scales, musical instruments, coin machines, vending machines, sporting goods and other miscellaneous products and equipment. They are employed by product specialty repair shops and service establishments.

Example titles

bicycle repairer
camera repairer
meter repairer
piano repairer

scale repairer
sewing machine servicer – domestic
sporting goods repairer
vending machine repairer

Main duties

Repairers and servicers in this unit group perform some or all of the following duties:

- Inspect products to determine the requirement for repair
- Repair or replace defective or worn out parts and components using hand, power or specially designed tools
- Test and adjust repaired products for proper functioning
- Perform routine maintenance
- May calibrate products using hand tools.

Employment requirements

- Some secondary school education is usually required.
- Completion of college or other courses relevant to a particular equipment or product repair
or
Completion of several months of on-the-job training is usually required.

Additional information

- Some mobility may occur among workers in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Locksmiths (in 7384 *Other trades and related occupations, n.e.c.*)
- Supervisors of workers in this unit group (in 7205 *Contractors and supervisors, other construction trades, installers, repairers and servicers*)

7451 Longshore workers

Longshore workers transfer cargo throughout dock area and onto and from ships and other vessels. They are employed by marine cargo handling companies, shipping agencies and shipping lines.

Example titles

dockworker
longshoreman/woman
longshore worker

ship loader operator
stevedore
tanker loader

Main duties

Longshore workers perform some or all of the following duties:

- Operate industrial trucks, tractors and other mobile equipment to transfer cargo, such as containers, crated items, automobiles and pallet-mounted machinery, around dock to within range of cranes and hoists
- Operate winches or other hoisting devices to load and unload cargo onto and from ships and other vessels
- Operate mechanical towers to load vessels with materials such as coal and ore
- Operate equipment to transfer bulk materials, such as grain, to hold of vessels
- Connect hoses and operate equipment to transfer liquid materials into storage tanks on vessels
- Perform other activities such as lashing and shoring cargo aboard ships, opening and closing hatches, cleaning holds of ships and rigging cargo.

Employment requirements

- Some secondary school education may be required.
- On-the-job training is provided.

Additional information

- Progression to foreman/woman or supervisor of longshore workers is possible with experience.

Classified elsewhere

- Longshore crane operators (in 7371 *Crane operators*)
- *Material handlers* (7452)
- Supervisors of longshore workers (in 7302 *Contractors and supervisors, heavy equipment operator crews*)

7452 Material handlers

This unit group includes workers who handle, move, load and unload materials by hand or using a variety of material handling equipment. They are employed by transportation, storage and moving companies, and by a variety of manufacturing and processing companies and retail and wholesale warehouses.

Example titles

bin filler
coal handler
conveyor console operator
forklift truck operator
freight handler (except air transport)
furniture mover
lumber piler – building supplies

material handler
railway car loader
stockpiler
storage worker – material handling
truck loader
warehouseman/woman

Main duties

Material handlers (manual) perform some or all of the following duties:

- Load, unload and move products and materials by hand or using basic material handling equipment
- Move household appliances and furniture onto and off moving trucks or vans
- Perform other material handling activities such as counting, weighing, sorting, packing and unpacking.

Material handlers (equipment operators) perform some or all of the following duties:

- Operate winches and other loading devices to load and unload materials onto and off trucks, railway cars and loading docks of warehouses and industrial establishments
- Operate industrial trucks, tractors, loaders and other equipment to transport materials to and from transportation vehicles and loading docks and to store and retrieve materials in warehouses
- Connect hoses or pipes and operate equipment to load and unload liquid petroleum, chemical or other products into or from tank cars, tank trucks or storage tanks
- Operate equipment to dump materials such as coal, ore and grain into or to remove materials from railway cars, trucks or other vehicles
- Operate conveyors and equipment to transfer grain or other materials from transportation vehicles to elevators, bins or other storage areas
- May perform other activities, such as opening containers and crates, filling warehouse orders, assisting in taking inventory and weighing and checking materials.

Employment requirements

- Some secondary school education may be required.
- Physical strength is required for manual material handlers who work with heavy materials.

Classified elsewhere

- Freight attendants (in 7534 *Air transport ramp attendants*)
- Heavy equipment operators (except crane) (7521)
- Longshore workers (7451)
- Mover helpers (in 7622 *Railway and motor transport labourers*)
- Storekeepers and partspersons (1522)
- Supervisors of material handlers (in 7302 *Contractors and supervisors, heavy equipment operator crews*)
- Warehouse supervisors (in 1215 *Supervisors, supply chain, tracking and scheduling coordination occupations*)

7511 Transport truck drivers

Transport truck drivers operate heavy trucks to transport goods and materials over urban, interurban, provincial and international routes. They are employed by transportation, manufacturing, distribution and moving companies, and trucking employment service agencies, or they may be self-employed. This unit group also includes drivers of special purpose trucks and shunters who move trailers to and from loading docks within trucking yards or lots.

Example titles

bulk goods truck driver
dump truck driver
flatbed truck driver
logging truck driver
long haul truck driver
moving van driver

shunt truck driver
tow truck driver
transport driver
truck driver
truck driver, heavy truck
truck driver, tractor-trailer

Main duties

Long-haul transport truck drivers perform some or all of the following duties:

- Operate and drive primarily tractor-trailer, long-combination vehicle and straight-body trucks weighing over 4500 kg to transport goods and materials over long distances
- Plan trip logistics and obtain required documentation to transport goods
- Perform pre-trip, en route and post-trip inspection of vehicle systems, equipment and accessories such as tires, lights and turning signals, brakes and cold storage
- Ensure cargo is secured properly in accordance with safety requirements and follow safety procedures for transporting dangerous goods
- Obtain special permits and other documents required to transport cargo on international routes
- Record cargo information, hours of service, distance travelled and fuel consumption
- Administer bills of lading and manually or electronically maintain log books
- Communicate with dispatcher, other drivers and customers using communication devices and on-board computers
- May perform emergency roadside repairs
- May drive as part of a two-person team or convoy
- May transport hazardous products or dangerous goods.

Short-haul and local transport truck drivers perform some or all of the following duties:

- Operate and drive primarily straight trucks to transport goods and materials mainly on local routes and short inter-urban routes

- Perform pre-trip, en route and post-trip inspection and oversee all aspects of vehicle such as condition of equipment, and loading and unloading of cargo
- May drive special purpose trucks such as tow trucks, dump trucks, hydrovac trucks or cement mixing trucks.

Employment requirements

- Completion of secondary school is usually required.
- On-the-job-training is provided.
- Completion of an accredited driver training course of up to three months duration, through a vocational school or community college, may be required.
- A Class 3 or D licence is required to drive straight-body trucks.
- A Class 1 or A licence is required to drive long combination vehicles.
- Air brake endorsement (Z) is required for drivers who operate vehicles equipped with air brakes.
- Transportation of dangerous goods (TDG) certification is required for drivers who transport hazardous products or dangerous goods.
- Additional licensing endorsement or certification may be required to drive articulated trucks.

Additional information

- Progression to supervisory positions or to non-driving occupations, such as driver trainer, safety officer or truck dispatcher is possible with additional training or experience.

7511 Transport truck drivers

Classified elsewhere

- Drivers of light trucks (in 7514 *Delivery and courier service drivers*)
- Snowplough and garbage truck drivers (in 7522 *Public works maintenance equipment operators and related workers*)
- Supervisors, motor transport and other ground transit operators (7305)
- Truck dispatchers (in 1525 *Dispatchers*)
- Truck driver helpers (in 7622 *Railway and motor transport labourers*)
- Truck driver trainers (in 4021 *College and other vocational instructors*)

7512 Bus drivers, subway operators and other transit operators

This unit group includes workers who drive buses and operate streetcars, subway trains and light rail transit vehicles to transport passengers on established routes. Bus drivers are employed by urban transit systems, school boards or transportation authorities and private transportation companies. Streetcar, subway and light rail transit operators are employed by urban transit systems.

Example titles

bus driver	school bus driver
bus operator	sightseeing tour driver
light rail transit operator	streetcar operator
motor coach driver	subway train operator
public passenger transit driver	transit operator – transportation

Main duties

Bus drivers and streetcar operators perform some or all of the following duties:

7533 Boat and cable ferry operators and related occupations

This unit group includes workers who operate lock gates, bridges and similar equipment along canal systems and workers who operate cable ferries and ferry terminals. This group also includes boat operators, and owner-operators, who operate small motorboats or watercraft to transport passengers or freight. Workers in this group are employed by the federal government, cable ferry companies, ferry terminals, marine companies and canal, port or harbour authorities. Owner-operators of small boats are self-employed.

Example titles

bridgemaster
cable ferry operator
canal lock operator
charter boat operator
ferry terminal worker
launch master
linesman/woman – canal lock system

loading bridge operator
lockmaster
motorboat operator
scow captain
sightseeing boat operator
small craft operator
water taxi operator

Main duties

Lock equipment operators perform some or all of the following duties:

- Operate telecommunication equipment or use portable loudspeakers to direct movements of vessels in lock area
- Operate controls to open or close lock gates
- Operate controls to raise, lower or turn bridges
- Observe progress of vessels passing through locks.

Cable ferry operators perform some or all of the following duties:

- Signal passengers and motor vehicles to embark and disembark
- Operate cable ferry across narrow waterway
- Perform routine maintenance and repairs to engine, cables and winches.

Ferry terminal workers perform some or all of the following duties:

- Operate controls to adjust landing bridge, position or remove gangplank, open or close doors and gates, and secure or remove docking devices
- Signal passengers and motor vehicles to embark and disembark
- May collect tickets or fares from passengers.

Boat operators perform some or all of the following duties:

- Operate motorboats, launches, small ferry boats and other similar vessels to transport passengers or freight

- Maintain boats and equipment on board, such as engines, winches, derricks, fire extinguishers and life preservers
- May perform other duties, such as checking for oil spills or other pollutants around ports and harbours, patrolling beaches and measuring depth of water.

Employment requirements

- Some secondary school education is usually required.
- On-the-job training is provided.
- Master of a Small Craft or Master of a Small Passenger Craft certificate, issued by Transport Canada, is required for boat operators.

Additional information

- There is little or no mobility among lock equipment operators, cable ferry operators and ferry terminal workers.
- Mobility between boat operators in this unit group is possible.
- Progression from boat operator positions to deck officer positions is possible with additional training, experience and certification.

Classified elsewhere

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who extract coal, minerals and ore; operate underground conveyances; and perform other services in support of underground mining, or of heavy equipment operators, drillers, blasters and other workers in surface mining and quarrying
- Establish methods to meet work schedules and confer with managerial and technical personnel, other departments and contractors to resolve problems and co-ordinate activities
- Oversee the safety of the mining or quarrying operations
- Resolve work problems and recommend measures to improve productivity
- Requisition materials and supplies
- Train workers in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports.

Employment requirements

- Completion of secondary school is required.
- Completion of a college or university program in mining technology or engineering may be required for some positions in this group.
- Several years of experience in the occupations supervised are usually required.
- Provincial certification as an underground mine supervisor, shift boss, or coal mining supervisor may be required.

Additional information

- There is mobility between employers, especially for supervisors with post-secondary diplomas or degrees.
- Mobility between surface mining, underground mining, coal or metal mining sectors may be limited by differences in production technologies and licensing requirements.

Classified elsewhere

- *Drillers and blasters – surface mining, quarrying and construction (7372)*
- *Heavy equipment operators (except crane) (7521)*
- *Mine labourers (8614)*
- *Mine managers (in 0811 Managers in natural resources production and fishing)*
- *Underground mine service and support workers (8411)*
- *Underground production and development miners (8231)*

8222 Contractors and supervisors, oil and gas drilling and services

Supervisors in this unit group supervise and co-ordinate the activities of workers engaged in drilling for oil or gas, operating service rigs, or providing oil and gas well services. They are employed by drilling and well service contracting companies and by petroleum producing companies. This unit group includes oilfield consultants who may be self-employed.

Example titles

fracturing supervisor
multi-service operator – oil field services
oilfield consultant

rig manager
toolpusher
well services crew supervisor

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who drill for oil and gas, operate service rigs or provide oil and gas well services
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Requisition and procure materials and supplies
- Resolve work problems and recommend measures to improve productivity and safety
- Train workers in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports
- May set up machines and equipment.

Employment requirements

- Completion of secondary school is required.
- Completion of college or petroleum industry approved training courses is required.
- Extensive experience in the occupations supervised is required.
- A two-year college diploma in petroleum engineering technology may be required.
- Certificates in first aid, hydrogen sulphide awareness, blowout prevention, well control, workplace hazardous materials information system (WHMIS), transportation of dangerous goods (TDG) or other safety and technical subjects are required and are obtained by completing short courses.

Additional information

- There is little mobility for supervisors from well services to well drilling.

Classified elsewhere

- *Geological and mineral technologists and technicians (2212)*
- *Managers in natural resources production and fishing (0811)*
- *Oil and gas well drillers, servicers, testers and related workers (8232)*
- *Oil and gas well drilling and related workers and services operators (8412)*

8231 Underground production and development miners

Underground production and development miners drill, blast, operate mining machinery, and perform related duties to extract coal and ore in underground mines and to construct tunnels, passageways and shafts to facilitate mining operations. They are employed by coal, metal and non-metallic mineral underground mines and by specialized contractors in mine construction, shaft sinking and tunnelling.

Example titles

blaster – underground mining	miner
chute blaster – underground mining	mining machine operator
diamond driller – underground mining	powderman/woman – underground mining
drift miner	raise miner
driller – underground mining	roadheader operator
hardrock miner apprentice	scooptram operator
hoist operator – underground mining	shaft inspector

Main duties

Underground production and development miners perform some or all of the following duties:

- Set up and operate drills and drilling machines to produce a designated pattern of blasting holes
- Operate diamond drills or other specialized drills such as raise boring machinery to test geological formations or to produce underground passageways
- Set up and operate mining machinery to shear coal, rock or ore from the working face
- Load explosives, set fuses, and detonate explosives to produce desired blasting patterns and rock fragmentation in underground mines
- Operate scooptram, load-haul-dump (LHD) machine or mucking machine to load and haul ore from stopes, drifts and drawpoints to ore passes
- Perform duties required to ensure safety and to support the mining advance, such as scaling loose rock from walls and roof, drilling and installing rock bolts, extending and installing air and water pipes, operating ore loading machinery, inspecting mine shafts, operating hoists that transport people, equipment and materials through mine shafts, and constructing timber supports and cribbing if required
- Perform routine maintenance of mining machinery.

Employment requirements

- Completion of secondary school is usually required.

- Formal training of up to six weeks followed by extended periods of specialized training as a helper or in support occupations is usually provided.
- Previous experience as a mine labourer or in other mine occupations is usually required.
- Provincial blasting licence may be required.
- May be certified in the basic common core program or as an underground hard rock miner in Ontario.
- Trade certification for miners is available, but voluntary, in Quebec and Manitoba.
- Company licensing or certification is often required for occupations in this unit group.
- Certificate in first aid may be required.

Additional information

- Mobility is possible to other occupational groups in underground mining such as underground service and support occupations.
- There is mobility between employers within each of the three following sectors: underground coal mining, underground hard rock mining and underground potash, salt or soft rock mining.
- Mobility between these sectors is somewhat limited by differences in production technologies.
- Progression to mining supervisor is possible with experience.

8231 Underground production and development miners

Classified elsewhere

- *Drillers and blasters – surface mining, quarrying and construction (7372)*
- *Mine labourers (8614)*
- *Supervisors, mining and quarrying (8221)*
- *Underground mine service and support workers (8411)*

8232 Oil and gas well drillers, servicers, testers and related workers

Oil and gas well drillers and well servicers control the operation of drilling and hoisting equipment on drilling and service rigs, and direct the activities of the rig crew under supervision of the rig manager. Oil and gas well loggers, testers and related workers operate specialized mechanical or electronic equipment, tools or instruments to provide services in conjunction with well drilling, completion or servicing. Workers in this unit group are employed by drilling and well service contractors, petroleum producing companies and well logging or testing companies.

Example titles

assistant driller – oil and gas well drilling
directional drilling operator
downhole tool operator
driller – oil and gas drilling
drill stem tester
electric line operator

logging and perforating operator
service rig operator
slickline operator
well testing operator
wireline operator

Main duties

Oil and gas well drillers and well servicers perform some or all of the following duties:

- Direct rig crew in setting up rigs and drilling, completing or servicing oil and gas exploration and producing wells
- Operate controls of drill or service rig drilling and hoisting machinery
- Train or arrange for training of crew
- Maintain records of drilling and servicing operations
- Ensure safety procedures are followed.

Oil and gas well loggers, testers and related workers perform some or all of the following duties:

- Drive well service or wireline truck to well site
- Assemble and attach equipment, tools or recorders to drill stem or wireline to conduct required procedures and tests
- Operate or direct the operation of wireline or unit controls to lower, position and retrieve equipment and instruments
- Operate recorders and computers in mobile testing or logging unit to collect data
- May perform limited data interpretation.

Employment requirements

- Completion of secondary school is usually required.
- Oil and gas well drillers and well servicers require three to six months of formal on-the-job training, college or petroleum industry-approved training courses and four or more years of work experience in subordinate rig crew positions.

- A college diploma in drilling may be required.
- Offshore work requires several years of experience in an equivalent position on land.
- Certificates in first aid, hydrogen sulphide awareness, blowout prevention, well control, workplace hazardous materials information system (WHMIS), transportation of dangerous goods (TDG) and a special oil well operator (boiler) certificate are required.
- Oil and gas well loggers, testers and related workers require three to six months of formal on-the-job training and several years of experience in subordinate logging and testing positions or on drilling and servicing rigs.
- Completion of a college program in electronics or engineering technology may be required for open hole well logging.
- A provincial blaster's licence, and seismic blaster and oil well blaster certification are required for well perforation services.

Additional information

- Mobility between jobs on drilling and service rigs is limited by the differences in the machinery, tools and operations performed, but mobility is possible especially from drilling to service rigs.
- Progression to crew supervisor or manager is possible with experience and additional education and training.

8232 Oil and gas well drillers, servicers, testers and related workers

Classified elsewhere

- *Oil and gas well drilling and related workers and services operators (8412)*
- *Rig managers (in 8222 Contractors and supervisors, oil and gas drilling and services)*
- *Water well drillers (7373)*

8241 Logging machinery operators

Logging machinery operators operate cable yarding systems, mechanical harvesters and forwarders and mechanical tree processors and loaders to fell, yard and process trees at logging sites. They are employed by logging companies and contractors.

Example titles

Cable yarding system operators

grapple operator – logging
linehorse operator
rigging slinger – logging
steel spar operator – logging
yarder operator – logging

Mechanical harvester and forwarder operators

feller buncher operator
feller forwarder operator

shortwood harvester operator
treelength forwarder operator

Mechanical tree processor and loader operators

chipping machine operator
delimber operator
loader operator – logging
log processor operator
slasher operator – logging

Main duties

Logging machinery operators perform some or all of the following duties:

- Cable yarding system operators operate machines to transport trees from logging areas to landing or log loading sites in mountainous terrain in western Canada.
- Mechanical harvester and forwarder operators assess site and terrain and drive heavy equipment to perform a combination of felling, slashing, bucking, bunching and forwarding operations at logging areas.
- Mechanical tree processor and loader operators operate a variety of machines which perform a combination of slashing, bucking, chipping, sorting and loading logs or trees at landing sites.

Employment requirements

- Completion of secondary school may be required.
- On-the-job training from three to 16 months is provided, depending on the complexity of machinery operated and the type of woodlands operation.
- Experience requirements vary depending on the complexity of machinery operated.
- Mechanical harvester and forwarder operators may require logging experience as a chain saw and skidder operator.
- Feller buncher operators and cable yarder operators usually require three to five years of logging experience.

- Mechanical tree processor and loader operators usually require one to three years of logging experience.
- Certification as a heavy equipment operator may be required.
- Company certification for mobile logging machinery operation may be required.
- Provincial air brake certification may be required in British Columbia, depending on the type of equipment operated.
- Workplace hazardous materials information system (WHMIS) and first aid certificates may be required.
- Knowledge of tree harvesting regulations is required.

Additional information

- There is some mobility among jobs in this group from the less complex to more complex machinery operation.
- There is some mobility between employers, particularly in similar types of woodland operations.
- Self-employment as a logging contractor is possible with investment in equipment.
- Logging machinery operators may perform minor repairs and maintenance on their equipment.
- Progression to logging and forestry supervisory positions is possible with experience.

8241 Logging machinery operators

Classified elsewhere

- *Chain saw and skidder operators (8421)*
- *Heavy equipment operators (except crane) (7521)*
- *Silviculture and forestry workers (8422)*
- *Supervisors, logging and forestry (8211)*
- *Transport truck drivers (7511)*

8252 Agricultural service contractors, farm supervisors and specialized livestock workers

Agricultural service contractors, who own and operate their own businesses, provide agricultural services such as livestock and poultry breeding, soil preparation, crop planting, crop spraying, cultivating or harvesting. Farm supervisors supervise the work of general farm workers and harvesting labourers. Specialized livestock workers carry out feeding, health and breeding programs on dairy, beef, sheep, poultry, hog and other livestock farms.

Example titles

artificial inseminator

cattle herdsman

contractor, artificial insemination service

contractor, crop harvesting service

crop dusting contractor

dairy herdsman

farm foreman/woman

farm supervisor

feedlot foreman/woman

hog operation supervisor

horse trainer

livestock breeding service contractor

pork production technician

poultry farm foreman/woman

ranch foreman/woman

swine herdsman

vegetable farm foreman/woman

Main duties

Agricultural service contractors perform some or all the following duties:

- Provide agricultural livestock services such as artificial insemination, spraying or shearing of livestock or disinfecting pens, barns or poultry houses
- Provide agricultural crop services such as plowing, irrigating, cultivating, spraying or harvesting
- Assist in the development and implementation of farm safety and bio-security procedures
- Hire and train workers
- Negotiate the terms of services to be provided
- Maintain financial and operational records
- May participate in the provision of services or in the operation of machinery and equipment.

Farm supervisors perform some or all of the following duties:

- Co-ordinate and supervise the work of general farm workers and harvesting labourers
- Supervise and oversee breeding and other livestock-related programs
- Supervise and oversee growing and other crop-related operations
- Develop work schedules and establish procedures
- Ensure farm safety and bio-security procedures are followed
- Maintain quality control and production records
- May perform general farm duties.

Farm supervisors may specialize in areas such as dairy, poultry, swine, beef, sheep, equine, fruit, vegetable, mixed or other specialty farming.

Specialized livestock workers perform some or all of the following duties:

- Formulate feeding programs
- Implement pasture or pen breeding programs
- Follow safety and bio-security procedures
- Recognize and treat certain livestock health problems
- Maintain livestock performance records
- Select livestock for sale
- Train horses
- Perform general farm duties
- May supervise general farm workers.

Specialized livestock workers usually specialize in one type of farm animal such as beef cattle, dairy cattle, poultry or swine.

Employment requirements

- Agricultural service contractors usually require a university degree, college diploma or industry courses in agricultural studies and several years of experience related to the service offered.
- Contractors providing certain services, such as artificial insemination and pesticide application, may require training certificates and provincial licensing.
- Farm supervisors and specialized livestock workers may require a college certificate or other specialized training in agriculture or livestock husbandry.

8252 Agricultural service contractors, farm supervisors and specialized livestock workers

- A course or certificate in first aid may be required.

Classified elsewhere

- *General farm workers* (8431)
- *Harvesting labourers* (8611)
- *Managers in agriculture* (0821)
- *Managers in horticulture* (0822)
- *Pest controllers and fumigators* (7444)
- *Pet groomers and animal care workers* (6563)

8255 Contractors and supervisors, landscaping, grounds maintenance and horticulture services

This unit group includes landscaping and grounds maintenance contractors, who own and operate their own businesses. This group also includes supervisors who supervise and co-ordinate the activities of workers in the following unit groups: *Nursery and Greenhouse Workers (8432)* and *Landscaping and Grounds Maintenance Labourers (8612)*. They are employed by landscaping companies, cemeteries, lawn care and tree service companies, nurseries and greenhouses and by landscaping operations of public works departments and private establishments.

Example titles

greenhouse supervisor	landscaping foreman/woman
groundskeeping supervisor	landscaping supervisor
grounds maintenance contractor	lawn care contractor
horticulture workers supervisor	nursery foreman/woman
interior plantscaping contractor	park maintenance supervisor
landscaping contractor	tree service contractor

Main duties

Contractors and supervisors in this unit group perform some or all of the following duties:

- Supervise and co-ordinate the activities of workers who maintain lawns, gardens, athletic fields, golf courses, cemeteries, parks, interior plantscapes and other landscaped areas
- Tender bids on contracts for landscaping and grounds maintenance work
- Plan and estimate the materials and labour requirements for individual contracts
- Organize the planting and maintenance of trees, gardens, lawns, shrubs and hedges and the construction and installation of fences, decks, patios, walkways and retaining walls
- Establish work schedules and procedures and co-ordinate activities with other work units
- Resolve work-related problems and prepare and submit progress and other reports
- Requisition supplies and materials
- Maintain financial and personnel records
- Hire staff and train workers in job duties and company policies
- May manage operations of own company
- May provide snow removal services during winter months
- May perform the same duties as workers supervised.

Employment requirements

- Completion of secondary school is usually required.

- A college diploma, specialized courses or industry-related training and certification in landscaping and horticulture are usually required.
- Experience as a landscape or horticulture supervisor or as a landscape or horticulture technician is required.
- Experience in the type of work supervised is required.
- A provincial licence to apply chemical fertilizers, fungicides, herbicides and pesticides may be required.

Classified elsewhere

- *Contractors and supervisors, heavy equipment operator crews (7302)*
- *Contractors and supervisors, other construction trades, installers, repairers and servicers (7205)*
- *Landscape and horticulture technicians and specialists (2225)*
- *Landscape architects (2152)*
- *Managers in agriculture (0821)*
- *Managers in horticulture (0822)*

8261 Fishing masters and officers

Fishing masters and officers manage and operate saltwater and freshwater fishing vessels greater than 100 gross tonnes to pursue and land fish and other marine life. They are employed by establishments engaged in operating commercial fishing vessels.

Example titles

captain, offshore fishing vessel
deck officer, fishing vessel
first mate, fishing vessel

fishing vessel boatswain
fishing vessel master
trawler captain

Main duties

Fishing masters and officers perform some or all of the following duties:

- Command fishing vessels to catch fish and other marine life
- Determine areas for fishing, plot courses and compute navigational positions using compasses, charts, tables and other aids
- Steer vessels and operate navigational instruments and electronic fishing aids such as echo sounders and chart plotters
- Direct fishing operations and supervise crew activities
- Record fishing progress, crew activities, weather and sea conditions on ship's log
- Select and train vessel crews.

Employment requirements

- Some secondary school education is usually required.
- One to two years of experience as a fishing vessel deckhand is required.
- Captains require one year of service as officer in charge of the watch.
- A Fishing Master's Certificate is required for all occupations in this unit group.
- A commercial fishing licence is required.

Additional information

- Completion of Transport Canada examinations is required to advance from Fishing Master Class IV through Class I. Training programs are provided in provincial training centres.
- Progression to merchant or government vessel officer positions (which require a Marine Officer Certificate) is possible with additional training and experience.

Classified elsewhere

- *Deck officers, water transport (2273)*
- *Fishermen/women (8262)*
- Fishing vessel engineers requiring a Transport Canada licence (in *2274 Engineer officers, water transport*)

8262 Fishermen/women

Fishermen/women operate fishing vessels to pursue and land fish and other marine life. They are usually self-employed owner-operators of fishing vessels.

Example titles

fisherman/woman

fishing vessel skipper

inshore fisherman/woman

lobster fisherman/woman

longliner fisherman/woman

seiner fisherman/woman

Main duties

Fishermen/women perform some or all of the following duties:

- Operate fishing vessel to pursue and catch fish and other marine life
- Select area for fishing, plot courses and compute navigational positions using compasses and charts or electronic fishing aids
- Steer vessel and operate navigational instruments
- Operate fishing gear, direct fishing operation and supervise fishing crew members
- Maintain engine, fishing gear and other on-board equipment
- Record fishing activities, weather and sea conditions
- Estimate costs of operations and plan budget for each fishing season
- Establish fish marketing plan and keep records of all financial transactions
- May transport fish to processing plants or fish buyers.

Employment requirements

- Several years of experience as fishing vessel crew member or helper are usually required.
- A commercial fishing licence is required.
- Licences are required for each species of fish pursued.
- Trade certification for fish harvesters is available, but voluntary, in Newfoundland and Labrador.

Additional information

- Progression to master or mate on fishing vessels over 100 gross tonnes is possible with additional training, licensing and experience.

Classified elsewhere

- *Fishing masters and officers* (8261)
- *Fishing vessel deckhands* (8441)

8411 Underground mine service and support workers

Underground mine service and support workers perform a range of duties related to the operation of orepasses, chutes and conveyor systems, the construction and support of underground structures, passages and roadways, and the supply of materials and supplies to support underground mining. They are employed by coal, metal and non-metallic mineral mines.

Example titles

backfiller – underground mining
blaster helper – underground mining
cage tender
conveyor operator – underground mining
crusher operator – underground mining
driller helper – underground mining
haulageman/woman – underground mining
lamp keeper – underground mining

materialman/woman – underground mining
mine construction worker
orepass tender – underground mining
pipeworker – underground mining
raise miner helper
skip tender
timberman/woman – underground mining
trainman/woman – underground mining

Main duties

Underground mine service and support workers perform some or all of the following duties:

- Operate and maintain ore chutes or conveyor systems to control flow of ore or coal in underground mine
- Operate construction equipment such as bulldozer, grader or backhoe to build and maintain underground passages and haulageways
- Construct and repair wood or metal supports and structures such as bulkheads, platforms, drift doors and chutes using construction and mining tools
- Attach and extend ventilation and water pipes and related mine services
- Assist miners in setting up and operating various drills and other mining machinery
- Supply and maintain backfill distribution of sand, rock or other materials
- Operate diesel or electric track haulage equipment such as ore trains to distribute personnel and supplies and to convey ore from orepass to primary crusher or skip
- Maintain supply storage areas and maintain equipment and supplies such as explosives, drill bits, fire extinguishers, lamps and batteries
- Perform routine maintenance of machinery.

Employment requirements

- Completion of secondary school is usually required.

- Previous formal training of up to six weeks followed by periods of on-the-job training as a helper or in support occupations is usually required.
- Previous experience as a mine labourer is usually required.
- May be certified in the basic common core program in Ontario.
- Company licensing or certification is often required for occupations in this unit group.

Additional information

- Mobility is possible to other occupational groups in underground mining.
- There is mobility between employers within each of the three following sectors: underground coal mining, underground hard rock mining and underground potash, salt or soft rock mining.
- Mobility between these sectors is somewhat limited by differences in production technologies.

Classified elsewhere

- *Drillers and blasters – surface mining, quarrying and construction* (7372)
- *Mine labourers* (8614)
- *Underground production and development miners* (8231)

8412 Oil and gas well drilling and related workers and services operators

Oil and gas well drilling workers operate drilling and service rig machinery as intermediate members of the rig crew. Oil and gas well services operators drive trucks and operate specialized hydraulic pumping systems to place cement in wells or to treat wells with chemicals, sand mixtures or gases to stimulate production. Workers in this unit group are employed by drilling and well service contractors and by petroleum producing companies.

Example titles

acidizer, oil field services

blender operator – oil field services

control room operator – offshore drilling

derrickman/woman

motorhand – oil and gas drilling

oil well cementer, oil field services

pumper operator – oil field services

pumpman/woman – oil field services

rig technician – derrickhand

seismic buried facilities locator

Main duties

Oil and gas well drilling workers perform some or all of the following duties:

- Use specialized equipment, information and maps to determine and document the location of buried pipelines and other utilities in preparation for seismic exploration and drilling activities
- Align and manipulate sections of pipe or drill stem from platform on rig derrick during removal and replacement of strings of pipe, or drill stem and drill bit
- Operate and maintain drilling mud systems and pumps during drilling, and mix mud, chemicals and additives
- Record mud flows and volumes and take samples
- Operate and maintain drilling rig diesel motors, transmissions and other mechanical equipment
- Assist in setting up, taking down and transporting drilling and service rigs
- Supervise floorhands and labourers.

Oil and gas well services operators perform some or all of the following duties:

- Drive well services truck to well site
- Assemble pumping equipment and attach pumps and hoses to wellhead
- Operate hydraulic pumping systems to pump chemicals, gases, sand, cement or other material into well
- Read gauges to monitor pressure, density, rate and concentration and adjust pumping procedure as required
- May mix chemicals and cements.

Employment requirements

- Completion of secondary school is required.

- Training of up to three months with an experienced operator is required for oil and gas well services operators.
- Completion of petroleum industry-approved training courses may be required.
- One year of experience as a floorhand, assistant or labourer is usually required.
- Certificates in first aid, hydrogen sulphide awareness, blowout prevention, workplace hazardous materials information system (WHMIS), transportation of dangerous goods (TDG), cryogenic safety or in other safety concerns may be required.
- Rig technician certification for motorhands and derrickhands may be required by some employers.

Additional information

- Progression to oil and gas well driller or service rig operator is possible with experience.
- Progression to supervisor of well services is possible for gas and oil well services operators.

Classified elsewhere

- *Contractors and supervisors, oil and gas drilling and services* (8222)
- *Oil and gas drilling, servicing and related labourers* (8615)
- *Oil and gas well drillers, servicers, testers and related workers* (8232)

8421 Chain saw and skidder operators

Chain saw and skidder operators operate chain saws to fell, delimb and buck trees, and operate skidders to move or yard the felled trees from the logging site to the landing area for processing and transportation. They are employed by logging companies and contractors.

Example titles

bucker

chain saw operator – logging

faller

feller

forest worker – logging

grapple skidder operator

landingman/woman

pieceworker – logging

skidder operator

Main duties

Chain saw and skidder operators perform some or all of the following duties:

- Operate chain saw to fell, delimb and buck trees at the logging site and loading area
- Operate cable, or grapple skidder to move or yard the felled trees from the logging site to the landing area for processing and transportation
- Assess site, terrain and weather conditions before felling and yarding trees
- May work as member of a team rotating between chain saw operation and skidder operation
- May maintain and perform minor repairs on skidders, chain saws and other equipment.

Employment requirements

- Completion of secondary school may be required.
- Completion of a college program for forest workers may be required.
- Formal training in chain saw operation and maintenance and several months of on-the-job training are usually provided.
- Previous experience as a logging and forestry labourer or logging machine operator may be required. Experience requirements vary depending on the type and location of woodlands operations.
- Provincial certification or a forest worker program certificate is required in some provinces.
- Trade certification for fallers is available, but voluntary in Quebec.
- Workplace hazardous materials information system (WHMIS) and first aid certificates may be required.

Additional information

- There is a trend toward company certification of chain saw operators in larger companies.
- Chain saw operators often must own and maintain their own chain saw.
- There is some mobility among jobs within this unit group as chain saw and skidder operators often work in teams and rotate jobs.
- Mobility may be limited from eastern and central forest zones to western forest zones where tree size or steep terrain may require different cutting and yarding methods.
- Mobility is possible to logging machinery operators.
- Progression to supervisory positions or self-employment as a logging contractor is possible with experience.

Classified elsewhere

- *Logging and forestry labourers* (8616)
- Logging contractors and supervisors (in 8211 *Supervisors, logging and forestry*)
- *Logging machinery operators* (8241)
- *Silviculture and forestry workers* (8422)

8422 Silviculture and forestry workers

Silviculture and forestry workers perform a variety of duties related to reforestation and to the management, improvement and conservation of forest lands. They are employed by logging companies, contractors and government services.

Example titles

clearing saw operator – forestry
forest firefighter
forestry crew worker
pieceworker – silviculture

scarification equipment operator – forestry
silviculture worker
thinning saw operator

Main duties

Silviculture and forestry workers perform some or all of the following duties:

- Assess site, select seedlings and plant trees using manual planting tools in reforestation areas
- Operate power thinning saw to thin and space trees in reforestation areas
- Operate chain saw to thin young forest stands
- Control weeds and undergrowth in regenerating forest stands using manual tools and chemicals
- Complete firefighting reports and maintain firefighting equipment
- Dig trenches, cut trees, pump water on burning areas to fight forest fires under direction of fire suppression officer or forestry technician
- Operate and maintain a skidder, bulldozer or other prime mover to pull a variety of scarification or site preparation equipment over areas to be regenerated
- Perform other silviculture duties such as collecting seed cones, pruning trees, assisting in planting surveys and marking trees for subsequent operations.

Employment requirements

- Completion of secondary school may be required.
- Completion of a college or other specialized program for silviculture workers or forestry crew workers may be required.
- Formal training in power saw operation and maintenance and several months of on-the-job training are usually provided.
- Experience as a logging and forestry labourer may be required.
- A chemicals application licence is required.

- Workplace hazardous materials information system (WHMIS) and transportation of dangerous goods (TDG) certificates may be required.
- A silvicultural worker's licence may be required.

Additional information

- There is some mobility among jobs in this unit group.
- Progression to supervisory positions is possible with experience.
- Progression to forestry technician or technologist is possible with additional education and training.

Classified elsewhere

- Arborists (in 2225 *Landscape and horticulture technicians and specialists*)
- *Chain saw and skidder operators* (8421)
- Forest nursery workers (in 8432 *Nursery and greenhouse workers*)
- *Forestry professionals* (2122)
- *Forestry technologists and technicians* (2223)
- *Logging and forestry labourers* (8616)
- *Supervisors, logging and forestry* (8211)

8431 General farm workers

General farm workers plant, cultivate and harvest crops, raise livestock and poultry and maintain and repair farm equipment and buildings. This group includes operators of farm machinery. General farm workers are employed on crop, livestock, fruit, vegetable and specialty farms.

Example titles

beef cattle farm worker
cattle ranch labourer
dairy farm worker
farm machinery operator
general farm worker

grain farm worker
harvester machine operator
hatchery worker
poultry farm worker
vegetable farm worker

Main duties

General farm workers perform some or all of the following duties:

- Plant, fertilize, cultivate, spray, irrigate and harvest crops
- Feed and tend livestock and poultry
- Milk cows
- Operate and maintain farm machinery and equipment
- Detect disease and health problems in crops, livestock and poultry
- Examine produce for quality and prepare for market
- Set and monitor water lines, air flow and temperature in barns, pens and chicken coops
- Clean stables, barns, barnyards and pens.

General farm workers can become specialized in a particular type of crop or livestock production through experience.

Employment requirements

- There are no specific education or training requirements. However, a college certificate or specialized courses related to farming, such as farm equipment mechanics, agricultural welding, tree pruning and pesticide application, are available.
- Basic farm knowledge, usually obtained from working on a family farm, may be required for employment.
- A course or certificate in first aid may be required.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Agricultural service contractors, farm supervisors and specialized livestock workers (8252)*
- *Harvesting labourers (8611)*
- *Managers in agriculture (0821)*

8432 Nursery and greenhouse workers

Nursery and greenhouse workers plant, cultivate and harvest trees, shrubs, flowers and plants, and serve nursery and greenhouse customers. They are employed in indoor and outdoor nurseries and greenhouses.

Example titles

forest nursery worker
greenhouse worker
horticulture worker

hothouse worker
hydroponics worker
nursery worker

Main duties

Nursery and greenhouse workers perform some or all of the following duties:

- Prepare soil; plant bulbs, seeds and cuttings; graft and bud plants; and transplant seedlings and rooted cuttings
- Spray trees, shrubs, flowers and plants to prevent disease and pests
- Position and regulate greenhouse and outdoor irrigation systems to water plants and fields
- Dig, cut and transplant trees, shrubs, flowers and plants and prepare them for sale
- Provide information to customers on gardening and the care of trees, shrubs, flowers, plants and lawns
- May operate tractors and other machinery and equipment to fertilize, cultivate, harvest and spray fields and plants

- 9221 Supervisors, motor vehicle assembling
- 9222 Supervisors, electronics manufacturing
- 9223 Supervisors, electrical products manufacturing
- 9224 Supervisors, furniture and fixtures manufacturing
- 9226 Supervisors, other mechanical and metal products manufacturing
- 9227 Supervisors, other products manufacturing and assembly

923 Central control and process operators in processing and manufacturing

- 9231 Central control and process operators, mineral and metal processing
- 9232 Petroleum, gas and chemical process operators
- 9235 Pulping, papermaking and coating control operators

924 Utilities equipment operators and controllers

- 9241 Power engineers and power systems operators
- 9243 Water and waste treatment plant operators

Major Group 94

Processing and manufacturing machine operators and related production workers

941 Machine operators and related workers in mineral and metal products processing and manufacturing

- 9411 Machine operators, mineral and metal processing
- 9412 Foundry workers
- 9413 Glass forming and finishing machine operators and glass cutters
- 9414 Concrete, clay and stone forming operators
- 9415 Inspectors and testers, mineral and metal processing
- 9416 Metalworking and forging machine operators
- 9417 Machining tool operators
- 9418 Other metal products machine operators

942 Machine operators and related workers in chemical, plastic and rubber processing

- 9421 Chemical plant machine operators
- 9422 Plastics processing machine operators
- 9423 Rubber processing machine operators and related workers

943 Machine operators and related workers in pulp and paper production and wood processing and manufacturing

- 9431 Sawmill machine operators
- 9432 Pulp mill machine operators
- 9433 Papermaking and finishing machine operators
- 9434 Other wood processing machine operators
- 9435 Paper converting machine operators
- 9436 Lumber graders and other wood processing inspectors and graders
- 9437 Woodworking machine operators

944 Machine operators and related workers in textile, fabric, fur and leather products processing and manufacturing

- 9441 Textile fibre and yarn, hide and pelt processing machine operators and workers
- 9442 Weavers, knitters and other fabric making occupations
- 9445 Fabric, fur and leather cutters
- 9446 Industrial sewing machine operators
- 9447 Inspectors and graders, textile, fabric, fur and leather products manufacturing

946 Machine operators and related workers in food, beverage and associated products processing

- 9461 Process control and machine operators, food, beverage and associated products processing
- 9462 Industrial butchers and meat cutters, poultry preparers and related workers
- 9463 Fish and seafood plant workers
- 9465 Testers and graders, food, beverage and associated products processing

947 Printing equipment operators and related occupations

- 9471 Plateless printing equipment operators
- 9472 Camera, platemaking and other prepress occupations
- 9473 Binding and finishing machine operators
- 9474 Photographic and film processors

Major Group 95

Assemblers in manufacturing

952 Mechanical, electrical and electronics assemblers

- 9521 Aircraft assemblers and aircraft assembly inspectors
- 9522 Motor vehicle assemblers, inspectors and testers
- 9523 Electronics assemblers, fabricators, inspectors and testers

- 9524 Assemblers and inspectors, electrical appliance, apparatus and equipment manufacturing
- 9525 Assemblers, fabricators and inspectors, industrial electrical motors and transformers
- 9526 Mechanical assemblers and inspectors
- 9527 Machine operators and inspectors, electrical apparatus manufacturing

953 Other assembly and related occupations

- 9531 Boat assemblers and inspectors
- 9532 Furniture and fixture assemblers and inspectors
- 9533 Other wood products assemblers and inspectors
- 9534 Furniture finishers and refinishers
- 9535 Plastic products assemblers, finishers and inspectors
- 9536 Industrial painters, coaters and metal finishing process operators
- 9537 Other products assemblers, finishers and inspectors

Major Group 96

Labourers in processing, manufacturing and utilities

961 Labourers in processing, manufacturing and utilities

- 9611 Labourers in mineral and metal processing
- 9612 Labourers in metal fabrication
- 9613 Labourers in chemical products processing and utilities
- 9614 Labourers in wood, pulp and paper processing
- 9615 Labourers in rubber and plastic products manufacturing
- 9616 Labourers in textile processing
- 9617 Labourers in food, beverage and associated products processing
- 9618 Labourers in fish and seafood processing
- 9619 Other labourers in processing, manufacturing and utilities

9211 Supervisors, mineral and metal processing

Supervisors, mineral and metal processing, supervise and co-ordinate the activities of workers in the following groups: *Central Control and Process Operators, Mineral and Metal Processing (9231), Machine Operators and Related Workers in Metal and Mineral Products Processing and Manufacturing (941)* and *Labourers in Mineral and Metal Processing (9611)*. They are employed in mineral ore and metal processing plants such as copper, lead and zinc refineries, uranium processing plants, steel mills, aluminum plants, precious metal refineries, cement processing plants, clay, glass and stone processing plants and foundries.

Example titles

blast furnace foreman/woman
brick and tile foreman/woman
cement processing supervisor
coremaking foreman/woman – foundry
die casting supervisor
foreman/woman, lead refining

lime preparation foreman/woman
melting and roasting department supervisor
ore milling supervisor
roll shop operations coach – steel mill
shift co-ordinator, steel mill
supervisor, glass cutters

Main duties

Supervisors, mineral and metal processing, perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers engaged in the following duties: operating single or multi-function mineral and metal processing machinery and equipment; operating mouldmaking and coremaking machines or manually make moulds and cores; operating glass process control, forming and finishing machines; operating concrete, clay and stone forming and finishing machines; and operating cement process control machines and equipment
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Requisition materials and supplies
- Resolve work problems and recommend work measures to improve productivity and product quality
- Train staff in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports
- May set up machines and equipment.

Employment requirements

- Completion of secondary school is usually required.
- Post-secondary education in metallurgy, sciences or a related field may be required for some occupations in this unit group.
- Several years of experience as a worker in the unit or department being supervised are usually required.

Classified elsewhere

- *Supervisors, mining and quarrying (8221)*
- *Supervisors, other mechanical and metal products manufacturing (9226)*

9212 Supervisors, petroleum, gas and chemical processing and utilities

Supervisors in this unit group supervise and co-ordinate the activities of workers in the following unit groups: *Petroleum, Gas and Chemical Process Operators (9232)*, *Power Engineers and Power Systems Operators (9241)*, *Water and Waste Treatment Plant Operators (9243)*, *Chemical Plant Machine Operators (9421)* and *Labourers in Chemical Products Processing and Utilities (9613)*. They are employed by petroleum and natural gas processing, pipeline and petrochemical companies, chemical and pharmaceutical companies, electric power utilities, water and waste treatment utilities and in a range of other industries and institutions.

Example titles

chemical processing supervisor
foreman/woman, chemical
foreman/woman, cosmetics processing
foreman/woman, natural gas plant
foreman/woman, water purification plant
paint processing foreman/woman
production supervisor, pharmaceuticals

production supervisor, specialty chemicals
steam engineer leader
supervisor, petroleum refining
supervisor, pipeline operation
supervisor, power station
supervisor, sewage treatment plant

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who operate petroleum refineries, chemical plants, water and waste treatment plants and equipment, pipelines, heating plants and power stations and systems
- Identify, investigate, correct and document potential environmental and safety problems
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend measures to improve productivity and product quality
- Provide information for maintenance plans to ensure that maintenance and production objectives are met
- Requisition materials and supplies
- Train staff in job duties, safety procedures and company policy
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports and develop and manage operating budget for area of responsibility
- May also supervise, co-ordinate and schedule the activities of trades workers, labourers or other workers.

- Post-secondary education in chemical processing or sciences may be required for some occupations in this unit group.
- Several years of experience as a senior operator in the same company or plant are usually required.
- Some occupations in this unit group may require a specific licence or certification, such as a stationary engineer's licence or refrigeration certification.
- Solid waste, landfill or compost facility operator certification may be required.

Additional information

- There is some mobility between occupations with similar technological or licensing requirements within this group.

Classified elsewhere

- Supervisors of telecommunications workers, power utility electricians and power line workers (in 7202 *Contractors and supervisors, electrical trades and telecommunications occupations*)

Employment requirements

- Completion of secondary school is required.

9213 Supervisors, food, beverage and associated products processing

Supervisors in this unit group supervise and co-ordinate the activities of workers who operate processing and packaging machines, and workers who grade food, beverage and associated products. They are employed in fruit and vegetable processing plants, dairies, flour mills, bakeries, sugar refineries, fish plants, meat plants, breweries and other food, beverage and associated products processing establishments.

Example titles

brewer supervisor
foreman/woman, poultry graders
HACCP co-ordinator
packaging supervisor – food and beverage processing
production supervisor – food and beverage processing

supervisor, bottling
supervisor, fish processing
supervisor, food product testers
supervisor, meat packing
supervisor, tobacco processing
supervisor, vegetable packing
team supervisor, flour milling

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who process, package, test and grade food, beverage and associated products
- Establish methods to meet work schedules and co-ordinate work activities with other departments

- Requisition materials and supplies
- Train staff in job duties, safety procedures and company policy
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports.
- HACCP co-ordinators identify, evaluate, control and prevent hazards at all stages of the food production process.

Employment requirements

- Completion of secondary school is usually required.
- Post-secondary education in microbiology or chemistry may be required for some positions in this group.
- Several years of experience in the food, beverage or associated products processing industry are required.
- Hazard analysis critical control point (HACCP) co-ordinators require HACCP certification and several years of experience in quality assurance of food production.

Classified elsewhere

- *Machine operators and related workers in food, beverage and associated products processing (946)*
- Managers of food, beverage and associated products processing (in 0911 *Manufacturing managers*)
- Supervisors of meat and fish inspectors (in 2222 *Agricultural and fish products inspectors*)

9214 Supervisors, plastic and rubber products manufacturing

Supervisors in this unit group supervise and co-ordinate the activities of workers who operate processing machines and who fabricate, assemble and inspect rubber or plastic products. They are employed by rubber and plastic products manufacturing companies and in plastic parts divisions of other manufacturing companies.

Example titles

foreman/woman, blow moulding
foreman/woman, calendaring – rubber and plastic manufacturing
foreman/woman, extruding – rubber and plastic manufacturing

supervisor, injection moulding – plastic products manufacturing
supervisor, plastic products manufacturing
supervisor, rubber products manufacturing
supervisor, tire building

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of production workers who operate processing machines and who fabricate, assemble, finish or inspect plastic or rubber parts and products
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend measures to improve productivity and product quality
- Requisition materials and supplies
- Train staff in job duties, safety procedures and company policies

- May set up machines and equipment.

Employment requirements

- Completion of secondary school is usually required.
- Post-secondary education in sciences or plastics technology may be required for some positions in this group.
- Several years of experience as a machine operator or an assembler in rubber or plastic products manufacturing is usually required.

Classified elsewhere

- *Labourers in rubber and plastic products manufacturing (9615)*
- *Plastic products assemblers, finishers and inspectors (9535)*
- *Plastics processing machine operators (9422)*
- *Rubber processing machine operators and related workers (9423)*

9215 Supervisors, forest products processing

Supervisors in this unit group supervise and co-ordinate the activities of workers in the following groups: *Pulping, Papermaking and Coating Control Operators (9235)*, *Machine Operators and Related Workers in Pulp and Paper Production and Wood Processing and Manufacturing (943)* and *Labourers in Wood, Pulp and Paper Processing (9614)*. They are employed by pulp and paper companies, paper converting companies, sawmills, planing mills, wood treatment plants, waferboard plants and other wood processing companies.

Example titles

coating room foreman/woman – pulp and paper
foreman/woman, lumber grading – wood
processing
foreman/woman, plywood making
foreman/woman, shingle mill
foreman/woman, waferboard
foreman/woman, wood treating plant

paper machine foreman/woman
paper mill foreman/woman
pulp mill foreman/woman
sawmill foreman/woman
shift operating supervisor – pulp and paper
supervisor, paper converting
tour foreman/woman – pulp and paper

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who operate pulp and paper mills, paper converting mills, sawmills, planing mills, plywood, waferboard and other wood and paper products mills
- Ensure that systems and equipment are operating efficiently and that proper maintenance and repairs are performed
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend measures to improve productivity and product quality
- Requisition materials and supplies

- Monitor safety conditions
- May set up machines and equipment.

Employment requirements

- Completion of secondary school is required.
- A college diploma in pulp and paper technology or a related discipline may be required for some pulp and paper supervisor positions.
- Several years of some combination of formal and on-the-job training are provided.

- Several years of experience in the most senior occupation supervised are often required.
- Certificates, such as lumber grading and industrial first aid, and a competency certificate in natural gas may be required.

Additional information

- Mobility is possible between positions employing similar technology or producing similar products.
- Progression to managerial positions is possible with experience.

Classified elsewhere

- *Manufacturing managers (0911)*

9217 Supervisors, textile, fabric, fur and leather products processing and manufacturing

Supervisors in this unit group supervise and co-ordinate the activities of workers engaged in textile, fabric, fur and leather products processing and manufacturing. They are employed by textile manufacturing companies, tanneries and other manufacturers of fabric, fur and leather products.

Example titles

boot and shoe foreman/woman
canvas products manufacturing foreman/woman
cutting department foreman/woman, fabric
dye room supervisor
embroidery supervisor – fabric products
finishing supervisor – textiles
foreman/woman – textile processing

fur dressing foreman/woman
hat and cap makers foreman/woman
sample room foreman/woman, leather products
sewing machine operators supervisor
stitching department supervisor
supervisor, knitting
tannery foreman/woman

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of production workers who operate machines to process natural, synthetic and hybrid textile fibre, yarn and thread; bleach, dye and finish textiles; operate manufacturing machines to cut, stitch and produce fabric, fur or leather garments and other products; and inspect textiles products

9222 Supervisors, electronics manufacturing

Supervisors in this unit group supervise and co-ordinate the activities of workers who assemble, fabricate, test, repair and inspect electronic parts, components and systems. They are employed in electronics manufacturing plants.

Example titles

assembly and testing supervisor – electronic equipment manufacturing
final assembly and testing foreman/woman – electronic equipment manufacturing
foreman/woman, electronic assembly
foreman/woman, printed circuit board fabrication

production supervisor – electronics manufacturing supervisor, communications equipment assembly – electronic equipment manufacturing
systems test foreman/woman – electronic equipment manufacturing

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who assemble, fabricate, inspect and test electronic and electromechanical assemblies, subassemblies, parts and components
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend work measures to improve productivity
- Requisition materials and supplies
- Train workers in job duties, safety procedures and company policies and recommend personnel actions such as hirings and promotions
- Ensure safety rules and regulations are followed
- Prepare production and other reports
- May set up machines and equipment
- Supervise, co-ordinate and schedule the activities of related helpers and labourers.

Employment requirements

- Completion of secondary school is required.
- Several years of experience as an electronics assembler, fabricator, inspector or tester are usually required.
- Post-secondary education in electronics or a related discipline is required.

Classified elsewhere

- *Electrical and electronics engineering technologists and technicians (2241)*
- *Electronics assemblers, fabricators, inspectors and testers (9523)*
- *Electronic service technicians (household and business equipment) (2242)*
- *Supervisors, electrical products manufacturing (9223)*

9223 Supervisors, electrical products manufacturing

Supervisors in this unit group supervise and co-ordinate the activities of workers who assemble, fabricate and inspect electrical components, appliances, motors and industrial equipment. They are employed by companies that manufacture electrical products.

Example titles

foreman/woman, electrical motor assembly
foreman/woman, electrical transformer assembly
foreman/woman, switchgear assembly

supervisor, electrical appliance assembly
supervisor, electrical equipment manufacturing

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who assemble, fabricate and inspect various types of electrical apparatus and equipment such as electrical appliances, batteries, electric motors, transformers and generators and electrical switchgear and control equipment
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend work measures to improve productivity
- Requisition materials and supplies
- Train staff in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports
- May set up machines and equipment.

Employment requirements

- Completion of secondary school is usually required.
- Post-secondary education in electrical or manufacturing technology or other related discipline may be required for some positions in this group.
- Several years of experience as an assembler, inspector or lead hand are required.

Classified elsewhere

- *Assemblers and inspectors, electrical appliance, apparatus and equipment manufacturing (9524)*
- *Assemblers, fabricators and inspectors, industrial electrical motors and transformers (9525)*
- *Contractors and supervisors, electrical trades and telecommunications occupations (7202)*
- *Supervisors, electronics manufacturing (9222)*

9224 Supervisors, furniture and fixtures manufacturing

Supervisors in this unit group supervise and co-ordinate the activities of workers who manufacture furniture and fixtures made of wood or other materials. They are employed in furniture and fixtures manufacturing establishments.

Example titles

foreman/woman, desk assembly
foreman/woman, furniture assembly
foreman/woman, woodworking machine operators
– furniture and fixtures manufacturing

laminating foreman/woman
supervisor, furniture and fixture manufacturing
supervisor, furniture finishers
supervisor, woodworking machine operators

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule the activities of workers who assemble furniture and fixtures of any materials, operate woodworking machines and finish furniture to specified colour or finish
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend work measures to improve productivity and product quality
- Requisition materials and supplies
- Train staff in job duties, safety procedures and company policy
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports.

Employment requirements

- Completion of secondary school is usually required.
- Experience as a furniture and fixture assembler, woodworking machine operator, cabinetmaker or furniture finisher, is usually required.

Classified elsewhere

- *Cabinetmakers* (7272)
- *Contractors and supervisors, carpentry trades* (7204)
- *Furniture and fixture assemblers and inspectors* (9532)
- *Furniture finishers and refinishers* (9534)
- Supervisors of millwork and wood product manufacturing other than furniture and fixture, and wood machining (in 9227 *Supervisors, other products manufacturing and assembly*)
- *Woodworking machine operators* (9437)

9226 Supervisors, other mechanical and metal products manufacturing

Supervisors in this unit group supervise and co-ordinate the activities of workers who fabricate, assemble and inspect mechanical and metal products, such as aircraft and aircraft parts, heavy trucks, buses, trailers, motor vehicle engines, transmissions, heating equipment, commercial refrigeration and similar metal products. They are employed by a wide variety of manufacturing companies.

Example titles

aircraft assembly foreman/woman
engine assembly foreman/woman (except aircraft)
foreman/woman, metalworking machine operators
foreman/woman, mobile home assembly

shipyard painter foreman/woman
supervisor, helicopter assembly
supervisor, snowmobile assembly
truck trailer assembly foreman/woman

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule activities of workers who assemble and inspect products such as aircraft, buses, heavy trucks, transmissions, automobile engines and refrigeration and heating equipment
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend measures to improve productivity and product quality
- Requisition materials and supplies
- Train staff in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports
- May set up machines and equipment.

Employment requirements

- Completion of secondary school is usually required.
- Post-secondary education may be required for some occupations in this group.
- Several years of experience as an assembler or inspector in the same company are usually required.

Classified elsewhere

- Aircraft engine assembly and machine fitters' supervisors (in 7301 *Contractors and supervisors, mechanic trades*)
- *Contractors and supervisors, machining, metal forming, shaping and erecting trades and related occupations* (7201)
- *Supervisors, electrical products manufacturing* (9223)
- *Supervisors, motor vehicle assembling* (9221)

9227 Supervisors, other products manufacturing and assembly

This unit group includes supervisors, not elsewhere classified, who supervise and co-ordinate the activities of workers who assemble, fabricate and inspect a variety of products, such as jewellery, clocks and watches, millwork, sporting goods, toys and other miscellaneous products. They are employed in a wide variety of manufacturing companies.

Example titles

foreman/woman, bicycle assembly
foreman/woman, clock and watch assembly
foreman/woman, jewellery manufacturing
foreman/woman, millwork assembly

supervisor, millwork assembly
supervisor, silverware manufacturing
supervisor, sports equipment assembly
supervisor, toy manufacturing

Main duties

Supervisors in this unit group perform some or all of the following duties:

- Supervise, co-ordinate and schedule activities of workers who assemble, fabricate and inspect products, such as jewellery, clocks, watches, bicycles, millwork, sporting goods and toys
- Establish methods to meet work schedules and co-ordinate work activities with other departments
- Resolve work problems and recommend measures to improve productivity and product quality
- Requisition materials and supplies
- Train workers in job duties, safety procedures and company policies
- Recommend personnel actions such as hirings and promotions
- Prepare production and other reports
- May set up machines and equipment.

Employment requirements

- Completion of secondary school may be required.
- Several years of experience as an assembler or inspector in the same company are usually required.

Additional information

- There is little mobility between different types of supervisors in this unit group.

Classified elsewhere

- *Other labourers in processing, manufacturing and utilities (9619)*
- *Other products assemblers, finishers and inspectors (9537)*
- Supervisors of woodworking machine operators (in 9224 *Supervisors, furniture and fixtures manufacturing*)

9231 Central control and process operators, mineral and metal processing

Central control and process operators, mineral and metal processing, operate and monitor multi-function process control machinery and equipment to control the processing of mineral ores, metals or cement. They are employed in mineral ore and metal processing plants such as copper, lead and zinc refineries, uranium processing plants, steel mills, aluminum plants, precious metal refineries and cement processing plants.

Example titles

blast furnace operator
central control caster
central control room operator – primary metal processing
chief flotation operator

console operator – cement manufacturing
pelletizing control operator
roaster operator – primary metal processing
rolling mill control operator

Main duties

Central control and process operators, mineral and metal processing, perform some or all of the following duties:

- Co-ordinate and monitor the operation of a particular aspect of mineral ore, metal and cement processing production through control panels, computer terminals or other control systems, usually from a central control room
- Operate multi-function central process control machinery to grind, separate, filter, melt, roast, treat, refine or otherwise process mineral ores
- Observe computer printouts, video monitors and gauges to verify specified processing conditions and to make necessary adjustments
- Co-ordinate and supervise production crew such as machine and process operators, tenders, assistants and helpers
- Start up and shut down the production system in cases of emergency or as required by schedule
- Provide or organize training for members of production crew
- Maintain shift log of production and other data and prepare production and other reports.

Employment requirements

- Completion of secondary school is required.
- A college diploma may be required for some positions in this group.
- On-the-job training is provided.
- Several years of experience as a machine or process operator, usually in the same company or production department, are required.

Additional information

- There is little mobility among the various types of central control and process operators within the mineral and metal processing industry.
- With experience, central control and process operators may progress to supervisory positions in mineral and metal processing.

Classified elsewhere

- Foundry furnace operators and casters (in 9412 *Foundry workers*)
- *Machine operators, mineral and metal processing* (9411)
- *Supervisors, mineral and metal processing* (9211)

9232 Petroleum, gas and chemical process operators

Petroleum, gas and chemical process operators monitor and operate petroleum, petrochemical and chemical plants and monitor, adjust and maintain processing units and equipment in these plants. They are employed by petroleum and natural gas processing, pipeline and petrochemical companies and industrial, agricultural and specialty chemical and pharmaceutical companies.

Example titles

acid plant operator
cell room operator, chlor-alkali plant
chemical process operator
chief technician, chemical processing
gas field production operator
gas plant operator
gas recovery operator
master operator – chemical processing

oil refinery process operator
panel operator – chemical processing
petroleum process operator
pharmaceutical processing operator
pipeline compressor station operator
process technician – chemical processing
refinery process technician

Main duties

Petroleum, gas and chemical process operators perform some or all of the following duties:

- Operate electronic or computerized control panel from a central control room to monitor and optimize physical and chemical processes for several processing units
- Control process start-up, shut-down and troubleshooting
- Monitor outside process equipment
- Adjust equipment, valves, pumps and controls and process equipment
- Authorize or co-sign maintenance work orders
- Shut down, isolate and prepare process units or production equipment for maintenance
- Sample products, perform tests, record data, carry out statistical process control on process operations, and write production logs
- Develop operator procedures for normal operation, start-up or shut-down of unit
- Participate in safety audits and programs and provide emergency response when required
- Ensure adherence to safety and environmental regulations
- May rotate between different processing units during shift cycles
- May work in a team with shared supervisory responsibilities and participate in training other workers
- May be cross-trained in a skilled trade and work in the trade during shift cycles.

Employment requirements

- Completion of secondary school is required. Mathematics, chemistry and physics subjects are often specified.
- A college diploma in process operation, sciences or a related subject may be required for some positions.
- Petroleum and chemical process operators and process technicians require completion of several years of formal company training.
- Experience as a petroleum or chemical process operator in all the operating units controlled by the central control room is required for chief operators.
- Company certification as a petroleum process operator or technician may be required.
- A provincial stationary engineer licence, compressor operator or refrigeration certificate may be required when certain kinds of equipment are included in the process.
- Certification in the transportation of dangerous goods (TDG), first aid, firefighting, or workplace hazardous materials information system (WHMIS) may be required.

Additional information

- There is considerable mobility among jobs within a company, often as part of a formal development or training program.
- Mobility to other petroleum or chemical processing plants is possible, but may be limited by the usual practice of training and promoting workers from within the establishment.
- Progression to supervisory or managerial positions is possible with experience.

9232 Petroleum, gas and chemical process operators

- Occupations in this unit group may involve exposure to hazards of toxic, flammable or explosive chemicals and personal protective equipment may be required.

Classified elsewhere

- *Chemical plant machine operators (9421)*
- *Supervisors, petroleum, gas and chemical processing and utilities (9212)*

9235 Pulping, papermaking and coating control operators

Pulping, papermaking and coating control operators operate and monitor multi-function process control machinery and equipment to control the processing of wood, scrap pulp, recyclable paper, cellulose materials, paper pulp and paperboard. They are employed by pulp and paper companies.

Example titles

bleach plant operator – pulp and paper
control operator, paper machine
panelboard operator – pulp and paper

pulping control operator
pulping group operator – pulp and paper
pulping technician

Main duties

Pulping, papermaking and coating control operators perform some or all of the following duties:

- Operate, co-ordinate and monitor pulping, papermaking and papercoating process equipment from central control room or machine consoles and control panels in equipment cabins to control process operations and machinery in the production of pulp and paper
- Control the processing of wood, scrap pulp, recyclable paper, cellulose materials, pulp paper and paperboard and monitor the chemical and physical process operations using a distributed control system and process computers
- Observe panel indicators, gauges, video monitors and other instruments to detect equipment malfunctions and ensure pulping, papermaking and coating processes are operating according to process specifications
- Analyze instrument readings and production test samples and make adjustments or direct other pulp mill, papermaking and finishing machine operators to make adjustments to pulp production, papermaking and coating process and equipment as required
- Complete and maintain production reports.

Employment requirements

- Completion of secondary school is required.
- A college or other program in forest products processing or a related subject may be required for pulping control operators.
- Completion of several weeks of formal company training and several months of on-the-job training is required.
- Several years of experience as a pulp mill, papermaking or finishing machine operator within the same company is usually required.

- A certificate in industrial first aid may be required.
- A competency certificate in natural gas may be required.

Additional information

- There is limited mobility among jobs within this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Papermaking and finishing machine operators* (9433)
- *Pulp mill machine operators* (9432)
- *Supervisors, forest products processing* (9215)

9241 Power engineers and power systems operators

Power engineers operate and maintain reactors, turbines, boilers, generators, stationary engines and auxiliary equipment to generate electrical power and to provide heat, light, refrigeration and other utility services for commercial, industrial and institutional buildings and other work sites. Power systems operators monitor and operate switchboards and related equipment in electrical control centres to control the distribution of electrical power in transmission networks. They are employed by power generation plants, electrical power utilities, manufacturing plants, hospitals, universities and government and commercial establishments.

Example titles

apprentice power dispatcher

auxiliary plant operator

building systems technician

control room operator – electrical power systems

distribution control operator – electrical power systems

electrical power systems operator

energy from waste plant operator

load dispatcher apprentice – electrical power systems

nuclear generating station field operator

nuclear reactor operator – electrical power systems

power dispatcher – generating station

power engineer

power plant operator

power plant stationary engineer

stationary engineer

system controller – electrical power systems

Main duties

Power engineers perform some or all of the following duties:

- Operate automated or computerized control systems, stationary engines and auxiliary equipment such as reactors, boilers, turbines, generators, pumps, compressors, pollution control devices and other equipment to generate electrical power and to provide light, heat, ventilation and refrigeration for buildings, industrial plants and other work sites
- Start up and shut down power plant equipment, control switching operations, regulate water levels and communicate with systems operators to regulate and co-ordinate transmission loads, frequency and line voltages
- Monitor and inspect plant equipment, computer terminals, switches, valves, gauges, alarms, meters and other instruments to measure temperature, pressure and fuel flow, to detect leaks or other equipment malfunctions and to ensure plant equipment is operating at maximum efficiency
- Analyze and record instrument readings and equipment malfunctions
- Troubleshoot and perform corrective action and minor repairs to prevent equipment or system failure

- Clean and lubricate generators, turbines, pumps and compressors and perform other routine equipment maintenance duties using appropriate lubricants and hand, power and precision tools
- Maintain a daily log of operation, maintenance and safety activities, and write reports on plant operation
- May assist in the development of operation, maintenance and safety procedures.

Power systems operators perform some or all of the following duties:

- Operate and monitor computerized switchboards and auxiliary equipment in electrical control centres to control the distribution and to regulate the flow of electrical power in the transmission network
- Co-ordinate, schedule and direct generating station and substation power loads and line voltages to meet distribution demands during daily operations, system outages, repairs and importing or exporting of power
- Monitor and visually inspect station instruments, meters and alarms to ensure transmission voltages and line loadings are within prescribed limits and to detect equipment failure, line disturbances and outages
- Issue work and test permits to electrical and mechanical maintenance personnel, assist maintenance and technical personnel to locate and isolate system problems, and assist during routine system testing

9241 Power engineers and power systems operators

- Complete and maintain station records, logs and reports.

Employment requirements

- Completion of secondary school is usually required.
- Power engineers require a college training program in stationary or power engineering and several years of work experience in the field.
- Power engineers require a provincial or territorial power engineering or stationary engineering certificate according to class.
- Stationary engineer trade certification according to class (4th, 3rd, 2nd or 1st class) is compulsory in Nova Scotia and Quebec and available, but voluntary in New Brunswick.
- Power systems operators require completion of a three- to five-year power system operator apprenticeship program
or
Over three years of work experience in the trade and some college or industry courses in electrical and electronic technology.
- Trade certification is available, but voluntary for power system operators in Newfoundland and Labrador.
- Control room operators at nuclear power plants require licensing from the Canadian Nuclear Safety Commission.

Additional information

- There is little mobility between nuclear power generation station operators and other classic or alternative power generation station operators.
- Progression from lower to higher classes for stationary or power engineers is dependent on further training and experience.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Nuclear power station equipment mechanics (in 7311 *Construction millwrights and industrial mechanics*)
- Professional engineers (in 213 *Civil, mechanical, electrical and chemical engineers*)
- Professional engineers (in 214 *Other engineers*)
- Supervisors of stationary engineers and auxiliary equipment operators (in 9212 *Supervisors, petroleum, gas and chemical processing and utilities*)

9243 Water and waste treatment plant operators

Water treatment plant operators monitor and operate computerized control systems and related equipment in water filtration and treatment plants to regulate the treatment and distribution of water. Liquid waste plant operators monitor and operate computerized control systems and related equipment in wastewater, sewage treatment and liquid waste plants to regulate the treatment and disposal of sewage and wastes. They are employed by municipal governments and industrial facilities. This unit group also includes waste treatment plant operators in composting plants and other waste management facilities.

Example titles

environmental systems operator – water treatment operator, water purification plant process operator, liquid waste sewage plant operator

waste treatment plant operator
wastewater treatment plant operator
water filtration plant operator
water treatment plant operator

Main duties

Water treatment plant operators perform some or all of the following duties:

- Operate and monitor computerized control systems and related equipment in water filtration and treatment plants to regulate the treatment and distribution of water
- Monitor and inspect plant equipment and systems to detect equipment malfunctions and to ensure plant systems are operating normally
- Read flow meters, gauges and other recording instruments to measure water output and consumption levels, bacterial content, chlorine and fluoride levels
- Collect and test water samples for chemical and bacterial content, analyze test results and instrument readings and make adjustments to plant equipment and systems to ensure quality control
- Provide verbal or written instructions for process control changes to waterworks system to ensure water produced meets standardized quality requirements
- Perform security checks in plant and on grounds
- Respond to public enquiries regarding water quality issues and emergencies
- Complete and maintain plant logs, reports and statistics
- May perform minor maintenance or assist skilled tradespersons with installation and repair of plant machinery
- May measure, mix and transport chemicals to maintain feed stocks.

Liquid waste plant operators perform some or all of the following duties:

- Operate and monitor computerized control systems and related equipment in wastewater treatment, sewage treatment and liquid waste plants to regulate the flow of sewage through settling, aeration and digestion tanks, and to treat and dispose of sewage and wastes
- Patrol plant to check pumps, motors, filters, chlorinators and other plant equipment; monitor and read gauges, meters and other recording instruments to detect equipment malfunctions and ensure plant systems and equipment are operating within prescribed limits
- Test and adjust chemical feed rates to ensure that disinfection processes meet quality standards
- Collect waste and sewage samples, test and analyze results and make adjustments to plant equipment and systems as required
- Perform security checks in plant and on grounds
- Complete and maintain plant logs and reports
- Perform preventive maintenance on plant equipment to ensure that the facility operates in accordance with required standards
- May assist skilled tradespersons with installation and repair of plant machinery.

Employment requirements

- Completion of secondary school is required.
- College or industry training courses in chemistry, pollution control or related subjects are required.
- Certification in water treatment and distribution (Levels I, II, III or IV depending on the certification level of the plant) is required for water treatment plant operators.

9243 Water and waste treatment plant operators

- Certification in wastewater collection and wastewater treatment (Level I, II, III or IV depending certification level of the plant) is required for wastewater treatment plant operators.
- Solid waste, landfill or compost facility operator certification may be required for operators in waste treatment plants.
- Certification in workplace hazardous materials information system (WHMIS), transportation of dangerous goods (TDG), and courses in safety practices may be required.
- On-the-job training is provided.
- Previous experience as a worker in the water treatment or wastewater field may be required.

Additional information

- There is limited mobility between water treatment plant and waste plant operators.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Chemical engineers* (2134)
- *Chemical technologists and technicians* (2211)
- *Supervisors, petroleum, gas and chemical processing and utilities* (9212)
- *Water and waste plant labourers* (in 9613 *Labourers in chemical products processing and utilities*)
- *Waterworks and gas maintenance workers* (7442)

9411 Machine operators, mineral and metal processing

Workers in this unit group operate single-function machines or machinery that is part of a larger production process to process mineral ore and metal products. They are employed in mineral ore and metal processing plants such as copper, lead and zinc refineries, uranium processing plants, steel mills, aluminum plants, precious metal refineries and cement processing plants.

Example titles

aluminum classifier

asbestos dryer

billet heater

brick and tile crusher operator

cement miller

extrusion press operator

foil-winding machine operator

furnace charger – mineral and metal processing

ladle pourer

lead refiner

lime kiln operator

mica sheet laminator

quenching car operator

scrap metal shredder

sintering machine operator

slurry equipment operator

steel roller

uranium classifier operator

zinc cell operator

Main duties

Machine operators, mineral and metal processing, perform some or all of the following duties:

- Set up, prepare and adjust mineral ore, metal and cement processing machinery to carry out one step in the overall mineral ore or metal processing operation
- Operate single-function machinery to grind, separate, filter, mix, treat, cast, roll, refine or otherwise process mineral ores
- Observe gauges, meters, computer printouts, video monitors and products to ensure correct operation of machine and verify specified processing conditions
- Make adjustments to machinery as required
- Record production information and complete reports
- May assist with machinery maintenance or repair.

Employment requirements

- Completion of secondary school is usually required.
- On-the-job training is provided.
- Experience as a labourer in mineral and metal processing is usually required for machine operators.

Additional information

- There is little mobility among the various types of machine operators within the mineral and metal processing industry.
- With experience, machine operators may progress to central control and process operators in mineral and metal processing.

Classified elsewhere

- *Central control and process operators, mineral and metal processing (9231)*
- *Concrete, clay and stone forming operators (9414)*
- *Foundry workers (9412)*
- *Glass forming and finishing machine operators and glass cutters (9413)*
- *Inspectors and testers, mineral and metal processing (9415)*
- *Labourers in mineral and metal processing (9611)*
- *Supervisors, mineral and metal processing (9211)*

9412 Foundry workers

This unit group includes workers who make foundry moulds and cores by hand or machine, cast molten metal, and operate furnaces in the foundry industry. They are employed by metal foundries and foundry departments of metal products manufacturing companies.

Example titles

bench moulder	manual moulder
casting machine operator	melter – foundry
ceramic mouldmaker	metal caster
die-casting machine operator	pit moulder
foundry worker	sand coremaker
furnace operator – foundry	sand moulder
machine coremaker	

Main duties

The following is a summary of the main duties for some occupations in this unit group:

- Manual mouldmakers make and repair sand moulds using patterns, moulding boxes, sand and hand tools following bench, floor or pit moulding methods; operate ovens to dry moulds; may pour molten metal into moulds to produce metal castings.
- Manual coremakers make cores for use inside moulds to form holes or void spaces in castings using core boxes, sand, hammer and wire or other reinforcing material; coat cores with protective materials and bake cores in oven.
- Machine mouldmakers and coremakers set up, adjust and operate various mouldmaking and coremaking machines to make sand and ceramics moulds and cores.
- Metal casters set up and operate various casting machines to cast ferrous and non-ferrous metal products; hand ladle and pour molten metal into moulds to produce castings.
- Foundry furnace operators operate furnaces used to melt metals for moulding and casting.

Employment requirements

- Completion of secondary school may be required.
- Up to two years of on-the-job training are required for manual mouldmakers; several months of on-the-job training are required for other workers in this unit group.

Additional information

- There is some mobility between workers in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Foundry labourers (in 9611 *Labourers in mineral and metal processing*)
- Furnace operators who convert and refine primary metals, and operators of continuous casting processes (in 9231 *Central control and process operators, mineral and metal processing*)
- Supervisors of foundry workers (in 9211 *Supervisors, mineral and metal processing*)

9413 Glass forming and finishing machine operators and glass cutters

Machine operators in this unit group operate multi-function process control machinery or single function machines to melt, form, cut or finish flat glass, glassware, bottles, and other glass products. Glass cutters cut flat glass of various thicknesses to specified sizes and shapes by hand. They are employed by glass and glass products manufacturing companies.

Example titles

bottle machine operator – glass products
manufacturing
float operator – glass forming
glass beveller
glass-blowing machine operator
glass cutter, hand

glass edger
glass-finishing machine operator
glass moulder
glass-pressing machine operator
mirror maker

Main duties

Glass process control operators perform some or all of the following duties:

- Operate multi-function process control machinery through control panels, computer terminals or other control systems to mix and melt raw materials; heat, anneal, temper or form float glass or glass products; and coat glass with silver or other metals and materials
- Observe gauges, computer printouts and video monitors to verify specified processing conditions and make adjustments as necessary
- Maintain shift log of production and other data
- May operate process control machinery to cut glass or assemble glass window units
- May clean and maintain process machinery
- May ensure adequate levels of oil, soap, talc or other materials used in machine production of glass.

Glass forming machine operators perform some or all of the following duties:

- Set up and adjust automatic glass feeding, flowing and forming machines
- Operate and maintain machines that press or blow molten glass in moulds to form or shape containers, such as bottles, jars and drinking glasses
- Operate electric kilns that heat glass sheets and mould to the shape and curve of metal jigs
- Spray or swab moulds with oil solutions to prevent adhesion of glass
- Weigh, measure and check production samples to assess conformance to specifications using scales and gauges and by visual verification.

Glass finishing machine operators perform some or all of the following duties:

- Set up and adjust glass and glass-product finishing machines
- Operate and maintain finishing machines to grind, drill, sand, bevel, decorate, wash or polish glass or glass products
- Visually inspect products for quality
- Record manufacturing information such as quantity, size and type of goods produced.

Glass cutters perform some or all of the following duties:

- Jig and measure and mark glass or place pattern on or under glass for cutting
- Examine and mark defective glass to obtain best cut
- Cut glass along marked outlines or around pattern using hand tools
- Smooth rough edges using belt sander or smoothing wheels
- Set up, operate and adjust computerized or robotic glass cutting equipment
- Monitor process for product quality.

Employment requirements

- Completion of secondary school may be required.
- Experience as a machine operator helper in glass manufacturing is usually required for machine operators in this unit group.
- Experience as a glass cutter helper is usually required for manual glass cutters.

9413 Glass forming and finishing machine operators and glass cutters

Additional information

- Mobility is possible among the various types of machine operators in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Glass blowers (in 5244 *Artisans and craftspersons*)
- *Glaziers* (7292)
- Helpers and labourers in glass products manufacturing (in 9611 *Labourers in mineral and metal processing*)
- Neon sign makers (in 9524 *Assemblers and inspectors, electrical appliance, apparatus and equipment manufacturing*)
- Production inspectors in glass products manufacturing (in 9415 *Inspectors and testers, mineral and metal processing*)
- Supervisors of workers in this unit group (in 9211 *Supervisors, mineral and metal processing*)

9414 Concrete, clay and stone forming operators

This unit group includes workers who cast and finish concrete products, operate machines to extrude, mould, press and bake clay products, and operate machines to form, cut and finish stone products. They are employed by concrete, clay and stone products manufacturing companies.

Example titles

asbestos shingle presser	moulder, clay products
brick presser operator	precast concrete moulder
clay press operator	precast concrete slab maker
concrete block maker	stone driller
finisher – concrete, clay and stone products	stone planer
granite cutter	stonework moulder
marble cutter	

Main duties

Concrete products forming and finishing workers perform some or all of the following duties:

- Construct clay models and moulds by hand and with hand tools for use in casting concrete products
- Build and repair wooden forms used to mould concrete products
- Position reinforcing rods or wire mesh in moulds and fill moulds with concrete from suspended pouring buckets
- Start vibrating tables to settle concrete, or tamp concrete using electric vibrator
- Remove castings from mould with crane or forklift, and finish surfaces of castings using screed or trowel
- Cut cured concrete pipe sections with saw or chisel, and cement sections together to form odd shaped fittings.

Concrete products machine operators perform some or all of the following duties:

- Set up, adjust and operate single-function machines to mix, drill, grind and cut concrete to specifications in the manufacture of concrete products
- Check products for quality control, repair flaws and perform ongoing machine adjustments and minor maintenance as necessary
- Move products using forklift, crane or hydraulic hoist
- Record manufacturing information such as quantity, size and type of goods produced.

Clay products forming and finishing machine operators perform some or all of the following duties:

- Set up and operate automatic machines that mix ingredients, extrude tempered clay mixture and cut extruded clay into sections to make products such as bricks, drain tiles and porcelain insulators
- Operate mechanical or hydraulic ram and hot-presses to form pottery and porcelain ware
- Prepare and mix slip and fill moulds with slip to form pottery and porcelain ware such as jugs, cups, sinks and toilet bowls
- Operate kiln to bake clay products to specified hardness.

Stone forming and finishing workers perform some or all of the following duties:

- Operate blade or wire saws to cut blocks of stone to specified dimensions
- Operate machines to grind and polish surfaces of stone blocks, slabs or other stone products to specific shape or design and to produce smooth finish
- Operate sandblasting equipment to cut inscriptions or decorative designs in stone monuments
- Finish stone products with spray paint and by mounting plaques or installing concrete bases
- Operate stone-dressing lathe to sharpen and dress grindstones that grind logs into pulp
- Operate machine to drill holes in blocks or slabs of stone according to specifications.

9414 Concrete, clay and stone forming operators

Employment requirements

- Some secondary school education may be required.
- On-the-job training is provided.
- Experience as a helper or labourer in concrete, clay or stone products manufacturing may be required.
- Mould makers in this unit group who construct and repair wooden forms may require some carpentry or woodworking experience.

Additional information

- Mobility is possible between workers within each of the concrete, clay and stone manufacturing sectors, but there is little or no mobility between these manufacturing sectors.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Concrete finishers (7282)*
- Helpers and labourers in concrete, clay and stone products manufacturing (in 9611 *Labourers in mineral and metal processing*)
- Inspectors of concrete, clay and stone products (in 9415 *Inspectors and testers, mineral and metal processing*)
- Sculptors (in 5136 *Painters, sculptors and other visual artists*)
- Stone carvers and potters (in 5244 *Artisans and craftspersons*)
- Stone masons (in 7281 *Bricklayers*)
- Supervisors of workers in this unit group (in 9211 *Supervisors, mineral and metal processing*)

9415 Inspectors and testers, mineral and metal processing

Inspectors and testers in this unit group inspect, grade, sample or test raw materials and products from mineral ore and metal processing operations. They are employed in mineral ore and metal processing plants such as copper, lead and zinc refineries, uranium processing plants, steel mills, aluminum plants, precious metal refineries, cement processing plants, clay, glass and stone processing plants and foundries.

Example titles

asbestos grader
brick and tile inspector
castings tester – primary metal and mineral products processing
clay products grader
core tester – foundry
fibreglass tester
glass quality control inspector

heat treating inspector – metal processing
metal processing inspector
mineral sampler – mineral products processing
molten metal sampler – primary metal processing
salvage glass inspector
sheet steel inspector – primary metal processing
steel tester – primary metal processing

Main duties

Inspectors and testers perform some or all of the following duties:

- Inspect mineral ore, metal, cement, glass, clay or concrete products at various stages of processing to ensure adherence to specifications
- Grade and label raw materials or finished products according to size, thickness, composition or other classification standards
- Take samples of products during or after processing operation for routine analysis or for subsequent laboratory analysis
- Test product for strength, density, durability and conformance to specifications
- Advise supervisor or central control operator and process machine operators of problems and product deficiencies
- Complete inspection and test reports.

Employment requirements

- Completion of secondary school is usually required.
- Experience as a machine or process operator in mineral and metal processing is usually required.

Classified elsewhere

- *Central control and process operators, mineral and metal processing (9231)*
- *Machine operators, mineral and metal processing (9411)*
- *Metallurgical control analysts and mineralogical assayers (in 2211 Chemical technologists and technicians)*

- *Supervisors, mineral and metal processing (9211)*

9416 Metalworking and forging machine operators

Light metalworking machine operators operate metalworking machines which shape and form sheet or other light metal into parts or products. Heavy metalworking machine operators operate metalworking machines which shape and form steel or other heavy metal into parts or products. Forging machine operators operate forging machines to form and shape metal into various shapes and sizes and impart desired strength, hardness or other characteristics. Light metalworking machine operators are employed by sheet metal products manufacturing companies, sheet metal shops and other light metal products manufacturing establishments. Heavy metalworking machine operators are employed by structural steel fabrication, boiler and platework manufacturing companies, heavy machinery manufacturing companies and in the shipbuilding industry. Forging machine operators are employed primarily in the fabricated metal products, machinery and transportation equipment manufacturing industries.

Example titles

bending press operator – metal fabrication
cold press operator – metal forging
disk flange operator – metal fabrication
drop hammer operator – metal forging
electric arc cutter – metal products manufacturing
forging press operator
metal-forming machine set-up operator
metalworking machine operator

power brake operator – metal fabrication
power press operator – metal fabrication
punch press setter – metalworking
roll operator – metal fabrication
saw operator – metal fabrication
shear setter – metal fabrication
sheet metal roll operator – metal fabrication

Main duties

Metalworking machine operators perform some or all of the following duties:

- Read specifications or follow verbal instructions
- Lay out, set up and operate one or more light or heavy metalworking machines such as shears, power presses, saws, plate rolls, drills, brakes, slitters, punch presses, computer numerically controlled (CNC) equipment, and other hand tools to cut, bend, roll, ream, punch and drill, weld or otherwise shape and form metal stock into parts or products
- Operate machines or equipment which weld, solder, bolt, screw or rivet metal parts together
- Check products for correct shapes, dimensions and other specifications
- Troubleshoot and perform corrective action or minor repairs
- May select and transport material to work area manually or using crane or hoist
- May document work completed
- May build staging or erect scaffolding as required for heavy metalworking jobs
- May clean or lubricate equipment and replace parts as required.

Forging machine operators perform some or all of the following duties:

- Operate gas or oil fired furnaces to heat metal to proper temperature prior to forging
- Place metal pieces in furnace using hand tongs or overhead cranes and remove from furnace when colour of metal indicates proper forging temperature, or load and unload furnace with automatic conveyor
- Position heated or cold metal pieces, on die of press or other forging machinery
- Operate presses or other forging machines to perform hot or cold forging by flattening, straightening, twisting, forming, drawing, upsetting, splitting, cutting, punching, piercing, bending, coining, or other operations to shape or form metal
- Position and adjust dies on anvil of forging machinery using overhead cranes or other hoisting devices and hand tools.

Employment requirements

- Completion of secondary school education may be required.
- Previous experience as a labourer or helper in the same company may be required.
- On-the-job training is usually provided.

9416 Metalworking and forging machine operators

Additional information

- There is little or no mobility between operators of light and heavy metalworking machines.
- Progression to structural metal fabricator or supervisory positions is possible with experience for metalworking machine operators.
- Progression to blacksmith, die setting, or supervisory positions is possible with experience for forging machine operators.

Classified elsewhere

- *Sheet metal workers (7233)*
- *Structural metal and platework fabricators and fitters (7235)*
- Supervisors of metalworking machine operators (in 9226 *Supervisors, other mechanical and metal products manufacturing*)

9417 Machining tool operators

Machining tool operators set up and operate or tend metal-cutting machines designed for repetitive machining work. They are employed by metal products and other manufacturing companies and in machine shops. This unit group also includes workers who etch or chemically mill metal pieces.

Example titles

aircraft parts etcher

boring mill operator – metal machining

CNC machining tool operator

lathe machining operator

machining tool operator

milling machine set-up operator

production gear cutter

production grinder operator – metal machining

radial drill operator – metal machining

Main duties

Machining tool operators perform some or all of the following duties:

- Study job orders and interpret blueprints to determine machining operations to be performed
- Set up and operate machine tools to perform repetitive machining operations, such as turning, milling, drilling, boring, planing, honing, broaching, grinding or other machining operations
- Verify dimensions of parts machined using micrometers, callipers and other precision measuring instruments
- Prepare etching solution and immerse metal parts or workpiece in etching solution to remove unwanted portions
- Perform routine maintenance on equipment and machinery
- May enter codes specifying speed, feed and cut of the toolpath for computer numerical controlled (CNC) machine tools.

Employment requirements

- Some secondary school education is required.
- College or other courses in machining may be required.
- Several months of on-the-job training are provided.
- Senior positions in this unit group, such as set-up operator, require experience as a machine operator.

Additional information

- Experienced machining tool operators may become machinists or tool and die makers through apprenticeship training.

Classified elsewhere

- CAD/CAM and CNC programmers (in 2233 *Industrial engineering and manufacturing technologists and technicians*)
- *Contractors and supervisors, machining, metal forming, shaping and erecting trades and related occupations (7201)*
- *Machinists and machining and tooling inspectors (7231)*
- *Tool and die makers (7232)*

9418 Other metal products machine operators

This unit group includes metal products machine operators, not elsewhere classified, who operate one or more automatic or multi-purpose machines to produce a variety of metal parts and products, such as wire mesh, nails, bolts and chains. They are employed by a wide variety of metal products manufacturing companies.

Example titles

bolt machine operator

bullet maker

can-forming machine operator

chain-making machine operator

metal cable maker operator

nail making machine tender

spring machine operator

wire screen maker

wire weaver

Main duties

Machine operators in this unit group perform some or all of the following duties:

- Operate or tend automatic or multi-purpose machines including wire looms to produce metal parts and metal products such as wire screening, fencing, tinware, metal baskets, racks, hooks, metal tubing and similar articles
- Fit and assemble components using hand and power tools
- Clean, polish, file or otherwise finish products
- Check products for quality and other specifications
- May clean and lubricate machinery.

Employment requirements

- Some secondary school education is usually required.
- On-the-job training is provided.
- Experience as a labourer in the same company may be required.

Additional information

- There is some mobility among machine operators in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Machining tool operators* (9417)
- *Metalworking and forging machine operators* (9416)
- Supervisors of machine operators in this unit group (in 9226 *Supervisors, other mechanical and metal products manufacturing*)

9421 Chemical plant machine operators

Chemical plant machine operators monitor and operate units and machinery to blend, mix, process and package a wide range of specialty chemicals, pharmaceuticals, cleaning and toiletry products. They are primarily employed in chemical, cleaning compound, ink and adhesive industries, but may also be employed by chemical processing departments in other industries.

Example titles

batch mixer – chemical processing

blender – chemical processing

capsule machine operator

evaporator operator – chemical processing

formulations blender operator

glue blender

granulator machine operator

mixer – chemical processing

scraper – chemical processing

soap maker

Main duties

Chemical plant machine operators perform some or all of the following duties:

- Monitor meters, gauges and electronic instrumentation on one or more chemical or formulation units, such as mixers, kettles, blenders, dryers, tableting, encapsulation, granulation and coating machines
- Measure, weigh and load chemical ingredients following formulation cards
- Start up, shut down, troubleshoot and clean equipment
- Adjust processing machines and equipment
- Monitor reaction processes and transfers of products in conformance with safety procedures
- Take samples and perform routine chemical and physical tests of products
- Record production data
- May operate equipment from a control room or from control consoles located near the production units.

Employment requirements

- Completion of secondary school is usually required.
- Completion of several months to one year of informal, on-the-job training within the company is required for most mixer and blender operators.
- Completion of more than one year of formal and informal company training may be required for some operators working in pharmaceutical, explosives and agricultural chemical or in specialty chemical plants.
- Previous experience in chemical products processing as an assistant, labourer or helper may be required for some occupations in this unit group.

- Certification in the transportation of dangerous goods (TDG), first aid, firefighting or workplace hazardous materials information system (WHMIS) may be required for some occupations in this unit group.

Additional information

- Mobility between employers producing similar products is possible for some of the more skilled operators in this unit group.
- Progression to supervisory positions or to process control occupations is possible with experience.
- Personal protective equipment may be required when working with some types of chemicals or pharmaceuticals.

Classified elsewhere

- *Petroleum, gas and chemical process operators* (9232)
- *Supervisors, petroleum, gas and chemical processing and utilities* (9212)

9422 Plastics processing machine operators

Plastics processing machine operators set up and operate plastic mixing, calendering, extruding and moulding processing machines used in the manufacture of plastic parts and plastic products. They are employed by plastic products manufacturing companies.

Example titles

bag machine operator

banbury operator – plastic manufacturing

blow moulding machine operator – plastic manufacturing

calender operator – plastic manufacturing

extruder operator – plastic manufacturing

injection moulding operator – plastic manufacturing

moulder, printing rollers – plastic manufacturing

plastics press operator

solution mixer operator – plastic manufacturing

thermoforming operator

Main duties

Mixing machine operators perform some or all of the following duties:

- Weigh resins, colorants and other chemicals according to formula
- Place weighed materials in mixing machine and operate machine to blend plastic and other chemicals to a specified consistency or viscosity
- Monitor operation, regulate material supply and add chemicals and colorants to mixture
- Operate controls to regulate temperature, speed and other processing conditions
- Unload mixture into container or conveyor for further processing
- Maintain and perform minor repairs on machinery as required
- Maintain inventory of material and clean working area.

Calendering process operators perform some or all of the following duties:

- Set up and operate calender machines which transform dough-consistent plastic mass into continuous sheets or films of specified thickness
- Troubleshoot, maintain and make minor repairs to equipment and adjust calender rollers for production line change
- Monitor quality of material produced
- Maintain inventory of material and clean working area.

Extruding process operators perform some or all of the following duties:

- Set up and operate one or more extruding machines which extrude plastic composites products through a nozzle or die
- Change dies on extruding machines according to production line change

- Troubleshoot, maintain and make minor repairs to equipment
- Monitor quality of material produced
- Maintain inventory of material and clean working area.

Moulding process operators perform some or all of the following duties:

- Set up and operate one or more moulding machines which mould plastic products according to specifications
- Change moulds and adjust equipment for production line change
- Troubleshoot, maintain and make minor repairs to equipment
- Monitor quality of material produced and adjust machine settings as required
- Follow formulation card to mix ingredient batches for injection moulding process
- Maintain inventory of material and clean working area.

Employment requirements

- For all operators in this unit group, completion of secondary school is usually required.
- Several years of experience as a helper, tender or packer in the same company may be required.
- Completion of a statistical process control (SPC) course may be required.
- Completion of courses in hydraulics, pneumatics and electronics systems may be required for moulding process operators.
- On-the-job training is provided.

9422 Plastics processing machine operators

Additional information

- Mobility among the various operators in this unit is possible.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Labourers in rubber and plastic products manufacturing (9615)*
- *Plastic products assemblers, finishers and inspectors (9535)*
- *Rubber processing machine operators and related workers (9423)*
- *Supervisors, plastic and rubber products manufacturing (9214)*

9423 Rubber processing machine operators and related workers

Workers in this unit group operate rubber processing machinery and assemble and inspect rubber products. They are employed by tire manufacturers and other rubber products manufacturing companies.

Example titles

banbury operator – rubber products manufacturing
belt builder, rubber
blow-out and test operator – rubber products
calender machine operator – rubber products
manufacturing
cure operator – rubber products manufacturing
extruder operator – rubber products manufacturing
hose builder, rubber
inspector, rubber products manufacturing

moulding press tender – rubber products
manufacturing
refiner mill tender – rubber products
manufacturing
rubber processing machine operator
rubber products assembler
scrap rubber grinder – recycling
tire builder
tire inspector

Main duties

Rubber processing machine operators perform some or all of the following duties:

- Set up, operate and tend machinery used for mixing, calendering, extruding, moulding and curing rubber materials or rubber products
- Load or feed rubber, pigments, filler, oil and chemicals into machines
- Check and monitor processing conditions and product quality
- Adjust machines to proper setting as required
- Train or assist in training new workers.

Assemblers, rubber products perform some or all of the following duties:

- Lay out and prepare rubber materials for assembly
- Operate machines or equipment or use hand tools to cut, shape, splice, fit and cement rubber materials to form rubber parts or finished rubber products
- Operate finishing machines or equipment to trim, grind, or buff rubber products into final form
- Train or assist in training new workers.

Rubber products inspectors perform some or all of the following duties:

- Inspect finished rubber products for defects and conformance to specifications and quality standards, visually or using instruments
- Affix seals or tags to approved products and mark and reroute defective products for repair or recycle
- Fill out product inspection report
- May make minor adjustments or repairs to products.

Employment requirements

- Completion of secondary school may be required.
- Experience as a labourer in the same company may be required.
- On-the-job training is provided.

Additional information

- Mobility among the various labourers in this unit group is possible.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Labourers in rubber and plastic products manufacturing (9615)*
- *Plastic products assemblers, finishers and inspectors (9535)*
- *Plastics processing machine operators (9422)*
- *Supervisors, plastic and rubber products manufacturing (9214)*

9431 Sawmill machine operators

Sawmill machine operators operate, monitor and control automated lumbermill equipment to saw timber logs into rough lumber; saw, trim and plane rough lumber into dressed lumber of various sizes; and saw or split shingles and shakes. They are employed in sawmills and planing mills.

Example titles

circular saw operator
edgerman/woman
head sawyer
log cut-off operator

planer operator
resaw operator
shake splitter
trimmerman/woman

Main duties

Sawmill machine operators perform some or all of the following duties:

- Operate front-end loaders and stationary deck cranes to feed logs into the sawmill
- Examine logs and rough lumber to determine size, condition, quality and other characteristics to decide best lumber cuts to carry out, or use automated equipment to convey logs through laser scanners which determine the most productive and profitable cutting patterns
- Operate automated lumbermill equipment from control rooms or equipment consoles to saw logs into rough lumber; saw, trim and plane rough lumber into dressed lumber of various sizes; and saw or split shingles and shakes
- Start conveyor system to move logs and lumber to and from saws
- Set up and adjust saw equipment and replace blades or bands using wrenches, gauges and other hand tools
- Operate equipment to sort and stack lumber by length and thickness, move stacks to storage areas or drying kilns, and feed lumber through planers
- Monitor movement of lumber and computer screens to ensure cuts are made according to specifications, and print production reports
- Clean and lubricate sawmill equipment.

Employment requirements

- Completion of secondary school is usually required.
- College courses in wood processing technology may be required.
- Several weeks of on-the-job training are usually provided.

- Head sawyers and planer operators usually require several years of experience in other sawmill machine operating positions in the same company.
- A certificate in industrial first aid may be required.

Additional information

- There is some mobility among jobs in this occupational group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Labourers in wood, pulp and paper processing* (9614)
- *Lumber graders and other wood processing inspectors and graders* (9436)
- *Other wood processing machine operators* (9434)
- *Supervisors, forest products processing* (9215)
- *Woodworking machine operators* (9437)

9432 Pulp mill machine operators

Pulp mill machine operators operate and monitor various types of processing machinery and equipment to produce pulp. They are employed by pulp and paper companies.

Example titles

assistant bleacher operator – pulp and paper
assistant digester operator
cook – pulp and paper
cook's first helper – pulp and paper
digester operator – pulp and paper
field operator – pulp and paper

grinderman/woman – pulp and paper
refiner operator – pulp and paper
repulper operator
screenman/woman – pulp and paper
thermomechanical pulp assistant operator
thermomechanical pulp operator

Main duties

Pulp mill machine operators perform some or all of the following duties:

- Operate and monitor screening equipment, bleaching equipment, digesters, mixing tanks, washers, and other pulp processing machinery and equipment to carry out one or more cellulose processing steps
- Observe equipment and machinery panel indicators, gauges, level indicators and other equipment instruments to detect machinery and equipment malfunctions and ensure process steps are carried out according to specifications
- Communicate with pulping control operator to make process adjustments and start up or shut down machinery and equipment as required
- Collect processing samples and conduct titration tests, pH readings, specific density tests and other routine tests on pulp and solutions
- Complete and maintain production reports.

Employment requirements

- Completion of secondary school is required.
- A college diploma in forest products processing or a related subject may be required.
- Completion of several weeks of formal company training and several months of on-the-job training is required.
- Previous experience as a pulp mill labourer within the same company is usually required.
- A certificate in industrial first aid may be required.

Additional information

- There is limited mobility among jobs within this occupational group.
- Progression to pulping control operator is possible with experience.

Classified elsewhere

- *Labourers in wood, pulp and paper processing* (9614)
- *Pulping, papermaking and coating control operators* (9235)
- *Supervisors, forest products processing* (9215)

9433 Papermaking and finishing machine operators

Papermaking and finishing machine operators operate process machinery and equipment and assist papermaking and coating control operators to produce, coat and finish paper. They are employed by pulp and paper companies.

Example titles

assistant coating operator – pulp and paper
balerman/woman – pulp and paper
calender operator – pulp and paper
embossing calender operator – pulp and paper
fourth hand – pulp and paper

graderman/woman – pulp and paper
paper-coating machine operator
paper machine operator
sheeter operator – pulp and paper
winderman/woman – pulp and paper

Main duties

Papermaking and finishing machine operators perform some or all of the following duties:

- Operate and monitor various papermaking and finishing process machinery and equipment to dry, calender, laminate, coat, slit, trim, wind or carry out other papermaking and finishing process steps
- Mount, position and thread paper rolls using a hoist
- Control process machinery using a distributed control system and process computers
- Observe equipment and machinery, panel indicators, gauges, level indicators and other equipment instruments to detect machinery and equipment malfunctions and ensure process steps are carried out according to specifications
- Communicate with and assist papermaking and coating control operators to make process adjustments and to start up or shut down process machines as required
- Inspect paper visually for wrinkles, holes, discolouration, streaks or other defects and take corrective action
- Complete and maintain production reports.

Employment requirements

- Completion of secondary school is required.
- Completion of several weeks of formal company training and several months of on-the-job training is required.
- Previous experience as a labourer within the same company is usually required.
- A certificate in industrial first aid may be required.
- A competency certificate in natural gas may be required.

Additional information

- There is limited mobility among jobs within this occupational group.
- Progression to papermaking and coating control operator occupations is possible with experience.

Classified elsewhere

- *Labourers in wood, pulp and paper processing* (9614)
- Machine operators engaged in fabricating and assembling paper products (in 9435 *Paper converting machine operators*)
- *Pulping, papermaking and coating control operators* (9235)
- *Supervisors, forest products processing* (9215)

9434 Other wood processing machine operators

Machine operators in this unit group operate and tend wood processing equipment and machines to remove bark from logs, produce wood chips, preserve and treat wood, and produce waferboards, particleboards, hardboards, insulation boards, plywood, veneers and similar wood products. They are employed in sawmills, woodrooms of pulp mills, planing mills, wood treatment plants, waferboard plants and other wood processing plants.

Example titles

barker operator
chipper operator
lumber kiln operator
particleboard line operator
plywood panel assembler

timber treating tank operator
veneer dryer tender
veneer lathe operator
waferboard press operator
wood treater

Main duties

Machine operators in this unit group perform some or all of the following duties:

- Operate and tend various wood processing equipment and machines to remove bark, knots and dirt from logs; reduce logs or sawmill waste into wood chips or flakes; stack and band lumber; screen wood chips; and produce waferboards, particleboards, hardboards and insulation boards
- Operate and tend conveyors, lathes, sanding machines and other equipment to peel and slice veneer from logs and log sections, and to glue, press, trim, sand and splice veneer sheets
- Operate and tend kilns, treating tanks and other equipment to dry lumber and other wood products, and to treat chemically and impregnate wood products with preservatives
- Observe equipment, panel indicators, video monitors, and other instruments to detect malfunctions and ensure that processes are operating according to specifications
- Assemble plywood panels and repair plywood and veneer mechanically or manually
- Start up, shut down, set up, adjust and assist in maintaining processing equipment and machines as required
- Complete and maintain production reports.

Employment requirements

- Completion of secondary school is usually required.
- Several months of on-the-job training are provided.

- For lumber kiln operators, particleboard operators and waferboard operators, some combination of college or company courses and up to one year of on-the-job training may be required.
- Previous experience as a labourer in wood processing may be required.

Additional information

- There is some mobility among jobs in this unit group.
- Progression to other positions in the wood, pulp and paper industries is possible with experience.

Classified elsewhere

- *Labourers in wood, pulp and paper processing* (9614)
- *Sawmill machine operators* (9431)
- *Supervisors, forest products processing* (9215)

9435 Paper converting machine operators

Paper converting machine operators operate various machines which fabricate and assemble paper products such as paper bags, containers, boxes, envelopes and similar articles. They are employed by paper products manufacturing companies.

Example titles

box maker operator

carton forming machine operator

core maker – paper converting

envelope maker operator

paper bag machine operator

paper box machine operator

Main duties

Paper converting machine operators perform some or all of the following duties:

- Operate machines which cut, fold, glue or clip paper and cardboard to make boxes, corrugated cartons and other articles
- Operate machines which glue paper to cardboard and cut it into required lengths
- Operate machines which press paper to form drinking cups and other containers
- Operate machines which cut, glue and fold paper to make envelopes or paper bags
- Operate other paper converting machines to form products such as paper tubes, cards, paper towels or diapers
- Clean and lubricate machine and perform other routine machine maintenance
- Set up machines.

Employment requirements

- Completion of secondary school is required by the pulp and paper industry and other large employers.
- Several weeks of on-the-job training are provided.
- Previous experience as a labourer within the same company may be required.

Additional information

- There is some mobility between jobs in this occupational group.

Classified elsewhere

- *Papermaking and finishing machine operators* (9433)
- *Plateless printing equipment operators* (9471)
- *Printing press operators* (7381)

9436 Lumber graders and other wood processing inspectors and graders

Lumber graders and other wood processing inspectors and graders inspect and grade lumber, shingles, veneer, waferboard and similar wood products to identify defects, ensure conformance to company specifications and classify products according to industry standards. They are employed by sawmills, planing mills, wood treatment plants, waferboard plants and other wood processing companies.

Example titles

grader tallyman/woman – wood processing
grader – wood processing
lumber grader
particleboard grader – wood processing

plywood grader
plywood inspector
veneer grader
wood measurer

Main duties

Lumber graders perform some or all of the following duties:

- Examine lumber visually for knots, holes, splits and other defects and sort for further drying, trimming or remanufacturing
- Measure lumber using callipers, gauges and tape measures to ensure specified thickness, length and width
- Classify and sort lumber according to industry standards and stamp lumber to indicate grade, wood type, moisture level and other characteristics
- Tally lumber
- Complete and maintain reports.

Other wood processing inspectors and graders perform some or all of the following duties:

- Inspect plywood panels, veneer sheets, panelboards, shingles and similar wood products visually for knots, holes, splits, straightness and other defects
- Mark defects and sort for repair or reprocessing
- Measure wood products to ensure conformance to specifications using standard measuring instruments
- Grade and label wood products according to quality standards
- Complete and maintain inspection and grading reports.

Employment requirements

- Completion of secondary school is usually required.
- On-the-job training and up to two weeks of classroom training are provided for lumber graders.

- Previous experience as a sawmill machine operator, other wood processing operator or as a labourer in wood processing is usually required for graders and inspectors in this unit group.
- Lumber graders require a lumber grader's licence issued by a provincial lumber association.

Additional information

- There is some mobility between employers processing similar wood products.

Classified elsewhere

- Forest products technologists (in 2211 *Chemical technologists and technicians*)
- Log scalers (in 2223 *Forestry technologists and technicians*)
- Production technologists in sawmills (in 2233 *Industrial engineering and manufacturing technologists and technicians*)
- *Supervisors, forest products processing* (9215)

9437 Woodworking machine operators

Woodworking machine operators set up, program and operate one or more woodworking machines to fabricate or repair wooden parts for furniture, fixtures or other wood products. They are employed in furniture, fixture and other wood products manufacturing establishments.

Example titles

boring machine operator – woodworking
CNC (computer numerically controlled) band saw operator
drill operator – woodworking
drum sander – woodworking
edge bander operator – woodworking

glue machine operator – woodworking
lathe operator – woodworking
planer operator – woodworking
rough mill operator – woodworking
shaper – woodworking
woodworking machine operator

Main duties

Woodworking machine operators perform some or all of the following duties:

- Set up, program and operate one or more computer numerically controlled (CNC) or manual woodworking machines such as saws, moulders, lathes, routers, planers, edgers, pressing machines, shapers, drills and sanders to fabricate or repair wooden parts for furniture, fixtures and other wood products
- Operate gluing machines to glue pieces of wood together or press and affix wood veneer to wood surfaces
- Operate preset special-purpose woodworking machines to fabricate wood products such as coat hangers, mop handles, clothes pins and other products
- Read and interpret specifications or follow verbal instructions
- May clean and lubricate equipment, and replace parts as necessary.

Employment requirements

- Some secondary school education is usually required.
- On-the-job training is usually provided.
- Experience as a labourer in the same company may be required.

Additional information

- Mobility is common among jobs in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Cabinetmakers (7272)*
- *Carpenters (7271)*
- Supervisors of woodworking machine operators (in 9224 *Supervisors, furniture and fixtures manufacturing*)

9441 Textile fibre and yarn, hide and pelt processing machine operators and workers

Textile fibre and yarn processing machine operators and workers operate machines to prepare textile fibres; spin, wind or twist yarn or thread; and bleach, dye or finish yarn, thread, cloth or textile products. They are employed by textile manufacturing companies. Hide and pelt processing machine operators and workers trim, scrape, clean, tan, buff and dye animal hides, pelts or skins to produce leather stock and finished furs. They are employed by leather tanning, fur dressing and leather and fur dyeing establishments.

Example titles

autoclave tender – textile manufacturing
bleaching range operator – textile manufacturing
calender operator – textile manufacturing
carding machine operator – textile manufacturing
coater operator – textile manufacturing
dyeing range operator – textile manufacturing
fabric-printing machine operator

finishing range operator – textile manufacturing
leather buffer – hide and pelt processing
leather stretcher – hide and pelt processing
spinning operator – textile manufacturing
tanner – hide and pelt processing
twisting operator – textile manufacturing
yarn doubler – textile manufacturing

Main duties

Textile fibre and yarn processing machine operators and workers perform some or all of the following duties:

- Operate and feed machines that wash, mix, blend, pick, card, lap, comb or draw fibres and finish yarn
- Operate spinning, twisting, winding or reeling machines
- Operate a variety of machines to bleach, dye, coat or finish fabric, thread, yarn or other textile products
- Mix dyes or chemicals according to established formulas
- Operate machinery to print designs onto textile products
- Oversee work area, examine products for defects and ensure adherence to quality standards
- Investigate machine stoppages and notify supervisor or mechanic in the event of equipment malfunction
- May set up machines and assist with maintenance and minor repairs to machinery.

Hide and pelt processing machine operators and workers perform some or all of the following duties:

- Operate machines or use hand and powered cutting knives to remove unnecessary particles from hides, skins or pelts; shave or polish hides; and shear fur or wool hides to produce pelts with hair of specified or uniform lengths

- Prepare solutions according to pre-established formulas and immerse hides, skins or pelts to clean, dehair, pickle, dye, oil, tan, soften and preserve
- Adjust rotation and mixing action of vats according to state of pelts
- Tint or dye furs to enhance natural shades of fur
- May maintain and repair vats and other machinery.

Employment requirements

- Completion of secondary school may be required.
- On-the-job training is provided for periods up to several months, depending on the complexity of the process and the number of machines operated.

Additional information

- Progression is possible within the group to operate more complex dye ranges and textile printing equipment.
- Progression to supervisory positions is possible with experience for fibre and yarn preparation machine operators and hide and pelt processing machine operators and workers.
- Progression to supervisory positions in textile processing usually requires completion of a college program in textiles, chemistry or a related subject.
- There is some mobility among jobs in this unit group.

9441 Textile fibre and yarn, hide and pelt processing machine operators and workers

Classified elsewhere

- Master dyers and textile colour technologists (in 2211 *Chemical technologists and technicians*)
- *Supervisors, textile, fabric, fur and leather products processing and manufacturing* (9217)

9442 Weavers, knitters and other fabric making occupations

Operators in this unit group operate machines to process yarn or thread into woven, non-woven and knitted products such as cloth, lace, carpets, rope, industrial fabric, hosiery and knitted garments or to quilt and embroider fabric. This unit group also includes workers who perform activities such as reproducing patterns, drawing-in and tying warps and setting up looms. They are employed by textile companies and by garment and mattress manufacturing companies.

Example titles

carpet weaver
drawer-in – textiles
drawing-in machine operator
embroidery machine operator
hosiery knitter
knitter – textiles
knitting machine operator
loom operator

mattress sewing machine operator
pinning machine operator
quilting machine operator
tufting operator
warp knitting machine tender
warp tier-in
weaver – textiles

Main duties

Operators in this unit group perform some or all of the following duties:

- Set up looms or other processing machines
- Read loom patterns and prepare loom pattern mechanisms for processing
- Operate looms to weave yarn or thread into textile fabrics or products
- Operate machines that produce twine, ropes or nets
- Operate batteries of knitting machines to produce knitted fabric, hosiery, garments or other products
- Operate carpet tufting machines, felt making needle-punch machines and other machines to produce textile products
- Operate large automatic multi-needle machines to embroider material or to sew lengths of several layers of material to make yard goods, quilts or mattress coverings
- Patrol machines and check fabrics or products for defects and to verify efficient operation
- Investigate machine stoppages
- Repair minor mechanical problems such as broken or defective needles
- Notify supervisor or repairers of mechanical malfunctions.

Employment requirements

- On-the-job training is provided for periods up to several months, depending on the complexity of the product, whether equipment set-up and maintenance is done by the operator, and the number of machines operated.
- Previous experience as a labourer in the same company may be required for some operators in this group.

Additional information

- Mobility among employers may be limited by differences in machines and products.
- Progression to textile machinery mechanics and repairers or to supervisory positions is possible with experience and training.

Classified elsewhere

- Craft weavers and knitters (in 5244 *Artisans and craftpersons*)
- *Industrial sewing machine operators* (9446)
- *Supervisors, textile, fabric, fur and leather products processing and manufacturing* (9217)
- Textile machinery mechanics (in 7311 *Construction millwrights and industrial mechanics*)

9445 Fabric, fur and leather cutters

Fabric cutters cut fabric to make parts for garments, linens and other articles. Fur cutters cut fur pelts to make parts for garments and other fur articles. Leather cutters cut leather to make parts for shoes, garments and other leather articles. Fabric cutters are employed by clothing and textile manufacturers and other manufacturers of fabric products. Fur cutters are employed by furriers and fur products manufacturers. Leather cutters are employed by shoe and other leather products manufacturers.

Example titles

clothing cutter
fabric cutter
fur cutter
glove cutter

leather cutter
sample cutter
shoe cutter

Main duties

Fabric cutters perform some or all of the following duties:

- Place patterns on top of layers of fabric and cut fabric following patterns, using electric or manual knives, cutters or computer numerically controlled (CNC) cutting devices
- Adjust cutting technique to type of fabric and style of garment
- May cut fabric samples.

Fur cutters perform some or all of the following duties:

- Cut fur skins in diagonal strips to specified length and shape of pelt using furrier's knives and cutters
- Number pelts to indicate their location on pattern
- May sort or match skins, and may prepare fur samples.

Leather cutters perform some or all of the following duties:

- Select leather and cutting dies for leather goods and shoe parts according to specifications
- Position leather on cutting bed of machine, maximizing usage according to skin grain, skin flaws and skin stretch
- Operate clicker or punch press to stretch leather
- Operate machine to cut leather or cut single leather skins by hand to make leather products
- May cut leather samples.

Employment requirements

- Some secondary school education is usually required.
- Experience as a fabric, fur or leather cutter is required for fabric, fur or leather sample cutters.

- Some on-the-job training is provided for occupations in this unit group.
- Several years of on-the-job training are provided for fur cutters.

Additional information

- There is little mobility among the different kinds of cutters in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Shoe repairers and shoemakers* (6343)
- *Tailors, dressmakers, furriers and milliners* (6342)

9446 Industrial sewing machine operators

Industrial sewing machine operators operate sewing machines to sew fabric, fur, leather or synthetic materials to produce or repair garments and other articles. They are employed in clothing, footwear, textile products, fur products and other manufacturing establishments and by furriers.

Example titles

fur sewing machine operator

leather products sewing machine operator

lining stitcher

sample sewer

serging machine operator

sewing machine operator

shoe sewer

Main duties

Industrial sewing machine operators perform some or all of the following duties:

- Assemble pieces of garments by matching patterns and dye lots
- Operate single, double or multi-needle serging, flat bed felling, banding and other sewing machines, to join sections of garments or other articles into finished products on a piece-work or production basis
- Operate fur sewing machines to join fur pelt strips to required size and shape and join pelts into garment sections or shells
- Operate stitching machines to sew leather parts together for leather garments, handbags, shoes and other leather articles
- Operate serging machines to sew and overcast edges of material simultaneously
- Operate tackers, pocketsetters, buttonhole makers and fusing, hemmer and other machines to perform various operations in the fabrication of garments and other articles
- Examine garments and operate sewing machines, sergers and other machines to repair garments and other articles during the manufacturing process
- Complete production reports
- May perform minor maintenance and repairs on sewing machine.

Employment requirements

- Some secondary school education is usually required.
- Experience operating a sewing machine is usually required.
- On-the-job training may be provided.

Additional information

- Industrial sewing machine operators may progress to supervisory positions with experience.

Classified elsewhere

- *Fabric, fur and leather cutters* (9445)
- *Mattress sewing and embroidery machine operators* (in 9442 *Weavers, knitters and other fabric making occupations*)
- *Shoe repairers and shoemakers* (6343)
- *Supervisors of sewing machine operators* (in 9217 *Supervisors, textile, fabric, fur and leather products processing and manufacturing*)
- *Tailors, dressmakers, furriers and milliners* (6342)

9447 Inspectors and graders, textile, fabric, fur and leather products manufacturing

Inspectors and graders in this unit group inspect and grade textile, fabric, fur and leather products. They are employed by textile companies, leather tanning and fur dressing establishments and garment, fur and leather products manufacturers.

Example titles

cloth inspector	leather goods inspector
colour grader – textiles	leather grader
fabric examiner	quality control inspector – textiles
fibre inspector – textiles	shoe inspector
fur grader	textile grader
fur matcher – fur products manufacturing	textile product sampler
garment inspector	yarn inspector
hide and pelt processing inspector	

Main duties

Inspectors and graders in this unit group perform some or all of the following duties:

- Examine natural, synthetic and hybrid textile, fabric, fur and leather garments or products for conformity to quality standards
- Inspect and grade animal hides and pelts according to size, condition and weight
- Verify fit or size of finished garments and products by measuring or comparing products with samples and patterns
- Mark defects, repair minor imperfections, cut excess materiel using scissors, and remove lint and spots using brushes, lint removers and cleaning solutions
- Grade and sort finished products and tag according to size, style and quality
- Record information on products inspected
- May package products.

Employment requirements

- Some secondary school education is usually required.
- On-the-job training is provided.
- Work experience in the manufacturing of the products inspected is usually required.

Additional information

- There is limited mobility among the different inspectors and graders in this unit group.

Classified elsewhere

- *Supervisors, textile, fabric, fur and leather products processing and manufacturing (9217)*

9461 Process control and machine operators, food, beverage and associated products processing

Process control and machine operators in this unit group operate multi-function process control machinery and single-function machines to process and package food, beverage and associated products. They are employed in fruit and vegetable processing plants, dairies, flour mills, bakeries, sugar refineries, meat plants, breweries, leaf tobacco products plants and other food, beverage and associated products processing establishments.

Example titles

bakery machine operator – food and beverage processing
brewhouse operator
canning machine operator
chocolate refiner
cigarette machine tender
citrus juice extractor
control room operator – food and beverage processing
corn sugar refinery operator
dryer tender – tobacco processing

fermenter operator
fruit preserver – food and beverage processing
fryer operator – food and beverage processing
grain-processing machine operator
meat grinder – food and beverage processing
mixer operator, dry foods
pasteurizer operator – food and beverage processing
tobacco blender
winery-press operator

Main duties

Process control operators in this unit group perform some or all of the following duties:

- Operate multi-function process control machinery through control panels, computer terminals or other control systems to grind, extract, mix, blend, cook or otherwise process food products and to bag, box or otherwise package food products
- Operate multi-function process control machinery to grind, extract, mix, blend, distill, ferment or otherwise process alcoholic or non-alcoholic beverages and to bottle, can or otherwise package beverages
- Observe gauges, computer printouts and video monitors to verify specified processing conditions and make adjustments to process variables such as cooking times, ingredient inputs, flow rates and temperature settings
- Maintain shift log of production and other data.

Machine operators in this group perform some or all of the following duties:

- Set up and adjust processing and packaging machines preparatory to operation
- Operate single-function machines to grind, extract, mix, blend, dry, freeze, cook or otherwise process food, beverage or associated products
- Operate single-function machines to box, can or otherwise package food, beverage or associated products

- Check products to ensure conformance to company standards and clear machine blockages as required
- Record production information such as quantity, weight, size, date and type of products packaged
- Perform corrective machine adjustments, clean machines and immediate work areas.

Employment requirements

- Completion of secondary school may be required.
- On-the-job training is provided.
- Experience as a machine operator in food, beverage or associated products processing is usually required for industrial process control operators.
- Experience as a labourer in food, beverage or associated products processing may be required for machine operators.

Additional information

- There is little mobility among the various types of process control operators within the food and beverage processing industry.
- Process control operators may progress to supervisory positions in food and beverage processing with experience.
- There is mobility among machine operators within the food, beverage and associated products processing.

9461 Process control and machine operators, food, beverage and associated products processing

- Machine operators may progress to process control operation or supervisory positions in food, beverage and associated products processing with experience.

Classified elsewhere

- *Bakers* (6332)
- *Butchers, meat cutters and fishmongers – retail and wholesale* (6331)
- *Fish and seafood plant workers* (9463)

9462 Industrial butchers and meat cutters, poultry preparers and related workers

Workers in this unit group prepare meat and poultry for further processing, for packaging or for marketing. They are employed in meat and poultry slaughtering, processing and packing establishments.

Example titles

beef boner
ham cutter
industrial butcher
industrial meat cutter

meat trimmer
poultry preparer
slaughterer

Main duties

Workers in this unit group perform some or all of the following duties:

- Industrial butchers slaughter livestock using stunning devices and knives; skin, clean and trim carcasses; remove viscera and other inedible parts from carcasses; split carcasses into smaller portions to facilitate handling; and may slaughter cattle, calves and sheep as prescribed by religious laws.
- Industrial meat cutters cut beef, lamb, pork or veal carcasses or sides or quarters of carcasses into primal cuts for further cutting, processing or packaging; remove bones from meat; and cut meat and poultry into specific cuts for institutional, commercial or other wholesale use.
- Poultry preparers slaughter poultry and remove inedible parts; remove feathers and singe and wash poultry to prepare for further processing or packaging.
- Trimmers remove skin, excess fat, bruises or other blemishes from carcasses or meat portions.

Employment requirements

- Completion of secondary school may be required.
- For industrial meat cutters, completion of a program in industrial meat cutting
or
Experience as an industrial butcher or trimmer is required.
- On-the-job training is provided for industrial butchers, poultry preparers and trimmers.

Additional information

- Industrial meat cutters may progress to inspecting, testing and grading jobs.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Butchers, meat cutters and fishmongers – retail and wholesale* (6331)
- Meat graders (in 9465 *Testers and graders, food, beverage and associated products processing*)
- Meat inspectors (in 2222 *Agricultural and fish products inspectors*)
- Supervisors, meat packing (in 9213 *Supervisors, food, beverage and associated products processing*)

9463 Fish and seafood plant workers

This unit group includes fish and seafood plant machine operators who set up and operate machinery to process and package fish and seafood products, and fish and seafood plant cutters and cleaners who cut, trim and clean fish or seafood by hand. Fish and seafood plant workers are employed in fish and seafood processing plants.

Example titles

fish cake maker	seafood preparer – fish and seafood processing
fish canning machine operator	shellfish processor
fish cleaner and cutter	shellfish shucker
fish cutting machine operator – fish processing	trimmer – fish processing
fish plant worker	

Main duties

Fish and seafood plant machine operators perform some or all of the following duties:

- Set up and operate machines to clean, cut, cook, smoke, brine, dehydrate or otherwise process fish or seafood products
- Set up and operate machines to can, bag, box or otherwise package fish and seafood products
- Check products and packaging for defects and to ensure conformance to company standards and perform corrective machine adjustments as required
- Record production information such as quantity, weight, date and type of products packaged.

Fish and seafood plant cutters and cleaners perform some or all of the following duties:

- Cut, clean and trim fish or seafood prior to marketing or further processing
- Scrape away scales, cut fish, separate fillets and remove scrap parts using knife
- Check fish fillets to determine optimal number and size of fillet sections, cut sections according to specifications and place in container for weighing
- Disjoint and remove meat from lobsters or other crustaceans preparatory to canning or further processing.

Employment requirements

- Some secondary school education may be required.
- On-the-job training is required.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Labourers in fish and seafood processing (9618)*
- *Supervisors, food, beverage and associated products processing (9213)*

9465 Testers and graders, food, beverage and associated products processing

Testers and graders in this unit group test or grade ingredients and finished food, beverage or associated products to ensure conformance to company standards. They are employed in fruit and vegetable processing plants, dairies, flour mills, bakeries, sugar refineries, fish plants, meat plants, breweries and other food, beverage and associated products processing plants.

Example titles

beef grader
beer tester
cheese grader
fish grader

milk grader
poultry grader
product tester – food and beverage processing
tobacco grader

Main duties

Testers and graders in this unit group perform some or all of the following duties:

- Take samples of products at various stages of processing
- Examine ingredients or finished products by sight, touch, taste and smell or weigh materials to ensure conformance to company standards
- Conduct routine tests for product specifications such as colour, alcohol content, carbonation, moisture content, temperature, fat content and packaging
- Grade or sort raw materials or finished products
- Ensure hygiene and sanitation practices conform to policies and regulations
- Advise supervisors of ingredient or product deficiencies.

Employment requirements

- Completion of secondary school may be required.
- Experience as a machine operator or labourer in the food, beverage and associated products processing industry may be required.
- On-the-job training is usually provided.

Additional information

- There is little mobility among the various types of testers and graders in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Agricultural and fish products inspectors (2222)*
- *Quality control technologists and technicians (in 2211 Chemical technologists and technicians)*
- *Supervisors, food, beverage and associated products processing (9213)*

9471 Plateless printing equipment operators

This unit group includes workers who operate laser printers, computerized high speed colour copiers and other printing machines to print text, illustrations and designs on a wide variety of materials such as paper, plastic, glass, leather, and metal. They are employed in rapid printing services, newspaper and magazine publishing companies, commercial printing companies and in manufacturing and other establishments that have in-house printing facilities.

Example titles

colour copier operator

electronic sign maker operator

embossing-imprinting machine operator

laser printer operator

printing machine operator – printing

quick print machine operator

silk-screen printing machine operator

wallpaper printer

Main duties

Printing machine operators perform some or all of the following duties:

- Review work order to determine job specifications, such as ink colour and quantity required
- Set up and make adjustments to printing machine, such as filling ink or paint reservoirs and loading stock
- Input codes and key in programming data on console keyboard of computerized machines
- Operate and monitor printing machines during print run and make adjustments as required
- Clean machines and replace worn parts.

Employment requirements

- Completion of secondary school may be required.
- Completion of college or other specialized courses in printing may be required.
- On-the-job training is provided.

Classified elsewhere

- *Printing press operators (7381)*
- *Supervisors, printing and related occupations (7303)*
- *Textile printing machine operators (in 9441 Textile fibre and yarn, hide and pelt processing machine operators and workers)*

9472 Camera, platemaking and other prepress occupations

This unit group includes prepress technicians who operate various computer controlled systems to perform prepress activities and workers who operate graphic arts cameras and scanners, assemble film and negatives and prepare, engrave and etch printing plates or cylinders for various types of printing presses. They are employed in firms that specialize in colour graphics or platemaking and cylinder preparation, commercial publishing and printing companies, newspapers, magazines, and in various establishments in the public and private sectors that have in-house printing departments.

Example titles

camera operator – graphic arts
cylinder preparer – printing
dot etcher – printing
file preparation operator
film stripper-assembler
platemaker – printing

pre-flight operator – printing
prepress technician
printing plate engraver
proofmaker
screenmaker
studio-image-processing system operator

Main duties

The following is a summary of main duties for some occupations in this unit group:

- Graphic arts camera operators set up and adjust black and white or colour separation process cameras to convert graphic art and photographs into film for assembly and exposure onto printing plates or cylinders.
- Cylinder preparers grind and polish press cylinders; expose and lay down carbon tissue; and etch or engrave cylinders using hand tools, etching machines, photogravure or laser processes to produce cylinders for gravure presses.
- Film strippers and assemblers assemble and position, either using automated equipment or by hand, pieces of film containing all parts of a printing job to produce flats or composite negatives for preparing printing plates or cylinders.
- Platemakers operate vacuum frames, plate processors and step and repeat machines to produce printing plates for various types of presses.
- Prepress technicians operate various computer-controlled studio systems to perform colour separation, retouching and editing that allow changes to be made to a colour negative for printing purposes, plan page layouts and electronically alter shape, size and positions of illustrations and text.

- Scanner operators operate computerized scanning machines or digital cameras to make colour separations and corrections from colour copy or transparencies for use in preparing film, digital files, printing plates or cylinders.
- Proofmakers operate computerized equipment to prepare film, laser or dylux proofs for quality control purposes or for customers' review.

Employment requirements

- Completion of secondary school is required.
- Completion of a college program in graphic arts technology
or
A combination of on-the-job training and specialized college, industry or other courses is required.
- Trade certification for some occupations in this group is available, but voluntary, in Ontario, Alberta, the Northwest Territories and Nunavut.

Classified elsewhere

- Desktop publishing operators (in 1423 *Desktop publishing operators and related occupations*)
- *Graphic arts technicians* (5223)
- *Graphic designers and illustrators* (5241)

- *Supervisors, printing and related occupations* (7303)

9473 Binding and finishing machine operators

Binding and finishing machine operators set up, operate or oversee the operation of machines, equipment or computerized units that bind and finish printed material. Workers who perform finishing operations in the paper, carton and packaging industries, as well as those who encode and stamp plastic cards, are included in this unit group. They are employed by binderies, commercial printing companies, newspapers, magazines, and other publishing companies, and establishments in both the public and private sectors that have in-house printing, binding and finishing departments.

Example titles

binder and finisher

binder – printing

bindery operator

bookbinder, machine

bookbinding machine operator

Cerlox binder operator

cutter operator – printing

finishing machine operator – printing

foil stamper – printing

gathering machine set-up operator – printing

gold leaf stamper

laminating machine operator

perforator operator – printing

stitcher operator – printing

Main duties

Binding and finishing machine operators perform some or all of the following duties:

- Set up and operate specialized equipment and machines that cut, fold, gather and bind or finish brochures, pamphlets, business forms, magazines, books and other printed material
- Set up and operate specialized equipment and machines that die cut, emboss, imprint, laminate, heat stamp and perform other finishing operations on printed material
- Perform pre-production runs of binding or finishing jobs to verify output and to ensure that product specifications are met
- Operate automatic and semi-automatic equipment and machines to bind or finish print material according to specifications
- Pack, weigh and stack bound and finished products on pallet for shipment
- May repair and rebind damaged or worn books.

Employment requirements

- Completion of secondary school is usually required.
- Completion of a college program in graphic arts technology
or
A combination of on-the-job training and specialized college, industry or other courses is usually required.

Additional information

- There is some mobility among various types of binding and finishing machine operator occupations in this group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Feeders, loaders, offbearers and similar occupations (in 9619 *Other labourers in processing, manufacturing and utilities*)
- Hand bookbinders (in 5244 *Artisans and craftspersons*)
- *Printing press operators (7381)*
- *Supervisors, printing and related occupations (7303)*

9474 Photographic and film processors

Photographic and film processors process and finish still photographic film and motion picture film. They are employed in film processing laboratories and retail photofinishing establishments.

Example titles

darkroom technician

film developer

film printing machine operator

film processor

photofinisher

photograph developer

photographic processor

photograph inspector – photographic processing

Main duties

Photographic and film processors perform some or all of the following duties:

- Operate equipment to develop negatives and slides, and to print black and white and colour photographs
- Operate photographic enlarging equipment to produce prints and enlargements from negatives
- Operate equipment to develop motion picture film
- Tend automatic equipment in retail establishments to develop colour negatives, prints and slides
- Operate equipment to transfer film to video tape
- Retouch photographic negatives or original prints to correct defects
- Splice film and mount film on reels
- Measure and mix chemicals required for processing
- Inspect rolls of photographic prints for conformance to specifications; or motion picture film to detect defects in developing and printing.

Employment requirements

- Completion of secondary school is usually required.
- For employment in film processing laboratories, completion of a college or other specialized photography program
or
Extensive related experience is required.
- For employment as a film printing machine operator in retail outlets, on-the-job training is provided.

Additional information

- There is mobility among occupations within laboratory processing operations.
- Progression is possible from automatic machine tenders in retail establishments to laboratory processing occupations.

Classified elsewhere

- Film strippers and assemblers and negative retouchers in the printing or graphic arts industry (in 9472 *Camera, platemaking and other prepress occupations*)
- Supervisors of photographic and film processors (in 7303 *Supervisors, printing and related occupations*)

9521 Aircraft assemblers and aircraft assembly inspectors

Aircraft assemblers assemble, fit and install prefabricated parts to manufacture fixed wing or rotary wing aircraft or aircraft subassemblies. Aircraft assembly inspectors inspect aircraft assemblies for adherence to engineering specifications. They are employed by aircraft and aircraft subassembly manufacturers.

Example titles

aircraft assembler
aircraft inspector, assembly
airframe assembler
bench and structural assembler

bench fitter mechanic – aircraft assembly
rigger – aircraft assembly
wing tank mechanic – aircraft assembly

Main duties

Aircraft assemblers perform some or all of the following duties:

- Read and interpret aircraft assembly diagrams
- Assemble and fit pre-fabricated parts to form subassemblies, working at benches or directly on an aircraft structure
- Assemble, fit and install pre-fabricated parts and subassemblies such as aircraft skins, flight controls, rigging, hydraulics and other mechanical systems.

Aircraft assembly inspectors perform some or all of the following duties:

- Inspect aircraft assemblies, using measuring and testing equipment, for adherence to engineering specifications
- Inspect assemblies for alignment, symmetry, dimensions, fit and quality of workmanship
- Complete detailed inspection documentation.

Employment requirements

- Completion of secondary school is required.
- Completion of a college or other program in aviation or aeronautical technology, with emphasis in aircraft manufacturing, may be required.
- Aircraft assemblers receive several months of on-the-job and classroom training.
- Aircraft assembly inspectors require experience as an aircraft assembler.

Additional information

- Aircraft assemblers and assembly inspectors may progress to supervisory positions with experience.

Classified elsewhere

- Aircraft engine assemblers (in 7316 *Machine fitters*)
- *Aircraft mechanics and aircraft inspectors* (7315)
- Aircraft painters (in 9536 *Industrial painters, coaters and metal finishing process operators*)
- Avionics and aircraft electronic equipment installers (in 2244 *Aircraft instrument, electrical and avionics mechanics, technicians and inspectors*)
- Supervisors of aircraft assemblers or inspectors (in 9226 *Supervisors, other mechanical and metal products manufacturing*)

9522 Motor vehicle assemblers, inspectors and testers

Motor vehicle assemblers assemble and install prefabricated motor vehicle parts and components to form subassemblies and finished motor vehicles. Motor vehicle inspectors and testers inspect and test parts, subassemblies, accessories and finished products to ensure proper performance and conformity to quality standards. They are employed in plants which manufacture automobiles, vans and light trucks.

Example titles

assembly inspector – motor vehicle manufacturing
auto assembly worker
body assembler – motor vehicle manufacturing
car assembler
chassis inspector – motor vehicle manufacturing
door fitter

motor vehicle assembler
sport utility vehicle (SUV) assembler
test driver – automobile assembly
transmission installer
van assembler

Main duties

Motor vehicle assemblers perform some or all of the following duties:

- Read electrical schematics, blueprints and other technical diagrams
- Bolt, screw, clip, weld, solder or otherwise fasten motor vehicle parts and components together using hand and power tools and equipment
- Operate and tend automated assembling equipment such as robotic and fixed automation equipment
- Connect cables, tubes and wires to complete assemblies and installations
- Position and install parts, subassemblies and accessories such as engines, transmissions, door panels or instrument panels using hand and power tools and other aids like overhead hoists
- Fit and adjust parts such as doors, hoods and trunk lids.

Motor vehicle inspectors and testers perform some or all of the following duties:

- Check motor vehicle exterior priming and colour coats, sealers and glazers, and mark, record and report defects to be repaired
- Test motor vehicle electrical assemblies, equipment and wiring for proper performance using testing devices such as meters, analyzers and timing lights
- Inspect auto parts and fully assembled motor vehicles for defects and to ensure that previously noted defects have been corrected
- Drive and test motor vehicles on roll testing device to ensure that transmission, axle, engine and brakes function properly.

Employment requirements

- Completion of secondary school is usually required.
- Skills required for occupations in this unit group are normally acquired through on-the-job training.

Additional information

- Mobility is possible to jobs in the same production department.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Assemblers of heavy trucks, trailers and buses (in 9526 *Mechanical assemblers and inspectors*)
- Automobile assembly painters and coaters (in 9536 *Industrial painters, coaters and metal finishing process operators*)
- Automotive engine, clutch and transmission assemblers (in 9526 *Mechanical assemblers and inspectors*)
- Mechanical repairers, automobile manufacturing (in 7321 *Automotive service technicians, truck and bus mechanics and mechanical repairers*)
- *Supervisors, motor vehicle assembling* (9221)

9523 Electronics assemblers, fabricators, inspectors and testers

Electronics assemblers and fabricators assemble and fabricate electronic equipment, parts and components. Electronics inspectors and testers inspect and test electronic and electromechanical assemblies, subassemblies, parts and components to ensure conformance to prescribed standards. They are employed in electronics manufacturing plants.

Example titles

capacitor assembler
circuit board assembler
component inserting machine operator
crystal final tester
electronics assembler
electronics inspector – electronic equipment
manufacturing
finished product inspector – electronic equipment
manufacturing

inspector, printed circuit board (PCB) assembly
precision instrument assembler – electronic
equipment manufacturing
surface mount assembler
tester, electronic components
through-hole assembler
wafer fabrication operator
wave soldering machine operator
wiring and assembly operator

Main duties

Electronics assemblers perform some or all of the following duties:

- Solder and manually assemble various electronic components such as resistors, diodes, transistors, capacitors, integrated circuits, switches, wires and other electronic parts to designated locations on printed circuit boards
- Assemble microcircuits requiring fine hand assembly, the use of microscopes and adherence to cleanroom procedures
- Install, mount, fasten, align and adjust parts, components, wiring and harnesses to subassemblies and assemblies using hand and small power tools
- Operate automatic and semi-automatic machines to position, solder and clean prescribed components on printed circuit boards
- May replace defective components and repair and overhaul older devices.

Electronics fabricators perform some or all of the following duties:

- Operate and monitor process equipment including automatic and semi-automatic machines to fabricate electronic components, solder, clean, seal and stamp components and perform other process operations as specified
- Set up process equipment and adhere to cleanroom procedures as required.

Electronics inspectors perform some or all of the following duties:

- Inspect electronic components and assemblies to ensure correct component selection and placement, wiring and soldering quality, proper pin insertions, location and diameter of plated holes, breaks in circuitry and line spacing in printed circuit board and other specified requirements while products are being assembled or fabricated
- Check final assembly for finish, labelling and packaging methods
- Check mechanical dimensions and perform "go-no-go" electrical tests
- Identify and mark acceptable and defective assemblies and return faulty assemblies to production for repair
- Collect, record and summarize inspection results
- Investigate equipment malfunction and instruct on proper operation.

Electronics testers perform some or all of the following duties:

- Operate various test equipment and tools to perform simple electrical and continuity testing of electronic components, parts and systems
- Set up and operate automatic testing equipment to locate circuit and wiring faults, shorts and component defects
- Compare test results to specifications and set parts or products aside for repair or replace components or parts as indicated by test equipment
- May conduct life tests (burn-ins) on components, subassemblies and assemblies

9523 Electronics assemblers, fabricators, inspectors and testers

- Maintain test result reports.

Employment requirements

- Completion of secondary school is usually required for electronics assemblers, fabricators, inspectors and testers.
- On-the-job training is usually provided for occupations in this unit group.
- A two-year apprenticeship and voluntary trade certification is available for electronics assemblers in Ontario and Saskatchewan.
- Electronics testers may require post-secondary courses in basic electronic theory, testing techniques and testing equipment.
- Electronics inspectors and testers may require experience as an electronics assembler or component fabricator.

Additional information

- Progression from electronics assembler or component fabricator to electronics inspector or tester is possible with additional training and experience.

9524 Assemblers and inspectors, electrical appliance, apparatus and equipment manufacturing

Assemblers in this unit group assemble prefabricated parts to produce household, commercial and industrial appliances and equipment. Inspectors in this unit group inspect and test assembled products. Workers who set up and prepare assembly lines for operation are included in this unit group. Workers in this unit group are employed by electrical appliance and electrical equipment manufacturing companies.

Example titles

assembler, electrical appliances
circuit breaker assembler
clothes dryer assembler, electric
coffee maker assembler
dishwasher assembler
hair dryer assembler

inspector, electrical appliance assembly
inspector, electrical controls assembly
lawn mower assembler, electric
production assembler, electrical equipment
refrigerator assembler, electric

Main duties

Assemblers in this unit group perform some or all of the following duties:

- Assemble prefabricated parts on an assembly line, or at work benches using screw guns and other hand and power tools
- Assemble small and large household electrical appliances such as coffeemakers, toasters, vacuum cleaners, lawnmowers, refrigerators and dishwashers
- Assemble small transformers, small electrical motors and transmissions used in appliances or other electrical products
- Assemble circuit breakers, switches or other electrical control equipment and position and fasten components such as springs, toggles or other parts into assembly casings
- Wind coils and armatures for small electric motors and transformers
- Perform minor repairs to products rejected from production assembly line
- Set up assembly line with materials and supplies required for production, and set up and adjust production tools.

Inspectors and testers in this unit group perform some or all of the following duties:

- Check products at different stages of production for visual defects and faulty electrical and mechanical connections, or operate automatic or other testing equipment to ensure product quality
- Identify and mark acceptable and defective assemblies and return faulty assemblies to production for repair
- Collect, record and summarize inspection results.

Employment requirements

- Some secondary school education is usually required.
- On-the-job training is provided.
- Inspectors may require experience as an assembler in the same company.
- Some types of inspectors may require completion of a college program in electronics.

Additional information

- With experience assemblers may progress to inspecting and testing positions.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Appliance servicers and repairers (7332)*
- Assemblers of electronic products, such as television, radios and computers (in 9523 *Electronics assemblers, fabricators, inspectors and testers*)
- Assemblers of heavy-duty electrical motors, transformers and related equipment (in 9525 *Assemblers, fabricators and inspectors, industrial electrical motors and transformers*)

9525 Assemblers, fabricators and inspectors, industrial electrical motors and transformers

This unit group includes workers who assemble, fabricate, fit, wire and inspect heavy-duty industrial electrical equipment. They are employed by manufacturers of industrial electric motors, transformers, control equipment, railway locomotives, transit vehicles and other heavy electrical equipment.

Example titles

assembler and wirer, motors and generators
assembler, switchgear and control panel
coil winder, transformer
control panel assembler
electrical fitter
fitter-assembler, AC (alternating current) and DC
(direct current) motors
inspector and tester, AC and DC motors
inspector, electrical control panel

panelboard assembler – industrial electrical
equipment
power transformer assembler
switchgear fitter-wirer
transformer inspector
transformer winder
winder, AC and DC armatures
wirer, electrical switchgear panels

Main duties

Assemblers in this unit group perform some or all of the following duties:

- Assemble and fit metal and other prefabricated parts to close tolerances according to blueprints to build heavy-duty electric motors or transformers
- Assemble stators or armatures for heavy-duty electric motors; compress steel laminations to build transformer cores; assemble windings into core using overhead cranes and make electrical connections using crimping, brazing and soldering equipment
- Assemble and fit electrical motor or transformer auxiliary equipment such as bushings, tap changes, conduit boxes, heating devices, protective equipment and cooling equipment
- Set up and adjust production machinery and equipment, such as coil winding machines, for the manufacture of heavy-duty electrical equipment
- May perform basic tests on electric motors.

Electrical fitters and wirers perform some or all of the following duties:

- Interpret engineering drawings, electrical schematics and blueprints
- Fit motor starters, contactors, capacitors, circuit breakers, voltage regulators, printed circuit boards or other electrical control devices into switchboards and panelboards to produce automated processing control equipment, electrical distribution panels, or other industrial electrical control equipment
- Wire electrical connections for switchboards and panelboards

- Assemble panelboard and switchboard cabinets and install bus bars used to carry heavy electrical current
- May operate metal fabricating equipment to fabricate or modify bus bars.

Inspectors in this unit group perform some or all of the following duties:

- Monitor production and troubleshoot production problems
- Check final assembly of electric motors, transformers or control equipment for adherence to quality control standards
- Collect, record and summarize inspection results.

Employment requirements

- Completion of secondary school is usually required.
- College courses in electricity or electro-technology may be required.
- Several years of on-the-job training are usually provided.
- Set-up persons, inspectors and leadhands in this unit group may require experience as an assembler, fitter or wirer in the same company.

Additional information

- Progression to supervisory positions is possible with experience.

9526 Mechanical assemblers and inspectors

Assemblers in this unit group assemble a wide variety of mechanical products such as trucks, buses, snowmobiles, garden tractors, automotive engines, transmissions, outboard motors, gearboxes, hydraulic pumps and sewing machines. Inspectors in this unit group check and inspect subassemblies and finished products to ensure proper quality and product specifications. They are employed by machinery and transportation equipment manufacturers and by other manufacturing companies.

Example titles

automotive engine assembler
garden machinery assembler
gearbox assembler
gearcase assembler
hydraulic hoist assembler
mechanical assembler
sewing machine assembler

snowmobile assembler
tractor assembler
transmission assembler
truck assembler
truck assembly inspector
truck trailer assembler
vending machine assembler

Main duties

Assemblers in this unit group perform some or all of the following duties:

- Assemble, fit and install prefabricated parts to form subassemblies or finish products using hand and power tools
- Position, align and adjust parts for proper fit and assembly and connect cables, tubes and wires
- Fasten parts together using bolting and riveting equipment or other fastening and joining techniques
- Operate or tend automated assembling equipment, such as robotics and fixed automation equipment
- Operate small cranes to transport or position larger parts as required.

Inspectors in this unit group perform some or all of the following duties:

- Check subassemblies and inspect finished products for proper quality
- Check mechanical assemblies and subassemblies for alignment and proper functioning
- Test and check electrical assemblies and wiring for proper connections
- Perform minor adjustments and repairs.

Employment requirements

- Some secondary school education is required.
- Up to two years of on-the-job training are provided.
- Experience as a mechanical assembler may be required for inspectors in this unit group.

Additional information

- There is little or no mobility among the various assemblers and inspectors in this unit group.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Aircraft assemblers and aircraft assembly inspectors (9521)*
- Industrial machinery, heavy equipment and aircraft engine assemblers (in 7316 *Machine fitters*)

9527 Machine operators and inspectors, electrical apparatus manufacturing

Machine operators in this unit group operate machinery or equipment to fabricate complete products or parts for use in the assembly of electrical appliances and equipment, and electrical apparatus, such as batteries, fuses and plugs. Inspectors in this unit group inspect and test completed parts and production items. Workers in this unit group are employed by electrical appliance and electrical equipment manufacturing companies.

Example titles

assembly machine setter – electrical equipment manufacturing

dry cell charge machine operator

epoxy coating machine operator

inspector, electrical dry battery

inspector, electrical light bulbs

machine operator – electrical equipment manufacturing

machine set-up operator – electrical appliance manufacturing

production line battery repairer – electrical equipment manufacturing

Main duties

Machine operators in this unit group perform some or all of the following duties:

- Operate machinery to assemble, test or package dry cell batteries
- Position lead acid storage batteries on assembly line and insert battery contents into casing
- Operate machinery, such as pasting and stacking machines, to fabricate plates for lead acid storage batteries
- Load machinery with glass tubes, bulbs and other parts used to produce incandescent, fluorescent and other types of light bulbs and tubes, and remove and pack finished product
- Operate or feed machinery and equipment to produce electrical wiring devices such as fuses, plugs, caps, sockets, connectors and switches
- Operate equipment to apply protective coatings to items such as freezer cabinets, small electric motors or transformer assemblies
- Perform minor repairs to items rejected from production line
- Set up and adjust production machinery and equipment for operation.

Inspectors and testers in this unit group perform some or all of the following duties:

- Check in-process and completed production items for visual or mechanical defects or operate testing equipment to maintain quality of products
- Identify and mark acceptable and defective assemblies and return faulty assemblies to production for repair
- Collect, record and summarize inspection results.

Employment requirements

- Some secondary school education is usually required.
- On-the-job training is provided.
- Inspectors may require experience as an assembler in the same company.

Additional information

- With experience, machine operators may progress to inspecting and testing positions.
- Progression to supervisory positions is possible with experience.

9531 Boat assemblers and inspectors

Boat assemblers assemble wooden, fibreglass and metal boats, such as sailboats, motorboats, canoes and cabin cruisers. Boat inspectors check assembled boats to ensure proper product quality. They are employed by boat and marine craft manufacturing companies.

Example titles

aluminum boat assembler
boat assembler
boat inspector
canoe assembler

fibreglass boat assembler
motorboat assembler
sailboat assembler

Main duties

Boat assemblers perform some or all of the following duties:

- Cut, shape and join timber pieces or assemble pre-cut timber pieces to make a wooden boat using hand and power tools
- Assemble prefabricated parts and sections of fibreglass, metal or other material to form complete boat
- Caulk decks and hulls using caulking gun
- Install trims, rudders, seats, engine mounts and other accessories using hand tools
- May repair boats.

Boat inspectors perform some or all of the following duties:

- Inspect assembled boats for defects and conformance to quality standards
- Mark defects to be repaired
- Make minor adjustments and repairs
- Record information on products inspected.

Employment requirements

- Some secondary school education may be required.
- Completion of college or other courses in boat building may be required.
- On-the-job training is provided.
- Experience as a helper or labourer in the same company may be required for boat assemblers.
- Experience as a boat assembler may be required for boat inspectors.

Additional information

- Progression to supervisory positions is possible with experience.

Classified elsewhere

- Builders of customized wooden boats and wooden shipwrights (in *7271 Carpenters*)
- Canoe builders (in *5244 Artisans and craftspersons*)

- Workers who fabricate, assemble and fit steel and other metal components to build ships (in *7235 Structural metal and platework fabricators and fitters*)

9532 Furniture and fixture assemblers and inspectors

Assemblers in this unit group assemble parts to form subassemblies or complete articles of furniture and fixtures. Inspectors in this unit group inspect furniture and fixture subassemblies and finished products to ensure product quality. They are employed by furniture manufacturing companies.

Example titles

assembly inspector – furniture manufacturing
chair assembler
desk assembler
fixture assembler
furniture assembler

furniture inspector
metal furniture assembler
table assembler
wood furniture assembler

Main duties

Assemblers in this unit group perform some or all of the following duties:

- Prepare, sand and trim wooden furniture and fixture parts using hand and power tools
- Assemble wooden or metal furniture and fixture parts to form subassemblies and complete articles using hand and power tools
- Assemble a combination of parts made of wood, metal, plastic, cane or other materials to form subassemblies or complete furniture articles
- Reinforce assembled furniture and fixtures with dowels or other supports
- Install hardware such as hinges or clasps on furniture and fixtures.

Inspectors in this unit group perform some or all of the following duties:

- Inspect furniture and fixture subassemblies and finished products for conformance to quality standards
- Mark defective parts or products for repair
- Make minor adjustments and repairs
- Record information on products inspected.

Employment requirements

- Some secondary school education may be required.
- On-the-job training is provided.
- Experience as a labourer in the same company may be required.

Additional information

- Mobility is possible between jobs in this unit group.
- Progression to supervisory positions is possible with experience.

9533 Other wood products assemblers and inspectors

Assemblers in this unit group assemble a variety of wood products and millwork, such as window sashes and doors. Inspectors in this unit group inspect wood products to ensure product quality. They are employed by establishments engaged in manufacturing a variety of wood and millwork products.

Example titles

bench assembler, wood products
crate builder, wood
manufactured housing production worker
millwork assembler
pallet maker, wood
prefabricated housing assembler

sash and door inspector
wooden box assembler
wooden door maker
wood products assembler
wood products assembling inspector

Main duties

Assemblers in this unit group perform some or all of the following duties:

- Read production orders and diagrams
- Trim and sand joints, moulding, or other wooden parts to be assembled using hand and power tools
- Assemble wood products such as window sashes, doors, boxes, pallets, ladders and barrels using glue, staples, screws, bolts or other fasteners
- Assemble door panels, trusses, modular components and other parts on assembly line to make prefabricated housing using jigs, overhead cranes and hand and power tools
- Reinforce assembled products with dowelling or other supports, and install hardware such as knobs and hinges
- May assist with maintenance of machinery.

Inspectors in this unit group perform some or all of the following duties:

- Inspect wood products for conformance to quality standards
- Mark defective parts or products for repair
- Make minor adjustments and repairs
- Record information on products inspected.

Employment requirements

- Some secondary school education may be required.
- Experience as a labourer in the same company may be required.
- Inspectors may require related assembly experience.
- On-the-job training is provided.

9534 Furniture finishers and refinishers

Furniture finishers finish new wood or metal furniture to specified colour and finish. They are employed in furniture manufacturing plants, retail furniture stores or refinishing and repair shops. Furniture refinishers refinish repaired, used or old furniture. They are employed in furniture refinishing and repair shops or they may be self-employed.

Example titles

finishing machine operator – furniture
manufacturing
furniture finisher
furniture refinisher
furniture stainer
furniture stripper

polisher, furniture – furniture finishing
touch-up person – furniture finishing
trimmer – furniture finishing
wash-off operator – furniture finishing
wood finisher – furniture finishing and refinishing

Main duties

Furniture finishers perform some or all of the following duties:

- Set up and operate finishing machines or finish furniture by hand
- Stain or finish wood to specified colour with stains, paints or other materials using brush or spray gun
- Apply toners, highlights, glazes or shaders to obtain desired finish
- Apply lacquer or other sealers
- Decorate wood surfaces or mark surfaces to create antique or other effects using hand and power tools
- Clean and polish furniture
- Sand metal furniture to prepare for finish and spray with paint or other materials.

Furniture refinishers perform some or all of the following duties:

- Strip old finish from wood surfaces using steel wool, sandpaper and solvents
- Smooth gouges with wood filler and sand wood
- Match colours to obtain original finish and apply appropriate finish to stripped wood
- Polish and wax refinished surfaces
- Sand or grind metal surfaces to prepare for coating, and paint metal surfaces using electrostatic method, spray gun or other painting equipment
- Make minor repairs to furniture
- May perform duties of furniture finisher.

Employment requirements

- Some secondary school education is required.

- College, high school or industry courses in furniture finishing or refinishing may be required.
- On-the-job training is provided.

Classified elsewhere

- *Painters and decorators (except interior decorators)* (7294)
- *Upholsterers* (6345)

9535 Plastic products assemblers, finishers and inspectors

This unit group includes workers who assemble, finish and inspect plastic parts and finished products. They are employed by plastic products manufacturing companies and plastic parts divisions of aircraft or other manufacturing companies.

Example titles

fibreglass laminator
plastic bottle trimmer
plastic parts assembler
plastic products fabricator
plastic products inspector and tester
plastics assembler

plastics inspector
plastics trimmer
plastic tank assembler
skylight assembler – plastic products
manufacturing

Main duties

Plastic products assemblers and finishers perform some or all of the following duties:

- Operate machines or equipment, or use hand tools to cut, shape, splice and fit plastic materials to form parts and assemblies
- Assemble composite materials on patterns to form parts and assemblies using bonding agents
- Operate spray-gun unit to apply resin mixtures to metal or wooden mould to form plastic products
- Load and operate autoclave oven to cure and bond plastic and composite parts and subassemblies
- Operate finishing equipment to trim, grind or buff plastic products into final form.

Plastic products inspectors perform some or all of the following duties:

- Inspect manufactured plastic products for defects and conformance to specifications and quality standards, visually or using instruments
- Affix seals or tags to approved plastic products and mark and reroute defective products for repair or recycle
- Prepare reports on products inspected
- Make minor adjustments and repairs to products
- May train or assist in training new workers.

Employment requirements

- Some secondary school education is usually required.
- Experience as a labourer in the same company may be required for assemblers, finishers and inspectors.
- On-the-job training is provided.

Additional information

- Mobility among the various workers in this unit group is possible.
- Progression to supervisory positions is possible with experience.

Classified elsewhere

- *Labourers in rubber and plastic products manufacturing (9615)*
- *Plastics processing machine operators (9422)*
- *Rubber processing machine operators and related workers (9423)*
- *Supervisors, plastic and rubber products manufacturing (9214)*

9536 Industrial painters, coaters and metal finishing process operators

Industrial painters and coaters operate and tend machines or use brushes and spray equipment to apply paint, enamel, lacquer or other non-metallic protective and decorative coatings to surfaces of various products. Metal finishing process operators operate machines or equipment to deposit metallized substances on workpieces and surfaces to provide decorative, protective and restorative coatings. These workers are employed by manufacturing companies and custom refinishing, coating and plating shops.

Example titles

automatic paint-sprayer operator
automobile painter – motor vehicle manufacturing
aviation painter
ceramic and enamel refinisher
coating machine operator – industrial painting and coating
electrogalvanizing machine operator
enameller – ship and boat building

hot-dip galvanizer – metal plating
industrial products painter
metal coater operator
metal electroplater
painter, assembly line
production painter-finisher
spray paint operator

Main duties

Industrial painters and coaters perform some or all of the following duties:

- Select appropriate paint or mix paints using automated paint mixing equipment according to a pre-determined formula
- Operate or tend equipment to clean, wash, strip, sand, remove corrosion, fill dents or otherwise prepare items for application of paint, lacquer or other protective or decorative coatings
- Operate or tend automated spray paint, dip or flow coating equipment or other mechanized painting or product coating application equipment
- Operate hand-held spray guns to spray paint or coat stationary items or items on moving conveyor system with protective or decorative coatings
- Paint small items and apply touch-ups using paint brushes
- Clean and maintain painting and coating, ventilation, compressed air and personal protective equipment
- May prepare and apply stencils, computer-generated decals or other decorative items on finished products.

Metal finishing process operators perform some or all of the following duties:

- Prepare and mix metallizing solutions according to formulas or specifications

- Operate or tend equipment to clean, degrease, pickle and etch metal and non-metal surfaces to prepare workpieces with desired surface characteristics
- Tend automatic metal coating machines which convey objects through a series of cleaning, rinsing and plating solutions
- Operate and control electroplating equipment to coat metal and other workpieces
- Operate hot-dip metal plating equipment to galvanize metal and other workpieces
- Operate spray equipment to build up worn or damaged parts or to bond protective or decorative coatings on various objects
- Check proper thickness of plating using micrometers, calipers or other devices
- May operate equipment to polish metallic surfaces of products
- May tend ovens which cure metal coating.

Employment requirements

- Some secondary school education is usually required.
- Some experience in operating production machinery or equipment may be required.
- Several months of on-the-job training are usually provided.
- Some industrial painters, such as aviation painters, may require specialized training and certification or college courses.

Additional information

- Progression to supervisory positions is possible with experience.

9537 Other products assemblers, finishers and inspectors

This unit group includes assemblers, finishers and inspectors, not elsewhere classified, who assemble, finish and inspect components or products of various materials, such as jewellery, silverware, buttons, pencils, non-prescription lenses, brushes, clocks and watches, musical instruments, sporting goods, toys and other miscellaneous products. They are employed by a wide variety of manufacturing companies.

Example titles

antenna assembler
bicycle assembler
brush making machine operator
button machine operator
camera assembly inspector
crayon making machine tender
eyeglass frame assembler
golf club assembler
jewellery annealer
jewellery inspector

lampshade assembler
piano assembly inspector
prism maker operator
skate press operator
sports ball moulder
stuffing machine tender
tennis ball maker operator
toy inspector
Venetian blind assembler
watch assembler

Main duties

Assemblers and finishers in this unit group perform some or all of the following duties:

- Operate machines or use hand tools to cut, shape and fit materials to form parts and to fabricate components or products
- Load supplies into hoppers of dispensing units or manually align, feed or otherwise place materials into machines
- Screw, clip, glue, bond, weld or otherwise assemble parts and components to form final products
- Sand, trim, grind or clean products into final form using hand tools
- Clean work stations and remove scraps, dust, shavings or other by-products from machinery and surrounding areas
- May make routine changes of dies, nozzles or other machinery attachments as required.

Inspectors in this unit group perform some or all of the following duties:

- Check manufactured items for defects and for conformance to specifications, visually or using sample models and instruments
- Affix seals or tags to approved items and return defective products for repair or recycle
- Complete reports on product inspection.

Employment requirements

- Some secondary school education is usually required.

- Experience as a manufacturing labourer in the same company may be required.
- On-the-job training is provided.

Additional information

- There is little or no mobility among the various assemblers and inspectors in this unit group.
- Progression to supervisory positions is possible with experience.

9611 Labourers in mineral and metal processing

Labourers in this unit group perform material handling, clean-up, packaging and other elemental activities related to mineral ore and metal processing. They are employed in mineral ore and metal processing plants such as copper, lead and zinc refineries, uranium processing plants, steel mills, aluminum plants, precious metal refineries, cement processing plants, clay, glass and stone processing plants and foundries.

Example titles

asbestos worker – mineral processing

brick and tile kiln cleaner

core shop labourer – foundry

extrusion helper – primary metal processing

furnace loader – primary metal and mineral products processing

glass packer

helper, fibreglass oven charger

lime kiln operator helper – mineral products processing

metal pourer helper

rolling mill worker – primary metal processing

salt screening labourer

tailings disposal labourer – primary metal processing

Main duties

Labourers in mineral and metal processing perform some or all of the following duties:

- Transport raw materials, finished products, scrap and recyclable materials throughout plant manually or using forklift or other powered equipment
- Feed conveyors, crushers and other equipment; open valves and start pumps; skim dross from furnaces; sort, stack, bundle and stamp materials; and perform other activities to assist process and machine operators in mineral ore and metal processing
- Clean work areas and equipment
- May assist with minor repairs and maintenance.

Employment requirements

- Completion of secondary school may be required for some positions in this group.

Additional information

- Progression to machine and process operator positions is possible with experience.

Classified elsewhere

- *Machine operators and related workers in mineral and metal products processing and manufacturing* (941)
- *Supervisors, mineral and metal processing* (9211)

9612 Labourers in metal fabrication

Labourers in this unit group remove excess metal and unwanted materials from metal parts, castings and other metal products and perform other labouring activities. They are employed in structural steel, boiler and platework fabrication plants, heavy machinery manufacturing plants, sheet metal fabrication shops, shipbuilding and other metal products manufacturing companies.

Example titles

blacksmith helper	metalworking machine helper
buffing machine tender – metal products manufacturing	plater helper – metal fabrication
grinder-deburrer	shipfitter helper
labourer – metal fabrication	shotblaster – metal fabrication
metal cleaner – metal products manufacturing	wheelabrator operator – metal products manufacturing

Main duties

Labourers in this unit group perform some or all of the following duties:

- Read and interpret work orders
- Operate metal cleaning equipment such as wheelabrators, deburrers and shotblasters to remove excess welds, rust, scale and other material from surfaces of metal parts, castings and other metal products
- Polish metal products to mirror finish
- Immerse metal products in cleaning solutions
- Assist structural steel and platework fitters, sheet metal workers, metalworking machine operators or other metal workers
- Transport raw materials and finished metal products manually or using hoists or other devices
- Sort metal sheets and parts, scrap metal and other materials
- Clean work areas and equipment
- Load and unload vehicles using hand truck or dolly
- May cut, grind or chip excess metal from metal products using hand tools.

Employment requirements

- Some secondary school education may be required.

Additional information

- There is some mobility among occupations in this unit group.
- Progression to metalworking machine operator positions is possible with experience.

Classified elsewhere

- *Labourers in mineral and metal processing (9611)*

9613 Labourers in chemical products processing and utilities

Labourers in this unit group carry out a variety of material handling, cleaning and routine general labouring activities. They are employed by petroleum and natural gas processing, pipeline and petrochemical, chemical and pharmaceutical companies, and by electrical, water and waste treatment utilities and services.

Example titles

cleaner, filter – chemical processing
cleaner, still – chemical processing
coating machine feeder – chemical processing
helper – chemical processing
labourer – gas utility

loader – chemical processing
retort unloader
water intake tender
waterworks labourer

Main duties

Labourers in this unit group perform some or all of the following duties:

- Feed and unload production machinery and equipment
- Clean chemical processing machines and equipment and production areas
- Move, sort and pile materials and products manually and using powered equipment
- Assist other workers to operate, repair and maintain process equipment, gas distribution, water filtration and waste plant equipment
- Perform general duties such as basic construction, painting and other manual tasks.

Employment requirements

- Completion of secondary school may be required.

Additional information

- Considerable mobility is possible among jobs in this unit group.
- Progression to operator positions in the chemical or utility industry is possible with experience and appropriate qualifications.

Classified elsewhere

- *Chemical plant machine operators* (9421)
- *Petroleum, gas and chemical process operators* (9232)
- *Supervisors, petroleum, gas and chemical processing and utilities* (9212)
- *Water and waste treatment plant operators* (9243)
- *Waterworks and gas maintenance workers* (7442)

9614 Labourers in wood, pulp and paper processing

Labourers in this unit group carry out a variety of general labouring and routine wood processing activities and assist pulp mill and papermaking machine operators. They are employed by pulp and paper, and paper converting companies, sawmills, planing mills, wood treatment plants, waferboard plants and other wood processing companies.

Example titles

beater operator helper – pulp and paper
chip bin attendant – wood processing
conveyor cleaner – pulp and paper
green wood chainman/woman – wood processing
grinder feeder – pulp and paper
labourer – pulp and paper

labourer – wood processing
lumber straightener – wood processing
plywood dryer feeder
sheeter helper – pulp and paper
utility man/woman – pulp and paper

Main duties

Labourers in this unit group perform some or all of the following duties:

- Feed logs onto conveyor and into hopper of grinding machine and align logs manually, using crowbar, picaroon or other tools and equipment
- Load wood chips, pulpwood, sulphur and other processing materials onto conveyors or processing tanks, remove recyclable paper and pulp from pulp and papermaking machines and transport recyclable paper and pulp to plant processing machines and equipment using forklift or other powered equipment
- Sort, pile and transport lumber, veneer sheets, panelboards and similar wood products during various stages of wood processing, manually or with powered equipment
- Remove scrap lumber and wood chips for reprocessing using forklift or other powered equipment
- Feed conveyors, saws, drying machines and other equipment to process lumber, shingles, veneer, plywood and similar wood products
- Clean wood processing machines and equipment and work areas using shovels, hoses and other tools
- Assist other wood processing workers to operate, maintain and repair various machines and equipment and carry out other wood processing activities.

Employment requirements

- Completion of secondary school is required by the pulp and paper industry and by other large employers.

Additional information

- There is considerable mobility among jobs within individual establishments.
- Progression to machine or plant operating positions is possible with experience.

Classified elsewhere
